(3) Documentation showing that the pesticide is being stored in a storage facility meeting all applicable storage requirements. If additional storage facilities were used or the pesticide was moved from one storage facility to another, the names and addresses of the additional storage facilities must be maintained.

(4) Records of receipt of the pesticide at the storage facility. These records shall be maintained at the storage facility.

(c) A copy of the records listed in paragraphs (a)(2) through (a)(8) of this section must be forwarded by the recaller to the registrant whose suspended and canceled pesticide was recalled, after the recaller has fulfilled his responsibilities under the mandatory recall rule and the recall plan. The registrant is responsible for collating and maintaining these records.

(d) The registrant shall maintain records at a central location for a period of 3 years following completion of the recall and make the records available for inspection or submission to EPA or its designated representative upon request.

§ 165.194 Reporting.

(a) Within 10 days after the effective date for initiation of the recall, registrants must report to EPA, in writing:

(1) The name, address and telephone number of the person responsible for conducting the recall.

(2) Where records will be stored.

(3) Where recalled pesticides will be stored as well as suspended and canceled pesticides owned by the registrant.

(b) Within 10 days after receipt of the recall plan, all other recallers must report to EPA:

(1) The name, address and telephone number of the person responsible for conducting the recall.

(2) Where recalled pesticides will be stored, if the recaller chooses to store the recalled pesticides himself.

(c) Persons responsible for conducting the recall must report to the registrant, in writing, no later than 3 months after the effective date for initiation of the recall:

(1) The total number of potential holders of the suspended and canceled pesticide.

(2) The number of potential holders contacted to date.

(3) The number of persons who are known to be holders of the pesticide.

(4) For each holder, the information required by § 165.190(e).

(5) The total amount of pesticide identified as subject to recall.

(6) The total amount of pesticide transferred to date to a designated storage facility.

(d) The registrant must report to EPA, in writing, the information received pursuant to paragraph (c) of this section within 15 working days of the 3 month deadline. The registrant must also report the total amount of the suspended and canceled pesticide owned by him.

(e) Within 10 days of transferring custody to the registrant of all suspended and canceled pesticides identified and recalled by the recaller, the recaller will provide a copy of the records described in § 165.192(a)(2) through (a)(8) to the registrant.

(f) Within 30 days of completion of the recall, i.e., transfer of all identified stocks of the suspended and canceled pesticide to the custody of the registrant or final disposal of all identified stocks; the registrant must submit a final report to EPA, in writing, on the outcome of the recall action. The final report will consist of:

(1) For each former holder, the information required by § 165.190(e)(1) and (2), and when the pesticide was transferred to the recaller's custody.

(2) If the holder has not offered the pesticide for recall, documentation of the refusal.

(3) The location of the storage facility where the pesticide was or is being held.

(4) The management options chosen by the registrant for the recalled material or, if the recalled material has been disposed of, the method of disposal, if known.

(g) Reports must be submitted to the following address unless otherwise directed by EPA in the final mandatory recall rule: Director, Compliance Division, Office of Compliance Monitoring (EN-342), U. S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

§ 165.196 Enforcement.

The Administrator may take action, under FIFRA sections 13 and 14, including seeking civil penalties of up to $5,000 per offense, and criminal penalties of up to $50,000 and/or 1 year imprisonment per offense, or seek injunctive relief under section 16(c) of FIFRA, against any registrant, distributor, or seller of a pesticide subject to a mandatory recall, or any successor in interest to such a person, who has failed substantially to comply with the terms of a mandatory recall as required by this subpart and any rule issued under § 165.188. Additionally, failure to comply with the terms of a rule issued under § 165.188 may be a violation of FIFRA sections 12(a)(2)(B), 12(a)(2)(M), 12(a)(2)(N) or 12(a)(2)(S) depending on the offense and subject to the penalties noted above.

§ 165.198 Pesticides subject to mandatory recall. [Reserved]

Subpart K—Storage And Disposal Plans; Reimbursement Of Storage Costs

§ 165.200 Scope and applicability.

(a) *Scope.* This subpart describes the criteria that the Agency will use in evaluating a storage and disposal plan submitted under FIFRA section 19(c)(1). Such a plan must be submitted by a registrant who seeks reimbursement of storage costs for a pesticide that has been recalled under FIFRA section 19(b). In addition, this subpart sets out the procedures for submitting claims for reimbursement of storage costs incurred as a result of a recall.

(b) *Applicability.* This subpart applies only to registrants seeking reimbursement of storage costs for pesticides recalled under section 19(b) of FIFRA. This subpart does not apply to any registrant who conducts a recall of a pesticide not ordered or required by the Administrator under section 19(b), regardless of whether the registration has been suspended or not. No registrant is required to submit a storage and disposal plan under this subpart. However, if a registrant wishes to be reimbursed for storage costs incurred as a result of the recall under section 19(b), the registrant must submit a storage and disposal plan, and comply with the provisions of this subpart in so doing.

§ 165.203 Definitions.

Terms used in this subpart shall have the meanings set forth in the Act. In addition, the following terms are defined for the purposes of this subpart.

Fifty percent reimbursement period. Means a 1-year period beginning on the later of:

(1) The date of approval of a storage and disposal plan by the Agency; or

(2) The date of cancellation of the pesticide.

Management options. Means the methods to manage the pesticide after it has been recalled, including (but not limited to) legal pesticide and non-pesticide use, recycling (e.g., recovery), treatment (e.g., neutralization, deactivation of the active ingredient, degradation), burning for energy or materials recovery, and disposal.

One hundred percent reimbursement period. Means that period of time beginning on the later of:

(1) The date of submission of an acceptable storage and disposal plan; or

(2) The date of cancellation of the pesticide, if it occurs before approval of the plan. In either case, the 100% period ends on the date of approval or conditional approval, if appropriate, of the plan by the Agency. The term does not include any period of time culminating in the disapproval of a storage and disposal plan by the Agency.

Twenty-five percent reimbursement period. Means the period of time beginning on the first day of the fourth year after the end of the 50-percent reimbursement period, and ending on the date that a disposal permit is issued by any State, or an alternative plan for disposal has been developed.

§ 165.205 Submission of storage and disposal plan.

(a) *Who must submit a plan.* Registrants who wish to be eligible for reimbursement of storage costs incurred as a result of a recall must submit a storage and disposal plan to the Agency that meets the criteria set forth in these regulations.

(b) *Where to submit the plan.* In order to be eligible for reimbursement, the registrant must submit the storage and disposal plan to: Office of Pesticide Programs (H7507C), Attention: Storage and Disposal Plans, U. S. Environmental Protection Agency, 401 M St., SW., Washington DC 20460.

(c) *When to submit a storage and disposal plan.* A storage and disposal plan must be submitted no later than:

(1) The date the voluntary recall plan is required to be submitted as set forth in § 166.165; or

(2) If EPA does not require submission of a voluntary recall plan under section 19(b)(2) of FIFRA or if the registrant fails to submit a recall plan that is approved under § 165.170, 60 days after publication in the **Federal Register** of a proposed rule prescribing mandatory recall.

§ 165.207 Criteria for the evaluation of storage and disposal plans.

The following criteria will be used to evaluate whether a storage and disposal plan is acceptable:

(a) *Storage in compliance with applicable law.* The plan must provide sufficient information for the Agency to be able to determine that the registrant is taking steps to assure that storage will be in compliance with applicable law.

(b) *Adequate discussion of management options.* The plan must show that the registrant is taking or will take appropriate steps for managing the recalled pesticides. The plan shall discuss all available management options and evaluate their feasibility, costs, and risks and benefits.

(c) *Completeness of the plan.* The plan must adequately address each item in § 165.208. For example, if the information provided in addressing one item contradicts other information in the plan, the plan would not have adequately addressed each item.

(d) *Signature.* The plan must be signed by the registrant or his authorized representative.

§ 165.208 Contents of storage and disposal plans.

The Storage and Disposal Plan must include each of the following elements:

(a) *Storage.* The plan must describe the steps the registrant will take to assure that the recalled pesticides will be stored in accordance with applicable law. Additionally, if the pesticides have particular characteristics that require specific storage conditions, the discussion must include such information.

(b) *Recall.* The plan must include a statement describing the current status of the recall, for example, whether the registrant has started recall procedures, and, if so, how much has been accomplished to date.

(c) *Identification of persons responsible for storage and disposal.* The storage and disposal plan must identify the primary contact person(s) within the registrant's company who will be responsible for carrying out the storage and disposal plan. The registrant must inform the Agency within 10 days, at the address listed in § 165.205(b), of any contact person(s) changes.

(d) *Description of pesticides to be stored.* The storage and disposal plan must describe the stocks of the suspended and canceled pesticides as follows:

(1) *For registrant's own inventory.* Provide the formulation types, container types and sizes, and the quantities of each being stored.

(2) *For the pesticides recalled from others.* Provide estimates of the formulation types, container sizes and types, and the quantities of each expected to be recalled. Estimates will not be acceptable if the registrant has completed the recall; the storage and disposal plan must then provide the actual information.

(e) *Storage facilities.* The storage and disposal plan must include:

(1) The location of the facility(ies) where the registrant's own inventory of suspended and canceled pesticides is being stored, and the name of the owner of the storage facility.

(2) For each storage facility to be used or anticipated to be used for storage of recalled pesticides, the following information must be included.

(i) The location of the storage facility and the name of the owner of the storage facility;

(ii) The available storage capacity either in pounds, and/or gallons. The registrant must indicate whether the total capacity is sufficient to handle the amount of pesticide that the registrant expects to recall. If the storage capacity available to the registrant at the time of submission of the plan is insufficient for the amount of recalled pesticides estimated, the registrant must describe the steps being undertaken or that will be undertaken to locate additional adequate storage.

(3) An estimated annual storage cost for the recalled pesticides and the basis for calculating such costs.

(4) If the storage facility(ies) is owned or leased by the registrant, the actions the registrant will take to assure effective supervision of the storage of recalled pesticides.

VOL 58 ISS 85 MY 5 1993 UMI

(5) If the storage facility(ies) for recalled pesticides are owned or leased by someone other than the registrant, the steps the registrant will take to assure effective control and supervision of the storage operation by that other person.

(f) *Management options.* The storage and disposal plan shall contain a full and complete discussion of management options of the recalled pesticide and the containers. The plan must discuss all available options (i.e., recycling, reclamation, lawful use of the recalled pesticides, as well as disposal) and evaluate their feasibility, cost, and risks and benefits. The plan must also estimate the quantities of pesticides which will be managed by each option and a timeframe for completing the option. If the options for management of the suspended and canceled pesticides are not known, the plan must describe a timeframe and the steps the registrant will take to identify management options.

(g) *Records retention.* The storage and disposal plan must list the location where records required by § 165.218 will be stored. Records must be retained by the registrant at the same central location for both the registrant's own inventory and recalled pesticides.

§ 165.210 Agency action.

(a) *Notification of receipt of the plan.* EPA will acknowledge the date of receipt of a storage and disposal plan by sending a notification to the registrant. Except as provided by paragraph (c) of this section, the 100 percent reimbursement period of storage costs begins on the date of receipt of the storage and disposal plan by the Agency.

(b) *Approval of storage and disposal plans.* The Agency will evaluate the storage and disposal plan according to the criteria in § 165.207. If the Agency determines that the plan is acceptable, it will approve the plan. The Agency will notify the registrant of the date of approval of the plan, and such date establishes the end of the 100-percent reimbursement period. The Agency may send to the registrant the acknowledgement of the date of receipt of the plan and the notification of approval at the same time.

(c) *Rejection of storage and disposal plans.* (1) A plan will be rejected as unacceptable if:

(i) The plan does not provide a scheme for safe storage and safe, practicable management of the recalled pesticides. For example, if the contents of the plan indicate the registrant would not be storing pesticides in compliance with applicable law.

(ii) The plan does not adequately address each element of the contents of a storage and disposal plan, as set forth in § 165.208.

(iii) The plan has not been signed by the registrant or by the registrant's authorized representative.

(iv) The plan is not submitted within the timeframes provided in § 165.205(c), unless the registrant can show extenuating circumstances that caused untimely submission of the plan.

(2) If EPA rejects a plan, EPA will return the plan to the registrant within 45 days of receipt of the plan, along with an explanation of why the plan is not acceptable. Such notification will describe the steps that must be taken for the plan to be approved. The 100-percent reimbursement period will not begin until the Agency receives a revised plan which is acceptable and subsequently approved.

(3) If EPA fails to reject a plan within 45 days of receipt of the plan, and upon review finds the plan unacceptable under paragraph (c)(1) of this section, then EPA will notify the registrant that the plan will be considered conditionally approved pending timely revision of the plan. Such notification will include the date of conditional approval and explain the steps that must be taken for the plan to be finally approved.

(4) If EPA finds at any time that a registrant submitted materially false or misleading information in the plan the Agency will reject the plan and take any other appropriate action.

(d) *Conditional approval.* (1) The Agency may conditionally approve a plan with minor errors. If this is the case, the Agency will notify the registrant of the conditional approval and the minor errors in the plan, and require that the errors be corrected and the plan be resubmitted. The following are examples of errors that could result in conditional approval:

(i) Typographical errors that cause the information submitted to be misleading or unclear.

(ii) Minor technical errors, such as misstatement of the name of the formulation.

(iii) Ambiguous information such that the meaning of a statement is not clear.

(2) The notification will include the date of conditional approval subject to resubmission and subsequent approval of the corrected plan.

(3) If the registrant fails to submit a corrected plan within 30 days of receipt of the notification, the Agency will consider the plan unacceptable and notify the registrant that the conditional approval has been rescinded and that the plan is rejected. In such situations, the 100-percent reimbursement period will not begin until EPA receives a corrected plan.

(4) If the registrant submits a corrected plan within 30 days of the notification, the date of conditional approval establishes the end of the 100-percent reimbursement period.

(e) *Modifications.* Upon written request by EPA, the registrant must modify the plan or submit additional information.

§ 165.212 Reimbursement of storage costs.

The Agency will reimburse only those costs which are reasonable and necessary and consistent with the approved storage and disposal plan. For purposes of this section, reasonable and necessary storage costs are those costs directly attributable to storage of the pesticides recalled under section 19(b) of the Act. Storage costs do not include indirect costs such as costs for acquiring permits, transportation of pesticides to or between storage facilities, transportation costs incurred as part of the recall, repackaging costs, cleanup of spills, structural expansion, or remediation of site contamination. The claimant has the burden to establish and support the reasonableness and necessity of all costs claimed. Storage costs for registrant's inventory of suspended and canceled pesticides are not reimbursable as they are not recalled pesticides under section 19 of the Act.

§ 165.214 Procedures for submission of storage cost reimbursement claims.

(a) *General.* Any registrant who seeks reimbursement of costs incurred in accordance with an approved storage and disposal plan, must file a claim with the Agency. Only the registrant may seek reimbursement. Claims from other persons will not be accepted. Reasonable and necessary storage costs, which are consistent with the approved plan, will be allowed.

(b) *Claim form.* The registrant must submit the claim on a claim form provided by the Agency.

(c) *Current storage and disposal plan.* The registrant must submit an updated storage and disposal plan and any modifications requested by the Agency under § 165.210 to accompany its reimbursement claim. This updated plan must provide current information on all the elements of a plan listed in § 165.208. All estimates must be replaced with exact information. Under management options (§ 165.208(f)), the registrant must provide information on types and amounts of recalled pesticides that have been lawfully sold, disposed of, or handled by other management

options. If the registrant has not disposed of any of the recalled pesticides, the registrant must describe the progress it has made in developing options for management. A reimbursement claim without an updated plan containing all the foregoing information will be rejected.

(d) *Proof of quantities of recalled pesticides.* The registrant must submit evidence showing that quantities claimed in storage were received and stored at the storage facility and the period of time for which they were stored. At a minimum, such documentation must include copies of manifests or other business records showing date of receipt, number of containers, and amount of recalled pesticides at each facility. If the documentation covers both recalled pesticides and the registrant's own inventory at the same facility, the registrant must clearly establish which portion of the total amount is recalled pesticides and which is the registrant's own inventory. The Agency will only reimburse the registrant for the storage costs of recalled pesticides.

(e) *Proof of storage costs.* The registrant must fully document the reasonableness and necessity of the claimed storage costs. Copies of lease or rental payments must be included and must be itemized so that all charges included in the payment are shown. If there is no lease or rental payment, business records must be provided which itemize costs. If the recalled pesticides only occupy a part of the total capacity of the storage facility, the costs submitted in the claim must be prorated to reflect the actual costs of storing the recalled pesticides.

(f) *Right to inspect.* The Agency retains the right to inspect all records and data supporting the claimed storage costs. To the extent that the registrant contracts with a third party for storage, the registrant must ensure that the government has complete access to all records and data maintained by the third party which supports the claimed storage costs.

(g) *Confidential business information.* (1) A registrant may assert a claim of confidential business information for information submitted through the claim form, in the manner described in 40 CFR 2.203. Claimants must substantiate all claims of confidentiality at the time they assert the confidentiality claim (i.e., when the reimbursement claim is filed). Claimants substantiate confidentiality claims by providing comments on the following:

(i) The period of time for which confidential treatment is desired.

(ii) Whether disclosure of the information is likely to result in substantial harmful effects to the competitive position of the business and if so, what those harmful effects would be, why they should be viewed as substantial, and an explanation of the causal relationship between disclosure and such harmful effects.

(iii) Measures taken by the business to guard against undesired disclosure of information to others.

(iv) The extent to which the information has been disclosed to others, and the precautions taken in connection therewith.

(v) Pertinent confidentiality determinations, if any, by EPA or other federal agencies, and a copy of such determination, if available.

(vi) Whether claimant asserts that the information is voluntarily submitted information under 40 CFR 2.201(i), and if so, whether and why disclosure of the information would tend to lessen the availability to EPA of similar information in the future.

(2) The information covered by the claim of confidentiality will be disclosed by the Agency only to the extent allowed by section 10 of the Act, and by means of the procedures set forth in 40 CFR part 2. If no claim of confidentiality is made at the time the reimbursement claim is submitted to the Agency, the information in the claim for reimbursement may be made available to the public by the Agency without further notice to the registrant (See 40 CFR 2.203(a)(2)). If a confidentiality claim is made but no supporting documentation received, the reimbursement claim will be considered incomplete and returned to the submitter.

(h) *Certification of claim.* At the time of submission of a claim, the registrant or his authorized representative must sign the claim form, certifying that:

(1) All statements made and information provided in the claim are true and correct to the best of registrant's knowledge.

(2) Acceptance by the registrant of any payment made by the Federal Government constitutes full satisfaction and final settlement of the claim.

(3) By submission of the claim, the registrant grants permission to authorized agents/designated representatives of the Federal Government to enter premises where records or pesticides are stored and to conduct inspections, audits, and/or examinations determined by the Government to be necessary to verify contents of the claim.

(4) For any recalled pesticide stored or being stored, the registrant has complied with the requirements of all applicable laws and regulations governing such storage.

(i) *When claims may be filed.* (1) The registrant must submit a separate claim for storage costs incurred for each reimbursement period.

(2) Each separate claim for storage costs incurred may be submitted only after the expiration of the appropriate period. For example, a claim for costs incurred during the 50-percent reimbursement period may be submitted only after the end of the 1-year period that circumscribes the 50-percent reimbursement period.

(3) If the registrant continues to store the pesticide into the 25-percent reimbursement period, he may submit an initial claim for reimbursement no earlier than 1 year after the beginning of the 25-percent reimbursement period. Thereafter, he may submit subsequent claims for 25-percent reimbursement annually until the reimbursement period ends.

(4) At the end of the 25-percent reimbursement period, the registrant may submit a final claim.

(j) *Where to file.* The registrant must submit the reimbursement claim to: Office of Pesticide Programs (H7507C), Attention: Storage and Disposal Plans, U. S. Environmental Protection Agency, 401 M St., SW., Washington DC 20460.

§ 165.216 Additional requirements for 25-percent reimbursement claims.

(a) A registrant who continues to store recalled pesticides into the 25- percent reimbursement period must provide the Agency, within 30 days after the beginning of the 25-percent reimbursement period, the following information:

(1) A description of the steps the registrant has taken to manage the recalled pesticide during the zero percent reimbursement period, documenting the management options considered, and the reasons why such options were not feasible. Acceptable reasons for continued storage might include, but are not limited to, the following:

(i) That the quantities of recalled pesticide temporarily exceed the capacity of the lawful use demand or disposal. The registrant must provide evidence showing that steps are being taken to rectify the situation, including information on the rate of lawful use or disposal, and give an estimate of the time needed.

(ii) If the pesticide would be disposed of as a hazardous waste, evidence that the registrant cannot lawfully dispose of the pesticide and that management options other than disposal are not

VOL 58 ISS 85 MY 5 1993 UMI

reasonably available, or that there are no legal management options.

(2) The quantities of pesticide that have been managed during the zero percent reimbursement period, and the method(s) of management that have been used.

(3) A schedule for managing the remaining pesticides.

(b) Failure to submit the information requested in paragraph (a) of this section within 30 days after the beginning of a 25-percent reimbursement period will result in rejection of a 25-percent reimbursement period claim submitted later.

(c) The Agency presumes that the registrant holding recalled pesticide is able to identify and avail himself of one or more management options during the zero percent reimbursement period. The burden is upon the registrant seeking reimbursement to document and justify the need for continued storage into the 25-percent reimbursement period. If the registrant cannot adequately justify his continued need, the Agency will reject a 25-percent reimbursement claim.

§ 165.217 Final Agency decision.

(a) EPA's determination regarding the amount of storage costs reimbursable will be sent in writing to the registrant. A denial of a storage costs reimbursement claim will also be sent in writing to the registrant and will include a statement of the reason(s) for the denial. In either case, the administrative determination will be final, unless EPA reconsiders its decision as set forth in paragraph (b) of this section.

(b) Upon a timely filing of a request for reconsideration, EPA may reconsider a decision if the registrant establishes that an error was made in the computation of the award, or that evidence or material facts were unavailable to the registrant at the time of filing the claim and that failure to provide the information was not a result of the registrant's lack of care. A registrant seeking reconsideration must file a request within 30 days from the date of EPA's final determination of the claim.

§ 165.218 Recordkeeping.

Any registrant that receives reimbursement must maintain records and data supporting the claim or ensure that records and data are maintained by a third party for 3 years following payment of the claim or final disposition of the pesticides, whichever is later.

Subpart L—Indemnification

§ 165.220 General.

(a) This subpart describes a pesticide owner's entitlement to indemnification for losses suffered by reason of suspension and subsequent cancellation of a pesticide, and establishes procedures for submitting indemnification claims to the Agency.

(b) All claims must be submitted in accordance with the requirements of this subpart and with any additional requirements issued by the Agency at the time of suspension and cancellation of specific pesticides.

§ 165.223 Definitions.

Terms used in this subpart shall have the meanings set forth in the Act. In addition, the following term is defined for the purposes of this subpart.

Special status seller. Means any dealer or distributor who did not receive advance notification of nonreimbursement and who is unable to get reimbursement due to his seller's bankruptcy or insolvency.

§ 165.225 Eligibility criteria.

(a) *Eligible pesticides.* In general, indemnification may be claimed for a pesticide whose registration has been suspended under FIFRA section 6(c) and subsequently canceled under FIFRA sections 6(b), 6(d), or 6(f). Lists of pesticides by registration numbers which are eligible for indemnification will be provided in a separate Notice issued by the Agency and published in the **Federal Register** after suspension and cancellation.

(b) *Eligibility of persons.* (1) A person is eligible to submit a claim for indemnification if:

(i) The person owned any quantity of a pesticide immediately before the date of its suspension under section 6.

(ii) The person suffered losses by reason of suspension and subsequent cancellation of the pesticide's registration under sections 6(b), 6(d) or 6(f).

(2) The right to receive indemnification belongs to the owner of the pesticide at the time of suspension.

(c) *Persons not eligible.* (1) A person is not eligible for indemnification if the Administrator finds that the person had knowledge of facts that, in themselves, would have shown that the pesticide did not meet the requirements for registration, and continued thereafter to produce the pesticide without giving timely notice of such facts to the Administrator.

(2) A person is not eligible for indemnification for stocks of a suspended and canceled pesticide acquired after the pesticide is suspended under section 6(c) even if the pesticides are acquired in a lawful manner for a lawful sale, distribution or use.

(3) A seller who reimburses purchasers as set forth in section 15(b)(2) of the Act cannot seek indemnification for the reimbursement.

(4) A seller who has been assigned a claim for indemnification will not be eligible for payment of the indemnification unless the Government waives the prohibition against early assignment in the Anti-Assignment of Claims Act, 31 U.S.C. 3727(b). EPA will consider waiving the prohibition against early assignment only if circumstances warrant such action and it is in the Government's interest to do so.

§ 165.227 Limitations on amount of indemnification.

(a) An owner can be indemnified only for losses suffered by reason of suspension and subsequent cancellation of a pesticide. The amount of loss which can be indemnified is limited to the cost of the pesticide owned by the person immediately before suspension, but cannot exceed the pesticide's fair market value at that time. The cost of the pesticide does not include incidental items such as transport, tax, storage costs, or repackaging.

(b) Owners have the responsibility to make a reasonable effort to mitigate their loss by converting the pesticide to other lawful uses such as reprocessing, recycling, or sale and distribution in accordance with the terms of applicable suspension and cancellation orders. The total amount of loss sustained by the owner for a given amount of a pesticide must be reduced by the amount of any sale, distribution or use of that pesticide. A claimant is not entitled to an indemnity payment for any amount of suspended and canceled pesticide for which losses were recovered through sale or use. Owners are not entitled to be indemnified for pesticides that are recycled or reprocessed, except to the extent that losses resulting from the suspension and cancellation have not been offset.

§ 165.230 Payment of indemnification.

(a) Two groups of eligible pesticide owners may receive payment from the Judgment Fund:

(1) End-users.

(2) Special status sellers. Persons who are sellers of pesticides who also apply pesticides will be treated as sellers only. Persons who are applicators who only sell the service of applying pesticides without delivering any unapplied pesticides to any person so served will be treated as an end-user.

(b) All other persons who are eligible for indemnification may receive payment only if Congress makes a specific line item appropriation of funds for the payment.

§ 165.232 Seller's requirement to reimburse.

(a) Each seller shall reimburse its purchasers (other than end users) who suffered a loss by reason of the suspension or cancellation of the pesticide unless the purchaser has been notified, in writing, at the time of sale, that the pesticide is not subject to reimbursement by the seller.

(b) After suspension and cancellation of the registration of a pesticide, the seller should notify all his purchasers (other than end-users) that the purchasers can obtain reimbursement.

(c) Reimbursement shall be provided for the quantity of the pesticide that cannot be used or resold as a result of suspension or cancellation.

§ 165.234 Procedures for submission of claims.

(a) *General.* Any person who files a claim for indemnification for a suspended and canceled pesticide must submit the items of information identified in this section. It is the responsibility of the person submitting an indemnification claim to submit the required documentation to support the claim. The Agency reserves the right to require additional information on a case by case basis.

(b) *Claim form.* The Agency will provide a specific claim form and instruction sheet for each suspended and canceled pesticide. The claim form will have boxes to identify the filing status of claimant. The instructions will indicate what supporting documentation is required for each element of the claim. The claim form must be completed and submitted to the agency in accordance with the instructions.

(c) *Filing status.* Each person submitting a claim for indemnification must identify his status as either:

(1) *An end user or special status seller.*

(2) *Seller.* A separate claim must be submitted for each status category.

(d) *Proof of ownership.* (1) An owner must supply proof that he/she owned the pesticide at the time of suspension. Such proof may be production records or purchase invoices.

(2) If the person filing the claim was not the owner on the date of suspension, the claimant must submit documentation of authority to file the claim, such as a power of attorney or assignment. The documentation must identify the owner of the pesticide at the time of suspension, and the owner's address and telephone number. A claimant with an assignment must supply proof that the assignor owned the pesticide at the time of suspension.

(e) *Proof of cost.* Proof of the cost of the pesticide can be substantiated by records of production costs, purchase receipts, and/or purchase invoices.

(f) *Proof of status.* A claimant applying as an end user or special status seller must check the appropriate box on the claim form and must certify that he qualifies for such status.

(1) A claimant applying as an end-user must certify that he/she is in fact an end user.

(2) A claimant applying as a special status seller must provide the following documentation:

(i) If the claimant seeks indemnification due to the seller's bankruptcy, the claimant must furnish a copy of a proof of claim filed with the Bankruptcy Court or other document showing that the claimant is included on the list of creditors, and a copy of documentation showing the amount of distribution received through the bankruptcy proceedings, such as the disclosure statement with a court-approved reorganization plan.

(ii) If the claimant seeks indemnification due to the seller's insolvency, the claimant must furnish evidence of the seller's insolvency such as a copy of a court order declaring the seller insolvent, a judgment that claimant has obtained against the seller and evidence that claimant has been unable to recover on the judgment, or some other documentation showing that the claimant attempted to recover from the seller but was unable to recover due to the seller's insolvency.

(iii) A dealer or distributor seeking indemnification under paragraph (f)(2) of this section may file a claim contingent upon the outcome of bankruptcy or insolvency proceedings. However, payment will not be authorized until bankruptcy proceedings have been completed and the amount of distribution, if any, has been verified.

(g) *Composite claim lists.* A seller who has several claims may submit composite lists for separate elements of the claim form identifying the pesticide, pesticide owner, quantities and units of pesticide, and other pertinent information indicated on the claim form.

(h) *Business records verification.* In lieu of submitting all documentation to EPA, a person who normally maintains business records may consolidate the supporting information required to accompany the claim form and verify the contents of the claim by submitting an independent auditor's or certified accountant's report. Each element of the claim, such as cost per unit of pesticide or quantity of pesticide owned at the time of suspension, must be reviewed and independently determined by the auditor or accountant to be valid if verification for the complete contents of the claim are provided through the report or statement. If the independent review is conducted for only one element of the claim, such as a manufacturer's cost of production per unit of pesticide, supporting documentation must be submitted for all other elements of the claim. The Agency may require submission of the information that formed the basis for the audits or reports to verify the validity of the information submitted.

(i) *Confidential Business Information.* (1) A claimant may assert a claim of confidentiel business information for the information submitted through the claim form in the manner described in 40 CFR 2.203. Claimants must substantiate all claims of confidentiality at the time they assert the confidentiality claim (i.e., when the indemnification claim is filed). Claimants substantiate confidentiality claims by providing comments on the following:

(i) The period of time for which confidential treatment is desired.

(ii) Whether disclosure of the information is likely to result in substantial harmful effects to the competitive position of the business and if so, what those harmful effects would be, why they should be viewed as substantial, and an explanation of the causal relationship between disclosure and such harmful effects.

(iii) Measures taken by the business to guard against undesired disclosure of information to others.

(iv) The extent to which the information has been disclosed to others, and the precautions taken in connection therewith.

(v) Pertinent confidentiality determinations, if any, by EPA or other Federal agencies, and a copy of such determination, if available.

(vi) Whether claimant asserts that the information is voluntarily submitted information under 40 CFR 2.201(i), and if so, whether and why disclosure of the information would tend to lessen the availability to EPA of similar information in the future.

(2) The information covered by the claim of confidentiality will be disclosed by the Agency only to the

VOL
58
ISS
85
MY
5
1993
UMI

extent allowed by section 10 of the Act, and by means of the procedures set forth in 40 CFR part 2. If no claim of confidentiality accompanies the information when it is received by the Agency, the information in the claim for indemnification may be made available to the public by the Agency without further notice to the claimant. If a confidentiality claim is made but no supporting documentation received, the indemnification claim will be considered incomplete and returned to the submitter.

(j) *Certification of claim.* At the time of submission of a claim, the claimant or authorized representative must sign the claim form, attesting to the following:

(1) That all statements made and information provided in the claim are true and correct to the best of the claimant's knowledge, and that the amount of the claim is an accurate statement of the cost of the pesticide.

(2) That the claimant had no knowledge of facts which, in themselves, showed that the pesticide did not meet registration requirements at the time of suspension.

(3) That acceptance by the claimant of any payment made by the Federal government constitutes full satisfaction and final settlement of the claim.

(4) That by submission of the claim, the claimant grants permission to authorized agents of the Federal government to enter premises where records or pesticides are retained to conduct whatever inspections, audits, or examinations are necessary to verify the contents of the claim, including any facts supporting a payment from the Judgment Fund, as set forth in § 165.234(f).

(5) That by submission of the claim, the claimant waives any claim of confidentiality for the following types of information: composition, quantity of pesticide, the unit size of containers, and the pesticide's location.

(6) That the claimant has received no other payment, including reimbursement by the seller, for the cost of the pesticides for which indemnification is claimed and that should claimant receive such other payment, claimant agrees to promptly repay the Federal government, in such amount up to and including the full amount of the indemnification payment made under section 15 of FIFRA.

(7) That ownership of and responsibility for pesticides for which indemnification payments are made remain with the claimant.

(8) That payment of indemnification under section 15 of FIFRA does not in any way constitute a finding or warranty by the United States with respect to the proper or safe storage, packaging, handling, transport, or disposal of such pesticides by the owners or holders of the pesticides or by agents, employees, or other persons acting in their behalf.

(9) That if the claim is filed by an assignee, the United States may assert against the assignee any defenses, or right of set-off or counterclaim, applicable against the person who assigned the claim.

(10) That if the claimant is applying as an end user or special status seller, the claimant meets the applicable criteria for this category.

(k) *When to file.* After suspension and cancellation of a pesticide registration, the Agency will issue guidance in a notice published in the Federal Register, providing specific information and requirements for the particular pesticide, and establishing a time frame for submission of indemnification claims.

(l) *Where to file.* The address to which claims should be submitted will be provided on the claim form and in the **Federal Register** notice which provides details of the indemnification program for a specific suspended and canceled pesticide.

§ 165.236 Agency review of claim.

(a) Upon receipt of a claim, the Agency will assign it a claim number and all correspondence regarding the claim will reference that number. Each claimant will be notified of any additional information or verification required for consideration of the claim. If a claimant is unable to provide the documentation required for consideration of his/her claim within a prescribed time period, the claim will be denied.

(b) A claim may be amended at any time before final action by EPA. All amendments must be submitted in writing and signed by the claimant or his/her authorized agent or legal representative.

(c) A claimant may withdraw a claim at any time by written notice to the Agency. A claim that has been withdrawn may be resubmitted only within the response period established by the Agency in the **Federal Register** notice referred to in § 165.234(k).

(d) The Agency's determinations regarding eligibility of claims and amounts of indemnity payable shall be final.

(e) EPA, at its discretion, may reconsider a decision if the claimant establishes that an error was made in the computation of the amount of indemnification, or that evidence or material facts were unavailable to the claimant at the time of filing the claim and that failure to provide the information was not the result of claimant's lack of care.

(1) A claimant seeking reconsideration of denial must submit a written request within 30 days of the date of the decision. The request for reconsideration must specify, if applicable, the evidence or material facts not previously considered and the reasons why the evidence or facts were not previously available.

(2) Requests for reconsideration should be submitted to the Agency Indemnification Claims officer at the following address: Office of Pesticide Programs (H7507C), Attention: Indemnification Claims Officer, U. S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Orally Administered Drug Products for Relief of Symptoms Associated With Overindulgence in Food and Drink for Over-the-Counter Human Use; Proposed Amendment to the Tentative Final Monograph

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the tentative final monograph for over-the-counter (OTC) orally administered drug products for relief of symptoms associated with overindulgence in food and drink to include a Reye syndrome warning for OTC drug products containing bismuth subsalicylate. This proposal is part of the ongoing review of OTC drug products conducted by FDA.

DATES: Written comments or objections by July 6, 1993; written comments on the agency's economic impact determination by July 6, 1993.

ADDRESSES: Written comments or objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drug Evaluation and Research (HFD–810), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8000.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 1, 1982 (47 FR 43540), FDA published, under § 330.10(a)(6) (21 CFR 330.10(a)(6)), an advance notice of proposed rulemaking to establish a monograph for OTC orally administered drug products for relief of symptoms associated with overindulgence in alcohol and food, together with the recommendations of the Advisory Review Panel on OTC Miscellaneous Internal Drug Products, which was the advisory review panel responsible for evaluating data on the active ingredients in these drug products. Interested persons were invited to submit comments by December 30, 1982. Reply comments in response to comments filed in the initial comment period could have been submitted by January 31, 1983.

The agency's proposed regulation, in the form of a tentative final monograph, for OTC orally administered drug products for relief of symptoms associated with overindulgence in food and drink was published in the **Federal Register** of December 24, 1991 (56 FR 66742). Interested persons were invited to file by April 22, 1992, written comments, objections, or requests for oral hearing on the proposed regulation before the Commissioner of Food and Drugs. Interested persons were also invited to submit new data by December 24, 1992, and to submit comments on the new data by February 24, 1993.

Final agency action on this class of drugs will occur with the publication at a future date of a final rule for orally administered drug products for relief of symptoms associated with overindulgence in food and drink. The proposal included in this notice will be addressed in that final rule.

Since publication of the tentative final monograph for OTC drug products for relief of symptoms associated with overindulgence in food and drink, FDA has considered the need for a Reye syndrome warning for OTC drug products that contain bismuth subsalicylate. FDA is aware that a manufacturer of a major OTC drug product that contains bismuth subsalicylate has voluntarily included a Reye syndrome warning on its labeling (Ref. 1).

FDA promulgated the existing Reye syndrome warning for OTC drug products containing aspirin in § 201.314(h) (21 CFR 201.314(h)) at a time when scientific research was focused primarily on the association of Reye syndrome and aspirin rather than the broader category of drug products containing nonaspirin salicylates; thus, the warning was limited to aspirin. The warning in § 201.314(h)(1), currently required for all oral and rectal OTC drug products containing aspirin, states: "WARNING: Children and teenagers should not use this medicine for chicken pox or flu symptoms before a doctor is consulted about Reye syndrome, a rare but serious illness reported to be associated with aspirin."

While cases of Reye syndrome are rare, the agency is aware of one fatality from Reye syndrome reported to be associated with the use of bismuth subsalicylate (Ref. 2). The death, which occurred in January 1989, involved a 6-year-old child who reportedly developed Reye syndrome following the administration of the label-recommended dosage of an OTC bismuth subsalicylate product for the treatment of flu-like symptoms, diarrhea, and nausea.

Aspirin is de-acetylated in the gut, blood, and liver to salicylic acid and the major plasma component after ingestion of aspirin is salicylate, the ionized form of salicylic acid (Ref. 3). Similarly, bismuth subsalicylate is chemically transformed throughout the gastrointestinal tract and nearly all of the resultant salicylate is systemically available (Refs. 4 and 5). Because higher serum salicylate levels in children with Reye syndrome than in the general population have been found during outbreaks of this disease (Ref. 6) and the mechanism of toxicity is unknown, the agency believes the aspirin association with Reye syndrome may be applicable to other salicylate products as well. The agency's decision on this matter will be discussed in a future issue of the **Federal Register**. However, irrespective of this final determination on the Reye syndrome warning for all drug products containing nonaspirin salicylates, the agency is proposing a Reye syndrome warning for OTC drug monograph products that contain bismuth subsalicylate.

Therefore, the agency is proposing to amend § 357.950 (21 CFR 357.950) by redesignating paragraphs (c)(1) through (c)(4) as paragraphs (c)(2) through (c)(5) and by adding new paragraph (c)(1) to include a Reye syndrome warning for all OTC overindulgence drug products that contain bismuth subsalicylate. Proposed § 357.950(c)(1)(i) and (c)(1)(ii) read as follows:

(i) "Children and teenagers who have or are recovering from chicken pox, flu symptoms, or flu should NOT use this product. If nausea, vomiting, or fever occur, consult a doctor because these symptoms could be an early sign of Reye syndrome, a rare but serious illness."

(ii) This warning statement shall appear on the immediate container labeling. In cases where the immediate container is not the retail package, the retail package also must bear the warning statement. In addition, the warning statement shall appear on any labeling that contains warnings and, in such cases, the warning statement shall be the first warning statement under the heading "Warnings".

The proposed Reye syndrome warning for products containing bismuth subsalicylate differs from the existing warning in § 201.314(h)(1) for oral and rectal drug products containing aspirin. The first sentence of this proposed warning states that "Children and teenagers who have or are recovering from chicken pox, flu symptoms, or flu should NOT use this product," whereas the warning for aspirin states that "Children and teenagers should not use this medicine for chicken pox or flu symptoms before a doctor * * *." Reye syndrome most commonly occurs following influenza, chicken pox, and several other common viral infections. As symptoms of the initial viral illness begin to diminish or clear, the dramatic symptoms of Reye syndrome, i.e., intractable vomiting, lethargy, or delirium, begin (Ref. 7). Thus, the agency believes that it is important that aspirin and bismuth subsalicylate not be given to children and teenagers when flu symptoms are present as well as when symptoms are absent and the child seems to be recovering from the illness. Therefore, the agency believes that the wording used in this proposal, i.e., "who have or are recovering from chicken pox, flu symptoms, or flu," is more informative than the wording currently used in the aspirin warning.

The proposed Reye syndrome warning also differs from the existing warning because it contains a second sentence that includes the terms "nausea, vomiting, or fever." On July 26, 1991, the Gastrointestinal Drugs Advisory Committee reviewed data on the use of bismuth subsalicylate for the relief of acute diarrhea and travelers' diarrhea. The Committee reviewed a Reye syndrome warning currently voluntarily included on a major OTC drug product containing bismuth subsalicylate. That warning stated: "WARNING: Children and teenagers who have or are recovering from chicken pox or flu should not use this medicine to treat nausea or vomiting. If nausea or vomiting is present, consult a doctor because this could be an early sign of Reye Syndrome, a rare but serious illness." The Committee felt that bismuth subsalicylate containing products should have a stronger warning regarding Reye syndrome because of concern that with approval of the drug as a treatment for diarrhea, there could be wider use of the product in children who might have a viral illness. A Reye syndrome warning for bismuth subsalicylate used as an antidiarrheal will be discussed in the rulemaking for OTC antidiarrheal drug products in a future issue of the **Federal Register**.

The agency has evaluated the warning and the Committee's recommendations and determined that the first sentence of the warning could be shortened and achieve the same effect. The agency also concludes that an additional sentence stating the early recognizable symptoms of Reye syndrome, i.e., nausea, vomiting, and fever, is important information that should be included as part of the warning. Therefore, the agency is proposing that the second sentence of the Reye syndrome warning reads as follows: "If nausea, vomiting, or fever occur, consult a doctor because these symptoms could be an early sign of Reye syndrome, a rare but serious illness." The agency is inviting comment on the Reye syndrome warning proposed for bismuth subsalicylate containing drug products for relief of overindulgence in food and drink. The agency is also considering the appropriateness of revising the current Reye Syndrome warning for oral and rectal OTC drug products containing aspirin in § 201.314(h)(1) to be similar to the language being proposed in this document. Based on the comments received, in a future issue of the **Federal Register**, the agency may propose to revise the current Reye syndrome warning in § 201.314(h)(1).

(7) Wolinsky, J. S., "Reye Syndrome," in "Cecil Textbook of Medicine," 19th Ed., edited by J. B. Wyngaarden, et al., W. B. Saunders Co., Philadelphia, pp. 2194–2195, 1992.

The agency has examined the economic consequences of this proposed rulemaking in conjunction with other rules resulting from the OTC drug review. In a notice published in the **Federal Register** of February 8, 1983 (48 FR 5806), the agency announced the availability of an assessment of these economic impacts. The assessment determined that the combined impacts of all the rules resulting from the OTC drug review do not constitute a major rule according to the criteria established by Executive Order 12291. The agency therefore concludes that no one of these rules, including this proposed rule for OTC overindulgence drug products, is a major rule.

The economic assessment also concluded that the overall OTC drug review was not likely to have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (Pub. L. 96–354). That assessment included a discretionary regulatory flexibility analysis in the event that an individual rule might impose an unusual or disproportionate impact on small entities. However, this particular rulemaking for OTC overindulgence drug products is not expected to pose such an impact on small businesses. The final rule will require some relabeling for all OTC overindulgence drug products containing bismuth subsalicylate; however, such relabeling should be a one time nominal cost. Manufacturers will have 1 year after publication of the final rule to implement this relabeling, and the cost to do so per product label is considered minimal. Therefore, the agency certifies that this proposed rule, if implemented, will not have a significant economic impact on a substantial number of small entities.

Because the tentative final monograph did not include a Reye syndrome warning, the agency is providing a 60-day period for comments. The agency invites public comment regarding any substantial or significant economic impact that this rulemaking would have on OTC overindulgence drug products. Types of impact may include, but are not limited to, costs associated with relabeling or repackaging. Comments regarding the impact of this rulemaking on OTC orally administered drug products for relief of symptoms associated with overindulgence in food and drink should be accompanied by appropriate documentation. The agency will evaluate any comments and supporting data that are received and will reassess the economic impact of this rulemaking in the preamble to the final rule.

The agency has determined under 21 CFR 25.24(c)(6) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Interested persons may, on or before July 6, 1993, submit written comments or objections on the proposed regulation to the Dockets Management Branch (address above). Written comments on the agency's economic impact determination may be submitted on or before July 6, 1993. Three copies of all comments or objections are to be submitted, except that individuals may

VOL

1993
UMI

submit one copy. Comments and objections are to be identified with the docket number found in brackets in the heading of this document and may be accompanied by a supporting memorandum or brief. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 357

Labeling, Over-the-counter drugs, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, it is proposed that 21 CFR part 357 (as proposed in the Federal Register of December 24, 1991 (56 FR 66742)), be amended as follows:

PART 357—MISCELLANEOUS INTERNAL DRUG PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

1. The authority citation for 21 CFR part 357 continues to read as follows:

Authority: Secs. 201, 501, 502, 503, 505, 510, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 351, 352, 353, 355, 360, 371).

2. Section 357.950 is amended by redesignating paragraphs (c)(1) through (c)(4) as paragraphs (c)(2) through (c)(5) and by adding new paragraph (c)(1) to read as follows:

§ 357.950 Labeling of drug products for the relief of symptoms of upset stomach due to overindulgence in food and drink.

* * * * *

(c) * * *

(1)(i) "Children and teenagers who have or are recovering from chicken pox, flu symptoms, or flu should NOT use this product. If nausea, vomiting, or fever occur, consult a doctor because these symptoms could be an early sign of Reye syndrome, a rare but serious illness."

(ii) This warning statement shall appear on the immediate container labeling. In cases where the immediate container is not the retail package, the retail package also must bear the warning statement. In addition, the warning statement shall appear on any labeling that contains warnings and, in such cases, the warning statement shall be the first warning statement under the heading "Warnings".

Protection and Advocacy of Individual Rights

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes regulations governing the Protection and Advocacy of Individual Rights (PAIR) program to implement requirements added to the Rehabilitation Act of 1973 (Act), as amended by the Rehabilitation Act Amendments of 1992 (1992 Amendments), Public Law 102-569. The 1992 Amendments moved the PAIR program from title VII, part D, of the Act to title V by adding a new section 509 of the Act. The new section establishes the purpose of the PAIR program, eligibility for services, funding requirements, application procedures and assurances, eligibility for assistance, and reporting requirements for new awards for the PAIR program. The proposed regulations would implement the requirements in section 509 and establish application requirements for the PAIR program. The Secretary also publishes this notice to propose selection criteria to be used in making new awards under the PAIR program.

DATES: Comments must be received on or before June 4, 1993.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Mark Shoob, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3028, Switzer Building, Washington, DC 20202-2575.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Deborah Havens, U.S. Department of Education, 400 Maryland Avenue, SW., room 3220, Switzer Building, Washington, DC 20202-2741. Telephone: (202) 205-8733. Deaf and hearing impaired individuals may call the Federal Information Relay Service at 1-800-877-8339 between 8 a.m. and 7 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The PAIR program is now authorized by new section 509 of the Act (29 U.S.C. 794e). Previously, the PAIR program was authorized by old section 731 of the Act. No program regulations existed for the old PAIR program. The newly authorized PAIR program differs substantially from the old program. Therefore, this notice of proposed rulemaking will not discuss any similarities or differences between the old and new PAIR programs. All references to the PAIR program will be to the newly authorized PAIR program.

The program is an important part of the National Education Goals. The program addresses Goal 5, that every adult American—including individuals with disabilities—will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

The PAIR program provides support to eligible systems within States to protect the legal and human rights of (a) individuals with disabilities who are ineligible for (1) client assistance programs (CAP) under section 112 of the Act; (2) protection and advocacy programs under part C of the Developmental Disabilities Assistance and Bill of Rights Act (DDA), 42 U.S.C. 6041-6043; and (3) protection and advocacy programs under the Protection and Advocacy for Mentally Ill Individuals Act of 1986 (PAMI), 42 U.S.C. 10801-10851; or (b) individuals with disabilities who need protection and advocacy services that are beyond the scope of the services provided by CAP. An individual with a disability may be eligible for services under the CAP but may be seeking services that a CAP may not have authority to provide. For example, an individual with a disability has a complaint of discrimination in the provision of housing on the basis of disability against the individual's landlord. In addition, the individual's housing is not related in any way to any services the individual is receiving or sought under the Act. Although the individual is eligible for services under the CAP, the CAP does not have the authority to assist the individual with the housing discrimination complaint. Therefore, the individual is eligible to receive assistance under the PAIR program.

These proposed regulations would implement section 509 of the Act, as recently added by the 1992 Amendments, and incorporate certain provisions of the Education Department General Administrative Regulations (EDGAR).

A summary of the proposed regulations follows:

Proposed § 381.2 describes who is eligible to apply for an award. In any fiscal year in which the amount appropriated to carry out this section is less than $5,500,000, protection and advocacy systems from Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, or the Republic of Palau may not apply for grants under the PAIR program. In any fiscal year in which the amount appropriated to carry out this section is equal to or greater than $5,500,000, an eligible system from any State and from any of the previously named jurisdictions may receive the amount allotted pursuant to section 509 (c) through (e) of the Act, except that the Republic of Palau may receive an allotment under section 509 of the Act only until the Compact of Free Association with Palau takes effect.

Proposed § 381.3 lists activities that eligible systems must carry out with funds made available under this part. Proposed § 381.3(a)(5) would require an eligible system to use funds made available under this part to develop a plan for achieving the annual objectives and priorities that an eligible system develops.

Under proposed § 381.4(a)(1), the regulations in Part 74 would apply to an eligible system if the eligible system is a nonprofit organization (NPO). Under proposed § 381.4(a)(2), the regulations in 34 CFR part 75 would apply to grants under the PAIR program if the amount appropriated for the PAIR program is less than $5,500,000. Under proposed § 381.4.(a)(3), the regulations in 34 CFR part 76 would apply to assistance awarded under the PAIR program if the amount appropriated for the PAIR program is equal to or greater than $5,500,000. Under proposed § 381.4(a)(6), the regulations in 34 CFR part 80 would apply to an eligible system if the eligible system is a State or local agency.

Proposed § 381.5 would provide definitions that apply to the PAIR program. In addition to incorporating certain EDGAR definitions, proposed § 381.5 would provide definitions of "Act," "Advocacy," "Eligible system," "Eligible individual with disabilities," "Mediation," and "State." The proposed regulations do not include a definition of "protection." The Department believes that the general dictionary definition of the word "protection" is adequate and does not require any added explanation.

Proposed § 381.10 describes the application requirements that an applicant must meet to receive assistance under this part. Proposed § 381.10(e) would require an eligible system to include in its application an assurance to develop a plan for achieving the annual objectives and priorities that an eligible system develops.

Proposed § 381.20 describes how the Secretary would evaluate an application for assistance under the PAIR program in any fiscal year in which the amount appropriated for the PAIR program is less than $5,500,000.

Proposed § 381.21 describes the selection criteria that the Secretary would use in evaluating an application for assistance under this program in any fiscal year in which the amount appropriated for the PAIR program is less than $5,500,000.

The proposed selection criterion in § 381.21(g)(2) would target individuals with disabilities who may have limited knowledge about the PAIR program, such as persons with mental retardation, persons with sensory or communications impairments, persons in isolated rural areas, or persons who are new to the vocational rehabilitation system. The Secretary believes this is necessary because the PAIR program has been funded only during the past three years and its existence is not as widely known as other programs, such as the CAP.

Proposed § 381.22 describes how the Secretary allocates funds under this program in any fiscal year in which the amount appropriated for the PAIR program is equal to or greater than $5,500,000. Under proposed § 381.22, the Secretary would first reserve 1.8 to 2.2 percent of the funds appropriated for the PAIR program in any fiscal year in which the amount appropriated for the PAIR program is equal to or greater than $5,500,000, and then allocate the remaining funds in accordance with section 509(c)(2) through (e) of the Act.

Proposed § 381.22(b) would implement section 509(g)(1) of the Act requiring that the amount of the allotment of a State under section 509 of the Act be paid directly to the eligible system that complies with the requirements of section 509 of the Act, unless the State provides otherwise.

Proposed § 381.30 would prohibit an eligible system from awarding subgrants or entering into contracts with another entity to carry out the PAIR program. Pursuant to section 509 of the Act, only a State protection and advocacy system that is established under part C of the DDA is eligible to receive a grant award under this program. In addition, section 509 of the Act does not authorize eligible systems to make subgrants. Therefore, only an eligible system may receive assistance (whether in the form of grants or contracts) to carry out the PAIR program. This prohibition would not prevent an eligible system from contracting with another entity or individual for specific services (e.g., contracting with a law firm to provide legal representation to a client or class of clients of the eligible system) after the eligible system has determined that the services are needed by its clients or class of clients and that contracting for the specific services is a more appropriate and cost-effective method of meeting the needs of its client or class of clients.

Proposed § 381.31 would require an eligible system to keep personal information about individuals served under the PAIR program strictly confidential and would allow an eligible system to release personal information only under very limited conditions. Proposed § 381.31 also would implement the restriction on the Department's authority to demand personally identifiable information added by new section 509(h) of the Act.

Proposed § 381.32 would require each eligible system to submit to the Secretary an annual report on the operation of its PAIR program during the previous year. The proposed regulations would enable the Secretary to comply with the requirement added by the 1992 Amendments that the Secretary submit to the Congress an annual report that includes the following information: (a) The types of services and activities undertaken by the eligible system and how these services and activities addressed the objectives and priorities developed pursuant to § 381.10(e). (b) The total number of individuals who requested services from the eligible system and the total number of individuals who were served by the eligible system. (c) The types of disabilities represented by individuals served by the eligible system. (d) The types of issues being addressed on behalf of individuals served by the eligible system. (e) Any other information that the Secretary may require.

Proposed § 381.33(a) would implement section 509(f)(7) of the Act requiring an eligible system to use funds made available under this part to supplement and not supplant the non-Federal funds that would otherwise be made available for the purpose for which Federal funds are provided. Proposed § 381.33(b) would implement section 509(j) of the Act limiting to five percent the amount of PAIR program funds that an eligible system may use for the costs of administration of the PAIR program. Proposed § 381.33(c) would implement section 509(g)(2) of the Act allowing funds appropriated for a fiscal year that are not expended or obligated during that year to be carried over to the next fiscal year. Proposed § 381.33(d) would inform eligible systems of the provisions in EDGAR that govern when an obligation may be made for various kinds of property and services.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

The small entities that would be affected by these proposed regulations are protection and advocacy agencies (P&As) receiving Federal funds under this program. However, the regulations would not have a significant economic impact on the P&As affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

Paperwork Reduction Act of 1980

Sections 381.10, 381.21, and 381.32 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these sections to the Office of Management and Budget (OMB) for its review. (44 U.S.C. 3504(h)).

Protection and advocacy systems are eligible to apply for grants under these regulations. The Department needs and uses the information to make grants. Annual public reporting burden for this collection of information is estimated to average 20 hours per response for 57 respondents, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, room 3002, New Executive Office Building, Washington, DC 20503; Attention: Daniel J. Chenok.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations on 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and to strengthen

VOL
58
ISS
85
MY
5
19 93
UMI

federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and action for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in room 3038, Switzer Building, 330 C Street, SW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

List of Subjects in 34 CFR Part 381

Education, Grant programs—education, Grant programs—social programs, Reporting and recordkeeping requirements, Vocational rehabilitation.

(Catalog of Federal Domestic Assistance Number: 84.240 Protection and Advocacy of Individual Rights)

Dated: April 30, 1993.

Richard W. Riley,

Secretary of Education.

The Secretary proposes to amend title 34 of the Code of Federal Regulations by adding a new part 381 to read as follows:

PART 381—PROTECTION AND ADVOCACY OF INDIVIDUAL RIGHTS

Subpart A—General

Sec.

381.1 What is the Protection and Advocacy of Individual Rights program?
381.2 Who is eligible for an award?
381.3 What activities may the Secretary fund?
381.4 What regulations apply?
381.5 What definitions apply?

Subpart B—How Does One Apply for an Award?

381.10 What are the application requirements?

Subpart C—How Does the Secretary Make an Award?

381.20 How does the Secretary evaluate an application?
381.21 What selection criteria does the Secretary use?
381.22 How does the Secretary allocate funds under this program?

Subpart D—What Conditions Must Be Met After an Award?

381.30 How are services to be administered?
381.31 What are the requirements pertaining to the protection, use, and release of personal information?
381.32 What are the reporting requirements?
381.33 What are the requirements related to the use of funds provided under this part?

Authority: 29 U.S.C. 794e.

Subpart A—General

§ 381.1 What is the Protection and Advocacy of Individual Rights program?

This program is designed to support a system in each State to protect the legal and human rights of eligible individuals with disabilities.

(**Authority:** Sec. 509(a) of the Act; 29 U.S.C. 794e(a))

§ 381.2 Who is eligible for an award?

(a) A State protection and advocacy system that is established under Part C of the Developmental Disabilities Assistance and Bill of Rights Act (DDA), 42 U.S.C. 6041–6043, and that meets the requirements of § 381.10 is eligible to receive a grant award under this program.

(b) In any fiscal year in which the amount appropriated to carry out this section is less than $5,500,000, protection and advocacy systems from Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, or the Republic of Palau may not apply for grants under the Protection and Advocacy of Individual Rights (PAIR) program.

(c) In any fiscal year in which the amount appropriated to carry out this section is equal to or greater than $5,500,000, an eligible system from any State and from any of the jurisdictions named in paragraph (b) of this section may receive the amount allotted pursuant to section 509(c)-(e) of the Act, except that the Republic of Palau may receive an allotment under section 509 of the Act only until the Compact of Free Association with Palau takes effect.

(**Authority:** Sec. 509(b)-(e) of the Act; 29 U.S.C. 794e(b)-(e))

§ 381.3 What activities may the Secretary fund?

(a) Funds made available under this part must be used for activities consistent with the purposes of this program, including the following activities:

(1) Establishing a system to protect, and advocate for, the rights of individuals with disabilities.

(2) Pursuing legal, administrative, and other appropriate remedies or approaches to ensure the protection of, and advocacy for, the rights of eligible individuals with disabilities within the State.

(3) Providing information on and make referrals to programs and services addressing the needs of individuals with disabilities in the State, including individuals with disabilities who are exiting from public school programs.

(4) Coordinating the programs provided through an eligible system with the advocacy programs of the Client Assistance Program (CAP) under section 112 of the Act, the State long-term care ombudsman program under the Older Americans Act of 1965, Part C of the DDA, and the Protection and Advocacy for Mentally Ill Individuals Act of 1986 (PAMI), 42 U.S.C. 10801–10851.

(5) Developing a statement of objectives and priorities on an annual basis and a plan for achieving these objectives and priorities.

(6) Providing to the public, including individuals with disabilities and, as appropriate, their representatives, an opportunity to comment on the objectives and priorities described in 381.10(f).

(7) Establishing a grievance procedure for clients or prospective clients of the eligible system to ensure that individuals with disabilities are afforded equal opportunity to access the services of the eligible system.

(b) Funds made available under this part also may be used to carry out any other activities consistent with the purpose of this part and the activities listed in paragraph (a) of this section.

(**Authority:** Secs. 12 and 509(f) of the Act; 29 U.S.C. 711 and 794e(f))

§ 381.4 What regulations apply?

The following regulations apply to the Protection and Advocacy of Individual Rights program:

(a) The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), if the eligible system is a private, nonprofit organization and is not a State or local government agency or Indian tribal organization.

(2) 34 CFR part 75 (Direct Grant Programs), if the appropriation for the PAIR program is less than $5,500,000.

(3) 34 CFR part 76 (State-Administered Programs), if the appropriation for the PAIR program is equal to or greater than $5,500,000 and the eligible system is a State or local government agency, except for—

(i) Section 76.103;

(ii) Sections 76.125 through 76.137;

(iii) Sections 76.300 through 76.401;

(iv) Section 76.704;

(v) Section 76.734; and

(vi) Section 76.740.

(4) 34 CFR part 77 (Definitions that Apply to Department Regulations).

(5) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(6) 34 CFR part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), if the eligible system is a State or local government agency.

(7) 34 CFR part 81 (General Education Provisions Act—Enforcement).

(8) 34 CFR part 82 (New Restrictions on Lobbying).

(9) 34 CFR part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

(10) 34 CFR part 86 (Drug Free Schools and Campuses).

(b) The regulations in this part 381.

(c) The regulations in 34 CFR 369.43, 369.46 and 369.48 relating to certain conditions that must be met by grantees.

(**Authority:** Secs. 12 and 509 of the Act; 29 U.S.C. 711 and 794e)

§ 381.5 What definitions apply?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Award
EDGAR
Fiscal year
Nonprofit
Private
Public
Secretary

(b) *Other definitions.* The following definitions also apply to this part:

Act means the Rehabilitation Act of 1973, as amended.

Advocacy means pleading an individual's cause or speaking or writing in support of an individual. Advocacy may be formal, as in the case of a lawyer representing an individual in a court of law or in formal administrative proceedings before government agencies (whether State, local or Federal). Advocacy also may be informal, as in the case of a lawyer or non-lawyer representing an individual in negotiations, mediation, or informal administrative proceedings before government agencies (whether State, local or Federal), or as in the case of a lawyer or nonlawyer representing an individual's cause before private entities, organizations or government agencies (whether State, local or Federal). Advocacy may be on behalf of—

(1) A single individual, in which case it is *individual advocacy;*

(2) More than one individual or a group or class of individuals, in which case it is *systems* (or *systemic*) *advocacy; or*

(3) Oneself, in which case it is *self advocacy.*

Eligible individual with disabilities means those individuals—

(1) Who are ineligible for—

(i) The CAP under section 112 of the Act;

(ii) Protection and advocacy programs under Part C of the DDA; and

(iii) Protection and advocacy programs under the PAMI; or

(2) Who need protection and advocacy services that are beyond the scope of the services provided by CAP.

Eligible system means a protection and advocacy system that is established under part C of the DDA, 42 U.S.C. 6041–6043, and that meets the requirements of § 381.10 of this part.

Mediation means the act or process of using a third party to act as an intermediary or conciliator to settle differences or disputes between persons or parties. Mediation may involve the use of professional mediators or any other third party mutually agreed to by the parties to the dispute.

State means, in addition to each of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau (until the Compact of Free Association takes effect), except for purposes of the allotments under sections 509(b)–(e) of the Act, in which case State does not mean or include Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau.

(**Authority:** Secs. 12 and 509 of the Act; 29 U.S.C. 711 and 794e)

Subpart B—How Does One Apply for an Award?

§ 381.10 What are the application requirements?

Each application must be submitted to the Secretary at the time and in the form and manner determined by the Secretary and must contain all information that the Secretary determines necessary, including assurances that the eligible system will—

(a) Have in effect a system to protect, and advocate for, the rights of eligible individuals with disabilities;

(b) Have the same general authorities, including access to records and program income, as in Part C of the DDA;

(c) Have the authority to pursue legal, administrative, and other appropriate remedies or approaches to ensure the protection of, and advocacy for, the rights of eligible individuals with disabilities within the State;

(d) Provide information on and make referrals to programs and services addressing the needs of individuals with disabilities in the State, including individuals with disabilities who are exiting from public school programs;

(e) Develop a statement of objectives and priorities on an annual basis and a plan for achieving these objectives and priorities;

(f) Provide to the public, including individuals with disabilities and, as appropriate, their representatives, an opportunity to comment on the objectives and priorities established by, and activities of, the eligible system including—

(1) The objectives and priorities for the activities of the eligible system for each year and the rationale for the establishment of those objectives and priorities; and

(2) The coordination of programs provided through eligible systems with the advocacy programs of the CAP under section 112, the State long-term care ombudsman program established under the Older Americans Act of 1965, part C of the DDA, and the PAMI;

(g) Establish a grievance procedure for clients or prospective clients of the eligible system to ensure that individuals with disabilities are afforded equal opportunity to access the services of the eligible system;

(h) Use funds made available under this part to supplement and not supplant the non-Federal funds that would otherwise be made available for the purpose for which Federal funds are provided; and

(i) Implement procedures designed to ensure that, to the maximum extent possible, mediation (and other

VOL 58 ISS 85 MY 5 1993 UMI

alternative dispute resolution) procedures, which include good faith negotiation, are used before resorting to formal administrative or legal remedies.

(Authority: Secs. 12 and 509(f) of the Act; 29 U.S.C. 711 and 794e(f))

Subpart C—How Does the Secretary Make an Award?

§ 381.20 How does the Secretary evaluate an application?

In any fiscal year in which the amount appropriated for the PAIR program is less than $5,500,000—

(a) The Secretary evaluates each application on the basis of the criteria in § 381.21;

(b) The Secretary awards up to 100 points for these criteria; and

(c) The maximum possible score for each criterion is indicated in parentheses after each criterion.

(Authority: Secs. 12 and 509 (b) and (f) of the Act; 29 U.S.C. 711 and 794e (b) and (f))

§ 381.21 What selection criteria does the Secretary use?

In any fiscal year in which the amount appropriated for the PAIR program is less than $5,500,000, the Secretary uses the following criteria to evaluate an application:

(a) Extent of need for the project. (20 points)

(1) The Secretary reviews each application to determine the extent to which the project meets specific needs recognized in the statute that authorizes the PAIR program, including consideration of—

(i) The needs addressed by the project;

(ii) How the applicant identified those needs;

(iii) How those needs will be met by the project; and

(iv) The benefits to be gained by meeting those needs.

(2) The Secretary reviews each application to determine the extent that the need for protection and advocacy services for eligible individuals with disabilities is justified in terms of complementing or expanding, but not duplicating, existing protection and advocacy or client assistance services.

(b) *Plan of operation.* (20 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(1) The quality of the design of the project;

(2) The extent to which the project includes specific intended outcomes that—

(i) Will accomplish the purposes of the PAIR program;

(ii) Are attainable within the project period, given the project's budget and other resources;

(iii) Are objective and measurable; and

(iv) For a multi-year project, include specific objectives to be met, during each budget period, that can be used to determine the progress of the project toward meeting its intended outcomes;

(3) The extent to which the plan of management is effective and ensures proper and efficient administration of the project;

(4) The extent to which the project involves individuals with disabilities in the development of the objectives and priorities of the project and will continue to involve individuals with disabilities in the implementation of the project;

(5) The quality of the applicant's plan to use its resources and personnel to achieve each objective and intended outcome during the period of Federal funding; and

(6) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or disabling condition.

(c) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (c)(1) (i) and (ii) of this section will commit to the project; and

(iv) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or disabling condition.

(2) To determine personnel qualifications under paragraphs (c)(1) (i) and (ii) of this section, the Secretary considers—

(i) Experience and training in fields related to the scope of the project; and

(ii) Any other qualifications that pertain to the objectives of the project.

(d) *Budget and cost effectiveness.* (5 points) The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project; and

(2) Costs are reasonable in relation to the objectives of the project.

(e) *Evaluation plan.* (10 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(1) Are appropriate to the project;

(2) Will determine how successful the project is in meeting its intended outcomes; and

(3) Are objective and produce data that are quantifiable.

(Cross-reference: 34 CFR 75.590, Evaluation by the grantee.)

(f) *Adequacy of resources.* (5 points) The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including accessibility of facilities, equipment, and supplies.

(g) *Service comprehensiveness.* (20 points) The Secretary reviews each application for information that shows—

(1) The comprehensiveness of the protection and advocacy services to be provided by the eligible system, including evidence that the eligible system will use all available authority and alternatives (including the right to pursue legal, administrative, and other available remedies) to provide for the protection and advocacy of the rights of eligible individuals with disabilities within the State; and

(2) Evidence that the eligible system will provide protection and advocacy services to individuals with a broad range of disabilities, including individuals with disabilities who may have limited knowledge about the PAIR program.

(h) *Coordination with other programs and systems.* (10 points)

(1) The Secretary reviews each application to determine that the agency designated to operate the PAIR program has demonstrated knowledge of the eligibility requirements and the range of services provided by the following programs and will coordinate, as appropriate, with the advocacy programs of—

(i) The CAP under section 112 of the Act;

(ii) The State long-term care ombudsman program established under the Older Americans Act of 1965;

(iii) The DDA; and

(iv) The PAMI.

(2) The Secretary reviews each application to determine the extent of planned cooperative activities with relevant public and private agencies and organizations in the community, including local educational agencies, to address barriers that prevent eligible individuals with disabilities from obtaining services from those public and private agencies and organizations in the community.

(Authority: Secs. 12 and 509 (b) and (f) of the Act; 29 U.S.C. 711 and 794e (b) and (f))

§ 381.22 How does the Secretary allocate funds under this program?

(a) In any fiscal year in which the amount appropriated for this program is equal to or greater than $5,500,000—

(1) The Secretary sets aside not less than 1.8 percent but not more than 2.2 percent of the amount appropriated to provide training and technical assistance to eligible systems established under this program.

(2) After the reservation required by paragraph (a)(1) of this section, the Secretary makes allotments from the remainder of the amount appropriated in accordance with section 509(c)(2)-(e) of the Act.

(b) Notwithstanding any other provision of law, the Secretary pays directly to an eligible system that meets the requirements of this part the amount of the allotment to the State pursuant to section 509 of the Act, unless the State provides otherwise.

(Authority: Sec. 509(c)-(e) of the Act; 29 U.S.C. 794e(c)-(e))

Subpart D—What Conditions Must Be Met After an Award?

§ 381.30 How are services to be administered?

(a) Each eligible system shall carry out the protection and advocacy program authorized under this part.

(b) An eligible system may not subgrant or contract with another entity to carry out the protection and advocacy program authorized under this part. However, an eligible system may contract with another entity or individual for specific services in a particular case (e.g., contracting with a law firm to provide legal representation in a particular case to a client or class of clients of the eligible system) if the eligible system determines that the services in that particular case are needed by its clients or class of clients and that contracting for the specific services in that particular case is a more appropriate and cost-effective method of meeting the needs of its client or class of clients.

(Authority: Secs. 12 and 509(i) of the Act; 29 U.S.C. 711 and 794e(i)).

§ 381.31 What are the requirements pertaining to the protection, use, and release of personal information?

(a) All personal information about individuals served by any eligible system under this part, including lists of names, addresses, photographs, and records of evaluation, must be held confidential.

(b) The eligible system's use of information and records concerning individuals must be limited only to purposes directly connected with the protection and advocacy program, including program evaluation activities. Except as provided in paragraph (d) of this section, this information may not be disclosed, directly or indirectly, other than in the administration of the protection and advocacy program unless the consent of the agency providing the information and the individual to whom the information applies, or his or her representative, have been obtained in writing. An eligible system may not produce any report, evaluation, or study that reveals any personally identifying information without the written consent of the individual or his or her representative.

(c) Except as limited in paragraph (d) of this section, the Secretary or other Federal or State officials responsible for enforcing legal requirements must be given complete access to all—

(1) Records of the eligible system receiving funds under this program; and

(2) All individual case records of clients served under this part without the consent of the client.

(d) The privilege of a person or eligible system not to produce documents or provide information pursuant to paragraph (c) of this section is governed by the principles of common law as interpreted by the courts of the United States except that, for purposes of any audit, report, monitoring review, State plan assurance review, or evaluation of the performance of the protection and advocacy program established under this part, the Secretary does not require the eligible system to disclose the identity of, or any other personally identifiable information related to, any individual requesting assistance under the program.

(Authority: Secs. 12 and 509(h) of the Act; 29 U.S.C. 711 and 794e(h))

§ 381.32 What are the reporting requirements?

Each eligible system shall provide to the Secretary, no later than 90 days after the end of each fiscal year, an annual report that includes information on the following:

(a) The types of services and activities undertaken by the eligible system and how these services and activities addressed the objectives and priorities developed pursuant to § 381.10(e).

(b) The total number of individuals who requested services from the eligible system and the total number of individuals who were served by the eligible system.

(c) The types of disabilities represented by individuals served by the eligible system.

(d) The types of issues being addressed on behalf of individuals served by the eligible system.

(e) Any other information that the Secretary may require.

(Authority: Sec. 509(l) of the Act; 29 U.S.C. 794e(l))

§ 381.33 What are the requirements related to the use of funds provided under this part?

(a) Funds made available under this part must be used to supplement and not supplant the non-Federal funds that would otherwise be made available for the purpose for which Federal funds are provided under this part.

(b) The eligible system may not use more than five percent of any allotment for the costs of administration of the system supported under this part. For purposes of this paragraph, "costs of administration" include, but are not limited to, administrative salaries (including salaries for clerical and support staff), supplies, depreciation or use allowances, the cost of operating and maintaining facilities, equipment, and grounds (e.g., rental of office space or equipment, telephone, postage, maintenance agreements), and other similar types of costs that would be incurred by the eligible system even if the eligible system did not carry out the PAIR program.

(c) Funds paid to a State or an eligible system within a State for a fiscal year to carry out this program that are not expended or obligated prior to the end of that fiscal year remain available to the State or an eligible system within a State for obligation during the succeeding fiscal year in accordance with 34 CFR 76.705–76.707.

(d) For determining when an eligible system makes an obligation for various kinds of property or services, 34 CFR 75.707 and 76.707, as appropriate, apply to this program. If the appropriation for the PAIR program is less than $5,500,000, § 75.707 applies. If the appropriation for the PAIR program is equal to or greater than $5,500,000, § 76.707 applies. An eligible system is considered a State for purposes of § 76.707. For determining when an eligible system makes an obligation for various kinds of property or services, 34 CFR 76.707 applies to this program.

Thirty-First Report of the TSCA Interagency Testing Committee to the Administrator; Receipt of Report, Request for Comments, Opportunity to Initiate Negotiations for TSCA Section 4 Testing Consent Agreements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The TSCA Interagency Testing Committee (ITC), established under section 4(e) of the Toxic Substances Control Act (TSCA), transmitted its Thirty-First Report to the Administrator of EPA on January 28, 1993. This report is included with this notice. As noted in this Report, the ITC revised the *Priority Testing List* by adding one group of 24 chemicals to the list for priority consideration by the EPA Administrator for promulgation of test rules under section 4(a) of the Act. These chemicals are designated for response within 12 months. Therefore, in response to the ITC's designation, EPA will either initiate rulemaking under section 4(a) of TSCA, enter into a testing consent agreement, or publish a **Federal Register** notice explaining the reasons for not initiating such rulemaking within 12 months. The ITC is also revising the recommendations for two chemical groups that were recommended in the ITC's Twenty-Eighth Report. The propylene glycol ethers and esters group is revised by the addition of 2 chemicals and the removal of 29. The methyl ethylene glycol ethers and esters group is modified by the removal of eight chemicals. The ITC's reasons for revising these chemical groups are stated in the Thirty-First Report. There are no recommended with intent-to-designate chemicals or chemical groups in the Thirty-First Report. EPA invites interested persons to submit written comments on the Report.

In addition, EPA is soliciting interested parties for participation in or monitoring of a consent agreement process for the chemicals that were designated for dermal absorption testing. EPA is also inviting manufacturers and/or processors of chemical substances who wish to participate in testing negotiations for the chemicals designated for dermal absorption testing to develop and submit testing consent agreement proposals to EPA.

DATES: Written comments on the Thirty-First ITC Report must be received by June 4, 1993. Written testing proposals must be received by July 6, 1993. Written notice of interest in being designated an "interested party" to the development or monitoring of a consent agreement for the chemicals designated for dermal absorption testing must be received by July 6, 1993. Those submitting written testing proposals will be considered "interested parties" and do not have to submit separate written notice. EPA will contact all "interested parties" and advise them of meeting dates.

ADDRESSES: Send six copies of written submissions to: TSCA Docket Receipts (TS–790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. ET G–102, 401 M St., SW., Washington, DC 20460. Submissions should bear the document control number (OPPTS–41038; FRL–4583–4). The public record supporting this action, including comments, is available for public inspection in Rm. ET G–102 at the address noted above from 8 a.m. to noon and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M Street, SW., Rm. E–543B, Washington, DC 20460, (202) 554–1404, TDD (202) 554–0551.

SUPPLEMENTARY INFORMATION:

Electronic Availability: This document, along with a complete list of Chemical Abstract Service numbers, and chemical names of chemicals and chemicals in groups on the TSCA section 4(e) *Priority Testing List*, is available as an electronic file on *The Federal Bulletin Board* at 9 a.m. on the date of publication in the **Federal Register**. By modem dial 202–512–1387 or call 202–512–1530 for disks or paper copies. This file is also available in Postscript, Wordperfect and ASCII. The list of chemical abstract Service numbers, and chemical names of chemicals and chemicals in groups on the TSCA section 4(e) *Priority Testing List*, is available in Wordperfect and ASCII.

I. Background

TSCA (15 U.S.C. 2601 et seq.) authorizes the Administrator of EPA to promulgate regulations under section 4(a) requiring testing of chemical substances and mixtures ("chemicals") in order to develop data relevant to determining whether such chemicals may present unreasonable risks to health or the environment. Section 4(e) of TSCA established the Interagency Testing Committee (ITC) to recommend chemicals and chemical groups to the Administrator of EPA for priority testing consideration. Section 4(e) directs the ITC to revise the TSCA section 4(e) *Priority Testing List* at least every 6 months. The most recent revisions to this List are included in the ITC's Thirty-First Report. The Report was received by the Administrator on January 28, 1993, and is included with this notice. The Report adds 1 group of 24 chemicals to the TSCA section 4(e) *Priority Testing List* and revises the recommendations for 2 chemical groups that were recommended in the ITC's Twenty-Eighth Report.

II. Written and Oral Comments on Recommendations

EPA invites interested persons to submit detailed comments on the ITC's new recommendations. The Agency is interested in receiving information concerning additional or ongoing health and safety studies on the subject chemicals as well as information relating to the human and environmental exposure to these chemicals.

A notice will be published at a later date in the **Federal Register** adding the substances recommended in the ITC's Thirty-First Report to the TSCA section 8(d) Health and Safety Data Reporting Rule (40 CFR part 716), which requires the reporting of unpublished health and safety studies on the listed chemicals. That notice will also add the chemicals to the TSCA section 8(a) Preliminary Assessment Information Rule (40 CFR part 712). The section 8(a) rule requires the reporting of production volume, use, exposure, and release information on the listed chemicals.

III. Status of List

The ITC's Thirty-First Report notes the addition of one chemical group to the *Priority Testing List* and the revision of the recommendations for two chemical groups in the Twenty-Eighth Report. The current TSCA section 4(e) *Priority Testing List* contains 24 chemicals and 24 chemical groups; 1 chemical group and 11 chemicals are designated for priority testing consideration.

IV. Testing Consent Agreements

1. *Solicitation of Interested Parties.* EPA's procedures for requiring the testing of chemical substances under section 4 of TSCA at 40 CFR 790.22, includes the adoption of enforceable consent agreements and the promulgation of test rules. EPA has on numerous occasions been approached by chemical companies interested in negotiating consent agreements for testing ITC chemicals or chemical groups. As a result of these requests, EPA is now inviting persons interested in participating in or monitoring negotiations on the chemicals designated in the Thirty-First ITC Report to notify EPA in writing. Those who respond to this solicitation by the deadline established in this notice will have the status of "interested parties" and will be afforded opportunities to participate in the negotiation process. These "interested parties" will not incur any obligations by being designated "interested parties."

2. *Solicitation of testing proposals for consent agreement negotiations.* EPA is also now soliciting testing proposals for a consent agreement to perform dermal absorption testing on the 24 chemical substances designated in the Thirty-First Report. Following publication of this notice, manufacturers and/or processors have 60 days to develop and submit testing proposals for any of the chemical substances designated in the Thirty-First Report that they wish EPA to consider as candidates for consent agreement negotiations.

Federal scientists from a number of the ITC's statutory and liaison organizations including the Consumer Product Safety Commission, Environmental Protection Agency, Food and Drug Administration, National Institute for Occupational Safety and Health, and Occupational Safety and Health Administration, have developed a proposed federally-harmonized test protocol that will provide data needed by several U. S. Government Organizations represented on the ITC. This proposed protocol is entitled "Protocol for *in vitro* Percutaneous Absorption Studies" and is available to the public through the TSCA Docket Receipts and the Environmental Assistance Division listed above. This document should be reviewed before submitting any testing proposals in response to this notice.

For additional technical information on this testing protocol contact Dr. John D. Walker, Executive Director, TSCA Interagency Testing Committee, (202) 260–1820.

All testing proposals submitted should describe the testing to be performed and explain any deviations from the federally harmonized test protocol that are necessary to assure the development of reliable percutaneous absorption data.

EPA will review the submissions and select the most promising submissions as candidates for negotiation. Submissions that fully address the ITC's concerns will have a higher chance of success than those that do not fully address all data needs.

3. *Negotiation of testing program and development of a testing consent agreement.* EPA will follow the negotiation procedures under 40 CFR 790.22, and to the extent feasible, the timetable outlined in 40 CFR part 790, Appendix A to subpart B.

In the case of the 24 substances designated for priority testing consideration in the Thirty-First ITC Report, EPA believes that obtaining testing through the development of consent agreements would be most feasible if interested manufacturers organized a testing consortium. Because of the straightforward and relatively inexpensive nature of the recommended tests for each of the substances (i.e., dermal absorption tests), and the costs to EPA and industry that would be incurred should many consent agreements be pursued, EPA believes that negotiating with an organized group of manufacturers may be the most efficient means to obtain the needed testing.

For additional information about process or negotiations contact Frank Kover, Chief, Chemical Testing and Information Branch, (202) 260–8130.

Authority: 15 U.S.C. 2603.

Dated: April 23, 1993.

Charles M. Auer,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

Thirty-First Report of the TSCA Interagency Testing Committee to the Administrator, Environmental Protection Agency

Summary. The Interagency Testing Committee (ITC) was created under Section 4(e) of the Toxic Substances Control Act (TSCA) as an independent advisory committee to the Administrator of the U.S. Environmental Protection Agency (EPA) on setting priorities for the testing of chemicals. The Committee maintains the TSCA section 4(e) *Priority Testing List* and transmits revisions of the List as a Report to the EPA Administrator at least every 6 months for action and publication in the **Federal Register**. This Report presents the ITC's revisions to the *Priority Testing List* resulting from its deliberations during the reporting period May through November 1992.

This revision designates a group of 24 chemicals of regulatory interest to the Occupational Safety and Health Administration (OSHA) for dermal absorption testing. Also, two groups of chemicals previously recommended are revised. The propylene glycol ethers and esters group is revised by adding 2 chemicals and removing 29. The methyl ethylene glycol ethers and esters group is modified by removing eight chemicals.

TABLE 1.—REVISIONS TO THE TSCA SECTION 4(E) PRIORITY TESTING LIST

Group	Action	Date	Concern
OSHA Chemicals with no dermal absorption data (listed in Table 2)	Designated	1/93	Dermal absorption testing
Propylene glycol ethers and esters (revised)	Recommended	1/93	Information solicited
Methyl ethylene glycol ethers and esters (revised)	Recommended	1/93	Information solicited

Chapter 1—Introduction

1.1 *Background.* Since its creation in 1976 under Section 4(e) of the Toxic Substances Control Act (Public Law 94–469, 90 Stat. 2003 et seq., 15 U.S.C. 2601 et seq.), the TSCA Interagency Testing Committee (ITC) has sent 30 semi-annual Reports to the Administrator of the U.S. Environmental Protection Agency (EPA) to advise on setting priorities for the testing of chemicals. These Reports have been published in the **Federal Register** and are also available from the Committee. In this, its Thirty-First Report, the Committee revises its *Priority Testing List* with the addition of one group and the revision of two groups already on the *List*. A short version of the *Priority Testing List* appears at the end of this Report. The complete *Priority Testing List* with all individual chemicals in each group is available upon request from the Committee (address and phone number given below) or, electronically available on *The Federal Bulletin Board* (see preamble for the phone number).

VOL 58 ISS 85 MY 5 1993 UMI

The Committee meets monthly and produces its Reports with the help of staff and technical contract support provided by EPA. Committee membership and support personnel are listed at the end of this Report.

Upon receipt of the ITC's Reports, the EPA's Office of Pollution Prevention and Toxics issues information gathering rules under Sections 8(a) and 8(d) of TSCA. These rules require that manufacturers and producers submit (1) production and exposure data and (2) health and safety studies, respectively, within 2 months of the rule's effective date. These submissions are indexed and stored in data bases by EPA and are then available for review by the ITC and others.

1.2 *ITC's activities during this reporting period.* For the period May 28, 1992 to November 5, 1992, the ITC had six meetings. Chemical groups previously recommended after nomination by the National Institute of Occupational Safety and Health (NIOSH) were reviewed. The individual chemicals comprising these groups are here modified. The ITC also accepted the request of the Occupational Safety and Health Administration (OSHA) to determine testing needs for industrial chemicals which may cause harm to exposed workers by absorption through the skin.

1.3. *Revision of Previously Recommended Groups.* In the ITC's Twenty-Eighth Report, groups of propylene glycol ethers and esters and methyl ethylene glycol ethers and esters were added to the TSCA section 4(e) *Priority Testing List* for reproductive effects and developmental toxicity testing based on concerns raised by NIOSH (58 FR 41212, August 19, 1991). NIOSH is concerned with glycol ethers and their esters that are metabolized in humans to known reproductive toxicants. The original groups of glycol ethers and esters were selected from industrial chemicals to which workers are exposed, and the groups were expanded by adding structurally similar compounds through a substructure search of the ITC's Substructure-based Computerized Chemical Selection Expert System (SuCCSES).

During this reporting period, NIOSH commented that not all of these chemicals are of concern because of their possible metabolism to reproductive toxicants. The ITC reconsidered the individual members of the groups. Upon review of available metabolism data and consideration of possible structure/activity relationships, the ITC decided to remove some chemicals from both groups. A chemical was removed if: (1) it is expected to be metabolized to tricarboxylic acid cycle intermediates and therefore of lower concern; (2) it is not expected to be metabolized to reproductive toxicants; (3) there are fewer than 1,000 workers exposed, according to the National Occupational Exposure Survey; or (4) other human exposure (mostly through consumer uses) is not considered likely. The Consumer Product Safety Commission (CPSC) expressed an interest in retaining some of the propylene and methyl ethylene glycol ethers and esters on the *Priority Testing List* and adding two chemicals in order to obtain information submitted under TSCA Sections 8(a) and 8(d). The ITC has a concern that some of these chemicals are likely to be used in consumer products as replacements for ethylene glycol ethers and has no metabolism data available. As a result, the ITC retains some members of both groups on the *List* and adds two chemicals.

Chapter 2—Actions taken by the ITC in this Report

2.1 *Designated chemicals.* OSHA-nominated chemicals for which no dermal toxicity data are available.

I. Rationale for the Designation

OSHA has established Permissible Exposure Limits (PELs) to protect workers from industrial chemicals. In general, PELs are based on inhalation of airborne dusts and vapors. In those cases where skin absorption could be harmful, the chemicals with PELs are assigned "skin designations." OSHA requested that the ITC help identify chemicals which lack sufficient data for OSHA to determine the need for skin designations and to use their authority to recommend chemicals for priority testing consideration by EPA to obtain these data. To assign a skin designation, OSHA requires acute dermal studies and sufficient dermal absorption data to determine the total exposure of workers. The ITC identified 24 chemicals for which no dermal toxicity or absorption data could be located and which are potentially testable under TSCA. These chemicals are listed in the following Table 2:

TABLE 2.—OSHA CHEMICALS DESIGNATED FOR DERMAL ABSORPTION TESTING

CAS No.	Chemical Name
60-29-7	Ethyl ether
75-65-0	tert-Butyl alcohol
76-22-2	Camphor
78-92-2	sec-Butyl alcohol
79-20-9	Methyl acetate
97-77-8	Disulfiram
100-25-4 ...	*p*-Dinitrobenzene
105-46-4 ...	sec-Butyl acetate
106-42-3 ...	*p*-Xylene
107-31-3 ...	Methyl formate
107-66-4 ...	Dibutyl phosphate
108-03-2 ...	1-Nitropropane
108-87-2 ...	Methylcyclohexane
109-66-0 ...	Pentane
110-83-8 ...	Cyclohexene
111-84-2 ...	Nonane
123-92-2 ...	Isoamyl acetate
142-82-5 ...	*n*-Heptane
287-92-3 ...	Cyclopentane
532-27-4 ...	*a*-Chloroacetophenone
540-88-5 ...	tert-Butyl acetate
628-63-7 ...	*n*-Amyl acetate
7631-90-5 .	Sodium bisulfite
7681-57-4 .	Sodium metabisulfite

II. Recommended Tests

The group of chemicals listed in Table 2 above are designated for dermal absorption testing.

III. Supporting Information

In its January 19, 1989 Air Contaminants Rule (54 FR 2332), OSHA stated that:

> The purpose of having the skin designation is to prevent the same toxic effects that the chemical causes through inhalation. The inhalation limit is based on keeping exposure below the limit which will create a significant risk of material impairment of health. If skin absorption is possible, an employee might be below the inhalation limit; however, the additional body burden through skin absorption may create the material impairment which the limit attempts to reduce.

In September 1991, OSHA presented a list of 658 chemical substances and mixtures (its Z-1-A Table in 54 FR 2332-2983) to the ITC to assess the availability of dermal absorption data and the need for testing that could be recommended under TSCA. The ITC reviewed the list and determined that 145 polymers, pesticides, complex mixtures, and chlorofluorocarbons (CFCs) are not suitable candidates for consideration because they are not suitable for testing, they are regulated under other Federal authorities, or they are not regulable under TSCA. The remaining chemicals were divided into two groups based on production volume: greater or less than 1 million pounds, based on the 1989 production figures from the EPA Inventory. Chemicals that are vapors at ambient temperature, are highly reactive, have low toxicity, are members of chemical groups, or have dermal LD50 values reported in the Registry of Toxic Effects of Chemical Substances were identified in each of the production groups and are deferred for future ITC review. A group of 16 high and 8 low production chemicals were identified as having no dermal toxicity data and are here designated for dermal absorption testing. The following Figure 1 diagrams the selection process.

BILLING CODE 6560-50-F

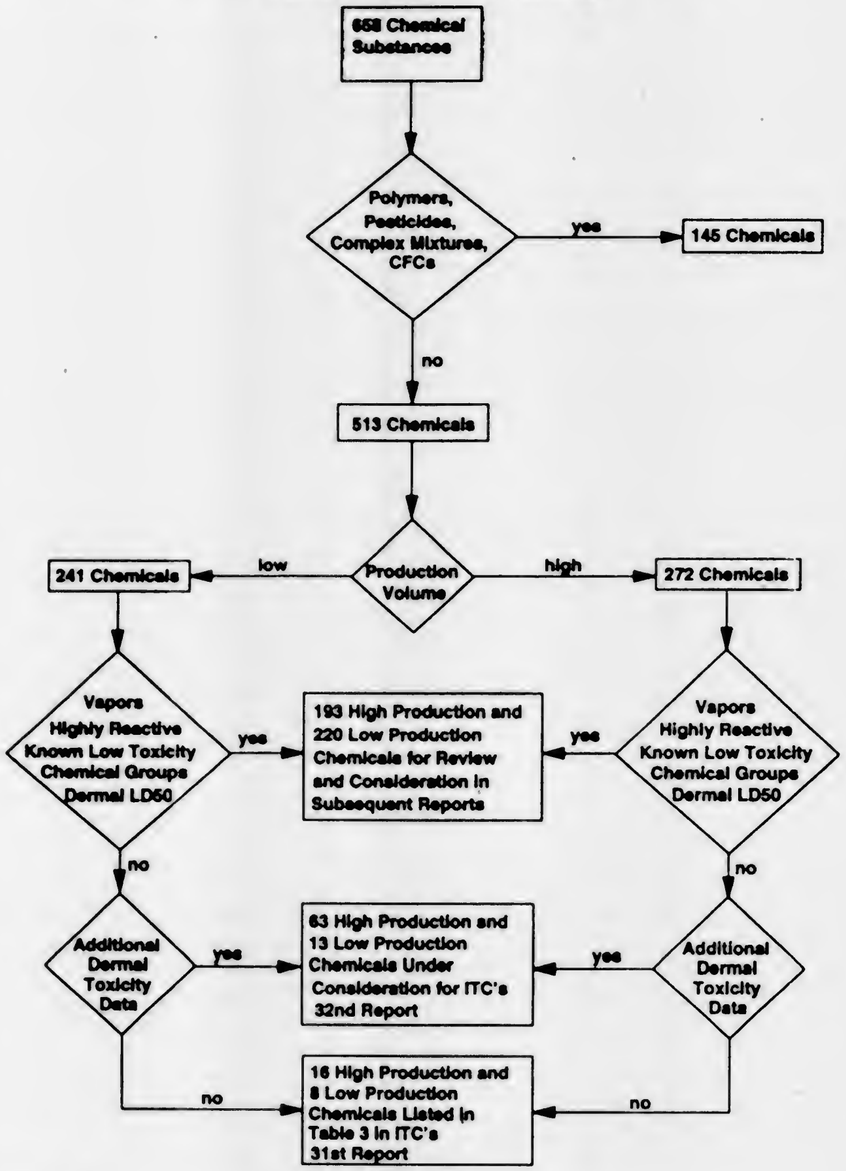
Figure 1. Process to Select OSHA Chemicals for Dermal Absorption Testing



BILLING CODE 6560-50-C

2.2 Revisions of Previously Recommended Chemical Groups

2.2.a. Propylene glycol ethers and esters

I. Rationale for Recommendation

The ITC has reason to believe that propylene glycol ethers and esters are substantially used in a variety of consumer products. There is concern about the potential metabolism in humans of these compounds to reproductive toxicants. Occupational and consumer exposures to these chemicals are unknown to the ITC but are considered to be potentially significant. Therefore, TSCA Section 8(a) and 8(d) information is deemed necessary.

TABLE 3.—REVISED GROUP OF PROPYLENE GLYCOL ETHERS AND ESTERS ON THE TSCA SECTION 4(E) PRIORITY TESTING LIST

CAS No.	Chemical Name
108–65–6	Propylene glycol monomethyl ether acetate
110–98–5	Dipropylene glycol
770–35–4	1-Phenoxy-2-propanol
20324–32–7 ...	1-(2-Methoxy-1-methylethoxy)-2-propanol
20324–33–8 ...	Tripropylene glycol methyl ether[1]
28677–93–2 ...	Mathoxy-1-propanol
29387–86–8 ...	Propylene glycol monobutyl ether[1]
29911–28–2 ...	Dipropylene glycol butyl ether
42978–66–5 ...	Tripropylene glycol diacrylate
57018–52–7 ...	Propylene glycol mono-tert-butyl ether

TABLE 3.—REVISED GROUP OF PROPYLENE GLYCOL ETHERS AND ESTERS ON THE TSCA SECTION 4(E) PRIORITY TESTING LIST—Continued

CAS No.	Chemical Name
88917–22–0 ...	Dipropylene glycol monomethyl ether acetate

[1] Added in this the Thirty-First Report. All others are retained from the Twenty-Eighth Report.

II. Recommendation

Nine selected propylene glycol ethers and ethers are retained and two are added to the *Priority Testing List* to obtain information under TSCA Sections 8(a) and 8(d).

III. Supporting Information

Based on the recommendations of CPSC, Food and Drug Administration (FDA) and NIOSH and discussion at ITC meetings, the ITC revises the TSCA section 4(e) *Priority Testing List* to remove 29 of the 38 propylene glycol ethers and esters recommended in the Twenty-Eighth Report and to add 2 chemicals: tripropylene glycol methyl ether and propylene glycol monobutyl ether.

CPSC requested that these chemicals be recommended so that TSCA Section 8(a) and 8(d) information can be obtained. CPSC is interested in learning about the types and quantities of propylene glycol ethers and esters used in consumer products, and possible exposures to propylene glycol ethers and esters that may result from consumer use of these products. In the event of substantial exposure, metabolism studies may be requested in the future. FDA is interested in the available data on dipropylene glycol methyl ether as it is used in cosmetics.

2.2.b. Methyl ethylene glycol ethers and esters

I. Rationale for Recommendation

The ITC has reason to believe that ethylene glycol monomethyl ether acrylate (CAS number 3121–61–7) and tetraethylene glycol monomethyl ether (CAS number 23783–42–8) are used in consumer products. These compounds may be metabolized to reproductive toxicants. Consequently, it is recommended that TSCA Section 8(a) and 8(d) information be solicited. If these chemicals are used in consumer products or have substantial worker exposure, metabolism studies may be needed.

II. Recommendation

Ethylene glycol monomethyl ether acrylate and tetraethylene glycol monomethyl ether remain on the *Priority Testing List* to obtain TSCA Section 8(a) and 8(d) information.

III. Supporting Information

In the ITC's Twenty-Eighth Report, 10 methyl ethylene glycol ethers and esters were added to the TSCA section 4(e) *Priority Testing List* based on concerns of NIOSH about potential reproductive and developmental effects (56 FR 41212, August 19, 1991). The ITC reconsidered these glycol ethers and esters and here removes 8 of them from the *Priority Testing List* on the recommendation of NIOSH. These 8 chemicals have no known industrial or consumer exposures according to the National Occupational Exposure Survey and publicly-available information on chemicals in consumer products. The ITC determined that ethylene glycol monomethyl ether acrylate and tetraethylene glycol monomethyl ether should remain on the *Priority Testing List* because they are likely to have consumer exposures of interest to CPSC.

THE TSCA SECTION 4(E) PRIORITY TESTING LIST

Report	Date	Chemical/Group	Action
22	May 1988	Ethoxylated quaternary ammonium compounds	Recommended
22	May 1988	Imidazolium quaternary ammonium compounds	Recommended
23	November 1988	Tetrakis(2-chloroethyl)ethylene di-phosphate	Recommended with intent-to-designate
23	November 1988	Tris(1,3-dichloro-2-propyl) phosphate	Recommended with intent-to-designate
23	November 1988	Tris(1-chloro-2-propyl) phosphate	Recommended with intent-to-designate
23	November 1988	Tris(2-chloro-1-propyl) phosphate	Recommended with intent-to-designate
23	November 1988	Tris(2-chloroethyl)- phosphate	Recommended with intent-to-designate
23	November 1988	Butyraldehyde	Recommended
25	November 1989	Brominated flame retardants	Recommended
26	May 1990	Isocyanates	Recommended with intent-to-designate

VOL 58 ISS 85 MY 5 1993 UMI

THE TSCA SECTION 4(E) PRIORITY TESTING LIST—Continued

Report	Date	Chemical/Group	Action
26	May 1990	Brominated flame retardants	Recommended
26	May 1990	Alkyl phosphates	Recommended
27	November 1990	Acetophenone	Designated
27	November 1990	Phenol	Designated
27	November 1990	*N,N*-Dimethylaniline	Designated
27	November 1990	Ethylacetate	Designated
27	November 1990	2,6-Dimethylphenol	Designated
27	November 1990	Aldehydes	Recommended with intent-to-designate
27	November 1990	2,4-Dinitrophenol	Recommended
27	November 1990	3,4-Dimethylphenol	Recommended
27	November 1990	*N*-phenyl-1-naphthylamine	Recommended
27	November 1990	Sulfones	Recommended
27	November 1990	Substantially produced chemicals in need of sub-chronic toxicity testing	Recommended
28	May 1991	Acetone	Designated
28	May 1991	*n*-Butanol	Designated
28	May 1991	Isobutanol	Designated
28	May 1991	Di-(2-ethylhexyl)adipate	Designated
28	May 1991	Dimethyl terephthalate	Designated
28	May 1991	Thiophenol	Designated
28	May 1991	*m*-Dinitrobenzene	Recommended
28	May 1991	Allyl alcohol	Recommended
28	May 1991	2,4-Dichlorophenol	Recommended
28	May 1991	Alkynes	Recommended
28	May 1991	Nitroalcohols	Recommended
28	May 1991	Phosphonium compounds	Recommended
28	May 1991	Hydrazines	Recommended
28	May 1991	Oximes	Recommended
28	May 1991	Alkoxysilanes	Recommended
28	May 1991	Aldehyde hydrates	Recommended
28	May 1991	Isothiocyanates	Recommended
28	May 1991	Cyanoacrylates	Recommended
29	November 1991	White phosphorus	Recommended
29	November 1991	Allyl-, bromo-, chloro-, hydroxymethyl diaryl ethers	Recommended
30	May 1992	Siloxanes	Recommended
30	May 1992	Chloroalkyl phosphates	Recommended
31	January 1993	OSHA chemicals with no dermal absorption data	Designated
31	January 1993	Propylene glycol ethers and esters (revised)	Recommended
31	January 1993	Methyl ethylene glycol ethers and esters (revised)	Recommended

Title 3—

The President

Proclamation 6557 of May 3, 1993

Asian/Pacific American Heritage Month, 1993

By the President of the United States of America

A Proclamation

This month we honor the heritage and history of Asian and Pacific Americans and the contributions they have made to our country: to its economic development, its cultural wealth, its scientific and medical achievements, its institutes of education, and its government. As we celebrate the diversity of our people and their heritage, we remember that we are one Nation, united in a common quest for freedom and dignity.

Traders from the Asia-Pacific region reached North America as early as the 16th century, but the first significant wave of immigration began during the late 1800s. From China, Japan, Korea, the Philippines, and the Indian subcontinent they came and found work in America: as miners, railroad workers, farmers, and merchants. These settlers and their children preserved the rich legacy of their homelands while also learning the history of our Nation and embracing the traditions that define it.

While they found many opportunities in America, immigrants from the Asia-Pacific region also were victims of discrimination. Some were denied the right to buy land or become naturalized citizens solely because of their ethnic origin. Such prejudice often led to segregated community structures. Once thought of as ghettos, these neighborhoods are now vibrant cultural assets and magnets for tourism and trade in the cities of which they are a part.

America has made great progress in advancing civil rights since the days when Asian workers were exploited and labored under crushing hardship. A second significant wave of immigration brought doctors, nurses, engineers, musicians, scientists, and other professionals. Now-familiar names like Yo Yo Ma, Midori, Seiji Ozawa, Amy Tan, Michael Chang, and Kristi Yamaguchi today symbolize the rich heritage that Asian and Pacific Americans have added to our culture.

Today Asian and Pacific Americans represent a large portion of our population. The region from which they migrated is now one of the world's most dynamic areas of economic growth. America's trade with Asian and Pacific countries totals more than $300 billion, a greater amount than any other region in the world. The United States maintains alliances with countries from the Pacific such as Japan, Korea, the Philippines, and Thailand. We will continue to promote economic cooperation and the expansion of free markets there. The security of our allies and the advancement of human rights in Asia and the Pacific benefit both our country and the countries of that region.

America is an ongoing experiment, an unfinished work. It is important that we continually strive to fulfill the ideals that attracted the Asian/Pacific peoples and other immigrants to our shores. The next century will present many challenges, but the ethnic diversity that binds us as a Nation will provide us with the energy and hope we need to build a more peaceful and more prosperous world. To honor the achievements of Asian/Pacific Americans and to recognize their contributions to our Nation, the Congress, by Public Law 102–450, has designated the month of May of each year as "Asian/Pacific American Heritage Month."

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim the month of May 1993 as Asian/Pacific American Heritage Month. I call upon the people of the United States to observe this occasion with appropriate programs, ceremonies, and activities. I also call upon all Americans to rededicate themselves to the principles of inclusion, mutual respect, and social justice.

IN WITNESS WHEREOF, I have hereunto set my hand this third day of May, in the year of our Lord nineteen hundred and ninety-three, and of the Independence of the United States of America the two hundred and seventeenth.

William J. Clinton

[FR Doc. 93-10810
Filed 5-4-93; 10:41 am]
Billing code 3195-01-P

Editorial note: For the President's remarks on signing this proclamation, see the *Weekly Compilation of Presidential Documents* (vol. 29, issue 18).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present.
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 12 and June 15 at 9:00 am
WHERE: Office of the Federal Register, 7th Floor Conference Room, 800 North Capitol Street NW, Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202-523-4538

PHILADELPHIA, PA

WHEN: May 25, at 1:00 pm
WHERE: William J. Green, Jr. Federal Building, Conference Room 6306-10, 600 Arch St. Philadelphia, PA
RESERVATIONS: Federal Information Center 1-800-347-1997

Rules and Regulations

Federal Register
Vol. 58, No. 86
Thursday, May 6, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 58

RIN 0581–AA89

[DA–91–017–B]

Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products; General Specifications for Dairy Plants Approved for USDA Inspection and Grading Service

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the General Specifications for Dairy Plants Approved for USDA Inspection and Grading Service (General Specifications) by incorporating provisions to specify the sampling, testing, and recordkeeping requirements relating to an expanded drug residue monitoring program in USDA-approved dairy plants. This action was initiated at the request of the National Association of State Departments of Agriculture (NASDA) and was developed in cooperation with NASDA, the Food and Drug Administration (FDA), dairy trade associations and producer groups.

EFFECTIVE DATE: June 7, 1993.

FOR FURTHER INFORMATION CONTACT: Duane R. Spomer, Chief, Dairy Standardization Branch, USDA/AMS/Dairy Division, room 2750–S, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–7473.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as a "non-major" rule under the criteria contained therein.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This rule does not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

The final rule also has been reviewed in accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* The Administrator, Agricultural Marketing Service, has determined that this final rule will not have a significant economic impact on a substantial number of small entities because participation in the USDA-approved plant program is voluntary and the amendments will not increase the costs to those utilizing the program.

In accordance with the Paperwork Reduction Act of 1980, the information collection requirements that are included in this action have been approved by the Office of Management and Budget (OMB) under OMB Control No. 0581–0110. These amendments increase the frequency of tests for drug residues that must be conducted by USDA-approved dairy plants of loads of producer milk. There are approximately 600 approved dairy plants. The current frequency is at least four tests in 6 months for each producer's milk or commingled sample. This final rule provides that each load of producer milk delivered to a USDA-approved facility must be tested. The current General Specifications require testing of milk for antibiotics. This action amends the General Specifications to require testing for beta lactum drug residues. Records of drug residue tests and records of notifications to State regulatory agencies concerning positive test results and disposition of positive-testing milk are to be retained for a period of 12 months. In addition, current requirements do not stipulate the minimum retention time for somatic cell test results. The amendments specify that somatic cell count records be retained for a period of 12 months.

An occurrence of drug residue in milk or milk products may be a health concern to consumers. USDA has therefore developed a model drug residue monitoring program for manufacturing grade milk. FDA has developed the program for Grade A milk.

In order to establish an expanded drug residue monitoring program concerning milk and milk products originating in USDA-approved dairy plants, USDA is amending the general specifications for dairy plants in part 58, subpart B, of the grading and inspection regulations concerning dairy products, as follows:

1. Provide That All Milk Received in USDA-Approved Plants Be Sampled and Tested for the Presence of Beta Lactam Drugs

Previously, the General Specifications provided for the testing of milk for antibiotics at a minimum frequency of four times in 6 months. These amendments specify that all milk which is received for processing in USDA-approved plants be sampled and tested for beta lactam drugs.

2. Provide That the Testing of Milk Be Completed Prior to Processing

Previously, the General Specifications did not contain requirements for the timely completion and reporting of the antibiotic tests. These amendments specify that testing be completed prior to processing the load of milk.

3. Specify Plant Responsibilities in the Expanded Drug Residue Monitoring Program

The amendments require USDA-approved plants to notify the appropriate State regulatory agency of (a) each occurrence of a load sample testing positive for drug residue; (b) the identity of any producer whose milk causes a load sample to test positive for drug residue; and (c) the intended and final disposition of the load of milk represented in a sample testing positive for drug residue. Milk testing positive for beta lactams is to be disposed of in a manner that removes it from the human and animal food chain, unless reconditioned under FDA guidelines.

4. Make Other Revisions and Editorial Changes in the General Specifications To Reflect the Expansion of the Drug Residue Monitoring Program

The amendments require dairy plants to: (a) Test the milk of new and transfer producers for the presence of drug residues prior to acceptance of the milk at the plant; (b) retain drug residue test results for a minimum of 12 months; (c)

VOL
58
ISS
86
MY
6
1993
UMI

include in a producer's records the results of drug residue tests for the preceding 12 months; and (d) provide field service assistance to farmers regarding drug residue issues.

5. Provide Revisions To Update and Clarify Somatic Cell Testing Requirements

Changes include correcting the action level at which the Wisconsin Mastitis Test must be confirmed.

USDA grade standards are voluntary standards that are developed to facilitate the orderly marketing process. Dairy plants are free to choose whether or not to use the standards. When manufactured or processed dairy products are graded, the USDA regulations governing the grading of dairy products are used. Included in these regulations are the requirements that all graded dairy products be produced in a USDA-approved plant and that charges be assessed for grading and inspection services provided by USDA.

The National Conference on Interstate Milk Shipments is developing a database intended to compile information concerning drug residue test results which are reflective of the milk supply. The Department encourages participation in this voluntary program.

Public Comments

On July 27, 1992, the Department published a proposed rule (57 FR 33130) to amend the General Specifications for Dairy Plants Approved for USDA Inspection and Grading Service. The public comment period closed August 26, 1992. Comments were received from six commenters: Two representing State regulatory agencies, one representing dairy producers, one representing dairy processors, one representing veterinarians, and one representing a dairy cooperative.

Discussion of Comments

1. One commenter was concerned that the proposal duplicated State drug residue monitoring programs and was not consistent with existing State laws.

The Department advocates nationally uniform regulations for monitoring drug residue in the milk supply and has worked closely with the Dairy Division of NASDA to promote uniformity. During the development of the proposal for monitoring drug residue in USDA-approved dairy plants, the Department consulted with NASDA representatives to provide requirements consistent with currently existing State laws. The Department believes the expanded drug residue monitoring program accomplishes this.

2. Two commenters requested that the minimum record retention time be reduced from 12 months to 6 months. These commenters felt the change would provide consistency with the Grade A milk program and reduce recordkeeping requirements.

Since 1975, USDA-approved dairy plants have maintained sediment and bacterial test records for a minimum of 12 months. This action expands the requirement to include drug residue and somatic cell results.

The Department believes that accurate records detailing a 12-month history of drug residue test results is necessary for the USDA-approved dairy plant program. Further, under state programs, three occurrences of positive drug residue tests within a 12-month period will require that State administrative procedures be initiated to suspend the producer's milk shipping privileges. Also, the Department believes that somatic cell test results are equally as important as sediment and bacterial results in evaluating quality histories.

Provisions in the Grade A milk program require State regulatory agencies to maintain a history of milk quality and drug residue test results. The USDA-approved plant program does not impose record retention requirements on State regulatory agencies.

3. One commenter requested the deletion of the requirement that milk buyers obtain quality and drug residue test history for producers transferring milk shipments from another plant.

Since 1975, USDA requirements have specified the transfer of producer quality records when a milk producer changes milk buyers. This action expands the requirements to include a history of drug residue test results.

The Department recognizes the difficulties which occur when a new buyer requests quality records for a transfer producer. However, a producer's quality and drug residue test history is essential in establishing test frequency and determining sanctions.

4. There were several comments recommending changes outside the scope of the proposal. These comments suggested: Changing the requirements for rejecting milk due to bacterial estimate, modifying the list of acceptable somatic cell tests, lowering the maximum allowable bacterial estimate, lowering the maximum allowable somatic cell limit, and using sani-guide discs to determine sediment in milk.

Since the proposal did not request public comment concerning these topics, these comments may be considered as future changes are proposed.

List of Subjects in 7 CFR Part 58

Dairy products, Food grades and standards, Food labeling, Reporting and record keeping requirements.

For the reasons set forth in the preamble, 7 CFR part 58, subpart B, is amended as follows:

PART 58—[AMENDED]

1. The authority citation for 7 CFR part 58, continues to read as follows:

Authority: Agricultural Marketing Act of 1946, Secs. 202–208, 60 Stat. 1087, as amended; 7 U.S.C. 1621–1627, unless otherwise noted.

2. Section 58.132 is revised as follows:

§ 58.132 Basis for classification.

The quality classification of raw milk for manufacturing purposes from each producer shall be based on an organoleptic examination for appearance and odor, a drug residue test, and quality control tests for sediment content, bacterial estimate and somatic cell count. All milk received from producers shall not exceed the Food and Drug Administration's established limits for pesticide, herbicide and drug residues. Producers shall be promptly notified of any shipment or portion thereof of their milk that fails to meet any of these quality specifications.

3. In § 58.133, paragraphs (b)(1), (b)(2), (b)(6), and (c) are revised to read as follows:

§ 58.133 Methods for quality and wholesomeness determination.

* * * * *

(b) *Somatic cell count.* (1) A laboratory examination to determine the level of somatic cells shall be made at least four times in each 6-month period at irregular intervals on milk received from each patron.

(2) A confirmatory test for somatic cells shall be done when a herd sample exceeds either of the following screening test results:

(i) California Mastitis Test—Weak Positive (CMT 1).

(ii) Wisconsin Mastitis Test—WMT value of 18 mm.

* * * * *

(6) An additional sample shall be taken after a lapse of 3 days but within 21 days of the notice required in paragraph (b)(5)(ii) of this section. If this sample also exceeds 1,000,000 per ml., subsequent milkings shall not be accepted for market until satisfactory compliance is obtained. Shipment may be resumed and a temporary status assigned to the producer by the appropriate State regulatory agency when an additional sample of herd milk is tested and found satisfactory. The producer may be assigned a full reinstatement status when three out of four consecutive somatic cell count tests do not exceed 1,000,000 per ml. The samples shall be taken at a rate of not more than two per week on separate days within a 3-week period.

(c) *Drug residue level.* (1) USDA-approved plants shall not accept for processing any milk testing positive for drug residue. All milk received at USDA-approved plants shall be sampled and tested, prior to processing, for beta lactam drug residue. When directed by the regulatory agency, additional testing for other drug residues shall be performed. Samples shall be analyzed for beta lactams and other drug residues by methods evaluated by the Association of Official Analytical Chemists (AOAC) and accepted by the Food and Drug Administration (FDA) as effective in determining compliance with "safe levels" or established tolerances. "Safe levels" and tolerances for particular drugs are established by the FDA. Other test methods evaluated by the Virginia Polytechnic Institute and State University, or by other institutions using equivalent evaluation procedures, and determined to demonstrate accurate compliance results, may be employed on a temporary basis until they are evaluated by the AOAC and accepted or rejected by the FDA.

(2) Individual producer milk samples for beta lactam drug residue testing shall be obtained from each milk shipment as follows:

(i) *Milk in farm bulk tanks.* A sample shall be taken at each farm and shall include milk from each farm bulk tank.

(ii) *Milk in cans.* A sample shall be formed separately at the receiving plant for each can milk producer included in a delivery, and shall be representative of all milk received from the producer.

(3) Load milk samples for beta lactam drug residue testing shall be obtained from each milk shipment as follows:

(i) *Milk in bulk milk pickup tankers.* A sample shall be taken from the bulk milk pickup tanker after its arrival at the plant and prior to further commingling.

(ii) *Milk in cans.* A sample representing all of the milk received on a shipment shall be formed at the plant, using a sampling procedure that includes milk from every can on the vehicle.

(4) *Follow-up to positive-testing samples.* (i) When a load sample tests positive for drug residue, the appropriate State regulatory agency shall be notified immediately of the positive test result and of the intended disposition of the shipment of milk containing the drug residue.

(ii) Each individual producer sample represented in the positive-testing load sample shall be singly tested to determine the producer of the milk sample testing positive for drug residue. Identification of the producer responsible for producing the milk testing positive for drug residue, and details of the final disposition of the shipment of milk containing the drug residue, shall be reported immediately to the appropriate agency.

(iii) Milk shipment from the producer identified as the source of milk testing positive for drug residue shall cease immediately and may resume only after a sample from a subsequent milking does not test positive for drug residue.

4. Sections 58.136 through 56.140 are revised to read as follows:

§ 58.136 Rejected milk.

A plant shall reject specific milk from a producer if the milk fails to meet the requirements for appearance and odor (§ 58.133(a)), if it is classified No. 4 for sediment content (§ 58.134), or if it tests positive for drug residue (§ 58.133(c)).

§ 58.137 Excluded milk.

A plant shall not accept milk from a producer if:

(a) The milk has been in a probational (No. 3) sediment content classification for more than 10 calendar days (§ 58.134);

(b) The milk has been classified "Undergrade" for bacterial estimate for more than 4 successive weeks (§ 58.135);

(c) Three of the last five milk samples have exceeded the maximum somatic cell count level of 1,000,000 per ml. (§ 58.133(b)(6)); or

(d) The producer's milk shipments to either the Grade A or the manufacturing grade milk market currently are not permitted due to a positive drug residue test (§ 58.133(c)(4)).

§ 58.138 Quality testing of milk from new producers.

A quality examination and tests shall be made on the first shipment of milk from a producer shipping milk to a plant for the first time or resuming shipment to a plant after a period of non-shipment. The milk shall meet the requirements for acceptable milk, somatic cell count and drug residue level (§§ 58.133, 58.134 and 58.135). The buyer shall also confirm that the producer's milk is currently not excluded from the market (§ 58.137). Thereafter, the milk shall be tested in accordance with the provisions in §§ 58.133, 58.134 and 58.135.

§ 58.139 Record of tests.

Accurate records listing the results of quality and drug residue tests for each producer shall be kept on file at the plant. Additionally, the plant shall obtain the quality and drug residue test records (§ 58.148(a), (e) and (g)) for any producer transferring milk shipment from another plant. These records shall be available for examination by the inspector.

§ 58.140 Field service.

A representative of the plant shall arrange to promptly visit the farm of each producer whose milk tests positive for drug residue, exceeds the maximum somatic cell count level, or does not meet the requirements for acceptable milk. The purpose of the visit shall be to inspect the milking equipment and facilities and to offer assistance to improve the quality of the producer's milk and eliminate any potential causes of drug residues. A representative of the plant should routinely visit each producer as often as necessary to assist and encourage the production of high quality milk.

5. In § 58.148, paragraphs (e), (f) and (g) are added to read as follows:

§ 58.148 Plant records.

* * * * *

(e) Load and Individual drug residue test results. Retain for 12 months.

(f) Notifications to appropriate State regulatory agencies of positive drug residue tests and intended and final dispositions of milk testing positive for drug residue. Retain for 12 months.

(g) Somatic cell count test results on raw milk from each producer. Retain for 12 months.

* * * * *

Dated: April 30, 1993.

L.P. Massaro,

Acting Administrator.

[FR Doc. 93–10717 Filed 5–5–93; 8:45 am]

BILLING CODE 3410–02–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 93–NM–49–AD; Amendment 39–8567; AD 93–08–19]

Airworthiness Directives; British Aerospace Model ATP Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

VOL
58
ISS
86
MY
6
1993
UMI

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to all British Aerospace Model ATP series airplanes. This action requires measuring the electrical bonding resistance between certain components in engine nacelle module 3 and the airframe earth on the left and right engine nacelles, and modifying the electrical bonding, if necessary. This amendment is prompted by a recent report of loss of engine power on a Model ATP series airplane due to malfunctioning of the de-ice system and subsequent ingestion of ice into the engine, which has been attributed to insufficient electrical bonding. The actions specified in this AD are intended to prevent multiple engine power loss during flight in freezing precipitation.

DATES: Effective May 6, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 6, 1993.

Comments for inclusion in the Rules Docket must be received on or before July 6, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–49–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041–6029. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on all British Aerospace Model ATP series airplanes. The CAA advises that there has been a recent report of loss of engine power on a Model ATP series airplane due to ingestion of ice into the engine. The engine ingested an excessive amount of ice due to malfunctioning of the de-ice system, caused by an interruption of the engine de-ice timer operation; the interruption has been attributed to insufficient electrical bonding between the Thorstrand material in engine nacelle module 3 and the airframe earth. (Thorstrand is glass-fiber aluminum impregnated matting, which is located just below the surface of the composite material makeup of engine nacelle module 3.) This condition, if not corrected, could result in multiple engine power loss during flight in freezing precipitation.

Jetstream Aircraft, Ltd., has issued Service Bulletin ATP–24–55, Revision 1; dated April 24, 1993, that describes procedures for measuring the electrical bonding resistance between certain components in engine nacelle module 3 and the airframe earth on the left and right engine nacelles, and modifying the electrical bonding, if necessary. The modification involves machining the outer surface of engine nacelle module 3 to obtain improved electrical conductivity between the Thorstrand material and the throttle stepper motor controller (referred to in the Aircraft Maintenance Manual as a stepper motor drive unit). Depending on the results of electrical bonding measurements, the modification may also entail installing an additional electrical bonding lead between the main body casing of the throttle stepper motor controller and the airframe earth. Installation of the modification will eliminate static discharging between engine nacelle module 3 and the throttle stepper motor controller. Static discharging in this area can cause malfunction of the engine air intake de-ice system. The CAA classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD is being issued to prevent multiple engine power loss during flight in freezing precipitation. This AD requires measuring the electrical bonding resistance between certain components in engine nacelle module 3 and the airframe earth on the left and right engine nacelles, and modifying the electrical bonding, if necessary. The actions are required to be accomplished in accordance with the service bulletin described previously.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "**ADDRESSES.**" All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–NM–49–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93–08–19 British Aerospace: Amendment 39–8567. Docket 93–NM–49–AD.

Applicability: All Model ATP series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent multiple engine power loss during flight in freezing precipitation, accomplish the following:

(a) Within 16 days after the effective date of this AD, measure the electrical resistance of the electrical bonding between certain components in engine nacelle module 3 and the airframe earth on the left and right engine nacelles in accordance with Jetstream Aircraft, Ltd., Service Bulletin ATP–24–55, Revision 1, dated April 24, 1993.

(1) If the electrical resistance measures less than 3 ohms, prior to further flight, reassemble the throttle stepper motor controller installation, overseal all bolts, and perform an operational test of the standby power lever controls in accordance with the service bulletin.

(2) If the electrical resistance measures 3 or more ohms, prior to further flight, accomplish the actions described in paragraphs 2.A.4) through 2.A.14) of the Accomplishment Instructions of the service bulletin, as applicable.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The measurement, modification, oversealing, and operational test shall be done in accordance with Jetstream Aircraft, Ltd., Service Bulletin ATP–24–55, Revision 1, dated April 24, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041–6029. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on May 6, 1993.

Issued in Renton, Washington, on April 27, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 260

[Docket No. RM93–16–000]

FERC Form No. 15, Interstate Pipeline's Annual Report of Gas Supply, and FERC Form No. 16, Report on Gas Supply and Requirements; Order Extending Time for Compliance

Issued: April 27, 1993.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order extending time for compliance.

SUMMARY: The Commission is considering whether natural gas pipeline companies should continue to be required to file FERC Form No. 15, Interstate Pipeline's Annual Report of Gas Supply, and FERC Form No. 16, Report of Gas Supply and Requirements, in light of the ongoing general industry restructuring. Pending the completion of its review, this order extends the time specified in the Commission's regulations for the filing of the two forms until July 31, 1993.

EFFECTIVE DATE: This order will become effective on the date of issuance, April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Gordon Wagner, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 219–0122.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 3104, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPS, set your communications software to use 300, 1200, or 2400 bps, full duplex, no parity, 8 data bits, and 1 stop bit. CIPS can also be accessed at 9600 bps by dialing (202) 208–1781. The full text of this rule will be available on CIPS for 30 days from the date of issuance. The complete text of diskette in Wordperfect format may also be

VOL 58 ISS 86 MY 6 1993 UMI

purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in room 3104, 941 North Capitol Street, NE., Washington, DC 20426.

Order Extending Time for Compliance

The Commission is considering whether natural gas pipeline companies should continue to be required to file Form No. 15 and Form No. 16 in light of the general industry restructuring which is ongoing as a result of Order No. 636.[1] Pending the completion of its review, the time specified in the Commission's regulations for the filing of Form No. 15, Interstate Pipeline's Annual Report of Gas Supply, 18 CFR 260.7, and Form No. 16, Report of Gas Supply and Requirements, 18 CFR 260.12, is hereby extended to July 31, 1993.

By the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 63

[FRL-4652-2]

National Emission Standards for Hazardous Air Pollutants; Compliance Extensions for Early Reductions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of complete enforceable commitments received.

SUMMARY: This notice provides a list of companies that have submitted "complete" enforceable commitments to the EPA under the Early Reductions Provisions [section 112(i)(5)] of the Clean Air Act (CAA) as amended in 1990. The list covers commitments determined by the EPA to be complete through April 6, 1993 and includes the name of each participating company, the associated emissions source location, and the EPA Regional Office which is the point of contact for further information. This is one of a series of notices of this type. The most recent notice listed sixteen sources which have had commitments deemed complete by the EPA. The EPA will publish additional lists of complete submittals on a monthly basis, as needed.

FOR FURTHER INFORMATION CONTACT: David Beck (telephone: 919-541-5421), Rick Colyer (telephone: 919-541-5262), or Mark Morris (telephone: 919-541-5416), Emission Standards Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Caroline 27711 for general information on the Early Reductions Program. For further information on specific submittals received under the Early Reductions Program contact the appropriate EPA Regional Office representative listed below.

Region I	Janet Beloin	(617) 565-2734
Region II	Umesh Dholakia or Hansh Patel	(212) 264-6676
Region III	Alice Chow	(215) 597-6550
Region IV	Anthony Toney	(404) 347-2864
Region V	Aurelio Alvarez	(312) 353-8657
Region VI	Tom Driscoll	(214) 655-7549
Region VII	Carmen Torres-Ortega	(913) 551-7873
Region VIII	Cory Potash	(303) 293-1886
Region IX	Ed Pike	(415) 744-1248
Region X	Chris Hall	(206) 553-1949

SUPPLEMENTARY INFORMATION: Under section 112(i)(5) of the Clean Air Act (CAA) as amended in 1990, an existing source of hazardous air pollutant emissions may obtain a 6-year extension of compliance with an emission standard promulgated under section 112(d) of the CAA, if the source achieves sufficient reductions of hazardous air pollutant emissions prior to certain dates. On October 29, 1992, the EPA Administrator signed a final rule to implement this "Early Reductions" provision. The final rule was published in the **Federal Register** on December 29, 1992, (57 FR 61970).

Sources choosing to participate in the Early Reductions Program must document base year emissions and post-reduction emissions to show that sufficient emission reductions have been achieved to qualify for a compliance extension. As a first step toward this demonstration, some sources may be required to submit an enforceable commitment containing base year emission information, or if not required, may voluntarily submit such emission information to the EPA for approval. As stated in the proposed Early Reductions rule, the EPA will review these submittals to verify emission information, and also will provide the opportunity for public review and comment. Following the review and comment process and after sources have had the chance to revise submittals (if necessary), the EPA will approve or disapprove the base year emissions.

To facilitate the public review process for program submittals, the proposed rule contains a commitment by the EPA to give monthly public notice of submittals received which have been determined to be complete and which are about to undergo technical review within the EPA. Members of the public wishing to obtain more information on a specific submittal then may contact the appropriate EPA Regional Office representative listed above.

Eighty-seven enforceable commitments have been received by the EPA, and nineteen have been determined to be complete to date. Some of the early reductions submittals received actually contain multiple enforceable commitments; that is, some companies have decided to divide their particular plant sites into more than one early reductions source. Each of these sources must achieve the required

[1] Pipeline Service Obligations and Revisions to Regulations Governing Self-Implementing Transportation; and Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol, 57 FR 13267 (April 16, 1992), III FERC Stats. & Regs. Preambles ¶ 30,939 (April 8, 1992); *order on reh'g*, Order No. 636-A, 57 FR 36128 (August 12, 1992), III FERC Stats. & Regs. Preambles ¶ 30,950 (August 3, 1992); *order on reh'g*, Order No. 636-B, 57 FR 57911 (December 8, 1992), 61 FERC ¶ 61,272 (November 27, 1992). The final rule requires significant alterations in the structure of interstate natural gas pipeline services and provides a schedule for implementing that restructuring. The rule applies to all pipelines that provide open-access transportation service.

emissions reductions individually to qualify for a compliance extension. The purpose of today's notice is to add commitments from Monsanto, Polyken, and Occidental Chemical to the previously published list of commitments that have been determined to be complete by EPA under the Early Reductions Program. Since the last notice, EPA has deemed complete one commitment from Monsanto for a source in Springfield, Massachusetts, one from Polyken in Franklin, Kentucky, and one from Occidental Chemical in Belle, West Virginia. As the remaining submittals are determined to be complete, they will appear in subsequent monthly notices.

At a later time (most likely within one to three months of today's date), the EPA Regional Offices will provide a formal opportunity for the public to comment on the submittals added to the list by today's notice. To do this, the Regional Office will publish a notice in the source's general area announcing that a copy of the source's submittal is available for public inspection and that comments will be received for a 30 day period.

The table below lists those companies that have made complete enforceable commitments or base year emission submittals under the Early Reductions Program through April 6, 1993. These submittals are undergoing technical review within the EPA at this time.

TABLE 1

(Complete Enforceable Commitments as of April 6, 1993)

Company	Location	EPA region
1. Kalama Chemical, Inc	Kalama, WA	X
2. Amoco Chemical Co. (first source)	Texas City, TX	VI
3. Amoco Chemical Co. (second source)	Texas City, TX	VI
4. Johnson & Johnson Medical, Inc	Sherman, TX	VI
5. PPG Industries	Lake Charles, LA	VI

BILLING CODE 6560-50-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6969

[NM-920-4210-06; NMNM 034478]

Revocation of Public Land Order No. 5245; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes in its entirety a public land order which withdrew 13,277.03 acres of public lands for use by the Bureau of Indian Affairs in connection with the Navajo Indian Irrigation Project. The lands are presently held in trust for the Navajo Tribe of Indians by the United States under Public Land Order No. 5624. The locatable minerals are controlled by the Navajo Tribe of Indians and are not available for mining. The lands have been and will remain open to mineral leasing. This is a record-clearing action only.

EFFECTIVE DATE: May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Georgiana E. Armijo, BLM New Mexico State Office, PO Box 27115, Santa Fe, New Mexico, 87502, 505-438-7594.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. Public Land Order No. 5245, which withdrew the following described lands for the Navajo Indian Irrigation Project, is hereby revoked in its entirety:

New Mexico Principal Meridian

T. 28 N., R. 11 W.,
- Sec. 30, lots 2, 3, and 4, NE¼, SE¼NW¼, E½SW¼, N½SE¼, and SW¼SE¼.

T. 26 N., R. 12 W.,
- Sec. 2, lots 1 and 2, S½NE¼, and E½SE¼.

T. 27 N., R. 12 W.,
- Sec. 1, lots 3 and 4, S½NW¼, NW¼SW¼, and S½SW¼;
- Sec. 2;
- Sec. 3, lots 1 to 4, inclusive, S½N½, N½SW¼, SE¼SW¼, and SE¼;
- Sec. 5, lots 1 and 2, S½NE¼, NE¼SE¼, and S½SE¼;
- Sec. 8, E½ and E½W½;
- Sec. 11;
- Sec. 17, NE¼, E½NW¼, and E½SE¼;
- Sec. 21, E½;
- Sec. 22;
- Sec. 26, S½;
- Sec. 27, N½, E½SW¼, and SE¼;
- Sec. 28, N½NE¼;
- Sec. 34, NE¼NE¼ and NE¼SE¼;
- Sec. 35, W½.

T. 28 N., R. 12 W.,
- Sec. 13, SW¼SW¼;
- Sec. 14, NE¼SW¼, NW¼SE¼, and S½S½;
- Sec. 21, S½NW¼ and SE¼;
- Sec. 22, NW¼SW¼, S½SW¼, and SW¼SE¼;
- Sec. 23, E½, N½NW¼, SE¼NW¼, and S½SW¼;
- Sec. 24, W½NW¼, SW¼, and SW¼SE¼;
- Sec. 25 to 28, inclusive;
- Sec. 29, SE¼NE¼ and E½SE¼;

BILLING CODE 4310-FB-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 1301

RIN 0970-AB03

Head Start Program

AGENCY: Administration on Children, Youth and Families (ACYF) Administration for Children and Families (ACF).

ACTION: Final rule.

SUMMARY: The Administration on Children, Youth and Families is amending 45 CFR 1301.32 to add the Office of Management and Budget (OMB) approval number for information collection requirements in the Head Start Grants Administration rule.

DATES: This amendment is effective May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Joseph A. Mottola, Acting Commissioner, Administration on Children, Youth and Families, P.O. Box 1182, Washington, DC 20013, (202) 205-8347.

SUPPLEMENTARY INFORMATION:

Background

The Administration on Children, Youth and Families published a final rule on September 14, 1992 ((57 FR 41881), which revises and clarifies for Head Start grantees the requirements implementing the statutory provision that limits development and administrative costs to 15 percent of total costs. The final rule also clarifies that training and technical assistance funds awarded to grantees must be included in total approved program costs, and are therefore subject to the 20 percent non-Federal matching requirement.

Purpose of Amendment to Section 1301.32

Paragraphs (f)(2) and (3) of 45 CFR 1301.32, in the September final rule, contain information collection requirements for which an OMB approval number is required. In addition, OMB requires the approval number to be displayed in the rule. OMB approved and assigned a number to the information collection requirements in § 1301.32 on January 26, 1993. This amendment adds that number at the end of the section.

Waiver of Notice and Comment Procedures

The Administrative Procedure Act (5 U.S.C. 553(b)) requires that a notice of proposed rulemaking be published unless the Department finds, for good cause, that such notice and opportunity for public comment is impracticable, unnecessary, or contrary to the public interest. In this instance, the rule in question effects only a technical change by including the OMB Control Number at the end of the section that contains information collection requirements. Accordingly, the Department has determined that it would be unnecessary to use notice and comment procedures in issuing this amendment to display an OMB Control Number.

Impact Analyses

As the only purpose of this rule is to display the OMB control number at the end of 45 CFR 1301.32, no impact analyses is required.

List of Subjects in 45 CFR Part 1301

Development and administrative costs, Dual benefit costs, Head Start, Indirect costs, Program costs, Total approved costs.

(Catalog of Federal Domestic Assistance Program Number 93.600, Project Head Start)

Dated: April 22, 1993.

Neil J. Stillman,

Deputy Assistant Secretary for Information Resources Management.

For the reasons set forth in the preamble, 45 CFR part 1301 is amended as follows:

1. The authority citation for part 1301 continues to read as follows:

Authority: 42 U.S.C. 9831 et seq.

2. Section 1301.32 is amended by adding the OMB Control Number at the end of the section.

§ 1301.32 Limitation on costs of development and administration of a Head Start program.

* * * * *

(Information collection requirements contained in paragraphs (f) (2) and (3) of this section were approved on January 26, 1993, by the Office of Management and Budget under Control Number 0980-1043).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90-214; RM-7101; RM-7226]

Radio Broadcasting Services; Homerville, Lakeland and Statenville, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document grants a petition for reconsideration filed by Lakeland Broadcasters, Inc. of the Report and Order in this proceeding. See 56 FR 51844, October 16, 1991. This Memorandum Opinion and Order substitutes Channel 290C3 for Channel 290A and modifies the license of Station WHFE(FM), Lakeland, Georgia, to reflect the new channel; substitutes Channel 254A for Channel 288A and modifies the license of Station WBTY (FM), Homerville, Georgia, to reflect operation on the new channel; and allots Channel 248A in lieu of Channel 254A and instructs the permittee, La Taurus Productions, Inc., to amend its construction permit for Statenville, Georgia. This document further specifies that Station WXMK(FM), Dock Junction, Georgia and Station WQHL (FM), Live Oak, Florida must amend their pending applications to adhere to the minimum distance separation requirements of § 73.211 of the Commission's rules. See supplemental information, *infra*. With this action, the proceeding is terminated.

EFFECTIVE DATE: June 14, 1993.

FOR FURTHER INFORMATION CONTACT: Elizabeth Beaty, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Memorandum Opinion and Order, MM Docket No. 90-214, adopted April 14, 1993, and released April 30, 1993. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, ITS, Inc., (202) 857-3800, 1919 M Street, NW., room 246, Washington, DC 20036 or 2100 M Street, NW., Washington, DC 20037.

The coordinates for Channel 290C3 at Lakeland, Georgia, are North Latitude 31-02-25 and West Longitude 83-05-00, with a site restriction 1.3 kilometers (.08 miles) west of the community. The coordinates for Channel 254A at Homerville, Georgia, are those of its license site, North Latitude 31-02-04 and West Longitude 82-51-50. The coordinates for Channel 248A at Statenville, Georgia, are North Latitude 30-45-40 and West Longitude 82-52-45, with a site restriction 15.5 kilometers (9.6 miles) northeast of the community.

GENERAL SERVICES ADMINISTRATION

48 CFR Part 509

[APD 2800.12A, CHGE 45]

General Services Administration Acquisition Regulation; Administrative Records for Debarment and Suspension

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration Acquisition Regulation (GSAR), chapter 5 (APD 2800.12A), is amended by adding a new paragraph to provide for furnishing parties a copy of the administrative record in a debarment proceeding, and to redesignate other paragraphs; to add a new paragraph to provide for furnishing parties a copy of the administrative record in a suspension proceeding, and to redesignate other paragraphs. The intended effect is to simplify the process for releasing documents in the administrative record to parties proposed for debarment or suspension.

EFFECTIVE DATE: May 21, 1993.

FOR FURTHER INFORMATION CONTACT: Les Davison, Office of GSA Acquisition Policy (202) 501-1224.

SUPPLEMENTARY INFORMATION:

A. Public Comments

A notice of proposed rulemaking was published in the **Federal Register** on March 16, 1992 (57 FR 10454). Favorable comments were received from the Coalition for Government Procurement. The Coalition indicated it believed the change would simplify the release of documents to parties proposed for debarment or suspension and help ensure that Government suspension and debarment proceedings are conducted in an open and fair manner.

B. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule.

C. Regulatory Flexibility Act

GSA certifies that the final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because the rule will make it easier for parties proposed for debarment or suspension, including small entities, to obtain the administrative record which formed the basis for the decision to propose debarment or suspension. Accordingly, the rule will have a beneficial impact on small entities.

D. Paperwork Reduction Act

This rule does not contain information collection requirements that require the approval of OMB under 44 U.S.C. 3501 *et seq.*

List of Subjects in 48 CFR Part 509

Government procurement.

1. The authority citation for 48 CFR part 509 continues to read as follows:

Authority: 40 U.S.C. 486(c).

VOL 58 ISS 86 MY 6 19 93 UMI

PART 509—CONTRACTOR QUALIFICATIONS

2. Section 509.406–3 is amended by redesignating paragraphs (b)(6) through (9) as (b)(7) through (10) and republishing them as set forth below and adding a new paragraph (b)(6) to read as follows:

§ 509.406–3 Procedures.

* * * * *

(b) * * *

(6) Upon request, the affected party will be furnished a copy of the administrative record which formed the basis for the decision to propose debarment. If there is a reason to withhold from the party any portion of the record, the party will be notified that a portion of the record is being withheld and will be informed of the reasons for the withholding.

(7) In actions not based on a conviction or judgment, the party may request a fact-finding hearing to resolve a genuine dispute of material fact. The party shall identify the material facts in dispute and the basis for disputing the facts. If the debarring official determines that there is a genuine dispute of material fact, the debarring official shall refer the matter to the fact-finding official. The fact-finding official will schedule a hearing within 20 calendar days of receipt of the debarring official's request. Extensions may be granted for good cause upon the request of the party or the agency.

(8) The purpose of a fact-finding hearing is to:

(i) Afford the affected party the opportunity to dispute material facts relating to the proposed debarment through the submission of oral and written evidence;

(ii) Resolve facts in dispute and provide the debarring official with written findings of fact based on a preponderance of evidence; and

(iii) Provide the debarring official with a determination as to whether a cause for debarment exists, based on facts as found.

(9) Hearings will be conducted by the fact-finding official in accordance with rules consistent with FAR 9.406–3(b)(2) promulgated by that official.

(10) The fact-finding official will notify the affected parties of the schedule for the hearing. The fact-finding official shall deliver written findings of fact to the debarring official (together with a transcription of the proceeding, if made) within 20 calendar days after the hearing record closes.

3. Section 509.407–3 is amended by redesignating paragraph (b) (5) and (6) as (b) (6) and (7) and revising them as set forth below and adding a new paragraph (b)(5) to read as follows:

§ 509.407–3 Procedures.

* * * * *

(b) * * *

(5) Upon request, a copy of the administrative record will be furnished to the affected party under the guidelines set forth at 509.406–3(b)(6).

(6) Fact-finding hearings will not be conducted in actions based on indictments, or in cases in which the suspending official determines pursuant to FAR 9.407–3(b)(2) not to refer a matter to the fact-finding official. A party may request a fact-finding hearing to resolve genuine disputes of material fact in other cases. The party shall identify the material facts in dispute and the basis for disputing the facts. If the suspending official determines that there is a genuine dispute of material fact, the suspending official shall refer the matter to the fact-finding official. The fact-finding official will schedule a hearing within 20 calendar days of receipt of the suspending official's request. Extensions may be requested by the party or the agency.

(7) The purpose of a fact-finding hearing is to:

(i) Afford the affected party the opportunity to dispute facts relating to the suspension action through the submission of oral and written evidence;

(ii) Determine whether, in light of the evidence presented, there is adequate evidence to suspect that the material allegations in the notice are true; and

(iii) Provide the suspending official with a determination as to whether the evidence is adequate to support a cause of suspension. Hearings will be conducted as outlined in 509.406–3(b)(9).

Dated: March 19, 1993.

Richard H. Hopf, III,

Associate Administrator for Acquisition Policy.

BILLING CODE 6820–61–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 222

[Docket No. 921077–3081]

Endangered and Threatened Species; Saimaa Seal

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NMFS is listing the Saimaa seal (*Phoca hispida saimensis*) as endangered under the endangered Species Act of 1973 (ESA). NMFS used the best available scientific and commercial information to make this determination. The Saimaa seal is a subspecies of the ringed seal (*Phoca hispida*) that has adapted to a freshwater environment. Scientists estimate the population at about 160–180. The seals are limited in range to Lake Saimaa in eastern Finland.

EFFECTIVE DATE: June 7, 1993.

FOR FURTHER INFORMATION CONTACT: Dean Wilkinson, Office of Protected Resources, NMFS, 1335 East-West Highway, Silver Spring, MD 20910, 301–713–2322.

SUPPLEMENTARY INFORMATION:

Background

The ESA is administered jointly by the U.S. fish and Wildlife Service (USFWS), the Department of the Interior, and NMFS. NMFS has jurisdiction over pinniped species (except walrus) and makes determinations under section 4(a) of the ESA as to whether such species should be listed as endangered or threatened. The USFWS maintains and publishes the List of Endangered and Threatened Wildlife in 50 CFR part 17 for all species determined by NMFS or USFWS to be endangered or threatened. A list of threatened and endangered species under the jurisdiction of NMFS is also contained in 50 CFR 227.4 and 223.23(a), respectively.

The ESA defines "species" to include any subspecies of fish, wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife that interbreeds when mature.

Section 4(a)(1) of the ESA and NMFS listing regulations set forth procedures for listing species. Based on the best available scientific and commercial information, the Secretary of Commerce must determine, through the regulatory process, if a species is endangered or threatened based upon one or a combination of the following factors:

(1) The present or threatened destruction, modification, or curtailment of its habitat or range;

(2) Overutilization for commercial, recreational, scientific, or educational purposes;

(3) Disease or predation;

(4) Inadequacy of existing regulatory mechanisms;

(5) Other natural or man-made factors affecting its continued existence.

NMFS conducted a status review of the Saimaa seal and concluded that the species is endangered based on listing factors (1), (4), and (5). NMFS then published a proposed rule (57 FR 60162, December 18, 1992) with a 60-day comment period. The proposed rule contained a background discussion of specific information leading to this rule. Background information previously presented will not be repeated here.

Comments and Responses

Four written comments were received in response to the proposed rule from: The American Society of Mammalogists; the American Association of Zoological Parks and Aquariums; the Marine Mammal Center in Sausalito, California; and a scientist who has conducted research on the species. All supported the proposed listing.

Two of the commenters noted that the Seal Specialists Group of the International Union for the Conservation of Nature and Natural Resources has determined that the Saimaa seal should be listed as endangered. The commenters stated that an endangered listing would be appropriate because it would be consist with the international classification.

One commenter pointed out that the Ministry of the Environment in Finland has developed a plan to protect two other areas as natural parks in Lake Saimaa during the next 10 years. When these parks are in place, the core parts of the four breeding areas will be protected. The commenter pointed out, however, that only terrestrial areas are included in the parks, but that the Government of Finland is considering a law making it possible to incorporate aquatic areas into the parks. In order to do this, it will be necessary to purchase the aquatic areas from private holders.

This comment reinforces two of the points contained in the proposed rule. First, habitat alterations have contributed to the decline of the population, and not all of the breeding areas are currently protected. In addition, although the Government of Finland has taken protective measures, additional regulatory action would help preserve the species. The contemplated actions would be likely to reduce mortality in juvenile seals and could make a significant contribution to the recovery of the species.

Determination

Based on the best available scientific and commercial data, NMFS has determined that the Saimaa seal should be classified as endangered. NMFS has determined that this condition is caused by a combination of the factors specified under section 4(a)(1) of the ESA.

Recommended Critical Habitat

Regulations regarding listing of species and designation of critical habitat (50 CFR 424.12(h)), specify that critical habitat cannot be designated in foreign countries or other areas outside U.S. jurisdiction. Because the range of the Saimaa seal is solely outside of U.S. jurisdiction, no critical habitat will be designated.

Classification

The 1982 amendments of the ESA, in section 4(b)(1)(A), restrict the information that may be considered when assessing species for listing. Based on this limitation of criteria for a listing decision and the opinion in *Pacific Legal Foundation* v. *Andrus*, 675 F. 2d 829 (6th cir., 1981), NMFS has categorically excluded all endangered species listings from environmental assessment requirements of the National Environmental Policy Act (48 FR 4413; February 6, 1984).

As noted in the conference report on the 1982 amendments to the ESA, economic considerations have no relevance to determinations regarding the status of species. Therefore, the economic analysis requirements of Executive Order 12291 and the Regulatory Flexibility Act are not applicable to the listing process. Similarly, listing actions are not subject to the requirements of Executive Order 12612.

This rule does not contain a collection-of-information requirement subject to the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 222

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Dated: April 28, 1993.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration.

For the reasons set forth in the preamble, 50 CFR part 222 is amended as follows:

PART 222—ENDANGERED FISH OR WILDLIFE

1. The authority citation for Part 222 continues to read as follows:

Authority: 16 U.S.C. 1531–1543.

§ 222.23 [Amended]

2. In § 222.23, paragraph (a) is amended by adding the phrase "Saimaa seal (*Phoca hispida saimensis*);" immediately after the phrase "Mediterranean monk seal (*Monachus monachus*);" in the second sentence.

50 CFR Part 285

[Docket No. 920407–2519]

Atlantic Tuna Fisheries; Bluefin Tuna

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure of the southern longline component of the Incidental Catch category.

SUMMARY: NMFS issues this notice to close the fishery for Atlantic bluefin tuna conducted by longline vessels permitted in the Incidental Catch category and operating in the Regulatory Area south of 36°00′ N latitude. Closure of this fishery is necessary because the total annual quota of 54 mt of Atlantic bluefin tuna allocated for this subcategory has been attained. The intent of this action is to prevent overharvest of the quota established for this fishery.

EFFECTIVE DATES: The closure is effective 0001 hours local time May 4, 1993 through December 31, 1993.

FOR FURTHER INFORMATION CONTACT: Aaron E. King, 301–713–2347 or Kevin B. Foster, 508–281–9260.

SUPPLEMENTARY INFORMATION: Regulations promulgated under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) regulating the harvest of Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 285.

Section 285.22(e)(2) of the regulations provides for an 1993 annual quota of 85 mt of Atlantic bluefin tuna to be harvested from the Regulatory Area by longline vessels permitted in the Incidental Catch category. Of the 85 mt quota for longline vessels, no more than 67 mt can be harvested in the area south of 36°00′ N latitude.

If a quota in any category, or as appropriate, subcategory, has been exceeded or has not been reached, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), is required under § 285.22(h) to subtract the overharvest from, or add the underharvest to, that quota for 1993; provided that the total of the 1992 harvest plus the 1993 adjusted quotas and the reserve does not exceed 2,497 mt.

The longline component of the Incidental Catch category fishery for Atlantic bluefin tuna operating south of

VOL 58 ISS 86 MY 6 1993 UMI

36°00′ N. latitude in the Regulatory Area, exceeded its quota for 1992 by 13.2 mt. This overharvest was dealt with in a separate action, and is further explained in **Federal Register** notice 57 FR 59310, published December 15, 1992, resulting in an adjusted 1993 maximum harvest for the southern longline Incidental Catch subcategory of 54 mt.

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), is authorized under § 285.20(b)(1) to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the total catch of Atlantic bluefin tuna will equal any quota under § 285.22. The Assistant Administrator is further authorized under § 285.20(b)(1) to prohibit the fishing for, or retention of, Atlantic bluefin tuna by those fishing in the category subject to the quota when the catch of tuna equals the quota established under § 285.22. The Assistant Administrator has determined, based on the reported catch, that the annual quota of Atlantic bluefin tuna for longline vessels fishing in the Regulatory Area will be attained by May 4, 1993. Fishing for, and retention of, Atlantic bluefin tuna south of 36°00′ N. latitude harvested under § 285.22(e)(2) must cease at 0001 local time on May 4, 1993. During the closure of the fishery south of 36°00′ N. latitude, it is prohibited to catch with longline gear, or possess Atlantic bluefin tuna taken with longline gear, south of 36°00′ N. latitude, including possession to land (i.e., offload) the fish shoreside. Fishing for Atlantic bluefin tuna by longline vessels possessing an Incidental catch permit, may continue north of 36°00′ N. latitude, until the quota is reached and closure occurs. Landing (i.e., offloading), or entering port with the intent to offload, of fish caught north of 36°00′ N. latitude, however, is restricted to ports north of 36°00′ N. latitude.

Classification

This action is required by 50 CFR 285.20(b)(1) and complies with E.O. 12291.

BILLING CODE 3510-22-M

50 CFR Part 661

[Docket No. 930402-3102]

Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule for 1993 fishery management measures; request for comments.

SUMMARY: The Secretary of Commerce (Secretary) issues an emergency interim rule to establish fishery management measures for the ocean salmon fisheries off Washington, Oregon, and California from May 1 through May 31, 1993. Specific fishery management measures vary by fishery and area. Together they establish fishing areas, seasons, quotas, legal gear, recreational fishing days and catch limits, possession and landing restrictions, and minimum lengths for salmon taken in the exclusive economic zone (3–200 nautical miles) off Washington, Oregon, and California. Based on concerns regarding Klamath River fall chinook salmon, the Secretary has disapproved the proposed 1993 salmon seasons recommended by the Pacific Fishery Management Council (Council). The management measures implemented by this emergency rule will allow the ocean salmon fisheries to begin while the Council develops revised season proposals that meet the Secretary's concerns. Following development of revised management measures, the Secretary will implement salmon seasons for the remainder of the year. This action is necessary to begin the salmon fishery on May 1, as recommended by the Council, in order to allow commercial and recreational fishermen to access many other harvestable salmon stocks that might not be available if the season opening were delayed. It is intended to prevent overfishing and to be consistent with the allocation objectives and spawning goals of the Fishery Management Plan for the Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California (FMP), except for changes described below that increase spawning escapement of Klamath River fall chinook. The Council recommendations upon which this rule is based are discussed and fully analyzed in the Council's Preseason Report III Analysis of Council-Adopted Management Measures for 1993 Ocean Salmon Fisheries.

DATES: Effective from 0001 hours P.D.T., May 1, 1993, until 2400 hours P.D.T. May 31, 1993. Comments will be accepted through May 17, 1993.

ADDRESSES: Comments may be sent to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, WA 98115–0070; or Gary Matlock, Acting Director, Southwest Region, National Marine Fisheries Service, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802–4213.

FOR FURTHER INFORMATION CONTACT: William L. Robinson at 206–526–6140, or Rodney R. McInnis at 310–980–4030.

SUPPLEMENTARY INFORMATION:

Background

The ocean salmon fisheries off Washington, Oregon, and California are managed under a "framework" fishery management plan. The framework FMP was approved in 1984 and has been amended four times (52 FR 4146, February 10, 1987; 53 FR 30285, August 11, 1988; 54 FR 19185, May 4, 1989; 56 FR 26774, June 11, 1991). Regulations at 50 CFR part 661 provide the mechanism for making preseason and inseason adjustments to the management measures, within limits set by the FMP, by notice in the **Federal Register**. Under the FMP, the Council makes recommendations to the Secretary on a management regime for the salmon fishery. If the Secretary approves the recommendations, he implements the management measures.

Klamath River fall-run chinook are the primary management concern off southern Oregon and northern California. In 1993, the abundance of Klamath fall-run chinook is expected to be 178,000 age-3 and age-4 fish at the beginning of the fishing season. Although this forecast is above last year's record low abundance, it is 48 percent below the 1985–1992 average ocean population forecast. Ocean escapement to the Klamath River (inriver run size) in 1992 totaled 25,900 adult fish, the lowest inriver run size since comprehensive inriver monitoring began in 1978.

The spawning escapement goal for the Klamath River system is 33–34 percent of the potential adult salmon with a minimum of 35,000 natural spawners (fish that spawn outside of the hatcheries). In 1992, the Klamath River fall chinook escapement fell below the minimum spawning escapement floor for the third consecutive year; a review work group has been appointed to review this stock in accordance with FMP guidelines. It is estimated that an ocean season in 1993 similar to that adopted preseason in 1992 would result in an escapement above the minimum spawning escapement floor.

In recent years, several Federal and regional actions have been undertaken to improve the habitat conditions within the Klamath River Basin for the purpose of increasing the production of anadromous fish populations, including the fall chinook salmon. Multi-agency task forces, including Federal, state and local governments, have been working for several years under the lead of the Department of the Interior, with the cooperation of the Department of Commerce, to restore salmon habitat in the Klamath River and its major tributary, the Trinity River. The Trinity River has been adversely impacted by the diversion of much of its natural flow into the Sacramento River Basin through the Central Valley Project. The Secretary of the Interior, in 1991, agreed to increase the minimum amount of water that would be released down the Trinity River from 240,000 acre-feet to 340,000 acre-feet. This action was taken to improve the habitat for salmon. On October 30, 1992, the Central Valley Project Improvement Act (Pub. L. 102–575) was signed. That Act included the 340,000 acre-feet minimum flow and provided for studies that may lead to an increased minimum flow after 1996.

During the preseason ocean salmon fishery management process, the Council was advised by the Department of the Interior that it should manage the Ocean fishery so that the Indian tribes on the Klamath River could take 50 percent of the harvestable Klamath River salmon. The Council considered a range of harvest rates for the ocean fisheries ranging from 12 to 28 percent of the Klamath River fall chinook.

At the Council's April 6–9 meeting, it recommended to the Secretary management measures that would result in an ocean harvest rate of 22 percent on Klamath River fall chinook salmon stocks and achieve the spawning escapement floor if the Klamath River tribes were to limit their harvest to one-half (17,400 fish) of the non-Indian harvest (ocean harvest plus inriver recreational catch of 2,600 fish) of Klamath fall chinook. However, a 22-percent ocean harvest rate combined with a tribal harvest equal to the non-Indian harvest of Klamath River fall chinook would return approximately 21,000 natural spawners, 61 percent of the natural spawning escapement floor, to the Klamath River. Were this to happen, the Klamath River escapement floor of 35,000 natural spawners would be breached for a fourth consecutive year.

Subsequent to the Council's April meeting, the Departments of Commerce and the Interior had extensive discussions regarding the spawning escapement, commercial and recreational ocean harvest, and tribal inriver harvest of Klamath River fall chinook. These discussions also considered conservation issues resulting from the severe and prolonged California drought and the failure to achieve the Klamath River fall chinook natural spawning escapement floor for the previous 3 years. The Departments of Commerce and the Interior have concluded that 1993 offers a unique opportunity, because of the end of the drought, to begin to address conservation concerns for Klamath River fall chinook, and to begin to rebuild the stock to levels that will support healthy and sustained harvests by both tribal and non-tribal fisheries.

In view of the fact that the Council's ocean fishery regulations have failed to achieve the spawning escapement floor of 35,000 natural Klamath River fall chinook spawners for the past 3 years (15,500, 11,500 11,000 adult natural spawners, respectively), and the fact that the long-term drought in California has ended and the region is enjoying the best water conditions in recent years, the Department of Commerce believes that it is in the best long-term interest of the Klamath River fall chinook resource, the fishing industry, and the tribal fisheries, to achieve as large a spawning escapement as reasonably possible in 1993. This provides the best opportunity to increase production of Klamath River fall chinook significantly beginning in 3 to 4 years when the production from the 1993 brood will return. Thus, the Secretary has determined that the Klamath River fall chinook natural spawning escapement in 1993 should be greater than the 35,000 fish spawning escapement floor.

In light of concerns about the need to increase conservation while meeting minimum tribal ceremonial and subsistence needs, the Department of the Interior has agreed that, for 1993, the Klamath tribal catch will be restricted to 18,500 chinook, in order to provide for greater spawning escapement.

Based on the Departments of Commerce and the Interiors' conservation concerns and the expected tribal inriver catch, the Secretary has determined that the Council's recommended 22-percent harvest rate on Klamath River fall chinook will not achieve the expected tribal harvest and a spawning escapement in excess of the 35,000 spawning escapement floor. Consequently, the Secretary has disapproved the Council's recommendation. The Secretary is requesting that the Council reconsider its proposals for the 1993 season and resubmit for consideration a proposed ocean fishery that will return sufficient fall chinook to the Klamath River to provide for a tribal inriver harvest of 18,500 fall chinook, and a spawning escapement of at least 38,000 natural spawners. The Secretary has balanced the conservation need for additional spawners against the economic impacts on the ocean fishery in this year, and has determined that a spawning escapement of 38,000 natural spawners is a reasonable accommodation of the competing needs. The Secretary believes that the short-term sacrifices made by both tribal and non-tribal fishermen to achieve a modest increase of at least 3,000 natural spawners above the FMP's spawning escapement goal, combined with better environmental conditions and the Department of the Interior's commitment to provide more water for fish production in the Trinity River, a major tributary of the Klamath River, will substantially improve the probability that the Klamath River fall chinook run will rebuild to a level that can sustain healthy fisheries.

In order to allow fisheries to begin on May 1, pending revisions to be made by the Council, the Secretary issues this emergency rule. This rule incorporates all of the Council-recommended management measures for fisheries that occur through May 31, except that the May 1 to May 6 troll fishery between Horse Mountain and Point Arena is excluded and the chinook quota for the recreational fishery beginning May 5 between Humbug and Horse Mountains (the Klamath Management Zone) is reduced from 12,000 to 8,000 chinook. These two changes are being made to reduce ocean impacts on Klamath fall chinook immediately in order to preserve flexibility for the Council to shape management measures later in the season. This emergency rule effectively amends the FMP to modify temporarily the spawning escapement goal for Klamath River chinook salmon.

After receiving revised season recommendations that meet the Secretary's spawning escapement objective and the expected level of tribal inriver harvest, the Secretary will publish a subsequent rule to implement the remainder of the seasons.

Management Measures for May 1993

The Secretary is establishing the following allowable ocean harvest levels and management measures for the fisheries that will occur from May 1 through May 31, which are designed to apportion the burden of protecting weak stocks equitably among ocean fisheries and to allow maximum harvest of natural and hatchery runs surplus to inside fishery and spawning needs.

VOL
58
ISS
86
MY
6
19 93
UMI

These management measures are intended to establish May fisheries while preserving flexibility for the Council to reconfigure the remaining ocean salmon fisheries.

A. South of Cape Falcon

In the area south of Cape Falcon, the management measures in this rule are based primarily on concerns for Klamath River fall chinook and Sacramento River winter chinook. The greatest constraint on the ocean management measures was the low abundance of Klamath River fall chinook as described above.

Winter-run chinook from the Sacramento River are listed under the federal Endangered Species Act as a threatened species. In 1991, NMFS concluded a formal consultation with the Council regarding the impacts of the ocean salmon fishing regulations on the winter run. The biological opinion issued from that consultation determined that the 1990 level of impacts from the ocean fisheries would not jeopardize the continued existence of the winter run. NMFS also recommended shortening the recreational fishing season off central California and closure of an area at the mouth of San Francisco Bay during the time when the winter run is entering the Bay. These recommended conservation measures were implemented in 1991 and remain a part of the salmon management measures for 1993. The overall impact of the 1993 salmon management program on the winter run is expected to be significantly less than in 1990, the base year for the biological opinion. This expectation is based on the harvest rate model for the Central Valley Index stocks of fall chinook, which will experience a harvest rate of 71 percent in 1993 as compared to 79 percent in 1990. These rates are only indicators of the relative impact on the winter run because these fish are less vulnerable to the ocean fisheries than fall-run chinook due to the timing of the seasons, as well as their growth and migration patterns.

Commercial Troll Fisheries

Chinook quotas are again being implemented in some areas to insure that the ocean impacts on threatened Sacramento River winter-run chinook, threatened Snake River fall chinook, and Sacramento and Klamath River fall chinook do not exceed those that have been modeled. Specifically, the commercial troll fishery will be limited to a quota of 38,000 chinook through May 31 in the area between Florence South Jetty and Humbug Mountain, Oregon. That quota represents a portion of the total 71,000 chinook quota recommended by the Council for this area through August 31. Other chinook quotas are anticipated to be in effect after May 31 and are not within the scope of this rule.

Due to the need to limit harvest impacts on Oregon coastal natural coho, there will be no retention of coho by the commercial troll fisheries south of Cape Falcon.

From Point Reyes, California, to the U.S.-Mexico border, the commercial fishery for all salmon except coho will open May 1 and remain open while this rule is in effect.

In the area between Point Arena and Point Reyes, California, the commercial fishery for all salmon except coho will open May 1 and close May 31, while this rule is in effect.

The area between Humbug Mountain, Oregon, and Point Arena, California, will be closed to commercial salmon fishing during the effective period of this rule.

From Cape Arago to Humbug Mountain, Oregon, the all-salmon-except-coho season will open May 1 through May 31 under the 38,000 chinook quota for the area between Florence South Jetty and Humbug Mountain. Gear will be restricted to no more than four spreads per line in this area.

From Florence South Jetty to Cape Arago, Oregon, an all-salmon-except-coho season will open May 1 and remain open during the effective period of this rule, subject to closure upon attainment of the overall catch quota of 38,000 chinook for the area between Florence South Jetty and Humbug Mountain. Gear will be restricted to no more than four spreads per line.

From Cape Falcon to Florence South Jetty, Oregon, the all-salmon-except-coho season will open May 1 and remain open during the effective period of this rule, with gear restricted to no more than four spreads per line.

Recreational Fisheries

The recreational fishery for all salmon between Point Arena and the U.S.-Mexico border opened on the nearest Saturday to March 1 and remains open while this rule is in effect. The daily bag limit is two fish.

The Horse Mountain to Point Arena, the recreational fishery for all salmon opened on the nearest Saturday to February 15 and remains open during the effective period of this rule with a two-fish daily bag limit.

The recreational fishery between Humbug Mountain and Horse Mountain will open for all salmon May 5 and remain open during the effective period of this rule, subject to closure upon attainment of the catch quota of 8,000 chinook. This season will be open Wednesday through Saturday only, with a one-fish daily bag limit.

From Cape Falcon to Humbug Mountain, the recreational fishery for all salmon will open May 1 and remain open during the effective period of this rule, 7 days a week, shoreward of a lien generally representing the 27 fathom curve. This season will have a two-fish daily bag limit, with no more than two fish in seven consecutive days, and no more than 10 fish per year.

B. North of Cape Falcon

From the U.S.-Canada border to Cape Falcon, ocean fisheries are managed to protect depressed upper Columbia River spring and summer chinook, lower Columbia River hatchery fall chinook, and natural coho stocks of the Quillayute, Hoh, Queets, and Skagit Rivers. Ocean treaty and non-treaty harvests and management measures were based in part on negotiations between Washington State fishery managers, user groups, and the Washington coastal, Puget Sound, and Columbia River treaty Indian tribes as authorized by the U.S. District Court in *U.S.* v. *Washington*, *U.S.* v. *Oregon*, and *Hoh Indian Tribe et al.* v. *Baldrige*.

The total allowable chinook catch in the ocean north of Cape Falcon was established to ensure that the impacts on Snake River spring/summer and fall chinook stocks, which are listed as threatened species under the Endangered Species Act, did not exceed recent years' level of impacts. For Snake River wild spring chinook, the available information indicates that it is highly unlikely these fish are impacted in Council area fisheries. For Snake River wild summer chinook, these fish comprise only a very small proportion of total chinook abundance in the Council management area, and it is unlikely these fish are significantly impacted in Council area fisheries. For Snake River wild fall chinook, which are caught in Council area fisheries, the Council estimated a reduction of 10 percent in the ocean exploitation rate under the Council's recommended 1993 ocean measures compared to the 1986–1990 average by using the Lyons Ferry Hatchery stock to represent Snake River wild fall chinook.

Commercial Troll Fisheries

The commercial fishery between the U.S.-Canada border and Cape Falcon will open on May 1 for all salmon except coho and remain open during the effective period of this rule, subject to closure upon the attainment of the

30,400 chinook harvest guideline. The control zone at the mouth of the Columbia River will be closed.

Recreational Fisheries

During the effective period for this rule, the only recreational fishery north of Cape Falcon is an all-salmon-except-coho fishery in Washington State waters east of the Bonilla-Tatoosh Line only, from May 1 through the earlier of May 31 or 1,000 chinook quota, with a two-fish daily bag limit.

Treaty Indian Fisheries

Treaty Indian troll fisheries north of Cape Falcon are governed by a quota of 33,000 chinook salmon. Treaty troll seasons, minimum length restrictions, and gear restrictions were developed by the tribes and agreed to by the Council. The all-salmon-except-coho seasons will open May 1 and remain open during the effective period of this rule, if the chinook quota is not reached. The minimum length restriction for all treaty ocean fisheries, excluding ceremonial and subsistence harvest, is 24 inches (61 cm) for chinook.

The following tables and text are the management measures being implemented by this emergency rule from May 1 through May 31, 1993. Additional seasons which begin on or after June 1 will be addressed in a subsequent rule after a determination can be made regarding the reconfiguration of the remaining ocean salmon fisheries. These early season management measures are responsive to the goals of the FMP, the requirements of the resource, and the socio-economic factors affecting resource users. They are consistent with requirements of the Magnuson Act and other applicable law, including U.S. obligations to Indian tribes with treaty-secured fishing rights.

A. SEASONS, SUBAREA QUOTAS, AND SPECIES
(Shaded areas represent closures.)

MAY

U.S.-CANADA BORDER — U.S.-CANADA BORDER

5/1 thru earlier of expiration of emergency rule or guideline of 30,400 chinook (E.1.). All salmon except coho. Control Zone 1 (C.3.), Columbia River mouth, is closed. See D.1.

CAPE FALCON — CAPE FALCON

5/1 thru expiration of emergency rule. All salmon except coho. No more than 4 spreads per line.

FLORENCE SOUTH JETTY — FLORENCE SOUTH JETTY

5/1 thru earlier of expiration of emergency rule or chinook quota (E.2.). All salmon except coho. No more than 4 spreads per line.

CAPE ARAGO — CAPE ARAGO

5/1 thru earlier of 5/31 or chinook quota (E.2.). All salmon except coho. No more than 4 spreads per line.

HUMBUG MOUNTAIN — HUMBUG MOUNTAIN

HORSE MOUNTAIN — HORSE MOUNTAIN

POINT ARENA — POINT ARENA

5/1 thru 5/31. All salmon except coho.

POINT REYES — POINT REYES

5/1 thru expiration of emergency rule. All salmon except coho.

U.S.-MEXICO BORDER — U.S.-MEXICO BORDER

B. MINIMUM SIZE LIMITS (Inches)

	Chinook		Coho		
	Total Length	Head-off	Total Length	Head-off	Pink
North of Cape Falcon	28.0	21.5	16.0	12.0	None
Cape Falcon to Humbug Mountain	26.0	19.5	16.0	12.0	None
South of Humbug Mountain	26.0	19.5	22.0	16.5	None

Chinook not less than 26 inches (19.5 inches head-off) taken in open seasons south of Cape Falcon may be landed north of Cape Falcon only when the season is closed north of Cape Falcon.

C. GENERAL REQUIREMENTS, RESTRICTIONS, AND EXCEPTIONS

C.1. Hooks - Single point, single shank barbless hooks are required.

C.2. Line Restriction - Off California, no more than 6 lines per boat are allowed.

C.3. Control Zone 1 - The ocean area surrounding the Columbia River mouth bounded by a line extending for 6 nautical miles due west from North Head along 46°18'00" N. latitude to 124°13'18" W. longitude, then southerly along a line of 167° True to 46°11'06" N. latitude and 124°11'00" W. longitude (Columbia River Buoy), then northeast along Red Buoy Line (continuing to Buoy #2, then to Buoy #4, then to Buoy #2SJ, then continuing on) to the tip of the south jetty, is closed.

C.4. Transit Through Closed Areas with Salmon on Board - It is unlawful for a vessel, which has been issued an ocean salmon permit by any state, to have troll gear in the water while transiting any area closed to salmon fishing while possessing salmon.

C.5. Landing Salmon in Closed Areas - Legally caught salmon may be landed in closed areas unless otherwise prohibited by these regulations.

D. POSSESSION, LANDING, AND SPECIAL RESTRICTIONS BY MANAGEMENT AREA

If prevented by unsafe weather conditions or mechanical problems from meeting special management area landing restrictions, vessels must notify the U.S. Coast Guard and receive acknowledgement of such notification prior to leaving the area. This notification shall include the name of the vessel, port where delivery will be made, approximate amount of salmon (by species) on board, and the estimated time of arrival.

D.1. U.S.-Canada Border to Cape Falcon, May/June All-Salmon-Except-Coho Season - The State of Oregon may require vessels landing fish from this fishery to the area south of Cape Falcon to notify the Newport office of the Oregon Department of Fish and Wildlife between 8 a.m. and 5 p.m. on the day of landing or the following weekday if such landing occurs on a weekend or outside office hours. The notification shall include the name of the vessel, port where delivery will be made, and the number of chinook landed. Following any closure of this fishery, vessels must land and deliver the fish within 48 hours of the closure.

E. QUOTAS

E.1. Chinook Guideline North of Cape Falcon - The troll fishery will be managed to keep chinook catch within a guideline of 30,400 chinook.

E.2. Chinook Quota Between Florence South Jetty and Humbug Mountain - The troll fishery will be limited by a catch quota of 38,000 chinook.

VOL 58 ISS 86 MY 6 1993 UMI

Table 2. Recreational management measures for 1993 ocean salmon fisheries.

(Note: This table contains important restrictions in Parts A, B, C, and D which must be followed for lawful participation in the fishery.)

A. SEASONS, SUBAREA QUOTAS, SPECIES AND BAG LIMITS
(Shaded areas represent closures.)

MAY

U.S.-CANADA BORDER — U.S.-CANADA BORDER

Open east of Bonilla-Tatoosh Line only. 5/1 thru earlier of 5/31 or 1,000 chinook quota (D.1.). Open 7 days per week. All salmon except coho. 2 fish per day.

CAPE ALAVA — CAPE ALAVA

QUEETS RIVER — QUEETS RIVER

LEADBETTER POINT — LEADBETTER POINT

CAPE FALCON — CAPE FALCON

5/1 thru expiration of emergency rule. Open 7 days per week. All salmon. 2 fish per day. No more than 2 fish in 7 consecutive days and no more than 10 fish per year (C.3.). Open only within the 27 fathom curve (C.2.).

HUMBUG MOUNTAIN — HUMBUG MOUNTAIN

5/5 thru earlier of expiration of emergency rule or 8,000 chinook quota (D.2.). Open Wed. thru Sat. only. All salmon. 1 fish per day.

HORSE MOUNTAIN — HORSE MOUNTAIN

Continuing (opened on nearest Sat. to 2/15) thru expiration of emergency rule. All salmon. 2 fish per day.

POINT ARENA — POINT ARENA

Continuing (opened on nearest Sat. to 3/1) thru expiration of emergency rule. All salmon. 2 fish per day.

U.S.-MEXICO BORDER — U.S.-MEXICO BORDER

B. MINIMUM SIZE LIMITS (Total length in inches)

	Chinook	Coho	Pink
North of Cape Falcon	24.0	16.0	None
Cape Falcon to Humbug Mountain	20.0	16.0	None
South of Humbug Mountain	20.0	20.0	None, except 20.0 off California

C. SPECIAL REQUIREMENTS, RESTRICTIONS AND EXCEPTIONS

C.1. Hooks - Single point, single shank barbless hooks are required north of Point Conception, California

C.2. Area Within the 27 Fathom Curve - The ocean area that is bounded by a line from Cape Falcon to 45°46'00" N., 124°01'20" W. (approximately 1.6 nautical miles west of Cape Falcon) to 45°04'15" N., 124°04'00" W. (approximately 2.2 nautical miles northwest of Cascade Head) to 44°40'40" N., 124°09'15" W. (approximately 3 nautical miles west of Yaquina Head) to 44°08'30" N., 124°12'00" W. (approximately 3 nautical miles west of Heceta Head) to 43°40'15" N., 124°14'30" W. (approximately 0.5 nautical miles west of the Umpqua Whistle Buoy) to 43°31'30" N., 124°17'00" W. (approximately 1.7 nautical miles west of the beach) to 43°15'15" N., 124°28'00" W. (approximately 3 nautical miles west of the beach) to 43°01'30" N., 124°29'05" W. (approximately 2 nautical miles west of Four Mile Creek) to 42°56'00" N., 124°33'10" W. (approximately 2.4 nautical miles west of the mouth of Floras Creek) to 42°50'20" N., 124°38'30" W. (approximately 3.4 nautical miles west of Cape Blanco) to 42°40'30" N., 124°28'45" W. (approximately 1.1 nautical mile west of Humbug Mountain) to Humbug Mountain.

C.3. Annual Possession Restriction Between Cape Falcon and Humbug Mountain - No more than 10 salmon of any species may be retained per year from the ocean area between Cape Falcon, Oregon and Humbug Mountain, Oregon.

C.4. For the purposes of California Fish and Game Code, section 8232.5, the definition of the Klamath management zone for the ocean salmon season shall be that area from Humbug Mountain, Oregon, to Horse Mountain, California.

D. QUOTAS

D.1. Chinook Quota North of Cape Alava - The recreational fishery will be limited by a harvest quota of 1,000 chinook.

D.2. Chinook Quota Between Humbug Mountain and Horse Mountain - The recreational fishery will be limited by a harvest quota of 8,000 chinook.

Table 3. Treaty Indian management measures for 1993 ocean salmon fisheries.

(Note: This table contains important restrictions in Parts A, B, and C which must be followed for lawful participation in the fishery.)

A. SEASONS, SPECIES, MINIMUM SIZE LIMITS, AND GEAR RESTRICTIONS

Tribe and Area Boundaries	Open Seasons	Salmon Species	Minimum Size Limit (inches) Chinook	Coho	Special Restrictions by Area
Makah — That portion of the Fishery Management Area (FMA) north of 48°02'15" N. latitude (Norwegian Memorial) and east of 125°44'00" W. longitude	May 1 thru earlier of expiration of emergency rule or chinook quota	All except coho	24	–	Barbless hooks. No more than 8 fixed lines per boat, or no more than 4 hand-held lines per person.
Quileute — That portion of the FMA between 48°07'36" N. latitude (Sand Point) and 47°31'42" N latitude (Queets River) east of 125°44'00" W. longitude	May 1 thru earlier of expiration of emergency rule or chinook quota	All except coho	24	–	Barbless hooks. No more than 8 fixed lines per boat.
Hoh — That portion of the FMA between 47°54'18" N. latitude (Quillayute River) and 47°21'00" N. latitude (Quinault River) east of 125°44'00" W. longitude	May 1 thru earlier of expiration of emergency rule or chinook quota	All except coho	24	–	Barbless hooks. No more than 8 fixed lines per boat.
Quinault — That portion of the FMA between 47°40'06" N. latitude (Destruction Island) and 46°53'18" N. latitude (Point Chehalis) east of 125°44'00" W. longitude	May 1 thru earlier of expiration of emergency rule or chinook quota	All except coho	24	–	Barbless hooks. No more than 8 fixed lines per boat.

B. SPECIAL REQUIREMENTS, RESTRICTIONS, AND EXCEPTIONS

B.1. All boundaries may be changed to include such other areas as may hereafter be authorized by a federal court for that tribe's treaty fishery.

B.2. Applicable lengths, in inches, for dressed, head-off salmon, are 18 inches for chinook and 12 inches for coho. Minimum size and retention limits for ceremonial and subsistence harvest are as follows:
Makah Tribe — None.
Quileute, Hoh, and Quinault tribes — Not more than 2 chinook longer than 24 inches in total length may be retained per day. Chinook less than 24 inches total length may be retained.

B.3. The areas within a 6-mile radius of the mouths of the Queets River (47°31'42" N. latitude) and the Hoh River (47°45'12" N. latitude) will be closed to commercial fishing. A closure within 2 miles of the mouth of the Quinault River (47°21'00" N. latitude) may be enacted by the Quinault Nation and/or the State of Washington and will not adversely affect the Secretary of Commerce's management regime.

C. QUOTAS

C.1. The overall treaty troll ocean quota is 33,000 chinook salmon. This quota includes troll catches by the Klallam and Makah tribes in Washington State Statistical Area 4B from May 1 through May 31.

BILLING CODE 3510-22-C

Gear Definitions and Restrictions

In addition to gear restrictions shown in Tables 1, 2, and 3 of this preamble, the following gear definitions and restrictions will be in effect.

Troll Fishing Gear. Troll fishing gear for the Fishery Management Area (FMA) is defined as one or more lines that drag hooks behind a moving fishing vessel.

In that portion of the FMA off Oregon and Washington, the line or lines must be affixed to the vessel and must not be intentionally disengaged from the vessel at any time during the fishing operation.

Recreational Fishing Gear. Recreational fishing gear for the FMA is defined as angling tackle consisting of a line with not more than one artificial lure or natural bait attached.

In that portion of the FMA off Oregon and Washington, the line must be attached to a rod and reel held by hand or closely attended; the rod and reel must be held by hand while playing a hooked fish. No person may use more than one rod and line while fishing off Oregon or Washington.

In that portion of the FMA off California, the line must be attached to a rod and reel held by hand or closely attended. Weights directly attached to a line may not exceed 4 (1.8 kg) pounds.

Fishing includes any activity that can reasonably be expected to result in the catching, taking, or harvesting of fish.

Geographical Landmarks

Wherever the words "nautical miles of shore" are used in this rule, the distance is measured from the baseline from which the territorial sea is measured.

Geographical landmarks referenced in this notice are at the following locations:

Bonilla-Tatoosh Line	A straight line drawn from Bonilla Point on Vancouver Island, British Columbia, to the light on Tatoosh Island, Washington, then to the most westerly point on Cape Flattery.
Cape Alava	48°10'00" N. lat.
Carroll Island	48°00'18" N. lat.
Queets River	47°31'42" N. lat.
Leadbetter Point	46°38'10" N. lat.
North Head	46°18'00" N. lat.
Red Buoy Line	Seaward along the south jetty of the Columbia River to the visible tip of the jetty and then to Buoy #2SJ, then southwesterly to Buoy #4, continuing southwesterly to Buoy #2, and then to the Columbia River Buoy, then due west along 46°11'06" N. latitude.
Cape Falcon	45°46'00" N. lat.
Florence South Jetty	44°01'00" N. lat.
Cape Arago	43°18'20" N. lat.
Humbug Mountain	42°40'30" N. lat.
Sisters Rocks	42°35'45" N. lat.
Mack Arch	42°13'40" N. lat.
Horse Mountain	40°05'00" N. lat.
Point Arena	38°57'30" N. lat.
Point Reyes	37°59'44" N. lat.
Point Conception	34°27'00" N. lat.

Inseason Notice Procedures

Actual notice of inseason management actions will be provided by a telephone hotline administered by the Northwest Region, NMFS, 206–526–6667 or 800–662–9825, and by U.S. Coast Guard Notice to Mariners broadcasts. These broadcasts are announced on Channel 16 VHF–FM and 2182 kHz at frequent intervals. The announcements designate the channel or frequency over which the Notice to Mariners will be immediately broadcast. Inseason actions will also be filed with the **Federal Register** as soon as practicable. Since provisions of these management measures may be altered by inseason actions, fishermen should monitor either the telephone hotline or Coast Guard broadcasts for current information for the area in which they are fishing.

The management measures described above are based on the most recent data available. The aggregate data upon which the measures are based are available for public inspection at the offices of the Regional Directors (see **ADDRESSES**) during business hours until the end of the comment period.

Classification

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has determined that the measures described in this preamble are necessary to respond to emergency situations and are consistent with the Magnuson Act and other applicable law. The Secretary has determined that, absent this emergency rule, the ocean salmon fishery will be unnecessarily closed pending submission of revised 1993 season proposals by the Council and the Secretary's final decision on the entire 1993 ocean salmon season. Delay in the start of the fishing season would deny ocean fishermen access to harvestable salmon stocks which, if taken later in the year, would produce unacceptable impacts on other salmon stocks. Implementation of this emergency rule meets the goals and objectives of the FMP and preserves the Secretary's flexibility for implementing management measures later in the season. It prevents the economic harm that otherwise would occur to the ocean salmon fishermen and coastal communities if the season were to remain closed on May 1. Therefore, it is necessary to implement ocean salmon fishing regulations by emergency action pursuant to 16 U.S.C. 1855(c).

The Assistant Administrator finds that the reasons justifying the promulgation of this rule on an emergency basis also make it impracticable and contrary to the public interest to provide notice and opportunity for comment upon, or to delay for 30 days the effective date of these emergency regulations, under the provisions of sections 553 (b) and (d) of the Administrative Procedure Act. Any delay in implementing this rule would cause unnecessary economic harm to users of the resource. The public had opportunities to comment on the management measures being implemented during meetings of the Council and its advisory committees in March and April 1993. The public will also have an opportunity to comment on the emergency measures during the comment period provided by this rule.

The Assistant Administrator has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management programs of Washington, Oregon, and California, and the San Francisco Bay Conservation and Development Commission. This determination has been submitted for review by the responsible agencies under section 307 of the Coastal Zone Management Act.

This emergency rule is exempt from the normal review procedures of E.O. 12291 as provided in section 8(a)(1) of that order. This rule is being reported to the director of the Office of Management and Budget, with an explanation of why it is not possible to follow the regular procedures of that order.

The Council prepared an environmental assessment (EA), the scope of which included this action, and the Assistant Administrator concluded that there will be no significant impact on the human environment. A copy of the EA is available from the Regional Directors (see **ADDRESSES**).

This emergency rule does not contain a collection of information for purposes of the Paperwork Reduction Act.

The Regulatory Flexibility Act does not apply to this rule because, as an emergency rule, it was not required to be promulgated as a proposed rule and the rule is issued without opportunity for prior public comment. Since notice and opportunity for comment are not required to be given under section 553 of the Administrative Procedure Act, and since no other law requires that notice and opportunity for comment be given for this rule, under sections 603(a)

VOL
58
ISS
86
MY
6
1993
UMI

and 604(a) of the Regulatory Flexibility Act, no initial or final regulatory flexibility analysis needs to be prepared.

This emergency rule does not contain policies with known federalism implications sufficient to warrant preparation of the federalism assessment under E.O. 12612. Washington, Oregon, and California are expected to implement State regulations compatible with this Federal rule.

On March 31, 1991, NMFS issued a biological opinion that considered the effects of the FMP on Sacramento River winter-run chinook salmon. The opinion concluded that implementation of the FMP is not likely to jeopardize the continued existence of the species. The 1993 season falls within the scope of the 1991 opinion, and the seasons and management measures comply with the recommendations and incidental take conditions contained in the biological opinion. Therefore, it was not necessary to reinitiate consultation on Sacramento River winter-run chinook salmon.

NMFS has prepared a biological opinion that considered the effects of the 1993 salmon management measures on wild sockeye salmon, wild spring/summer chinook salmon, and wild fall chinook salmon from the Snake River that concluded the fishery as proposed by the Council for May 1993 fishing under the FMP is not likely to jeopardize the continued existence of the listed stocks. These management measures are within the scope of that opinion.

List of Subjects in 50 CFR Part 661

Fisheries, Fishing, Indians, Reporting and recordkeeping requirements.

Dated: April 30, 1993.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 661 is amended as follows:

PART 661—OCEAN SALMON FISHERIES OFF THE COASTS OF WASHINGTON, OREGON, AND CALIFORNIA

1. The authority citation for part 661 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Effective from May 1 through May 31, 1993, the appendix to part 661 is amended in the table in IV.A., by suspending the existing entry for Klamath Fall Chinook, and its footnote number 3, and adding a new entry for Klamath Fall Chinook to read as follows:

Appendix

* * * * *

IV. * * *

A. * * *

SUMMARY OF SPECIFIC MANAGEMENT GOALS FOR STOCKS IN THE SALMON MANAGEMENT UNIT

System	Spawning [1] escapement goal
* * * * *	
Klamath Fall Chinook (temporary).	Between 33 and 34 percent of the potential adults from each brood of natural spawners, but no fewer than 38,000 naturally spawning adults in 1993.
* * * * *	

[1] Represents adult natural spawning escapement goal for viable natural stocks or adult hatchery return goal for stocks managed for artificial production.

Vol. 58, No. 86
Thursday, May 6, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1220

[No. LS-92-006]

RIN 0581-AA77

Soybean Promotion and Research Program; Procedures for Conduct of Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Soybean Promotion and Research Order was implemented July 9, 1991, as authorized by the Soybean Promotion, Research, and Consumer Information Act. The Act requires that the Secretary conduct a referendum among eligible soybean producers not earlier than 18 months and not later than 36 months after the issuance of an Order to determine whether the Order should be continued. Accordingly, a referendum must be held on or after January 9, 1993, but not later than July 9, 1994. This proposed rule sets forth the procedures for conducting the required continuance referendum. The proposed rule would also be applicable to any subsequent referenda which may be conducted pursuant to the Act.

DATES: Written comments must be received by June 7, 1993.

ADDRESSES: Send two copies of comments to Ralph L. Tapp, Chief; Marketing Programs Branch; Livestock and Seed Division; Agricultural Marketing Service (AMS), USDA, room 2624-S; PO Box 96456; Washington, DC 20090-6456. Comments will be available for public inspection during regular business hours at the above office in room 2624 South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC. Comments on the information collection requirements contained in this proposed rule may also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Agricultural Marketing Service, USDA.

FOR FURTHER INFORMATION CONTACT: Ralph L. Tapp, Chief, Marketing Programs Branch 202/720-1115.

SUPPLEMENTARY INFORMATION:

Regulatory Impact

This proposed rule has been reviewed by the United States Department of Agriculture in accordance with Departmental Regulation No. 1512-1 and the criteria contained in Executive Order No. 12291 and has been determined to be a non-major rule because it does not meet the criteria for a major rule as stated in the Order.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have a retroactive effect.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 1971 of the Act, a person subject to the Soybean Promotion and Research Order may file with the Secretary a petition stating that the Order, any provision of the Order, or any obligation imposed in connection with the Order is not in accordance with law and requesting a modification of the Order or an exemption from the Order. The petitioner is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The statute provides that the district court of the United States in any district in which the person who is a petitioner resides or carries on business has jurisdiction to review a ruling on the petition if a complaint for the purpose is filed not later than 20 days after the date of the entry of the ruling.

Further, section 1974 of the Act provides, with certain exceptions, that nothing in the Act may be construed to preempt or supersede any other program relating to soybean promotion, research, consumer information, or industry information organized and operated under the laws of the United States or any State. One exemption in the Act concerns assessments collected by Qualified State Soybean Boards. The exception provides that to ensure adequate funding of the operations of Qualified State Soybean Boards under the Act, no State law or regulation may limit or have the effect of limiting the full amount of assessments that a Qualified State Soybean Board in that State may collect, and which is authorized to be credited under the Act. Another exception concerns certain referenda conducted during specified periods by a State relating to the continuation or termination of a Qualified State Soybean Board or State soybean assessment.

This action has also been reviewed under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This proposed rule would establish procedures for the conduct of referenda. It permits all eligible soybean producers to register and to vote. Participation in referenda is voluntary. The Administrator of the Agricultural Marketing Service (AMS) has determined that this rule will not have a significant economic impact on a substantial number of small business entities.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980, the information collection requirements contained in this proposed rule have been approved by the Office of Management and Budget. They have been assigned OMB control number 0581-0093. The information collection requirements in this proposed rule include the following:

(a) For in-person voting: (1) Each producer of soybeans voting in a referendum must complete a Ballot (Form LS-49) at the County Cooperative Extension Service office. The producer must fill out the ballot and insert in the Ballot Envelope (Form LS-49-1).

(2) Each producer must fill out a Certification and Registration Form which is printed on the Referendum Envelope (LS-49-2). The Ballot Envelope containing the ballot is then inserted in the Referendum Envelope (LS-49-2). The estimated average time burden for completing the forms for in-person voting is 6 minutes per voter.

(b) For absentee voting: Each producer of soybeans requesting absentee voting in a referendum must complete a Combined Registration and Absentee Ballot (Form LS-44). The producer must fill out the form and insert the ballot portion in a Ballot Envelope (LS-44-2) and then insert the sealed Ballot Envelope and the registration portion in the Referendum Envelope (LS-44-1) and place in the mail. The estimated average time burden for completing this procedure is 6 minutes per voter.

VOL 58 ISS 86 MY 6 1993 UMI

(c) The proposed rule contains a requirement that the producer sign the voter registration list (Form LS–49–3). The State Cooperative Extension Service (CES) agent shall enter on the Absentee Voter Request List (Form LS–44–3) the names and addresses of each person or entity requesting an absentee ballot and the date the forms were mailed. This information is necessary for the Department to list the identities of each voter in the referendum and to allow voters and interested parties to see the identity of each voter in the referendum. This information can be used to validate ballots and to challenge potentially ineligible voters. Each CES agent will fill out one or more of Form LS–44–3 per referendum. The estimated average reporting burden will vary depending on the number of absentee ballots requested.

The estimated number of producers who will vote in the referendum is 100,000, each voting once.

Comments concerning the information collection requirements contained in this proposed rule may be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Agricultural Marketing Service, USDA.

Background

The Soybean Promotion, Research, and Consumer Information Act (Act) (7 U.S.C. 6301–6311) provides for the establishment of a coordinated program of promotion and research designed to strengthen the soybean industry's position in the marketplace and to maintain and expand domestic and foreign markets and uses for soybeans and soybean products. The program is financed by an assessment of 0.5 of one percent of the net market price of soybeans sold by producers. Pursuant to the Act, an Order was made effective July 9, 1991, and the collection of assessments began September 1, 1991.

The Act requires that a referendum be conducted not earlier than 18 months and not later than 36 months after the issuance of the Order to determine whether the Order should be continued. The initial referendum is to be conducted among persons who were producers of soybeans during a representative period specified by the Secretary for the purpose of determining whether the initial Order should be continued. The Order shall be continued only if it is approved by a majority of persons voting in the referendum. If continuation of the Order is not approved by a majority of those persons voting in the referendum, the Secretary shall terminate collection of assessments under the Order within 6 months after the referendum. The Secretary shall terminate the Order in an orderly manner as soon as practicable.

If continuation of the Order is approved, the Act requires that no later than 18 months after approval, the Secretary conduct a poll of soybean producers to determine if producers support the conduct of a referendum on the continuance of the payment of refunds under the Order. If the Secretary determines, based on the poll, that the conduct of a refund referendum is supported by at least 20 percent of the producers (not in excess of one-fifth of which may be producers in any one State), a referendum will be conducted not later than 1 year after the Secretary's decision.

The Act also requires the Secretary to hold additional referenda if requested by 10 percent or more of the producers who during a representative period were engaged in the production of soybeans. No more than one-fifth may be producers in any one State, as determined by the Secretary.

The Act specifies that a referendum shall be conducted for a reasonable period of time not to exceed 3 days as determined by the Secretary and that eligible persons are to certify that they were engaged in the production of soybeans during the representative period and vote, at the same time. The Act also provides that referenda shall be conducted at county offices of the State Cooperative Extension Service (CES) and that provision shall be made for absentee mail ballots to be provided on request. The Extension Service of the United States Department of Agriculture will coordinate the State and County Cooperative Extension Service roles in conducting the referendum.

The proposed rule sets forth procedures to be followed in conducting referenda under the Act. The proposed rule includes provisions concerning definitions, supervision of the referenda, registration, voting procedures, reporting referenda results, and disposition of the ballots and records. It is proposed that the Agricultural Stabilization and Conservation Service (ASCS) of the Department, will assist in the conduct of referenda by (1) counting ballots; (2) determining the eligibility of challenged voters; and (3) reporting referenda results.

List of Subjects in 7 CFR Part 1220

Administrative practice and procedure, Advertising, Agricultural research, Marketing agreements, Soybeans and soybean products, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, it is proposed that title 7 of the CFR part 1220 be amended as follows:

PART 1220—SOYBEAN PROMOTION, RESEARCH, AND CONSUMER INFORMATION

1. The authority citation for part 1220 continues to read as follows:

Authority: Title XIX, Pub. L. 101–624, 104 Stat. 3359, 3881 (7 U.S.C. 6301–6311).

2. Subpart E is added to read as follows:

Subpart E— Procedure for the Conduct of Referenda

Subpart E—Procedure for the Conduct of Referenda

Definitions

§ 1220.501 Act.

The term *Act* means the Soybean Promotion, Research, and Consumer Information Act set forth in title XIX, subtitle E of the Food, Agriculture, Conservation and Trade Act of 1990 (Pub. L. 101–624) and any amendments thereto.

§ 1220.502 Administrator.

The term *Administrator* means the Administrator of the Agricultural Marketing Service, or any officer or employee of the Department to whom there has heretofore been delegated or may hereafter be delegated the authority to act in the Administrator's stead.

§ 1220.503 Agricultural Stabilization and Conservation County Committee.

The term *Agricultural Stabilization and Conservation County Committee*, also referred to as "ASC County Committee," means the group of persons within a county elected to act as the County Agricultural Stabilization and Conservation Committee.

§ 1220.504 Agricultural Stabilization and Conservation Service.

The term *Agricultural Stabilization and Conservation Service*, also referred to as "ASCS," means the Agricultural Stabilization and Conservation Service of the Department.

§ 1220.505 Agricultural Stabilization and Conservation Service County Executive Director.

The term *Agricultural Stabilization and Conservation Service County Executive Director*, also referred to as "ASCS Executive Director," means the person employed by the ASC County Committee to execute the policies of the ASC county committee and be responsible for the day-to-day operation of the ASCS county office, or the person acting in such capacity.

§ 1220.506 Cooperative Extension Service.

The term *Cooperative Extension Service*, also referred to as "CES," means the State partner in the Cooperative Extension system.

§ 1220.507 Cooperative Extension Service Agent.

The term *Cooperative Extension Service Agent* also referred to as "CES Agent," means an employee of the Cooperative Extension Service.

§ 1220.508 Department.

The term *Department* means the United States Department of Agriculture.

§ 1260.509 Deputy Administrator.

The term *Deputy Administrator* means the Deputy or Acting Deputy Administrator, State and County Operations, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture.

§ 1220.510 Extension Service of the U.S. Department of Agriculture.

The term *Extension Service* of the U.S. Department of Agriculture also referred to as "ES" means the Federal partner of the Cooperative Extension System.

§ 1220.511 Order.

The term *Order* means the Soybean Promotion and Research Order.

§ 1220.512 Person.

The term *Person* means any individual, group of individuals, partnership, corporation, association, cooperative, or any other legal entity.

§ 1220.513 Producer.

The term *Producer* means any person engaged in the growing of soybeans in the United States, who owns, or shares the ownership and risk of loss of such soybeans.

§ 1220.514 Public notice.

The term *Public notice* means information regarding a referendum which shall be provided by the Secretary, without advertising expenses, through press releases and by State and county CES offices and county ASCS offices, by means of newspapers, electronic media, county newsletters, and the like. Such notice shall contain the referendum date and location, registration and voting requirements, rules regarding absentee voting, and other pertinent information.

§ 1220.515 Referenda.

The term *Referenda* means any referenda to be conducted by the Secretary pursuant to the Act whereby producers shall be given the opportunity to vote.

§ 1220.516 Registration period.

The term *Registration period* means a 1-day period to be announced by the Secretary for registration of producers desiring to vote in a referendum. The registration period shall be the same day as the voting period.

§ 1220.517 Representative period.

The term *Representative period* means the period designated by the Secretary pursuant to section 1970 of the Act.

§ 1220.518 Secretary.

The term *Secretary* means the Secretary of Agriculture of the United States or any other officer or employee of the Department to whom there has been delegated or to whom authority may hereafter be delegated the authority to act in the Secretary's stead.

§ 1220.519 Soybeans.

The term *Soybeans* means all varieties of Glycine max or Glycine soja.

§ 1220.520 State and United States.

The terms *State* and *United States* include the 50 States of the United States of America, the District of Columbia, and the Commonwealth of Puerto Rico.

§ 1220.521 Voting period.

The term *voting period* means a 1-day period to be announced by the Secretary for voting in a referendum.

Referendum

§ 1220.522 General.

(a) A referendum to determine whether eligible producers favor the continuance of the Order and other referenda provided for under the Act shall be conducted in accordance with this subpart.

(b) Referendum results will be based on the Secretary's determination of approval or disapproval by a majority of the producers casting valid ballots in a referendum.

(c) Referenda shall be conducted at the county offices of the Cooperative Extension Service.

(d) The Agricultural Stabilization and Conservation Service of the Department shall assist in the conduct of referenda.

§ 1220.523 Supervision of referenda.

The Administrator, AMS, shall be responsible for conducting referenda in accordance with this subpart.

§ 1220.524 Eligibility.

(a) *Eligible producers.* Each person who was a producer during the representative period is entitled to register and vote in the referendum. Each producer entity shall be entitled to cast only one ballot in the referendum.

(b) *Proxy registration and voting.* Proxy registration and voting is not authorized except that an officer or employee of a corporate producer, or any guardian, administrator, executor, or trustee of a producer's estate, or an authorized representative of any eligible producer entity (other than an individual producer), such as a corporation or partnership, may register

VOL 58 ISS 86 MY 6 1993 UMI

and cast a ballot on behalf of such entity. Any individual registering to vote in the referendum on behalf of any producer entity shall certify that he or she is authorized by such entity to take such action.

(c) *Joint and group interest.* A group of individuals, such as members of a family, joint tenants, tenants in common, a partnership, owners of community property, or a corporation engaged in the production of soybeans as a producer entity shall be entitled to only one vote; provided, however, that any member of a group may register to vote as a producer if he or she is an eligible producer separate from the group.

§ 1220.525 Time and place of registration and voting.

A referendum shall be held for 1 day on a date to be determined by the Secretary. Eligible persons shall register and vote following the procedures in § 1220.528. Except for absentee ballots, the registration and voting shall take place during business hours of each county CES office.

§ 1220.526 Facilities for registering and voting.

Each county CES office shall provide adequate facilities and space to permit producers to register and to mark their ballots in secret and a sealed box or other suitable receptacle for registration forms and ballots which shall be kept under observation during office hours and secured at all times. Copies of the Order and a summary of the Order shall be available for review.

§ 1220.527 Registration form and ballot.

A ballot (LS–49) and certification and registration form (LS–49–2) shall be used for voting in person. The information required includes name, address, and telephone number and also contains a certification statement, referenced in § 1220.528(a)(1). The ballot requires producers to check a "yes" or "no." A combined registration and voting form (Form LS–44–2) shall be used for absentee voting.

§ 1220.528 Registration and voting procedure.

(a) *Registering and voting in person.* (1) Each producer desiring to vote in a referendum shall register on the day of voting at the county CES office in which the producer's residence is located or at the county CES office serving the county in which the producer's residence is located. Producer entities other than individuals shall register at the county CES office in the county in which their headquarters office or business is located or at the county CES office serving the county in which the entities' headquarters office or business is located. Producers will be required to list their names on the voter registration list (Form LS–49–3) prior to receiving a registration form and ballot. To register, each producer shall complete the registration form (LS–49–2)and certify that (i) they or the entity they represent were producers during the specified representative period, and (ii) if voting on behalf of an entity referred to in § 1220.524 they are authorized to do so.

(2) Each eligible producer who has not voted by means of an absentee ballot may cast a ballot in person at the location and time set forth in § 1220.525 and on a date to be announced by the Secretary. Eligible persons who enter their names on the voter registration list (Form LS–49–3) will receive a registration form/envelope (Form LS–49–2) and a ballot (Form LS–49). Voting shall be by secret ballot under the supervision of the local county CES agent or his designee. The ballot shall be marked by the voter to indicate "yes" or "no." Voters shall place their marked ballots in an envelope marked "SOYBEAN BALLOT," seal it and place it in the completed and signed registration form/envelope marked "SOYBEAN REFERENDUM," seal that envelope and personally place it in a box marked "Ballot Box" or other suitable receptacle.

(b) *Absentee voting.* (1) Eligible producers and entities unable to vote in person may request and obtain a combined absentee registration and voting form (Form LS–44) and two envelopes—one marked "SOYBEAN BALLOT" (Form LS–44–2) and the other marked "SOYBEAN REFERENDUM" (Form LS–44–1) by mail from the State CES office of the State in which they reside if individuals, or where their main office is located, if a corporation or other entity. Only one absentee registration form and absentee ballot will be provided to each eligible producer. The forms must be requested in writing during a specified time period which will be announced by the Secretary. The State CES office shall enter on the absentee voter request list (Form LS–44–3) the name and address of each person or entity requesting an absentee ballot and the date the forms were mailed. A copy of the applicable absentee voter request list (Form LS–44–3) prepared by the State CES office shall be provided to each ASCS county office for absentee voter verification.

(2) To register, eligible producers must complete and sign the registration (Form LS–44), and certify that:

(i) They or the entity they represent were producers during the specified representative period; and

(ii) If voting on behalf of an entity referred to in subsection § 1220 524. they are authorized to do so

(3) A producer, after completing the registration form and marking the ballot, shall remove the ballot portion of Form LS–44 and seal the completed ballot in a separate envelope marked "SOYBEAN BALLOT" (Form LS–44–2) and place it in a second envelope marked "SOYBEAN REFERENDUM" (Form LS–44–1) along with the signed registration form. Producers shall print and sign their names on the envelope marked "SOYBEAN REFERENDUM" (Form LS–44–1) and mail it to the local county CES office of the county in which they reside or the county CES office serving the county in which they reside. In the case of a partnership, corporation, estate, or other entity, the registration form and ballot must be mailed to the county CES office in the county in which its main office is located or the county CES office in the county serving the county in which its main office is located.

(4) Absentee ballots must be received in the county CES office by the close of business, 5 business days before the date of the referendum. Absentee ballots received after that date shall be counted as invalid ballots. Upon receiving the "SOYBEAN REFERENDUM" envelope containing the registration form and ballot, the county CES agent or his designee shall place it, unopened in a secure ballot box. The county CES agent or his designee shall enter the names of absentee voters on the voter registration list (Form LS–44–3).

(5) A person casting an absentee ballot which is not recorded as being received or which is received after the deadline specified in this section may vote in person at the appropriate CES office on the day of the referendum.

§ 1220.529 List of registered producers.

The voter registration lists (Form LS–49–3 and LS–44–3) shall be available for inspection on the day of the referendum at the county CES office and subsequently at the ASCS county office. They shall be posted during regular office hours in a conspicuous public location at the ASCS county office on the second business day following the date of the referendum.

§ 1220.530 Challenge of eligibility.

(a) *Challenge period.* On the day of the referendum, the names of challenged voters may be reported to the CES county agent who will refer them to the ASCS county office. After that, the names of the challenged voters shall be referred directly to the ASCS county office. A challenge of a person's eligibility to vote may be made no later than the close of business the second business day after the date of the referendum.

(b) *Who may challenge.* A person's eligibility to vote may be challenged by any person.

(c) *Determination of challenges.* The ASC county committee or its representative shall make a determination concerning the eligibility of a producer who has been challenged and notify challenged producers as soon as practicable, but no later than 5 business days after the date of the referendum. If the ASC county committee or its representative is unable to determine whether a person was a producer during the representative period, it may require the person to submit records such as tax returns, sales documents, or other similar documents to prove that the person was a producer during the representative period.

(d) *Challenged ballot.* The registration form/envelope (Form LS–49–2) containing the ballots cast by producers voting in person whose eligibility is challenged shall be removed from the ballot box and placed in a separate box until the challenge has been resolved. Envelopes containing absentee voter registration forms and absentee ballots (Form LS–44) of challenged absentee voters also shall be removed from the ballot box and placed in the box containing ballots of challenged producers. A challenged ballot shall be determined to have been resolved if the determination of the ASC county committee or its representative is not appealed within the time allowed for appeal or there has been a determination by the ASC county committee after an appeal.

(e) *Appeal.* A person declared to be ineligible to register and vote by the ASC county committee or its representative may file an appeal at the ASCS county office within 3 business days after notification of such decision. Such person may be required to provide documentation such as tax returns, sales documents, or similar documents in order to demonstrate his or her eligibility. An appeal shall be determined by the ASC county committee as soon as practicable, but in all cases not later than the 9th business day after the date of the referendum. The ASCS county committee's determination on an appeal is final.

§ 1220.531 Receiving ballots.

A ballot shall be considered to have been received during the voting period if (a) it was cast in the county CES office prior to the close of business on the day of the referendum; or (b) an absentee ballot was received in the county CES office not later than close of business 5 business days before the date of the referendum.

§ 1220.532 Canvassing ballots.

(a) *Counting the ballots.* The county CES agent or designee shall deliver the sealed ballot box, the voter registration list (Form LS–49–3) and the absentee voter request list (Form LS–44–3) to the ASCS county office by the close of business on the first business day following the date of the referendum. ASCS county employees and the county CES agent or designee shall check the registration forms of all voters against the voter registration list (Form LS–49–3) and the absentee voter request list (Form LS–44–3) to determine properly registered voters. The ballots of producers voting in person whose names are not on the voter registration list (LS–49–3) shall be declared invalid. Likewise, the ballots of producers voting absentee, whose names are not on the absentee voter request list (Form LS–44–3) shall be declared invalid. Ballots declared invalid and all ballots of challenged voters declared ineligible shall be kept separate from the other ballots and the envelopes containing these ballots shall not be opened. The valid ballots shall be counted on the 10th business day after the referendum date. ASCS county office employees shall remove the sealed "Soybean Ballot" envelope from the registration form/envelopes or absentee ballot envelopes of all eligible voters and all challenged voters determined to be eligible. When removing the "Soybean Ballot" envelopes, steps shall be taken to ensure that the voter's name cannot be identified. After removing all "Soybean Ballot" envelopes, ASCS county employees shall open them and count the ballots. The ballots shall be tabulated as follows: (1) Number of eligible producers casting valid ballots; (2) number of producers favoring the Order; (3) number of producers not favoring the Order; (4) number of challenged ballots; (5) number of challenged ballots deemed ineligible; (6) number of invalid ballots; and (7) number of spoiled ballots.

(b) *Invalid ballots.* Ballots shall be declared invalid if a producer voting in person has failed to sign the voter registration list (Form LS–49–3), or an absentee voter's name is not on the absentee voter request list (Form LS–44–3), or the registration form or ballot was incomplete or incorrectly completed.

(c) *Spoiled ballots.* Ballots shall be considered as spoiled ballots when they are mutilated or marked in such a way that it cannot be determined whether it is a "yes" or "no" vote. Spoiled ballots shall not be considered as approving or disapproving the Order, or as a ballot cast in the referendum.

(d) *Confidentiality.* All ballots shall be confidential and the contents of the ballots shall not be divulged except as the Secretary may direct. The public may witness the opening of the ballot box and tabulation of the votes but may not interfere with the process.

§ 1220.533 ASCS county office report.

The ASCS county office shall notify the ASCS State office of the results of the referendum. Each ASCS county office shall transmit the results of the referendum in its county to the ASCS State office. Such report shall include the information listed in § 1220.532(a). The results of the referendum in each county may be made available to the public. A copy of the report of results shall be posted for 30 days in the ASCS county office in a conspicuous place accessible to the public, and a copy shall be kept on file in the ASCS county office for a period of at least 12 months.

§ 1220.534 ASCS State office report.

Each ASCS State office shall transmit to the Deputy Administrator, ASCS, a written summary of the results of the referendum received from all the ASCS county offices within the State. The summary shall include the information on the referendum results contained in the reports from all county offices within each State and be certified by the ASCS State executive director. The ASCS State office shall maintain a copy of the summary where it shall be available for public inspection for a period of not less than 12 months.

§ 1220.535 Results of the referendum.

(a) The Deputy Administrator, ASCS, shall submit to the Administrator, AMS, the results of the referendum. The Administrator, AMS, shall prepare and submit to the Secretary a report of the results of the referendum. The results of any referendum shall be issued by the Department in an official press release and published in the **Federal Register**. State reports, and related papers shall be available for public inspection in the office of the Marketing Programs Branch, Livestock and Seed Division, Agricultural Marketing Service, USDA, room 2624 South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC.

(b) If the Secretary deems it necessary, the report of any State or county shall

VOL 58 ISS 86 MY 6 1993 UMI

be re-examined and checked by such persons that may be designated by the Deputy Administrator, ASCS, or the Secretary.

§ 1220.536 Disposition of ballots and records.

Each ASCS county executive director shall place in sealed containers marked with the identification of the referendum the voter registration list, absentee voter request list, voted ballots, challenged registration forms/envelopes, challenged absentee voter registration forms, challenged ballots found to be ineligible, invalid ballots, spoiled ballots, and county summaries. Such records shall be placed under lock in a safe place under the custody of the ASCS county executive director for a period of not less than 12 months after the referendum. If no notice to the contrary is received from the Deputy Administrator, ASCS, by the end of such time, the records shall be destroyed.

§ 1220.537 Instructions and forms.

The Administrator is hereby authorized to prescribe additional instructions and forms not inconsistent with the provisions of this subpart to govern the conduct of the referendum.

Done at Washington, DC, on: April 30, 1993.

L.P. Massaro,

Acting Administrator.

[FR Doc. 93–10716 Filed 5–5–93; 8:45 am]

BILLING CODE 3410–05–P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30 and 35

RIN 3150–AE58

Authorization To Prepare Radiopharmaceutical Reagent Kits and Elute Radiopharmaceutical Generators; Use of Radiopharmaceuticals for Therapy; Extension of Expiration Date

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule; extension of expiration date.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to extend the expiration date of the interim final rule related to the preparation and therapeutic use of radiopharmaceuticals from August 23, 1993, to December 31, 1994. The proposed extension would allow licensees to continue to use byproduct material under the provisions of the interim final rule until the NRC completes a related rulemaking to address broader issues for the medical use of byproduct material (including those issues addressed by the interim final rule). The NRC expects that this broader rule would be completed and issued as a final rule before the end of 1994. This proposed extension of the expiration date is necessary to maintain the relief provided by the interim final rule.

DATES: The comment period expires June 7, 1993. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Mail written comments to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Hand deliver comments to 11555 Rockville Pike, Rockville, Maryland, between 7:45 a.m. and 4:15 p.m. on Federal workdays.

Copies of any public comments received on the proposed rule may be examined at: the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dr. Anthony N. Tse, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3797.

SUPPLEMENTARY INFORMATION:

Background

On June 5, 1989, the American College of Nuclear Physicians (ACNP) and the Society of Nuclear Medicine (SNM) submitted a petition for rulemaking (PRM–35–9), requesting the Commission to amend its regulations to permit licensed nuclear pharmacists and physicians greater flexibility in the preparation and use of radiopharmaceuticals. After reviewing the petition and consulting with the U.S. Food and Drug Administration (FDA), the NRC determined that some issues raised in the petition needed to be resolved expeditiously.

Subsequently, on August 23, 1990, the Commission published an interim final rule in the **Federal Register** (55 FR 34513) to allow medical use licensees, under certain conditions and limitations, to use therapeutic radiopharmaceuticals for indications and methods of administration not listed in the FDA-approved package inserts. In addition, the interim final rule allows medical use licensees and commercial nuclear pharmacies to depart from the manufacturer's instructions for preparing diagnostic radiopharmaceuticals using radionuclide generators and reagent kits, provided that the licensees follow the directions of a physician authorized user. The NRC amended the interim final rule to eliminate certain recordkeeping requirements related to the preparation and use of radiopharmaceuticals (57 FR 45566, October 2, 1992). The interim final rule will expire on August 23, 1993 unless it is extended.

Currently, the NRC is working on a broader proposed rule in response to PRM–35–9 that would resolve the issues raised in the petition, including the issues addressed by the interim final rule. The Commission intends to replace the provisions of the interim final rule with the provisions of this broader rule. The NRC expects that this broader rule will be promulgated and effective before the end of 1994. Therefore, the NRC is proposing to extend the expiration date of the interim final rule from August 23, 1993, to December 31, 1994. The proposed extension would allow licensees to continue to use byproduct material under the provisions of the interim final rule until the broader rule is completed and effective. This proposed extension is necessary to maintain the relief from restrictions provided by the interim final rule.

Discussion

Section 30.34 Terms and Conditions of Licenses

The NRC is proposing to extend the expiration date in paragraph (i)(1) of this section from August 23, 1993, to December 31, 1994. This extension is proposed to allow commercial nuclear pharmacies to continue to prepare byproduct material under the provisions of the interim final rule until the broader rule is effective.

Section 35.200 Use of Radiopharmaceuticals, Generators, and Reagent Kits for Imaging and Localization Studies.

The NRC is proposing to extend the expiration date in paragraph (c)(1) of this section from August 23, 1993, to December 31, 1994. This extension is proposed to allow medical use licensees to continue to use byproduct material under the provisions of the interim final rule until the broader rule is effective.

Section 35.300 Use of Radiopharmaceuticals for Therapy

The NRC is proposing to extend the expiration date in paragraph (b)(1) of this section from August 23, 1993, to December 31, 1994. This extension is proposed to allow medical use licensees to continue to use byproduct material under the provisions of the interim final rule until the broader rule is effective.

Also, the NRC is proposing to replace the word "method" with the word "methods" in paragraph (b)(1) of this section to correct a typographical error.

Environmental Impact: Categorical Exclusion

The NRC has determined that this proposed rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this proposed rule.

Paperwork Reduction Act Statement

This proposed rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget under approval numbers 3150–0010 and 3150–0017.

Regulatory Analysis

In August 1990, the NRC implemented an interim final rule allowing licensees to depart from (a) the manufacturer's instructions for preparing diagnostic radiopharmaceuticals, and (b) the package insert instructions regarding use of radiopharmaceuticals for therapy. The effective period for the rule is from August 23, 1990, to August 23, 1993.

The NRC is proposing to extend the expiration date from August 23, 1993, to December 31, 1994. The proposed extension would allow licensees to continue to use byproduct material under the provisions of the interim final rule until there is an effective final rule in a related rulemaking in response to the ACNP–SNM petition to address broader issues for the medical use of byproduct material (including those issues addressed by the interim final rule). The NRC expects that this broader rule would be completed and effective before the end of 1994. This proposed extension of the expiration date is necessary to continue the relief from restrictions provided by the interim final rule until the effective date of the broader rule.

The alternative to this proposed extension is to maintain the existing expiration date. Under this alternative, the provisions in the interim final rule would expire on August 23, 1993, as would the relief from restrictions provided by the interim final rule.

The NRC concludes that this proposed extension is justified to continue to allow licensees to use byproduct material under the provisions of the interim final rule until the broader rule is effective.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that, if adopted, this proposed rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would affect medical use licensees including some private practice physicians. Some of these licensees would be considered small entities under the NRC's size standards published in the **Federal Register** on November 6, 1991 (56 FR 56672). The proposed amendments would extend the expiration date of the interim final rule from August 23, 1993, to December 31, 1994. The proposed extension would allow licensees to continue to use byproduct material under the provisions of the interim final rule until the NRC completes a related rulemaking to address broader issues for the medical use of byproduct material (including those issues addressed by the interim final rule). Therefore, for the reasons provided above, this amendment would not have a significant economic impact on a substantial number of small entities.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this proposed amendment because this amendment does not impose requirements on existing nuclear power reactor licensees. Therefore, a backfit analysis was not prepared for this proposed amendment.

List of Subjects

10 CFR Part 30

Byproduct material, Criminal penalties, Government contracts, Intergovernmental relations, Isotopes, Nuclear materials, Radiation protection, Reporting and recordkeeping requirements.

10 CFR Part 35

Byproduct material, Criminal penalties, Drugs, Health facilities, Health professions, Incorporation by reference, Medical devices, Nuclear materials, Occupational safety and health, Radiation protection, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR parts 30 and 35.

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

1. The authority citation for part 30 continues to read as follows:

Authority: Secs. 81, 82, 161, 182, 183, 186, 68 Stat. 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2111, 2112, 2201, 2232, 2233, 2236, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 30.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 30.34(b) also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 30.61 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

2. In § 30.34, paragraph (i)(1) is revised to read as follows:

§ 30.34 Terms and conditions of licenses.

* * * * *

(i)(1) From August 23, 1990, to December 31, 1994, each licensee eluting generators and processing radioactive material with diagnostic reagent kits for which the Food and Drug Administration (FDA) has approved a "New Drug Application" (NDA), may depart from the manufacturer's elution and preparation instructions (for radiopharmaceuticals authorized for use pursuant to 10 CFR 35.200), provided that the licensee follows the directions of an authorized user physician.

* * * * *

PART 35—MEDICAL USE OF BYPRODUCT MATERIAL

3. The authority citation for part 35 continues to read as follows:

Authority: Secs. 81, 161, 182, 183, 68 Stat. 935, 948, 953, 954, as amended (42 U.S.C. 2111, 2201, 2232, 2233); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841).

4. In § 35.200, paragraph (c)(1) is revised to read as follows:

§ 35.200 Use of radiopharmaceuticals, generators, and reagent kits for imaging and localization studies.

* * * * *

(c)(1) From August 23, 1990, to December 31, 1994, a licensee may depart from the manufacturer's instructions for eluting generators and preparing reagent kits for which the Food and Drug Administration (FDA) has approved a "New Drug Application" (NDA), by following the

VOL 58 ISS 86 MY 6 1993 UMI

directions of an authorized user physician.

* * * * *

5. In § 35.300, paragraph (b)(1) is revised to read as follows:

§ 35.300 Use of radiopharmaceuticals for therapy.

* * * * *

(b)(1) From August 23, 1990, to December 31, 1994, a licensee may depart from the package insert instructions regarding indications or methods of administration for a radiopharmaceutical for which the Food and Drug Administration (FDA) has approved a "New Drug Application" (NDA), provided that the authorized user physician has prepared a written directive as required by § 35.32(a).

* * * * *

Dated at Rockville, Maryland, this 23rd day of April, 1993.

For the Nuclear Regulatory Commission.

James M. Taylor,

Executive Director for Operations.

[FR Doc. 93-10686 Filed 5-5-93; 8:45 am]

BILLING CODE 7590-01-P

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Parts 251 and 261

Land Uses and Prohibitions; Noncommercial Group Uses

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the existing rules governing noncommercial group events and noncommercial distribution of printed material within the National Forest System. These revisions would ensure that the authorization procedures for these activities comply with First Amendment requirements of free speech and assembly.

DATES: Comments must be received in writing by August 4, 1993.

ADDRESSES: Send written comments to Recreation, Cultural Resources, and Wilderness Management Staff (2340), Forest Service, USDA, PO Box 96090, Washington, DC 20090-6090.

FOR FURTHER INFORMATION CONTACT: William T. Svensen, Recreation, Cultural Resources, and Wilderness Management Staff, (202) 205-1407, or Ellen R. Hornstein, Office of the General Counsel, Natural Resources Division, (202) 720-9616.

SUPPLEMENTARY INFORMATION:

Background

The First Amendment of the United States Constitution provides in part that the government may not abridge the freedom of speech or the right to assemble peaceably. U.S. Const., amend. I. Freedom of speech means the right to disseminate ideas freely, both orally or in writing.

It is well established that the government may enforce reasonable time, place, and manner restrictions on First Amendment activities. Such restrictions are appropriate where they are justified without regard to the content of the regulated speech, where they are narrowly tailored to further a significant governmental interest, and where they leave open ample alternative channels for communication of information. *Clark* v. *Community for Creative Non-Violence*, 468 U.S. 288, 293 (1984). Permits have been recognized as constitutional restrictions of time, place, and manner when specific and objective standards guide the licensing authority. *Shuttlesworth* v. *City of Birmingham*, 394 U.S. 147, 150-51, 153 (1969).

The Forest Service regulates activity on National Forest System lands through the issuance of special use authorizations. Issuing special use authorizations allows the Forest Service to protect resources and improvements on National Forest System lands and to prevent conflicts among potential or existing uses and activities. The rules at 36 CFR part 251, subpart B, govern the issuance of special use authorizations for all uses of National Forest System lands, improvements, and resources, except the disposal of timber (part 223) and minerals (part 228) and the grazing of livestock (part 222).

On June 21, 1984, the Secretary of Agriculture promulgated a revision to 36 CFR part 251, subpart B. That rule required a permit for two types of noncommercial group events, recreation events and special events, both of which involved ten or more participants or spectators. As defined, recreation events entailed competition, entertainment, or training, and special events included a meeting, assembly, demonstration, parade, or other activity involving the expression of views. Noncommercial groups that did not fall into either of these categories did not have to have a permit. Moreover, the rule contained different standards for denying a special use authorization for each type of group event (49 FR 25449).

Subsequently, a federal district court held that it is unconstitutional to require a group to obtain a special use authorization simply because they gather to exercise their constitutional right of free speech. The court explained that the Forest Service has the right to regulate large group activities on government land, but only if the regulation is content-neutral and applies to all large groups. *United States* v. *Israel*, No. CR-86-027-TUC-RMB (D. Ariz. May 10, 1986).

On May 10, 1988, the Forest Service published an interim rule amending 36 CFR 251.50 through 251.54 to comport with First Amendment rights of assembly and free speech within the National Forest System (53 FR 16548). Upon challenge of this rule, a federal district court held that the Forest Service had failed to show good cause for adopting the interim rule without prior notice as required by the Administrative Procedure Act, 5 U.S.C. 553. *United States* v. *Rainbow Family*, 695 F. Supp. 294, 302-06 (E.D. Tex. 1988). In addition, the court invalidated the classification established by the 1984 rule, which on its face singled out expressive conduct and required that it be treated differently from other activity. The court held that the 1984 rule lacked clear and objective standards for determining when a group activity is a "recreation event" and when it is a "special event" involving the exercise of free speech. *Rainbow Family*, 695 F. Supp. at 309, 312. The court further held that the standards for evaluating an application for an authorization for expressive conduct were unconstitutionally vague as they vested too much discretion in the authorized officer. *Id.* at 309-12. The court ruled that the 1984 regulations were invalid for failure to impose a timeframe for filing and acting on an application, and that the absence of any requirement in the 1984 regulations that a reason be stated for denial of a special use authorization made it impossible to discern the grounds for an authorized officer's decision. *Id.* at 311-12. Finally, the court held that the 1984 rule was invalid for failure to provide for judicial review of the administrative determination. *Id.* at 311.

As a result of these court rulings, the Forest Service is proposing revisions of the rules governing special uses at 36 CFR part 251. The purpose of this proposed rule is to regulate noncommercial group events and noncommercial distribution of printed material on National Forest System lands in compliance with First Amendment rights of assembly and free speech. To achieve this goal, the proposed rule contains specific, content-neutral criteria for evaluating applications for noncommercial group events and noncommercial distribution of printed material and requires that the same criteria be applied to those activities, regardless of whether they involve First Amendment rights. In addition, the proposed rule requires an authorized officer to notify an applicant in writing of the reasons for denial of a special use authorization and provides for immediate judicial review of a decision denying an authorization.

Section-by-Section Analysis

Amendments to Part 251

Section 251.50—Scope

Paragraph (a) would be revised for clarity and to make explicit that an application is required for authorization of a special use. Paragraph (c) would be revised to clarify that a special use authorization is required for noncommercial group events involving 25 or more people and noncommercial distribution of printed material.

The agency has an interest in regulating group activities. Group activities tend to have a greater impact on forest resources and facilities than activities involving individuals or smaller parties. The agency also has an interest in regulating when noncommercial distribution of printed material occurs. Such distribution can occur by posting, affixing or erecting the material, which could damage natural resources if not regulated. In addition, as distribution generally occurs in crowded areas, it can obstruct traffic and create unsafe traffic conditions, for example, where a single-lane road provides the only access to a popular national forest attraction or where a national forest is near an urban center.

Section 251.51—Definitions

Section 251.51 contains definitions used in part 251, subpart B. The proposed rule would revise the definition for "group event" and add new terms and definitions for "commercial use or activity," "noncommercial use or activity," "printed material," and "distribution of printed material."

The term "group event" would cover any activity that involves and/or attracts 25 or more people, regardless of the purpose of the gathering. Thus, this term would embrace all groups that were included in the "special event" and "recreation event" categories of the 1984 rule, as well as those that were excluded. The Forest Service is proposing a cutoff of 25 people based on a review of the potential impact on resources and facilities. The agency believes that activities involving 25 or more people tend to have a greater impact on resources and facilities and thus require evaluation by an authorized officer. If the agency required an authorization for smaller group activities, the agency would be inundated with applications, which would create an unnecessary administrative burden and cost in light of the generally low impact of these activities. Public comment is especially invited on this group number threshold.

The terms and definitions for "commercial use of activity" and "noncommercial use or activity" would be added to clarify which activities would be subject to the authorization requirement in § 251.50(c)(3). The terms and definitions for "printed material" and "distribution of printed material" would be added to clarify one of the types of activities subject to the authorization requirement in § 251.50(c)(3).

Section 251.54—Special Use Applications

Section 251.54 of the existing rule prescribes procedures and requirements for processing applications for special use authorizations. Section 251.54(a) encourages all proponents to contact an authorized officer as early as possible so that potential constraints may be identified, the proposal can be considered in land management plans if necessary, and processing of an application can be tentatively scheduled. The proposed rule would amend § 251.54(a) to provide that the proponent will be given guidance and information about the items listed in paragraphs (a)(1) through (a)(8) only to the extent applicable to the proposed use and occupancy. For example, fees and bonding requirements listed in paragraph (a)(4) would not apply to applications for noncommercial group uses and noncommercial distribution of printed material and would not be discussed with proponents of those activities.

Section 251.54(e) specifies the information that must be contained in an application for a special use authorization. The proposed rule would amend paragraph(e)(1) to specify applicant identification requirements applicable to all special uses. Specifically, paragraph (e)(1) would require any applicant to provide his or her name and mailing address, or if the applicant is not an individual, the name and address of the applicant's agent who is authorized to receive notice of actions pertaining to the application.

Additionally, the proposed rule would amend this paragraph by adding a new paragraph (e)(2) to specify separate information requirements for noncommercial group uses and noncommercial distribution of printed material. Paragraph (e)(2) would require applicants for noncommercial group uses and noncommercial distribution of printed material to provide the following:

(1) A description of the proposed activity;

(2) A description of the National Forest System land and any facilities the applicant would like to use;

(3) The estimated number of participants and spectators;

(4) The date and time of the proposed activity; and

(5) The name of the person or persons 21 years of age or older who will sign a special use authorization on behalf of the applicant.

This is the minimum information needed by the authorized officer to apply the evaluation criteria in the proposed rule. Application information requirements for all other special uses would remain as provided in the existing rule, with one exception. The provision currently in paragraph (e)(1) concerning the deference to be given to findings of another agency would be moved to a new paragraph (f)(4), since this provision relates to the processing of applications rather than to their content.

The *Rainbow* court identified the need for a specific timeframe for granting or denying an application for a noncommercial group event or noncommercial distribution of printed material. 695 F. Supp. at 311. This decisionmaking process, however, may trigger extensive statutory and regulatory requirements, including those imposed by the National Environmental Policy Act of 1969 (NEPA), 42 USC 4331 *et seq.*, the Endangered Species Act (ESA), 16 USC 531 *et seq.*, the National Historic Preservation Act, 16 USC 470 *et seq.*, and other laws. The time needed to comply with these requirements varies greatly depending on the particular circumstances of each application. Committing to a specific timeframe could put the agency in the position of having to choose between violating either its own regulations or one or more of these statutory mandates.

Consequently, the agency has determined that it would be infeasible and arbitrary to specify a time period in which final agency decision would be made.

In recognition of these competing concerns, the proposed rule would add a new paragraph (f)(5) providing that the agency would grant or deny an application for noncommercial group events or noncommercial distribution of

VOL 58 ISS 86 MY 6 1993 UMI

printed material without unreasonable delay. A determination of whether the agency acted with sufficient speed would require an analysis of what is reasonable under the circumstances, in view of the applicable statutory and regulatory obligations. Applicants are encouraged to contact the agency as early as possible to discuss the amount of time that could be required to make a decision, and to apply sufficiently in advance of their proposed activities to allow the agency to comply with applicable statutory and regulatory requirements.

Section 251.54(h) of the 1984 rule enumerated grounds for denying an application for a special use other than a special event. Section 251.54(i) listed separate grounds for denying an application for a special event, which involved the expression of views. Thus, the 1984 rule applied different criteria for activities with First Amendment implications than for all other activities, including other types of group events. Moreover, the criteria for First Amendment activities were not specific enough to reduce the potential for application of disparate standards in reviewing applications for an authorization.

The proposed rule would presume that any noncommercial group event and noncommercial distribution of printed material would be authorized, upon a determination that seven evaluation criteria were met. These criteria would merely regulate time, place, and manner with respect to a proposed activity. The proposed rule would dictate that these same criteria be applied to all types of noncommercial group events and noncommercial distribution of printed material. Thus, these criteria are intended to be content-neutral, are narrowly tailored to advance significant governmental interests, and leave open ample alternative channels for communication of the information.

Specifically, § 251.54(h)(1) of the proposed rule would provide that an authorized officer shall grant an application for a special use authorization for any noncommercial group event or for noncommercial distribution of printed material, upon a determination that:

(1) *The proposed activity is not prohibited by the rules at 36 CFR part 261, subpart A, or by an order issued pursuant to 36 CFR part 261, subpart B, or by federal, state, or local law unrelated to the content of expressive activity.* This criterion would allow the agency to deny an application for an activity that would violate federal, state, or local law. This criterion would also allow the Forest Service to regulate where a proposed activity would be conducted. The Forest Service must comply with applicable federal law and regulations in managing the National Forest System. For example, the Wilderness Act requires the Forest Service to protect and manage wilderness areas so as to preserve their natural condition and to ensure that the imprint of human activity remains substantially unnoticeable. 16 U.S.C. 1131(c). The ESA prohibits a taking of an endangered species. A "taking" as defined by the ESA includes the loss of a listed species habitat. Thus, an authorized officer might deny an application if the activity would be conducted in a wilderness area or would risk a taking of a threatened or endangered species such as the spotted owl or grizzly bear. In addition, an authorized officer would have to deny an application if the activity would be conducted in an area that is closed or restricted pursuant to an order issued under 36 CFR part 261. Under a 261 order, the Forest Service might close a trial in the event of extreme fire danger or inclement weather.

(2) *The proposed activity is consistent or can be made consistent with the applicable approved land and resource management plan.* The National Forest Management Act requires that "(r)esource plans and permits, contracts, and other instruments for the use and occupancy of National Forest System lands shall be consistent with the land management plans." 16 U.S.C. 1604(i). An activity is consistent with a forest plan if it adheres to a plan's standards and guidelines that are forest-wide or that are included in management prescriptions for specific management areas. Standards and guidelines describe any activities that are not permitted to occur in a specified area or prescribe how activities must be implemented for environmental protection or other purposes. Forest plans are developed in accordance with the rules at 36 CFR part 219 and adopted with extensive public participation and comment.

(3) *The proposed activity would not delay, halt, or prevent administrative use of an area by the Forest Service or other scheduled or existing uses or activities on National Forest System land, including but not limited to uses and activities authorized pursuant to parts 222, 223, 228, and 251 of this chapter.* Under this criterion, an authorized officer might require a large group to alter arrival and departure times or to use an alternative access route to avoid congestion. An officer might suggest an alternate site on the opening day of fishing season for the same reason. This criterion would also allow the Forest Service to ensure that a group of Boy Scouts is not given a site that is already being used as pastureland under a grazing permit or that is currently being logged under a timber sale contract.

The 1984 rule provided that an application for a special event could be denied if the event conflicted with a previously approved use or if it would be of such nature or duration that it could not reasonably be accommodated in the place and time requested (49 FR 25449). The federal district court in *Rainbow Family* held that denying a permit because it "conflicts" with another use or because it "cannot reasonably be accommodated" in the time and place requested allows for too much discretion on the part of the authorized officer. 695 F. Supp. at 312.

This proposed rule would address the court's concern by providing specific examples of how an activity covered by this paragraph could delay, halt, or prevent existing or scheduled activities and what those activities might include. Similarly, the proposed rule would remove the unconstitutionally vague criterion which allows an authorized officer to deny an application for an activity covered by this proposed rule on the ground that it cannot reasonably be accommodated in the time and place requested.

(4) *The proposed activity would not pose a substantial danger to public health. Considerations of public health shall be limited to the following with respect to the proposed site:*

(a) *The sufficiency of sanitation facilities;*

(b) *The adequacy of waste disposal facilities;*

(c) *The availability of sufficient potable drinking water, in view of the expected number of users and duration of use;*

(d) *The risk of disease from the physical characteristics of the proposed site or natural conditions associated with the proposed site;*

(e) *The risk of contamination of the water supply; and*

(f) *The sufficiency of a plan for safe handling of food.*

(5) *The proposed activity would not pose a substantial danger to public safety. Considerations of public safety shall not include concerns about possible reaction to the users' identity or beliefs from non-members of the group seeking an authorization and shall be limited to the following:*

(a) *The potential for physical injury to other forest users from the proposed activity;*

(b) *The potential for physical injury to users from the physical characteristics of the proposed site or natural conditions associated with the proposed site;*

(c) *The potential for physical injury to users from scheduled or existing uses or activities on National Forest System land; and*

(d) *The adequacy of ingress and egress in case of an emergency.*

The 1984 rule allowed an authorized officer to deny an application for a special event if it presented a clear and present danger to the public health or safety (49 FR 25449). The *Rainbow* court struck down this language because it was too vague and allowed for too much discretion on the part of the authorized officer. 695 F. Supp. at 311. The proposed rule would overcome this deficiency. In regulating where the activity would occur, the criterion in the proposed rule would restrict the authorized officer's discretion by enumerating concrete, content-neutral considerations of public health and safety.

(6) *The proposed activity does not involve military or paramilitary training or exercises by private organizations or individuals, unless such training or exercises are federally funded.* This activity does not implicate the First Amendment and is currently prohibited by Forest Service policy as inconsistent with National Forest System purposes.

(7) *A person or persons 21 years of age or older has been designated to sign and does sign a special use authorization on behalf of the applicant.* The agency must have someone to contact for purposes of special use administration. The authorized officer may have questions about the application or may need to notify the applicant in the event of an emergency. If the application does not identify a contact person, the agency cannot make the appropriate notifications. In addition, someone on behalf of the applicant must accept the responsibilities associated with use of National Forest System land.

Public comment is especially invited on the seven evaluation criteria.

If, at the conclusion of the application process, the application does not meet the seven criteria, an administrative officer could deny the application. Under proposed § 251.54(h)(2), however, an authorized officer would have to notify an applicant in writing of the reasons for denial of an application for a special use authorization. The proposed rule would make explicit that a denial of an application under § 251.54(h)(1) would constitute final agency action and would be immediately subject to judicial review.

Section 251.56—Terms and Conditions

The proposed rule would amend § 251.56(e) on bonding to provide that an authorized officer could not require bonding for holders of authorizations for noncommercial group events or noncommercial distribution of printed material. This amendment would clarify the agency's intent to ensure that no undue burdens are imposed on the exercise of First Amendment rights.

Section 251.57—Fees

The proposed rule revises § 251.57 on fees for special use authorizations to provide that no fee will be charged when the authorization is for a noncommercial group event or for the noncommercial distribution of printed material. This revision would clarify the agency's intent to ensure that no undue burdens are imposed on the exercise of First Amendment rights.

Section 251.60—Termination, Revocation, and Suspension

Section 251.60 provides several grounds for terminating, revoking, or suspending a special use authorization, one of which is for reasons in the public interest. The proposed rule would amend this broad basis for termination, revocation, or suspension to exclude authorizations for noncommercial group events or noncommercial distribution of printed material. This amendment would clarify the agency's intent to ensure that the authorized officer does not have unbridled discretion with respect to administration of noncommercial First Amendment activities in the National Forest System. Under § 251.60(a), an authorized officer could still terminate, revoke, or suspend an authorization for these activities for noncompliance with applicable statutes, regulations, or terms and conditions of the authorization; for failure of the holder to exercise the rights and privileges granted; with the consent of the holder; or when, by its terms, a fixed or agreed upon condition, event, or time occurs.

Amendment to Part 261

In addition to the changes at 36 CFR part 251, subpart B, the proposed rule would make corollary amendments to the rules at 36 CFR part 261, subpart A, which contain general prohibitions in effect for the National Forest System.

The proposed rule would amend the authority citation for part 261 to consolidate the references. The proposed rule would also amend the definitions and prohibitions governing occupancy and use to make them consistent with the requirement in part 251 that a special use authorization is required for noncommercial distribution of printed material.

Section 261.2—Definitions

In the definitions section, the term "placing" would be replaced by the word "affixing." "Placing" could be construed to prohibit leaving printed material under windshield wipers or on dashboards of vehicles, neither of which would result in injury to public or private property. Use of the word "affixing" would narrow the prohibition to address damage to forest resources and facilities.

Section 261.10—Occupancy and Use

With respect to distribution of printed material, the proposed rule would prohibit delaying, halting, or preventing administrative use of an area by the Forest Service or other scheduled or existing uses or activities on National Forest System land; misrepresenting the purposes or affiliations of those distributing the material; or misrepresenting the availability of the material without cost or donation. Consistent with the third evaluation criterion proposed for part 251, this language would regulate time, place, and manner for the distribution of printed material. This prohibition would also protect the public from fraud by prohibiting specific types of misrepresentation in the context of such distribution.

Section 261.14—Developed Recreation Sites

The proposed rule would remove from this section the prohibition on distribution of printed material without a special use authorization. This prohibition is subsumed in the prohibition contained in § 261.10(g), which applies throughout the National Forest System.

Summary

With the changes in definitions and establishment of very limited circumstances under which an authorized officer could deny a special use authorization for noncommercial group events and noncommercial distribution of printed material, the proposed rule would preserve the fundamental constitutional rights of free speech and assembly, while providing reasonable administrative mechanisms to control or prevent adverse impacts on resources and public health and safety.

Public comment is invited and will be considered in adoption of the final rule. It will aid analysis of comments if

VOL 58 ISS 86 MY 6 1993 UMI

reviewers key them to specific sections of the proposed rule. Respondents should also note that in conducting this analysis, the agency will give more weight to substantive comments than to simple "yes," "no," or "check-off" responses to form letters or questionnaires.

A separate proposed rule revising the existing regulations at 36 CFR part 251 governing application procedures for all other special uses was published in the **Federal Register** at 57 FR 36618 on August 14, 1992. Upon adoption, that final rule will be integrated with this rulemaking to ensure consistency in substance and format.

Regulatory Impact

This proposed rule has been revised under USDA procedures and Executive Order 12291 on Federal Regulations. It has been determined that this would not be a major rule. The proposed rule would not have an effect of $100 million or more on the economy, substantially increase prices or costs for consumers, industry, or state or local governments, or adversely affect competition, employment, investment, productivity, innovation, or the ability of domestic companies to compete in foreign markets. In short, this proposed rule would have little or no impact on the national economy. The proposed rule would consist primarily of technical and administrative changes for authorization of occupancy and use of National Forest System lands.

Moreover, this proposed rule has been considered in light of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* This action would not have a significant economic impact on a substantial number of small entities because it would not impose recordkeeping requirements on them; it would not affect their competitive position in relation to large entities; and it would not affect their cash flow, liquidity, or ability to remain in the market.

This proposed rule has been reviewed for its impact on private property rights under Executive Order 12630 of March 15, 1988, as implemented by the United States Attorney General's Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings. Executive Order 12630 would not apply to this proposed rule because it would consist primarily of technical and administrative changes governing application procedures for authorization of occupancy and use of National Forest System lands. Application for a special use authorization does not grant any right, title, or interest in or to lands or resources held by the United States.

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. If this proposed rule were adopted, (1) all state and local laws and regulations that are in conflict with this proposed rule or which would impede its full implementation would be preempted; (2) no retroactive effect would be given to this proposed rule; and (3) it would not require administrative proceedings before parties may file suit in court challenging its provisions.

Paperwork Reduction Act

The information an applicant must provide the Forest Service to obtain an authorization for a noncommercial group event or noncommercial distribution of printed material (proposed § 251.54(e)(2)(i) (A)–(E)) constitutes an information requirement as defined by the Paperwork Reduction Act and the Office of Management and Budget implementing rules at 5 CFR part 1320 and thus would require OMB approval before adoption of the final rule. The Forest Service is requesting OMB approval of the information required for these applications. The agency estimates that each applicant would spend an average of one to four hours preparing an application, depending on the scope and complexity of the proposed activity. Comments on this information requirement should be submitted to the office listed in this proposed rule under **ADDRESSES**, as well as to the: Forest Service Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Environmental Impact

This proposed rule consists primarily of technical and administrative changes related to authorization of occupancy and use of National Forest System lands. No extraordinary circumstances have been identified that might cause this proposed action to have a significant effect on the human environment. Therefore, the agency's preliminary determination is that this proposed rule is categorically excluded from documentation in an Environmental Impact Statement or an Environmental Assessment (40 CFR 1508.4; Forest Service Handbook 1909.15, Environmental Policy and Procedures, section 31.1b(2), 57 FR 43208, September 18, 1992). A final determination will be made at the time of publication of the final rule.

List of Subjects

36 CFR Part 251

Electric power, Mineral resources, National forests, Rights-of-way, Water resources.

36 CFR Part 261

Law enforcement, National forests.

Therefore, for the reasons set forth in the preamble, it is proposed to amend part 251, subpart B, and part 261, subpart A, of chapter II of title 36 of the Code of Federal Regulations as follows:

PART 251—LAND USES

Subpart B—Special Uses

1. The authority citation for subpart B continues to read:

Authority: 16 U.S.C. 472, 551, 1134, 3210; 30 U.S.C. 185; 43 U.S.C. 1740, 1761–1771.

2. Amend § 251.50 by revising the heading and paragraphs (a), (c), introductory text, and (c)(3) to read as follows:

§ 251.50 Scope.

(a) All uses of National Forest System lands, improvements, and resources, except those provided for in the regulations governing the disposal of timber (part 223) and minerals (part 228) and the grazing of livestock (part 222), are designated "special uses." Before engaging in a special use, persons or entities must submit an application to an authorized officer and must obtain a special use authorization from the authorized officer, unless that requirement is waived by paragraph (c) of this section.

* * * * *

(c) A special use authorization is not required for noncommercial recreational activities such as camping, picnicking, hiking, fishing, hunting, horseback riding, and boating, as well as noncommercial activities involving the expression of views such as assemblies, meetings, demonstrations, and parades, except for:

* * * * *

(3) Noncommercial group events or noncommercial distribution of printed material as defined in § 251.51 of this subpart.

* * * * *

3. Amend § 251.51 by removing the terms and definitions for *Distributing noncommercial printed material* and *Noncommercial printed material*, revising the definition for *"Group event,"* and adding the following new terms and definitions in alphabetical order to read as follows:

§ 251.51 Definitions.

* * * * *

Commercial use or activity—any use or activity on National Forest System lands involving the charge of an entry or participation fee, or the purchase, sale, or exchange of a product or service, regardless of whether the use or activity is intended to produce a profit.

Distribution of printed material—disseminating, posting, affixing, or erecting printed material as defined in this section or soliciting information, views, or signatures in conjunction with the distribution of printed material.

Group event—an activity conducted on National Forest System lands that involves and/or attracts 25 or more people.

Noncommercial use or activity—any use or activity that does not involve a commercial use or activity as defined in this section.

Printed material—any written and/or graphic material including but not limited to pamphlets, periodicals, leaflets, brochures, photographs or graphics, handbills, signs, petitions, posters, bumper stickers, and booklets.

* * * * *

4. Amend § 251.54 by revising paragraphs (a), introductory text, (e)(1), (e)(2)(i) and the introductory text of (e)(2)(ii), redesignating paragraphs (f)(1) and (f)(2) as (f)(2) and (f)(3) and redesignating the first sentence of paragraph (f) as paragraph (f)(1), and adding new paragraphs (f)(4) and (f)(5) and revising paragraph (h) to read as follows:

§ 251.54 Special use applications.

(a) *Preapplication activity.* When occupancy or use of National Forest System land is desired, a proponent is encouraged to contact the Forest Service office(s) responsible for management of the affected land as early as possible so that potential constraints may be identified, the proposal can be considered in land management plans if necessary, and processing of an application can be tentatively scheduled. To the extent applicable to the proposed use and occupancy, the proponent will be given guidance and information about:

* * * * *

(e) *Application content*—(1) *Applicant identification.* Any applicant for a special use authorization shall provide the applicant's name and mailing address, or if the applicant is not an individual, the name and address of the applicant's agent who is authorized to receive notice of actions pertaining to the application.

(2) *Minimum information.*—(i) *Noncommercial group events and noncommercial distribution of printed material.* An applicant for noncommercial group events and noncommercial distribution of printed material shall provide the following:

(A) A description of the proposed activity;

(B) A description of the National Forest System land and any facilities the applicant would like to use;

(C) The estimated number of participants and spectators;

(D) The date and time of the proposed activity; and

(E) The name of the person or persons 21 years of age or older who will sign a special use authorization on behalf of the applicant.

(ii) *All other special uses.* If requested by an authorized officer, an applicant in one of the following categories shall furnish the information specified for that catetory:

(A) A State and local government agency: a copy of the authorization under which the application is made;

(B) A public corporation: the statute or other authority under which it was organized;

(C) A Federal government agency: the title of the agency official delegated the authority to file the application:

(D) A private corporation: (*1*) Evidence of Incorporation and its current good standing; (*2*) if reasonably obtainable by the applicant, the name and address of each shareholder owning 3 percent or more of the shares, together with the number and percentage of any class of voting shares of the entity which such shareholder is authorized to vote; (*3*) the name and address of each affiliate of the entity; (*4*) in the case of an affiliate which is controlled by the entity, the number of shares and the percentage of any class of voting stock of the affiliate that the entity owns either directly or indirectly; or (*5*) in the case of an affiliate which controls that entity, the number of shares and the percentage of any class of voting stock of that entity owned, either directly or indirectly by the affiliate; or

(E) A partnership, association or other unincorporated entity: a certified copy of the partnership agreement or other similar document, if any, creating the entity, or a certificate of good standing under the laws of the State.

* * * * *

(f) *Processing applications.* (1) * * *

(4) The authorized officer shall give due deference to the findings of another agency such as the Public Utility Commission, the Federal Energy Regulatory Commission, or the Interstate Commerce Commission in lieu of another detailed finding. If this information is already on file with the Forest Service, it need not be refiled if reference is made to the previous filing date, place, and case number.

(5) A decision to grant or deny an application for a noncommercial group event or noncommercial distribution of printed material shall be made without unreasonable delay.

* * * * *

(h) *Response to applicctions for noncommercial group events or for the noncommercial distribution of printed material.* (1) An authorized officer shall grant an application for a special use authorization for a noncommercial group event or for noncommercial distribution of printed material, upon a determination that:

(i) The proposed activity is not prohibited by the rules at 36 CFR part 261, subpart A, or by orders issued pursuant to 36 CFR part 261, subpart B, or by Federal, State, or local law;

(ii) The proposed activity is consistent or can be made consistent with the applicable approved land and resource management plan required pursuant to 36 CFR part 219;

(iii) The proposed activity will not delay, halt, or prevent administrative use of an area by the Forest Service or other scheduled or existing uses or activities on National Forest System land, including but not limited to uses and activities authorized pursuant to parts 222, 223, 228, and 251 of this chapter;

(iv) The proposed activity will not pose a substantial danger to public health. Considerations of public health shall be limited to the following with respect to the proposed site:

(A) The sufficiency of sanitation facilities;

(B) The adequacy of waste disposal facilities;

(C) The availability of sufficient potable drinking water, in view of the expected number of users and duration of use;

(D) The risk of disease from the physical characteristics of the proposed site or natural conditions associated with the proposed site;

(E) The risk of contamination of the water supply;

(F) The sufficiency of a plan for safe handling of food.

(v) The proposed activity will not pose a substantial danger to public safety. Considerations of public safety shall not include concerns about possible reaction to the users' identity or beliefs from non-members of the group seeking an authorization and shall be limited to the following:

VOL 58 ISS 86 MY 6 1993 UMI

(A) The potential for physical injury to other forest users from the proposed activity;

(B) The potential for physical injury to users from the physical characteristics of the proposed site or natural conditions associated with the proposed site;

(C) The potential for physical injury to users from scheduled or existing uses or activities on National Forest System land; and

(D) The adequacy of ingress and egress in case of an emergency;

(vi) The proposed activity does not involve military or paramilitary training or exercises by private organizations or individuals, unless such training or exercises are federally funded; and

(vii) A person or persons 21 years of age or older has been designated to sign and does sign a special use authorization on behalf of the applicant.

(2) If an authorized officer denies an application because it does not meet the criteria in paragraphs (h)(1)(i) through (vii) of this section, the authorized officer shall notify the applicant in writing of the reasons for the denial. A denial of an application under paragraph (h)(1)(i) through (vii) of this section constitutes final agency action and is immediately subject to judicial review.

5. Amend § 251.56 by revising paragraph (e) to read as follows:

§ 251.56 Terms and conditions.

* * * * *

(e) *Bonding.* An authorized officer may require the holder of a special use authorization for other than noncommercial group events and noncommercial distribution of printed material to furnish a bond or other security to secure all or any of the obligations imposed by the terms of the authorization or by any applicable law, regulation or order.

* * * * *

6. Amend § 251.57 by redesignating paragraphs (d) through (g) as (e) through (h) and adding a new paragraph (d) to read as follows:

§ 251.57 Rental fees.

* * * * *

(d) No fee shall be charged when the authorization is for a noncommercial group event or for the noncommercial distribution of printed material as defined in § 251.51 of this subpart.

* * * * *

7. Revise § 251.60(b) to read as follows:

§ 251.60 Termination, revocation, and suspension.

* * * * *

(b) A special use authorization may be suspended, revoked or terminated, in the discretion of the authorized officer, for reasons in the public interest, except that this provision shall not apply to special use authorizations for noncommercial group events or noncommercial distribution of printed material.

* * * * *

PART 261—PROHIBITIONS

8. Revise the authority citation for part 261 to read as follows:

Authority: 7 U.S.C. 1011(f); 16 U.S.C. 472, 551, 1133(c)–(d)(1), 1246(i).

Subpart A—General Prohibitions

9. Amend § 261.2 by adding the following new terms and definitions in alphabetical order to read as follows:

§ 261.2 Definitions.

* * * * *

Distribution of printed material. Disseminating, posting, affixing, or erecting printed material as defined in this section or soliciting information, views, or signatures in conjunction with the distribution of printed material.

Printed material. Any written and/or graphic material including but not limited to pamphlets, leaflets, brochures, photographs or graphics, handbills, signs, petitions, posters, bumper stickers, and booklets.

* * * * *

10. Amend § 261.10 by redesignating paragraphs (h) through (m) as paragraphs (i) through (n), revising paragraph (g), and adding a new paragraph (h) to read as follows:

§ 261.10 Occupancy and use.

* * * * *

(g) Distributing any printed material without a special use authorization.

(h) When distributing printed material, delaying, halting, or preventing administrative use of an area by the Forest Service or other scheduled or existing uses or activities on National Forest System land; misrepresenting the purposes or affiliations of those selling or distributing the material; or misrepresenting the availability of the material without cost or donation.

* * * * *

§ 261.14 [Amended]

11. Amend § 261.14 by removing paragraph (p) and redesignating paragraph (q) as paragraph (p).

Dated: March 25, 1993.

George M. Leonard,

Associate Chief.

BILLING CODE 3410–11–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Ch. I

[FRL–4652–3]

Public Meeting on the Rulemaking for the Pulp, Paper, and Paperboard Industry

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meetings.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing two public meetings regarding regulations that will apply to the pulp, paper, and paperboard industry. The regulations are scheduled to be proposed in October 1993. EPA is sponsoring these meetings to report on the status of regulatory development and to gather information and ideas from interested parties.

DATES: The dates for the public meetings are Wednesday, May 19, 1993, 9 a.m. to 5 p.m. and Wednesday, June 9, 1993, 9 a.m. to 5 p.m.

ADDRESSES: The May 19 meeting will be held at the Virginia Center for Innovative Technology, which is located near Dulles Airport at 2214 Rock Hill Road, Herndon, Virginia 22070, telephone number 703–689–3000. The June 9 meeting will be held at the Omni Durham Hotel, 210 Foster St., Durham, North Carolina 27701. A block of rooms is being held for meeting participants. Please call the hotel directly at 919–683–OMNI for reservations.

FOR FURTHER INFORMATION CONTACT: Wendy Smith at the U.S. Environmental Protection Agency—by mail at WH–552, Office of Science and Technology, 401 M. Street SW, Washington, DC 20460; by telephone at (202) 260–7184.

SUPPLEMENTARY INFORMATION: EPA is developing effluent limitations guidelines and standards under authority of the Clean Water Act and maximum achievable control technology standards under authority of the Clean Air Act. The Agency is scheduled to propose these water and air regulations in October 1993.

At the public meeting on May 19, 1993, EPA plans to report the technology basis selected for the proposed regulations. Other agenda items may include implementation issues and presentations by interested parties. At the June 9, 1993 meeting, implementation issues will be discussed.

Inspection of Documents: Meeting materials, including a preliminary agenda, will be mailed approximately one week prior to the meeting or distributed at the meeting. The mailing list has been compiled from previous public meeting attendees and by requests. Anyone wishing to be added to the mailing list for meeting materials may contact Wendy Smith at the address or phone number above.

Dated: April 29, 1993.

James Hanlon,

Acting Director, Office of Science and Technology.

BILLING CODE 6560–60–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 93–118, RM–8219]

Radio Broadcasting Services; Trenton, FL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Robert D. Fogel, the personal representative of the estate of William H. Burckhalter, licensee of Station WEWB (FM), Channel 269A, Trenton, Florida, requesting the substitution of Channel 269C2 for Channel 269A at Trenton, Florida, and the modification of Station WCWB(FM)'s license to specify operation on the higher class channel. The coordinates for Channel 269C2 at Trenton are North Latitude 29–35–00 and West Longitude 83–05–50.

DATES: Comments must be filed on or before June 21, 1993, and reply comments on or before July 6, 1993.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Robert D. Fogel, Legare, Hare, & Smith P.O. Box 578, 63 Broad Street, Charleston, SC 29402 (Counsel for Estate of William H. Burckhalter).

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 93–118, adopted April 13, 1993, and released April 30, 1993. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M. Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, Inc., (202) 857–3800 1919 M Street, NW, room 246, or 2100 M Street, NW, suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is not longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712–01–M

GENERAL SERVICES ADMINISTRATION

48 CFR Part 509

General Services Administration Acquisition Regulation, Debarment and Suspension Factfinding

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Proposed rule.

SUMMARY: This document invites comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR) that would amend regulations on debarment and suspension factfinding. The changes conform the GSAR to the existing requirements of the FAR. As provided in the FAR, the proposed change preserves the role of the factfinder in resolving material facts in dispute and makes it clear that the suspending and debarring official determines whether cause for suspension or debarment exists based on the facts as found. In addition, the revision would add a sentence stating that suspension hearings on material facts in dispute will be conducted as outlined in 509.406–3 (b)(8) and (b)(9).

DATES: Comments are due in writing on or before June 7, 1993.

ADDRESSES: Comments should be addressed to Marjorie Ashby, Office of GSA Acquisition Policy, 18th & F Streets, NW., room 4006, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Ida M. Ustad, Office of GSA Acquisition Policy (2020 501–1224.

A. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule.

B. Regulatory Flexibility Act

An Initial Regulatory Flexibility Analysis has not been prepared because the proposed rule does not appear to have a significant economic impact on a substantial number of small entities because it simply changes which GSA official, the suspension or the debarment official rather than the factfinding official, makes the determination regarding whether there is a cause for suspension or debarment. However, comments from small entities concerning the proposed rule will be considered in accordance with 5 U.S.C 601 *et seq.*

C. Paperwork Reduction Act

This proposed rule does not contain information collection requirements the require the approval of OMB under 44 U.S.C. 3501 *et seq.*

List of Subject in 48 CFR Part 509

Government procurement.

Accordingly, it is proposed to amend 48 CFR part 509 as follows:

1. The authority citation for 48 CFR part 509 continues to read as follows:

Authority: 40 U.S.C. 486(c)

PART 509—CONTRACTOR QUALIFICATIONS

2. Section 509.406–3 is amended by revising paragraph b(8) to read as follows:

509.406–3 Procedures.

* * * * *

(b) * * *

* * * * * *

(8) The purpose of a fact-finding hearing is to:

(i) Afford the affected party the opportunity to dispute material facts relating to the proposed debarment through the submission of oral and written evidence; and

(ii) Resolve facts in dispute and provide the debarring official with written findings of fact based on a preponderance of evidence.

* * * * *

3. Section 509.407–3 is amended by adding a sentence at the end of paragraph (b)(6) to read as follows:

509.407–3 Procedures.

* * * * *

(b) * * *

* * * * * *

(6) Hearing will be conducted as outlined in 509.406–3 (b)(8) and (b)(9).

4. Section 509.407–3(b)(7) is revised to read as follows:

(7) The purpose of a fact-finding hearing is to:

(i) Afford the affected party the opportunity to dispute material facts relating to the suspension action through the submission of oral and written evidence; and

(ii) Determine whether, in light of the evidence presented, there is adequate evidence to suspect that the material allegations in the notice are true.

Dated: March 19, 1993.

Richard H. Hopf, III,

Associate Administrator for Acquisition Policy.

BILLING CODE 6820–61–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of Public Hearing on Proposed Establishment of a Nonessential Experimental Population of Black-footed Ferrets in North-Central Montana

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of public hearing.

SUMMARY: The U.S. Fish and Wildlife Service gives notice that a public hearing will be held on the proposed reintroduction of black-footed ferrets (*Mustela nigripes*) into the 11,061 km² (4,237 mi²) North-Central Montana Black-footed Ferret Experimental Population Area in North-Central Montana. This reintroduction is proposed to implement a primary recovery action for this federally listed endangered species and to evaluate release techniques.

DATES: The comment period extends from April 13, 1993 through June 14, 1993. A public hearing will be held from 7 p.m. to 10 p.m. on May 24, 1993.

ADDRESSES: The public hearing will be held in the second floor meeting room, Malta City Hall, 39 South 2d East, Malta, Montana. Written comments and materials concerning the proposal for a nonessential experimental population of black-footed ferrets in North-Central Montana should be sent to the Billings Suboffice Coordinator, U.S. Fish and Wildlife Service, Ecological Services, 1501 14th Street West, Suite 230, Billings, Montana 59102. Comments and materials received will be available for public inspection by appointment during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Dennis M. Christopherson (see **ADDRESSES** above) at telephone (406) 657–6750.

SUPPLEMENTARY INFORMATION:

Background

The U.S. Fish and Wildlife Service (Service) in cooperation with the Montana Department of Fish, Wildlife and Parks has proposed to reintroduce black-footed ferrets (*Mustela nigripes*) into the 11,061 km² (4,237 mi²) of the UL Bend National Wildlife Refuge in South Phillips County, Montana. This reintroduction is proposed to implement a primary recovery action for this federally listed endangered species and to evaluate release techniques. As part of the reintroduction effort, the black-footed ferret population in the experimental population area is proposed to be designated as "nonessential experimental" under the authority of section 10(j) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*). This special designation would increase the Service's flexibility in managing the newly released population of black-footed ferrets. Additional information on this proposed rulemaking was published in the **Federal Register** (58 *FR* 19221) on April 13, 1993.

A public hearing will be held on May 24, 1993, to provide interested parties an opportunity to make their views known on the proposed rulemaking. During the public comment period, any member of the public may send in comments, which must be received by June 14, 1993. Those parties wishing to make statements for the record should have available a copy of their statements to be presented to the Service at the start of the hearing. Oral statements may be limited to 5 or 10 minutes, if necessary, to allow all parties time to speak. There are no limits to the length of written comments that are provided to the Service, either at this hearing or by mail.

Authority for this action is the Endangered Species Act of 1973.

Author

The author of this notice is Dennis Christopherson, U.S. Fish and Wildlife Service (see **FOR FURTHER INFORMATION CONTACT** above).

Vol. 58, No. 86
Thursday, May 6, 1993

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[DA-91-017-A]

Milk for Manufacturing Purposes and its Production and Processing; Requirements Recommended for Adoption by State Regulatory Agencies

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: This document changes the recommended manufacturing milk requirements (Recommended Requirements) by incorporating provisions for an expanded drug residue monitoring program. The changes provide State regulatory agencies and the dairy industry with guidance in carrying out sampling, testing and monitoring activities relating to drug residues in manufacturing grade milk. The changes include a provision for a State-sanctioned penalty to be imposed on a manufacturing grade milk producer who ships milk testing positive for drug residue. In addition, the changes provide guidelines for the storage and proper labeling of drugs used on the dairy farm.

The action to expand the drug residue monitoring program was initiated at the request of the National Association of State Departments of Agriculture (NASDA) and was developed in cooperation with NASDA, the Food and Drug Administration (FDA), dairy trade associations and producer groups.

EFFECTIVE DATE: May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Duane R. Spomer, Chief, Dairy Standardization Branch, USDA/AMS/Dairy Division, Room 2750–S, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–7473.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA guidelines implementing Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "non-major" under the criteria contained therein.

Under the authority of the Agricultural Marketing Act of 1946, the U.S. Department of Agriculture maintains a set of model regulations or requirements relating to quality and sanitation in the production and processing of manufacturing grade milk. These recommended requirements are available for adoption by the various States. The purpose of the model requirements is to promote, through State adoption and enforcement, uniformity in State dairy laws and regulations relating to manufacturing grade milk.

In July 1991, the Dairy Division of NASDA passed a resolution recommending that the manufacturing grade milk drug residue monitoring program be revised using the Grade A drug residue monitoring program as a prototype. The Grade A program is based on the requirement that the milk on every bulk milk pickup tanker be sampled and tested, prior to processing, for the presence of beta lactam drugs. In addition, the Grade A program provides for the temporary suspension of a producer's Grade A permit, or an equivalent penalty, in the case of a producer who ships milk testing positive for beta lactam drugs.

In order to establish an expanded manufacturing grade milk drug residue monitoring program, as requested by NASDA, this document makes the following changes to the Recommended Requirements:

1. Provide That all Marketed Manufacturing Grade Milk be Sampled and Tested for the Presence of Beta Lactam Drugs

Previously, the Recommended Requirements provided for the testing of milk for antiblotics at a minimum frequency of four times in 6 months. This change specifies that all manufacturing grade milk intended for processing be sampled by the defined methods and tested for beta lactam drugs.

2. Provide That the Testing of all Marketed Manufacturing Grade Milk be Completed Prior to Processing

Previously, the Recommended Requirements did not provide guidelines for the timely completion and reporting of antibiotic tests. This change specifies that testing be completed prior to processing the load of milk.

3. Define State Regulatory Agency and Industry Responsibilities for the Implementation of the Expanded Drug Residue Monitoring Program.

The successful implementation of any regulatory program requires cooperation between State officials and industry personnel. In order for the State regulatory agency to adequately supervise and enforce the drug residue monitoring program, the dairy industry must maintain accurate records and follow uniform procedures. The revised model regulations define the responsibilities of each party in the execution of this program.

The adopted changes require the industry to notify the appropriate State regulatory agency of (a) each occurrence of a load sample testing positive for drug residue; (b) the identity of any producer whose milk causes a load sample to test positive for drug residue; and (c) the intended and final disposition of the load of milk represented in a sample testing positive for drug residue. Milk testing positive for beta lactams is to be disposed of in a manner that removes it from the human and animal food chain, unless reconditioned under FDA guidelines.

The changes also provide for the State regulatory agency to: (a) monitor the industry's sampling and testing methods for accuracy, consistency, and thoroughness; (b) perform comparison milk sample testing to evaluate the plant's recorded results; (c) review the industry's records of response to a positive drug residue test; and (d) sanction penalties on producers who have shipped milk testing positive for drug residue.

4. Provide for a State-sanctioned Penalty To Be Imposed on a Manufacturing Grade Milk Producer Who Ships Milk Testing Positive for Drug Residue

In order to emphasize the importance of utilizing milk production methods that prevent drug residues in milk, this change requires that there be a State-sanctioned penalty imposed on a producer for each occurrence of shipping milk testing positive for drug residue.

Additionally, following a third violation of shipping milk testing positive for drug residue within a 12-month period, the appropriate State agency will initiate administrative procedures to suspend the producer's milk shipping privileges, according to that State's policy.

5. Require a Producer Who Ships Milk Testing Positive To Participate in a Milk-quality Improvement Educational Program

After each occurrence of shipping milk testing positive for drug residue, a producer is required under this change to meet with a licensed veterinarian within 30 days to review the "Milk and Dairy Beef Quality Assurance Program." The "Quality Assurance Program" was developed by the Joint Liaison Committee of the American Veterinary Medical Association and the National Milk Producers Federation, with the cooperation and support of USDA, FDA, industry, and academia to help milk producers identify and eliminate the causes of drug residues in milk.

6. Provide Detailed Guidelines for the Labeling and Storage of Farm Chemicals and Animal Drugs

A central element of the "Milk and Dairy Beef Quality Assurance Program" is the proper labeling and storage of drugs located in the milk production areas. This change specifies that the labeling of animal drugs used on manufacturing grade farms shall conform to federal regulations and that the drugs be stored according to intended use.

7. Make Other Revisions and Editorial Changes in the Recommended Requirements To Reflect the Expansion of the Current Drug Residue Monitoring Program

These changes require dairy plants to: (a) test the milk of new and transfer producers for the presence of drug residues prior to acceptance of the milk at the plant; (b) retain drug residue test results for a minimum of 12 months; (c) include in a producer's records the results of drug residue tests for the preceding 12 months; and (d) provide field service assistance to farmers regarding drug residue issues.

8. Make Revisions in the Recommended Requirements to Update and Clarify Somatic Cell Testing Requirements

This change corrects the action level at which the Wisconsin Mastitis Test must be confirmed.

State regulatory agencies that are responsible for overseeing the sanitation requirements relating to the production and processing of farm-separated cream are strongly encouraged to include such cream in a drug residue monitoring program to sample and test for illegal levels of drug residue which could contaminate products made from this source of cream. The National Conference on Interstate Milk Shipments is developing a database intended to compile information concerning drug residue test results which are reflective of the national milk supply. The Department encourages participation in this voluntary program.

Public Comments

On July 27, 1992, the Department published a notice of intent to revise the Recommended Requirements [57 FR 33168]. The public comment period closed August 26, 1992. Comments were received from six commenters: two representing State regulatory agencies, one representing dairy producers, one representing dairy processors, one representing veterinarians, and one representing a dairy cooperative.

Discussion of Comments

1. One commenter was concerned that the proposal duplicated State drug residue monitoring programs and that it is not consistent with existing State requirements.

The Department advocates nationally uniform regulations for monitoring drug residue in the milk supply and has worked closely with the Dairy Division of NASDA to promote uniformity. During the development of the drug residue monitoring program, the Department consulted with NASDA representatives to provide a model program consistent with existing State laws. The Department believes the expanded drug residue monitoring program accomplishes this.

2. Two commenters requested that the minimum record retention time be reduced from 12 months to 6 months. These commenters felt the change would provide consistency with the Grade A milk program and reduce recordkeeping requirements.

The Department believes that accurate records detailing a 12-month history of drug residue test results are necessary since three occurrences of positive drug residue tests within a 12-month period will require that administrative procedures be initiated to suspend the producer's milk shipping privileges.

Provisions in the Grade A milk program require State regulatory agencies to maintain a history of drug residue test results. Similarly, the USDA recommended program has provided for many years that the dairy plant maintain these records and have them available for regulatory review.

3. One commenter suggested that State regulatory agencies not be required to monitor the industry's drug residue testing and sampling procedures nor collect samples for comparison drug residue testing. The commenter was concerned that these requirements were costly, time-consuming and created an unofficial certification.

The Department believes that compliance with the provisions of the drug residue monitoring program can best be established through active participation by the State regulatory agency. The Department believes the requirements are necessary to ensure that proper procedures are being followed and that accurate drug residue test results are being obtained.

4. One commenter recommended immediate suspension of a producer's license or permit each time a violative level of drug residue is confirmed.

The Department believes that the revised provisions of the Recommended Requirements will preclude the further marketing of milk from producers who have violated the drug residue requirements until that producer's milk is individually sampled and found not to contain violative levels of drug residues. Individual States have the ability to develop more stringent requirements if they so choose.

5. Two commenters recommended an increase in the number of days allowed for a producer to review the "Milk and Dairy Beef Quality Assurance Program" with a licensed veterinarian.

During the development of the expanded drug residue monitoring program, the Department provided as much consistency with the Grade A milk program as possible. When the notice of intent to amend the Recommended Requirements was published, 21 days was considered to be the timeframe allowed by the Grade A milk program. Since then, the Grade A program has established 30 days as the allowable timeframe. The Department concurs with this and has modified the Recommended Requirements accordingly.

6. There were several comments recommending changes outside the scope of the proposal. These comments suggested: changing the requirements for rejecting milk due to bacterial estimate, modifying the list of acceptable somatic cell tests, lowering the maximum allowable bacterial estimate, lowering the maximum allowable somatic cell limit, and using sani-guide discs to evaluate sediment content in milk.

VOL 58 ISS 86 MY 6 1993 UMI

Since the proposal did not request public comment concerning these topics, the Department elects not to make the requested changes at this time. These comments will be considered as future changes are proposed.

7. One commenter suggested limiting barn storage of drugs to those approved for dairy animals or those prescribed by a licensed veterinarian.

The adopted model regulations permit barn storage of drugs labeled for use in non-dairy animals only when these drugs are located in an area of the barn which is separate from the milking area. The Recommended Requirements disallow the storage of drugs labelled for use in non-dairy animals in the same storage unit used to store drugs approved for use in dairy animals. The Department believes that sufficient guidance is provided to safeguard against accidental contamination due to inadvertent use of improper drugs.

8. One commenter requested the deletion of the requirement that milk buyers obtain quality and drug residue test records for producers transferring milk shipments from another plant.

Since 1972, the USDA Recommended Requirements have specified the transfer of producer quality records when a milk producer changes milk buyers. This action expands the requirement to include a history of drug residue test results.

The Department recognizes the difficulties which occur when a new buyer requests quality records for a transfer producer. However, a producer's quality and drug residue test history is essential in establishing test frequency and determining sanctions.

9. One commenter suggested modifying the proposal to clarify actions required of plants. The commenter cited instances where manufacturing operations or plants may not be purchasing milk directly from the producer and therefore are not able to fulfill certain provisions of the Recommended Requirements.

The buyer who purchases milk from the producer is usually responsible for ensuring that quality and drug residue tests are being conducted, records are being maintained, and follow-up actions have taken place. In many instances, this is the responsibility of the dairy plant to which the producer ships milk. In other instances, processing operations or plants may purchase milk and have little or no responsibility to the milk producer. The intent of the Recommended Requirements is that when a plant is used to indicate the party responsible for testing milk, maintaining quality and drug residue test records, and providing mandated follow-up actions with the milk producer, the responsible party may or may not be the manufacturing operation processing the milk. To clarify this, modifications in the proposal have been made accordingly.

For the reasons set forth in the preamble, the Recommended Requirements as published in the **Federal Register** on April 7, 1972 [37 FR 7046] and revised August 27, 1985 [50 FR 34726] are revised as follows:

1. In sec. B2., paragraphs (i), (j) and (p) are revised to read as follows:

Sec. B2. Terms Defined

* * * * *

(i) *Producer.* The person or persons who exercise control over the production of the milk delivered to a plant, and who receives payment for this product. A "new producer" is one who is initiating the shipment of milk from a farm. A "transfer producer" is one whose shipment of milk from a farm is shifted from one plant to another plant. A "producer/processor" is one who manufactures dairy products on the dairy farm entirely from his own milk, or from his own milk combined with milk from one or more other producers.

(j) *Dairy farm or farm.* A place or premise where one or more milking cows or goats are kept, and from which all or a portion of the milk produced thereon is delivered, sold, or offered for sale to a manufacturing plant.

* * * * *

(p) *Rejected milk.* Milk rejected from the market according to the provisions of sec. C5.

* * * * *

2. Sec. C1. is revised to read as follows:

Sec. C1. Basis

The quality classification of raw milk for manufacturing purposes from each producer shall be based on an organoleptic examination for appearance and odor, a drug residue test and quality control tests for sediment content, bacterial estimate and somatic cell count.

3. Sec. C5. is revised to read as follows:

Sec. C5. Rejected Milk

A plant shall reject specific milk from a producer if the milk fails to meet the requirements for appearance and odor (sec. C2.), if it is classified No. 4 for sediment content (sec. C3.), or if it tests positive for drug residue (sec. C12.).

4. Secs. C7. through C10. are revised to read as follows:

Sec. C7. Excluded Milk

A plant shall not accept milk from a producer if:

(a) The producer's initial milk shipment to a plant does not meet the requirements for acceptable milk (secs. C3. and C4.);

(b) The milk has been in a probational (No. 3) sediment content classification for more than 10 calendar days (sec. C3.);

(c) The milk has been classified "Undergrade" for bacterial estimate for more than 4 successive weeks (sec. C4.);

(d) Three of the last five milk samples have exceeded the maximum somatic cell count level of 1,000,000 per ml. (sec. C11.);

(e) The producer's milk shipments to either the Grade A or the manufacturing grade milk market currently are not permitted due to a positive drug residue test (sec. C12.); or

(f) The producer is delinquent in completing a review of the "Milk and Dairy Beef Quality Assurance Program" with a licensed veterinarian following an occurrence of shipping milk testing positive for drug residue (sec. C12.).

Sec. C8. Quality Testing of Milk From Producers.

(a) *New producers.*

(1) An examination and tests shall be made on the first shipment of milk from a new producer or from a producer resuming shipment after a period of non-shipment. The milk shall meet the requirements for:

(i) "Acceptable milk" (secs. C2., C3., and C4.);

(ii) Somatic cell count (sec. C11.); and

(iii) Drug residue level (sec. C12.).

(2) Thereafter, each milk shipment shall meet the requirements of sec. C2., and shall be tested in accordance with the provisions of secs. C3., C4., C11., and C12.

(b) *Transfer producers.*

(1) An examination and test shall be made by the new buyer on the first shipment of milk from a transfer producer. The milk shall meet the requirements for:

(i) "Acceptable milk" (secs. C2., C3., and C4.);

(ii) Somatic cell count (sec. C11.); and

(iii) Drug residue level (sec. C12.).

(2) Thereafter, each milk shipment shall meet the requirements of sec. C2., and shall be tested in accordance with the provisions of secs. C3., C4., C11., and C12.

(3) In addition, the new buyer shall determine from the producer's records that:

(i) The milk is currently classified "acceptable" for bacteria and sediment;

(ii) Three of the last five consecutive milk samples do not exceed the maximum somatic cell count level requirements;

(iii) The last shipment of milk received from the producer by the former plant did not test positive for drug residue; and

(iv) Milk shipments currently are not excluded from the market due to a positive drug residue test.

(4) When a producer discontinues milk delivery at one plant and begins delivery at another plant for any reason, the new buyer shall not accept the first milk delivery until he has requested from the previous buyer a copy of the record of:

(i) The producer's milk quality tests covering the preceding 90 days;

(ii) The producer's drug residue test results for the preceding 12-month period; and

(iii) A statement of the farm certification status and date of certification, if so provided under State regulations.

(5) The previous buyer shall furnish the new buyer with such information within 24 hours after receipt of the request. A new buyer may accept a transfer producer's milk after making the request for records, but before receiving them, if he first confirms the producer's records verbally from the previous buyer. If verbal communication is used to ascertain the status of quality records, the new buyer shall send to the previous buyer, as soon as possible, a written confirmation of the conversation.

(6) If the new buyer fails to receive the quality records from the previous buyer, he shall report this fact to the appropriate State regulatory agency. The new buyer may then, alternatively, obtain from the producer a copy of the test results for sediment content, bacterial estimate, and somatic cell count for the preceding 90-day period and a copy of the drug residue test results for the preceding 12-month period. A farm inspection shall then be made to confirm or establish certification of the transfer producer's farm.

Sec. C9. Record of Tests

Accurate records of the results of the milk quality and drug residue tests for each producer shall be kept on file for a period of not less than 12 months. The records shall be available for examination by the regulatory agency.

Sec. C10. Field Service

A representative of the plant shall arrange to promptly visit the farm of each producer whose milk tests positive for drug residue, exceeds the maximum somatic cell count level, or does not meet the requirements for acceptable milk. The purpose of the visit shall be to inspect the milking equipment and facilities and to offer assistance to improve the quality of the producer's milk and eliminate any potential causes of drug residues. A representative of the plant should routinely visit each producer as often as necessary to assist and encourage the production of high quality milk.

5. Sec. C11. is revised to read as follows:

Sec. C11. Somatic Cell Count

(a) A laboratory examination to determine the level of somatic cells shall be made on each producer's milk at least four times in each 6-month period at irregular intervals. Samples shall be analyzed at a laboratory approved by the State regulatory agency.

(b) A confirmatory test for somatic cells shall be done when a herd sample exceeds either of the following screening test results:

(1) California Mastitis Test - Weak Positive (CMT 1).

(2) Wisconsin Mastitis Test - WMT value of 18 mm.

(c) The confirmatory test for somatic cells shall be performed by using one of the following procedures:

(1) Direct Microscopic Somatic Cell Count (Single Strip Procedure). Pyronin Y-methyl green stain shall be used for goat milk.

(2) Electronic Somatic Cell Count.

(3) Optical Somatic Cell Count.

(d) The results of the confirmatory test for somatic cells shall be the official result.

(e) Whenever the confirmatory somatic cell count indicates the presence of more than 1,000,000 somatic cells per ml., the following procedures shall be applied:

(1) The producer shall be notified with a warning of the excessive somatic cell count.

(2) Whenever two of the last four consecutive somatic cell counts exceed 1,000,000 per ml., the appropriate regulatory authority shall be notified and a written warning notice given to the producer. The notice shall be in effect so long as two of the last four consecutive samples exceed 1,000,000 per ml.

(f) An additional sample shall be taken after a lapse of 3 days but within 21 days of the notice required in paragraph (e)(2) of this section. If this sample also exceeds 1,000,000 per ml., subsequent milkings shall be excluded from the market until satisfactory compliance is obtained. Shipment may be resumed and a temporary status assigned to the producer by the appropriate State regulatory agency when an additional sample of herd milk is tested and found satisfactory. The producer shall be assigned a full reinstatement status when three out of four consecutive somatic cell count tests do not exceed 1,000,000 per ml. The samples shall be taken at a rate of not more than two per week on separate days within a 3-week period.

6. New secs. C12., C13., C14., and C15. are added to read as follows:

Sec. C12. Drug Residue Level

(a) *Industry responsibilities.*

(1) *Sampling and testing program.*

(i) All milk shipped for processing or intended to be processed on the farm where it was produced shall be sampled and tested, prior to processing, for beta lactam drug residue. Collection, handling and testing of samples shall be done according to procedures established by the appropriate State regulatory agency.

(ii) When so specified by the U.S. Food and Drug Administration (FDA), all milk shipped for processing, or intended to be processed on the farm where it was produced, shall be sampled and tested, prior to processing, for other drug residues under a random drug sampling program. The random drug sampling program shall include at least four samples collected in at least 4 separate months during any 6-month period.

(iii) When the Commissioner of the FDA determines that a potential problem exists with an animal drug residue or other contaminant in the milk supply, a sampling and testing program shall be conducted, as determined by the FDA. The testing shall continue until such time that the Commissioner of the FDA determines with reasonable assurance that the potential problem has been remedied.

(iv) The dairy industry shall analyze samples for beta lactams and other drug residues by methods evaluated by the Association of Official Analytical Chemists (AOAC) and accepted by the FDA as effective in determining compliance with established "safe levels" or tolerances. "Safe levels" and tolerances for particular drugs are established and amended by the FDA. The industry may employ on a temporary basis other test methods evaluated by the Virginia Polytechnic Institute and State University, or by other institutions using equivalent evaluation procedures, and determined to demonstrate accurate compliance results. These test methods may be used

VOL
58
ISS
86
MY
6
1993
UMI

until they are evaluated by the AOAC and accepted or rejected by the FDA.

(2) *Individual producer sampling.*

(i) *Bulk milk.*

A milk sample for beta lactam drug residue testing shall be taken at each farm and shall include milk from each farm bulk tank.

(ii) *Can milk.*

A milk sample for beta lactam drug residue testing shall be formed separately at the receiving plant for each can milk producer included in a delivery, and shall be representative of all milk received from the producer.

(iii) *Producer/processor.*

A milk sample for beta lactam drug residue testing shall be formed separately according to paragraphs (a)(2)(i) and (ii) of this section for milk produced or received by a producer/processor.

(3) *Load sampling and testing.*

(i) *Bulk milk.*

A load sample shall be taken from the bulk milk pickup tanker after its arrival at the plant and prior to further commingling.

(ii) *Can milk.*

A load sample representing all of the milk received on a shipment shall be formed at the plant, using a sampling procedure that includes milk from every can on the vehicle.

(iii) *Producer/processor.*

A load sample shall be formed at the plant using a sampling procedure that includes all milk produced and received.

(4) *Sample and record retention.*

A load sample that tests positive for drug residue shall be retained according to guidelines established by the appropriate State regulatory agency. The records of all sample test results shall be retained for a period of not less than 12 months.

(5) *Industry follow-up.*

(i) When a load sample tests positive for drug residue, industry personnel shall notify the appropriate State regulatory agency immediately, according to State policy, of the positive test result and of the intended disposition of the shipment of milk containing the drug residue. All milk testing positive for drug residue shall be disposed of in a manner that removes it from the human or animal food chain, except when acceptably reconditioned under FDA compliance policy guidelines.

(ii) Each individual producer sample represented in the positive-testing load sample shall be singly tested as directed by the appropriate State regulatory agency to determine the producer of the milk sample testing positive for drug residue. Identification of the producer responsible for producing the milk testing positive for drug residue, and details of the final disposition of the shipment of milk containing the drug residue, shall be reported immediately to the appropriate agency, according to State policy.

(iii) Milk shipment from the producer identified as the source of milk testing positive for drug residue shall cease immediately and may resume only after a sample from a subsequent milking does not test positive for drug residue.

(b) *Regulatory agency responsibilities.*

(1) *Monitoring and surveillance.*

The appropriate State regulatory agency shall monitor the milk industry's drug residue program by conducting unannounced on-site inspections to observe testing and sampling procedures and to collect samples for comparison drug residue testing. In addition, the regulatory agency shall review industry records for compliance with State policy. The review shall seek to determine that:

(i) Each producer is included in a routine, effective drug residue milk monitoring program utilizing AOAC-evaluated and FDA-approved methods to test samples for the presence of drug residue;

(ii) The regulatory agency receives prompt notification from industry personnel of each occurrence of a sample testing positive for drug residue, and of the identity of each producer identified as a source of milk testing positive for drug residue;

(iii) The regulatory agency receives prompt notification from industry personnel of the intended and final disposition of milk testing positive for drug residue, and that disposal of the load is conducted in a manner that removes it from the human or animal food chain, except when acceptably reconditioned under FDA compliance policy guidelines; and

(iv) Milk shipment from a producer identified as a source of milk testing positive for drug residue completely and immediately ceases until a milk sample taken from the dairy herd does not test positive for drug residue.

(2) Enforcement.

(i) A penalty sanctioned by the State regulatory agency shall be imposed on the producer for each occurrence of shipping milk testing positive for drug residue.

(ii) The producer shall review the "Milk and Dairy Beef Quality Assurance Program" with a licensed veterinarian within 30 days after each occurrence of shipping milk testing positive for drug residue. A certificate confirming that the "Quality Assurance Program" has been reviewed shall be signed by the responsible producer and a licensed veterinarian. The appropriate State regulatory agency shall be notified after the program has been reviewed.

(iii) If a producer ships milk testing positive for drug residue three times within a 12-month period, the appropriate State agency shall initiate administrative procedures to suspend the producer's milk shipping privileges, according to State policy.

Sec. C13. Radionuclides

Composite milk samples from selected areas in each State should be tested for biologically significant radionuclides at a frequency which the regulatory agency determines to be adequate to protect the consumer.

Sec. C14. Pesticides and Herbicides

Composite milk samples should be tested for pesticides and herbicides at a frequency which the regulatory agency determines is adequate to protect the consumer. The test results from the samples shall not exceed established FDA limits.

Sec. C15. Added Water

Milk samples from each producer should be tested for added water at a frequency which the regulatory agency determines is adequate to prevent the addition of water to the milk.

7. Sec. D5.(e) is revised and D5.(f) is added to read as follows:

Sec. D5. Milkhouse or Milkroom

* * * * *

(e) The milkhouse or milkroom shall be kept clean and free of trash. Animals and fowl shall not be allowed access to the milkhouse or milkroom at any time.

(f) *Farm chemicals and animal drugs.*

(1) Animal biologics and other drugs intended for treatment of animals, and insecticides approved for use in dairy operations, shall be clearly labeled and used in accordance with label instructions, and shall be stored in a manner which will prevent accidental contact with milk and milk contact surfaces.

(2) Only drugs that are approved by the FDA or biologics approved by the USDA for use in dairy animals that are properly labeled according to FDA or USDA regulations shall be administered to such animals.

(3) When drug storage is located in the milkroom, milkhouse, or milking area, the drugs shall be stored in a closed, tight-fitting storage unit. Such drugs shall further be segregated in such a way so that drugs labeled for use in lactating dairy animals are separated from drugs labeled for use in non-lactating dairy animals.

(4) Drugs labeled for use in non-dairy animals shall not be stored with drugs labeled for use in dairy animals. When drugs labeled for use in non-dairy animals are stored in the barn, the drugs shall be located in an area of the barn separate from the milking area.

(5) Herbicides, fertilizers, pesticides, and insecticides that are not approved for use in dairy operations shall not be stored in the milkhouse, milkroom, or milking area.

(Agricultural Marketing Act of 1946, Secs. 202–208, 60 Stat. 1087, as amended; 7 U.S.C. 1621–1627, unless otherwise noted)

Dated: April 30, 1993.

L.P. Massaro,

Acting Administrator.

[FR Doc. 93–10725 Filed 5–5–93; 8:45 am]

BILLING CODE 3410–02–P

Forest Service

Exemption of Larry's Salvage Blowdown From Appeal

AGENCY: Forest Service, Northern Region, USDA.

ACTION: Notification that a timber salvage and rehabilitation project designed to recover blown down timber is exempt from provisions of 36 CFR part 217.

SUMMARY: In October 1991, unusually strong winds in localized areas across the Rexford Ranger District produced areas of wind-thrown timber. The Rexford District Ranger proposed a salvage timber sale to recover damaged sawtimber in the affected area.

The District Ranger has determined, through a Decision Memo and environmental analysis in the supporting project file, that there is good cause to expedite these actions in order to rehabilitate National Forest System lands and recover damaged resources. Salvage of commercial sawtimber within the area affected must be accomplished quickly to avoid further deterioration of sawtimber and reduce the risk of wildfire.

EFFECTIVE DATE: Effective May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Drew Bellon; Rexford District Ranger; Kootenai National Forest; 1299 Highway 93 North; Eureka, MT 59917; 406–296–2536.

SUPPLEMENTARY INFORMATION: Severe windstorms on October 16, 1991, damaged approximately 25 acres of timber in the Lawrence Mountain area approximately 30 miles southwest of Eureka, Montana. The wind-thrown timber is located within lands designated as suitable for timber management and assigned to Management Area 12 (Kootenai Forest Plan, August 1987). In the winter of 1991, the Rexford District Ranger, Kootenai National Forest, proposed to salvage wind-damaged timber in the Lawrence Mountain area. This proposal is designed to meet the following needs: (1) Recover dead and dying timber before it loses its commercial value, (2) rehabilitate the affected timber stands, and (3) reduce the potential for wildfire by reducing fuel loading. An interdisciplinary team was convened, and scoping began in 1992. Two alternatives were analyzed; no treatment (no action) and a salvage and rehabilitation proposal (proposed action).

The selected alternative will salvage approximately 168 MBF of dead and damaged timber from approximately 25 acres. All salvage areas are accessible from existing roads; no road construction or reconstruction will occur.

The sale and accompanying work is designed to accomplish the objectives as quickly as possible to reduce the fuel accumulations and to recover merchantable sawtimber before it deteriorates and removal becomes infeasible. To expedite implementation of this decision, procedures outlined in 36 CFR part 2179(a)(11) are being followed. Under this Regulation the following may be exempt from appeal:

"Decisions related to rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenomena, such as * * * severe wind * * * when the Regional Forester * * * determines and gives notice in the **Federal Register** that good cause exists to exempt such decisions from review under this part."

Based upon the information presented in the Larry's Blowdown Salvage Decision Memo, I have determined that good cause exists to exempt this decision from administrative review. Therefore, upon publication of this notice, this project will not be subject to review under 36 CFR part 217.

Dated: April 26, 1993.

Larry O. Gadt,

Acting Deputy Regional Forester, Northern Region.

[FR Doc. 93–10153 Filed 5–5–93; 8:45 am]

BILLING CODE 3410–11–M

Exemption From Appeal for Steen Creek Salvage Project, Payette National Forest

AGENCY: Forest Service, USDA.

ACTION: Notice of exemption from appeal.

SUMMARY: This is notification that timber salvage harvest and reforestation activities to recover and rehabilitate natural resources from recent wildfire on the Steen Creek Timber Salvage project, Council Ranger District, Payette National Forest, are exempt from appeal in accordance with 36 CFR 217.4(a)(11).

DATES: Effective on May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Tracy Beck, Environmental Coordinator, Council Ranger District, Payette National Forest, P.O. Box 567, Council, ID 83612, telephone: 208–253–4215.

SUPPLEMENTARY INFORMATION: Several years of drought in southwest Idaho have reduced soil moisture, weakened conifer trees, and increased the fire danger. In August of 1992, a lightning-ignited fire burned 17,500 acres of National Forest between Hells Canyon and the community of Cuprum, about 26 miles northwest of the town of Council in southwest Idaho.

As part of the effort to recover and rehabilitate natural resources damaged by the wildfire, Council Ranger District personnel have developed a proposal to harvest burned timber and reforest damaged acres. The Forest Service has completed the Final Environmental Impact Statement (EIS) for the Steen Creek Timber Salvage project.

The analysis area for the Steen Creek Timber Salvage EIS is located 24 miles northwest of Council, Idaho. The Forest will salvage burned trees throughout the 6,650-acre project area and recover approximately 12.5 million board feet (MMBF) of timber. The Steen Creek Salvage Project will harvest only dead and dying trees using helicopter, tractor and skyline logging systems. Cutting areas average 16 acres in size and will not exceed 81 acres. Regional Forester approval has been given to the Payette National Forest to exceed the Forest Plan cutting unit size limit due to the catastrophic condition of the timber stands.

Cutover areas greater than 5 acres will be replanted, and smaller areas may be replanted depending on accessibility. Approximately 1334 acres damaged by fire would be replanted with conifer seedlings. There is 10.3 miles of road construction and 12.6 miles of road reconstruction proposed for the salvage operations.

Management direction for the project area is established in the Payette National Forest Land and Resource Management Plan (Forest Plan) of 1988. The Forest Plan provides for the removal of salvage timber from lands

VOL 58 ISS 86 MY 6 1993 UMI

within the project area. In addition, the Forest Plan prescribes standards to protect soil, water, wildlife, visual quality, and other affected resources. The proposed action for Steen Creek Salvage is consistent with standards and guidelines, objectives, and direction contained in the Forest Plan.

An interdisciplinary team of Forest Service rehabilitation specialists has studied the burned area and prescribed watershed stabilization measures. Payette Forest and Council District foresters have analyzed the burned area and have found that a salvage timber sale to be an economical and practical means to rehabilitate the burned area. The salvage project will: (1) Recover valuable timber that would otherwise deteriorate, (2) clean up burned trees that would otherwise become flammable fuels in the future, and (3) reforest those areas that have been left with little or no tree cover as a result of the fire. It is extremely important to remove the dead and dying timber before it deteriorates and loses its economic value. Through the timber salvage operations, Knutson-Vandenburg (K–V) funds can be generated for use to restore forest resources that have been damaged by the wildfire.

The Forest Supervisor has determined through preliminary scoping and environmental analysis that there is justification to expedite these projects.

The decision for the Steen Creek Salvage project may be implemented after publication of this notice in the **Federal Register** and after the decision document has been signed by the responsible official. If the project is delayed because of appeal, it is possible that the salvage harvest could not be implemented during the 1993 normal operating season. This would result in a loss of volume and value of the timber due to deterioration. The total estimated value of the merchantable dead and dying timber is $3,750,000. Of this, approximately $937,500 [that's 25%] would be returned to counties from 25 percent fund receipts. Delays resulting from appeals could cause the loss of up to two-thirds of this value and potentially make the salvage sale unattractive to timber purchasers. This would jeopardize the objectives of the recovery and rehabilitation project.

Pursuant to 36 CFR 217.4(a)(11), it is my decision to exempt Steen Creek Salvage Project, Council Ranger Districts, Payette National Forest, from appeal. The Final EIS addresses the effects and issues associated with the Steen Creek Salvage Project.

Dated: April 30, 1993.

Robert C. Joslin

Deputy Regional Forester, Intermountain Region, USDA Forest Service.

[FR Doc. 93–10662 Filed 5–5–93; 8:45 am]

BILLING CODE 3410–11–M

Exemption of the Horsefly Fire Salvage Project, Salmon National Forest, ID

AGENCY: Forest Service, USDA.

ACTION: Notice of exemption from appeal.

SUMMARY: This is notification that timber salvage harvest and reforestation activities to recover and rehabilitate natural resources from the effects of catastrophic fire on the Horsefly Fire Salvage project area on the North Fork Ranger District, Salmon National Forest, are exempted from appeal in accordance with 36 CFR 217.4(a)(11).

DATES: Effective on May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Rogers Thomas, District Ranger, North Fork Ranger District, Salmon National Forest, P.O. Box 180, North Fork, Idaho 83466. Telephone: 208–865–2383.

SUPPLEMENTARY INFORMATION: In early August 1992, the Horsefly Wildfire burned approximately 3,500 acres in the Boulder Creek, Spring Creek and McKay Creek drainages. Several years of drought in central Idaho contributed to extreme and rarely observed fire behavior. Immediately after the fire, an Interdisciplinary Team (IDT) of resource specialists, surveyed much of the burn area to identify emergency and long-term rehabilitation needs. From this preliminary analysis, it was found that in many places, the Horsefly fire burned hot enough to cause severe damage to forest and watershed resources. Damage to soils is of greatest concern because this damage will affect the length of time necessary to achieve revegetation, as well as the quantity and quality of water runoff from the area.

As part of the effort to recover and rehabilitate natural resources damaged by catastrophic fire, Forest personnel have developed a proposal to harvest fire-killed timber, and reforest suitable timberlands. Forest Service personnel have completed the Horsefly Fire Salvage Environmental Assessment (EA), identified issues, developed alternatives, and analyzed the affects of implementing timber salvage and other rehabilitation activities.

The analysis area for the Horsefly Fire Salvage EA is located approximately seventeen (17) miles west of North Fork, Idaho, and one (1) mile north of Shoup. The Forest will harvest burned, dead and dying timber over an 800 acre project area and recover approximately 3 MMBF.

Of the 800 acres that would be harvested, roughly 532 acres are located within the Sheepeater Roadless Area. Impacts to this roadless area entail, harvesting dead and dying trees using helicopter and cable logging systems. There is no road construction or reconstruction proposed for the salvage operations. Four existing helicopter landing and one service landing from previous logging activity would be used. One additional landing is proposed within the Roadless Area. Lands suited for timber management would be replanted, where natural regeneration is not expected to be successful.

Management direction for the analysis area is established in the Salmon National Forest Land and Resource Management Plan (Forest Plan). The Forest Plan describes standards which must be observed when harvesting timber to protect soil, water, wildlife, visuals, and other on site resources. The proposed action for the Horsefly Fire Salvage project is consistent with standards, objectives, and direction contained in the Forest Plan.

Emergency rehabilitation measures initiated during fall 1992 included: grass seeding for soil stabilization and silt fence construction above anadromous fisheries. These actions were needed immediately to mitigate fire effects and reduce potential for soil movement. This proposal would further contribute to area recovery by: (1) Capturing the economic value of fire-killed timber that would otherwise deteriorate, (2) reforesting suitable timberlands to restore sites to timber production prior to disadvantageous brush competition, and (3) rehabilitating fire damaged watersheds to protect water quality and long-term soil productivity.

It is important to remove the salvageable timber prior to deterioration and subsequent value losses. Delays in implementing the activities necessary to restore these damaged lands will result in unacceptable degradation of the physical and biological resources of National Forest System land. Through timber salvage operation, commercial product value of the fire-killed trees can be recovered, and a portion of the receipts from this sale will provide funding for other restoration activities through collection of Knutsen-Vanderburg (K–V) and Salvage Sale Funds.

The Forest Supervisor has determined through preliminary scoping and environmental analysis that there is good cause to expedite this project.

The decision for the Horsefly Fire Salvage project may be implemented after publication of this notice in the **Federal Register** and after the decision document has been signed by the responsible official. If the project is delayed because of an appeal (delays up to 150 days are possible), it is likely the salvage harvest could not be implemented until early summer 1993. This would result in a loss of volume and value due to deterioration. The total estimated value of the merchantable dead and dying timber is $500,000. Of this, approximately $125,000 would be returned to counties from 25 percent fund receipts. Delays resulting from appeals could cause the loss of up to half of this value and potentially make the salvage sale unattractive to timber purchasers. This would jeopardize the objectives of the recovery and rehabilitation project.

Pursuant to 36 CFR 217.4(a)(11), it is my decision to exempt the Horsefly Fire Salvage Project, North Fork Ranger District, Salmon National Forest, from appeal. The environmental assessment disclosed the affects of the proposed actions on the environment and addresses the issues resulting from the proposal.

Dated: April 30, 1993.

Robert C. Joslin,

Deputy Regional Forester, Intermountain Region, USDA Forest Service.

[FR Doc. 93–10663 Filed 5–5–93; 8:45 am]

BILLING CODE 3410–11–M

Exemption from Appeal for Fir Fly Salvage Timber Sale, Salmon National Forest, ID

AGENCY: Forest Service, USDA.

ACITON: Notice of exemption from appeal.

SUMMARY: This is notification that timber salvage harvest, pheromone baiting/trapping, and reforestation activities to recover and rehabilitate natural resources from the effects of an ongoing district wide insect infestation in the Fir Fly Salvage project area on the Cobalt Ranger District, Salmon National Forest, are exempted from appeal in accordance with 36 CFR 217.4(a)(11).

EFFECTIVE DATE: May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Clinton Groll, District Ranger, Cobalt Ranger District, Salmon National Forest, P.O. Box 729, Salmon, Idaho, 83467, Telephone: 208–756–2240.

SUPPLEMENTARY INFORMATION: The Cobalt Ranger District of the Salmon National Forest has been under a district wide Douglas-fir and mountain pine beetle infestation for the last 3 years. The insect populations are presently at endemic levels in most areas but are approaching epidemic levels in some drainages. An interdisciplinary Team (IDT) of resource specialists surveyed the proposed analysis area to identify emergency and long-term rehabilitation needs. From this preliminary analysis, it was found that prompt salvage and rehabilitation efforts could protect resources from catastrophic damage.

As part of the effort to recover and rehabilitate natural resources damaged by insect infestations, Forest personnel have developed a proposal to harvest insect-killed timber and reforest suitable timberlands. Forest Service personnel have completed the Fir Fly Salvage Environmental Assessment (EA), identified issues, developed alternatives, and analyzed the effects of implementing timber salvage and other rehabilitation activities.

The 26,780 analysis area for the Fir Fly Salvage EA is located approximately thirty four (34) miles southwest of Salmon, Idaho. The forest will harvest dead and dying timber over an 1,120 acre project area and recover approximately 3–5 MMBF.

The 26,780 analysis area is comprised of portions of four roadless areas. 10,240 acres is roadless with 287 of these acres being impacted by the proposed salvage project or approximately 25% of the harvest occurring in roadless areas. Impacts to these roadless areas include harvesting dead and dying trees using a helicopter system and construction of approximately 12.5 acres of temporary landings. There is no road construction or reconstruction proposed for the salvage operation. Lands suited for timber management would be replanted where natural regeneration is not expected to be successful. A pheromone baiting/trapping program would be implemented in high risk areas to prevent endemic populations from reaching epidemic proportions.

Management direction for the analysis area is established in the Salmon National Forest Land and Resource Management Plan (Forest Plan). The Forest Plan describes standards which must be observed when harvesting timber to protect soil, water, wildlife, visuals, and other on site resources. The proposed action for the Fir Fly Salvage project is consistent with standards, objectives, and direction contained in the Forest Plan.

This proposal would further contribute to area recovery by:

(1) Capturing the economic value of insect-killed timber that would otherwise deteriorate,

(2) Revegetating suitable timberlands to restore sites to timber production prior to brush competition, and

(3) Preventing the spread of current insect populations in areas presently unaffected.

It is important to remove the salvageable timber prior to deterioration and subsequent value losses. Delays in implementing the activities necessary to restore these damaged lands will result in unacceptable degradation of the physical and biological resources of National Forest System land. Through timber salvage operation, commercial product value of the insect-killed trees can be recovered, and a portion of the receipts from this sale will provide funding for other restoration activities through collection of Knutsen-Vanderburg (K-V) and Salvage Sale Funds.

The Forest Supervisor has determined through preliminary scoping and environmental analysis that there is good cause to expedite this project.

The decision for the Fir Fly Salvage project will be implemented after publication of this notice in the **Federal Register**. If the project is delayed because of an appeal (delays up to 150 days are possible), it is likely the salvage harvest could not be implemented until early spring of 1994. This would result in a need to remark the sale so as to harvest new trees infested during the 1993 flight of the insect. It would also result in the loss of volume from dead trees that are currently merchantable but will lose their value by remaining on the stump for another year. Delays resulting from appeals could cause the loss of up to half of the value and potentially make the salvage sale unattractive to timber purchases. This would jeopardize the objectives of the recovery and rehabilitation project.

Pursuant to 36 CFR 217.4(a)(11), it is my decision to exempt the Fir Fly Salvage Project, Cobalt Ranger District, Salmon National Forest, from appeal. The environmental assessment disclosed the effects of the proposed actions on the environment and addresses the issues resulting from the proposal.

Dated: April 30, 1993.

Robert C. Joslin,

Deputy Regional Forester, Intermountain Region, USDA Forest Service.

COMMISSION ON CIVIL RIGHTS

Hearing on Racial and Ethnic Tensions in American Communities, Poverty, Inequality, and Discrimination—Los Angeles

Notice is hereby given pursuant to the provisions of the United States Commission on Civil Rights Act of 1983, Public Law 98–183, 97 Stat. 1301, as amended, that a three-day public hearing will commence on June 15, 1993, beginning at 8 a.m. at the Sheraton Grande Hotel, 333 S. Figuera Street, Los Angeles, California 90071.

The purpose of the hearing will be to collect information within the jurisdiction of the Commission, in order to examine the underlying causes of racial and ethnic tensions in the United States.

The Commission is an independent, bipartisan factfinding agency authorized to study, collect, and disseminate information and to appraise the laws and policies of the Federal Government, and to study and collect information concerning legal developments, with respect to discrimination or denials of equal protection of the laws under the Constitution because of race, color, religion, sex, age, handicap, or national origin, or in the administration of justice.

Hearing impaired persons who will attend the hearing and require the services of a sign language interpreter, should contact Betty Edmiston, Administrative Services and Clearinghouse Division (202) 376–8105, (TDD 202–376–8116), at least five (5) working days before the scheduled date of the meeting.

Dated at Washington, DC, May 3, 1993.

Arthur A. Fletcher,

Chairman.

BILLING CODE 6335–01–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

[Case No. 88–67]

Action Affecting Export Privileges; Applied Medical Systems, Inc.

Order

The Office of Antiboycott Compliance, Bureau of Export Administration, U.S. Department of Commerce ("Department"), having determined to initiate administrative proceedings pursuant to section 11(c) of the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. 2401–2420 (1991, supp. 1992, and Pub. L. 103–10, March 27, 1993)) (The "Act"), and part 788 of the Export Administration Regulations (currently codified at 15 CFR parts 768–799 (1992)) (the "Regulations"), against Applied Medical Systems, Inc. ("AMS"), resident in the United States, based on allegations set forth in the Proposed Charging Letter, dated March 9, 1993, incorporated herein by this reference, that between April 1987 and December 1987, AMS violated part 769 of the Regulations, promulgated to implement the Act, in that AMS, a United States person as defined in the Regulations, with respect to its activities in the interstate or foreign commerce of the United States, with intent to comply with, further or support an unsanctioned foreign boycott: (1) In one instance, knowingly agreed to refuse to do business with or in a boycotted country; (2) knowingly agreed to refuse to do business with six persons known or believed to be restricted from having any business relationship with or in a boycotting country pursuant to a requirement of, or a request from, or on behalf of, a boycotting country; (3) furnished one item of information about its business relationships with or in a boycotted country; and (4) furnished six items of information about its business relationship with persons known or believed to be restricted from having any business relationships with or in a boycotting country, activities prohibited by §§ 769.2(a) and 769.2(d) of the Regulations, and not excepted; and

The Department and AMS having entered into a Consent Agreement whereby AMS has agreed to settle this matter by the imposition by the Department of a civil penalty in the amount of $70,000 and by accepting a one year denial of its export privileges to Kuwait, Saudi Arabia, Bahrain, Iraq, Jordan, Lebanon, Oman, Qatar, the United Arab Emirates, Syria, the Yemen Arab Republic and the People's Democratic Republic of Yemen; and

The Assistant Secretary for Export Enforcement having approved the terms of the Consent Agreement;

It is therefore ordered that, First, a civil penalty in the amount of $70,000 is assessed against AMS.

Second, AMS shall pay the Department the sum $10,000 within 20 business days of its receipt of this Order. The remaining $60,000 of the civil penalty imposed shall be suspended for a period of two years from the date of the signing of this Order. The Department will waive payment of the remaining $60,000 civil penalty at the end of the two year period provided that AMS is in compliance with the Regulations and this Order. Payment shall be made in the manner specified in the attached instructions. Failure to pay the civil penalty in a timely manner constitutes a violation of this Order;

Third, all outstanding individual validated licenses to the countries referred to above in which AMS appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of AMS' privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to distribution licenses, to the countries referred to above are hereby revoked.

Fourth, for a period ending one year from the date of the entry of this Order, AMS is denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving commodities or technical data exported or to be exported from the United States, in whole or part, and subject to the Regulations, to the countries referred to above. Without limiting the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include, but not be limited to, participation, directly or indirectly in any manner or capacity:

(a) As a party of representative of a party to any export license application submitted to the Department;

(b) In the preparation of filing with the Department of any export license application or request for reexport authorization, or of any document to be submitted therewith;

(c) In obtaining from the Department of using any validated or general export license, reexport authorization or other export control document;

(d) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data, in whole or in part, to be exported from the United States and subject to the Regulations; and

(e) In the financing, forwarding, transporting, or other servicing of such commodities or technical data;

Fifth, for reasons of human health and safety, such denial shall not apply to, and have no effect whatsoever on, the export of replacement parts and consumable materials for medical systems sold and installed prior to the date of this Order, nor shall this Order apply to, or have any effect on, the conduct of service or maintenance of medical systems sold and installed prior to the date of this Order;

Sixth, as provided in § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Export Licensing, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) in any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

Seventh, the Proposed Charging Latter, the Consent Agreement and this Order shall be made available to the public.

Eighth, a copy of this Order shall be served on AMS. This order shall be published in the Federal Register.

Entered this 15th day of April, 1993.

This Order is effective immediately.

Judy R. Reinke,

Acting Assistant Secretary for Export Enforcement.

[FR Doc. 93–10695 Filed 5–5–93; 8:45 am]

BILLING CODE 3510–DT–M

Foreign-Trade Zones Board

[Docket 15–93]

Foreign-Trade Zone 89—Clark County, NV; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Nevada Development Authority (NDA), grantee of FTZ 89, requesting authority to expand its zone in Clark County, Nevada, within the Las Vegas Customs Port of Entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on April 20, 1993.

FTZ 89 was approved on November 7, 1983 (Board Order 227, 48 FR 51665; 11/10/83), and expanded on December 4, 1989 (Board Order 452, 54 FR 50787; 12/11/89). It currently consists of six sites in Clark County, Nevada: Site 1 (23 acres)—Las Vegas Convention Center, Clark County; Site 2 (100,000 sq. ft.)—Cashman Field Convention Center, Las Vegas; Site 3 two parcels (317 acres and 120,000 sq. ft.)—within the Hughes Airport Center industrial park, adjacent to McCarron International Airport; Site 4 (37 acres)—North Las Vegas Business Center, North Las Vegas; Site 5 (526 acres)—AMPAC Development Company Business Park, Clark County; and Site 6 (10 acres)—within the 160-acre Las Vegas International Air Cargo Center (LVIACC) at McCarran International Airport, Clark County (A–40–91, 1/13/92).

NDA is now requesting authority to expand its general-purpose zone Site 6 to include the entire 160-acre LVIACC. The center is owned by the county and the Nevada International Trade Corporation is the designated zone operator at this site. The proposal also includes a request to restore zone status to a parcel (10 acres) that was deleted from the AMPAC site (Site 5) in 1992.

No manufacturing requests are being made at this time. Such approvals would be requested from the Board on a case-by-case basis.

In accordance with the Board's regulations (as revised, 56 FR 50790–50808, 10–8–91), a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is July 6, 1993. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to July 20, 1993).

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

Office of the Port Director, U.S. Customs Service, International Arrivals Building, P.O. Box 11049, Las Vegas, Nevada 89111

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th & Pennsylvania Avenue, NW., Washington, DC 20230

Dated: April 21, 1993.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 93–10742 Filed 5–6–93; 8:45 am]

BILLING CODE 3510–DS–P

[Docket 16–93]

Foreign-Trade Zone 41—Milwaukee, WI; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Foreign-Trade Zone of Wisconsin, Ltd., grantee of FTZ 41, requesting authority to expand its zone in the Milwaukee, Wisconsin, area, within the Milwaukee Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on April 22, 1993.

FTZ 41 was approved in 1978 (Board Order 136, 43 FR 46887; 10/11/78), and expanded in 1981 (Board Order 178, 46 FR 40718; 8/11/81) and in 1985 (Board Order 315, 50 FR 43749, 10/29/85). The zone project currently consists of 4 sites (200 acres): Site 1 (78,000 sq. ft.)—within the Ace World Wide Industrial Park, Milwaukee; Site 2 (120 acres)—West Allis Industrial Center, West Allis; Site 3 (50 acres)—Northwestern Industrial Park, Milwaukee; and, Site 4 (30 acres)—at Milwaukee's Mitchell International Airport. An application is currently pending with the Board requesting authority to delete Sites 3 and 4, to relocate Site 1 to a warehouse facility (210,500 sq. ft.) located at 1925 East Kelly Lane, Cudahy, Wisconsin, and to add a site (300 acres) at the Port of Milwaukee (FTZ Doc. 69–91, 56 FR 5751, 57 FR 45606, 58 FR 4147).

The applicant is now requesting authority to further expand the general-purpose zone to include an additional site (proposed new Site 4)—Milwaukee County Research Park (166 acres). The park is located at U.S. Highway 45 and Watertown Plank Road, Wauwatosa (Milwaukee County), Wisconsin, some 10 miles west of downtown Milwaukee. The park is owned by Milwaukee County and operated by the Milwaukee County Research Park Corporation, a non-profit corporation affiliated with the County.

In accordance with the Board's regulations (as revised, 56 FR 50790–50808, 10–8–91), a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties.

VOL 58 ISS 86 MY 6 1993 UMI

Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is July 6, 1993. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to July 20, 1993.

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 517 East Wisconsin Avenue, Room 606, Milwaukee, Wisconsin 53202

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th & Pennsylvania Avenue, NW., Washington, DC 20230

Dated: April 21, 1993.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-P

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of initiation of antidumping and countervailing duty administrative reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings and suspension agreements with March anniversary dates. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Holly A. Kuga, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone (202) 482-2104.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce ("the Department") has received timely requests, in accordance with §§ 353.22(a) and 355.22(a) of the Department's regulations, from interested parties as defined in §§ 353.2(k) and 355.2(i) of the Department's regulations, for administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements, with March anniversary dates.

Initiation of Reviews

In accordance with §§ 353.22(c) and 355.22(c) of the Department's regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders, findings, and suspension agreements. We intend to issue the final results of these reviews not later than March 31, 1994.

Antidumping duty proceedings and firms	Period to be reviewed
Bangladesh:	
Shop Towels:

BILLING CODE 3510-DS-M

[A-570-820]

Preliminary Determination of Critical Circumstances: Certain Compact Ductile Iron Waterworks Fittings and Accessories Thereof From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Kate Johnson, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230; telephone: (202) 482-4929.

Preliminary Determination

The Department of Commerce (the Department) preliminarily determines that critical circumstances exist in the investigation of certain compact ductile iron waterworks (CDIW) fittings and accessories thereof from the People's Republic of China (PRC) sold in the United States, as provided in section 733(e) of the Tariff Act of 1930, as amended (the Act).

Case History

Since our affirmative preliminary determination of sales at less than fair value, on February 3, 1993, (58 FR 8930, February 18, 1993), the following events have occurred. On February 24, 1993, the U.S. Waterworks Fittings Producer's Council and its individual members (Clow Water Systems, Tyler Pipe Industries, Inc., and Union Foundry Company), petitioners, requested a public hearing. On February 23, 1993 the Department extended the deadline for the final determination in this investigation until June 18, 1993 (58 FR 12220, March 3, 1993).

On March 3, 1993, the Department presented China National Metals Products Import and Export Corporation (CMP), a Chinese exporter which accounted for a significant portion of exports from the PRC to the United States, with a verification outline and scheduled the following verifications: (1) From April 6 through April 8, 1993, CMP's exporter's sales price (ESP) responses at the offices of CMP's related importer, Sigma Corporation, in Cream Ridge, New Jersey, and (2) from April 22 through May 3, 1993, in Beijing, PRC of CMP's factors of production and separate rates responses.

On March 19, 1993, petitioners submitted scope clarification comments to the Department concerning gaskets and T-head bolts. On March 30, 1993, CMP submitted supplemental information on the Chinese CDIW industry and a list of Chinese CDIW exporters and quantities exported annually with regard to the issue of separate rates.

On March 31, 1993, petitioners alleged that critical circumstances exist with regard to CMP's exports. On April 2, 1993, the Department requested information on CMP's exports with regard to petitioners' allegation of critical circumstances. On April 14, 1993, CMP submitted a revised Section C computer tape to the Department correcting errors in its reporting of cash discounts. On April 16, 1993, CMP submitted its response to our request for monthly export data to evaluate petitioners' critical circumstances complaint.

Scope of Investigation

The products covered by this investigation are (1) certain compact ductile iron waterworks fittings of 3 to 16 inches nominal diameter regardless of shape, including bends, tees, crosses, wyes, reducers, adapters, and other shapes, whether or not cement line, and whether or not covered with bitumen or similar substance, conforming to AWWA/ANSI specification C153/A21.53, and rated for water working pressure of 350 PSI; and (2) certain CDIW fittings accessories which typically consist of a standard ductile iron gland, a styrene butadiene rubber (SBR) gasket, the requisite number of Cor-Ten steel or ductile iron T-head bolts, and hexagonal nuts, for fittings in sizes 3 to 16 inches, conforming to American Water Works Association/American National Standards Institute (AWWA/ANSI) specification C111/A21.11, and rated for water working pressure of 350 PSI. Gaskets, bolts and nuts are only included if they are imported as an accessory pack with a gland. However, glands imported separately are included in the scope of investigation.

The types of CDIW fittings covered by this investigation are compact ductile iron mechanical joint waterworks fittings and compact ductile iron push-on joint waterworks fittings, both of which are used for the same applications. CDIW fittings are used to join water main pressure pipes, valves, or hydrants in straight lines, and change, divert, divide, or direct the flow of raw and/or treated water in piping systems. CDIW fittings attach to the pipe, valve, or hydrant at a joint and are used principally for municipal water distribution systems.

CDIW fittings accessories are used to join mechanical joint CDIW fittings to pipes. The accessories ensure the completeness of the seal between the CDIW fitting and pipe. Mechanical joint fittings must be used with CDIW accessories. Push-on fittings do not require CDIW accessories other than a SBR gasket.

CDIW fittings with nominal diameters greater than 16 inches, and the accessories used with CDIW fittings with nominal diameters greater than 16 inches, are specifically excluded from the scope of the investigation. Nonmalleable cast iron fittings (also called gray iron fittings) and full-bodied ductile fittings are also specifically excluded from the scope of this investigation. Nonmalleable cast iron fittings have little ductility and are generally rated only 150 to 250 PSI. Full-bodied ductile fittings have a longer body design than a compact fitting because in the compact design the straight section of the body is omitted to provide a more compact and less heavy fitting without reducing strength or flow characteristics. In addition, the full-bodied ductile fittings are thicker walled than the compact fittings. Full-bodied fittings are made of either gray iron or ductile iron, in sizes of 3 to 48 inches, conform to AWWA/ANSI specification C110/C21.10, and are rated to a maximum of only 250 PSI. In addition, compact ductile iron flanged fittings are excluded from the scope of this investigation, as they have significantly different characteristics and uses than CDIW fittings.

CDIW fittings are classifiable under subheading 7307.19.30.00, of the Harmonized Tariff Schedule of the United States (HTSUS). Standard ductile iron glands are classifiable under HTSUS subheading 7325.99.10.00, styrene butadiene rubber gaskets are classifiable under HTSUS subheading 4016.93.00.90, T-Head bolts of steel or ductile iron are classifiable under HTSUS subheading 7318.15.20.90, and hexagonal nuts are classifiable under HTSUS subheading 7318.16.00.00. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Critical Circumstances

On March 31, 1993, petitioners alleged that "critical circumstances" exist with respect to imports of the subject merchandise from the PRC. Section 733(e)(1) of the Act provides that the Department will determine whether there is a reasonable basis to believe or suspect that:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported know or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and,

(B) There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Regarding requisite (A)(i) above, we normally consider whether there has been an antidumping order in the United States or elsewhere on the subject merchandise in determining whether there is a history of dumping. Regarding requisite (A)(ii) above, we normally consider margins of 25 percent or more for purchase price comparisons and 15 percent or more for exporter's sales price comparisons as sufficient to impute knowledge of dumping. Since the preliminary estimated dumping margin for all exporters of CDIW fittings and accessories from the PRC is in excess of 25 percent, we can impute

VOL 58 ISS 86 MY 6 1993 UMI

knowledge of dumping under section 733(e) (1)(A)(ii) of the Act.

For purposes of determining whether there have been massive imports over a relatively short period of time, the Department did not consider the company specific data submitted by CMP on April 16, 1993, because CMP has not demonstrated that it qualifies for a separate rate (58 FR 8930, February 18, 1993). The Department lacked monthly, country-wide shipment data, due to the PRC government's failure to provide an adequate consolidated questionnaire response on behalf of all PRC producers and exporters. As a result, the Department was forced to assume, as best information available (BIA), that there have been massive imports over a relatively short period of time. Accordingly, we preliminarily find that critical circumstances do exist in this investigation.

We will announce the final determination of critical circumstances along with the final antidumping determination in this investigation on June 18, 1993.

Suspension of Liquidation

In accordance with sections 733(d)(1) and 733(e)(2) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of CDIW fittings and accessories thereof from the PRC, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after November 20, 1992, the date which is 90 days prior to date of publication of the affirmative preliminary determination in this proceeding.

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination.

Public Comment

In accordance with 19 CFR 353.38, written comments regarding this preliminary critical circumstances determination, if any, should be included in the case briefs, which must be submitted to the Assistant Secretary for Import Administration no later than June 1, 1993, and rebuttal briefs which are due no later than June 8, 1993. In addition, five copies of a public version of case or rebuttal briefs should be submitted by the appropriate date if the submission contains business proprietary information. In accordance with 19 CFR 353.38(b), we will hold a public hearing, which has been requested by interested parties to afford an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held at 9:30 a.m. on June 10, 1993, at the U.S. Department of Commerce, room 1412, 14th Street and Constitution Avenue NW., Washington DC, 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)) and 19 CFR 353.16(b).

Dated: April 28, 1993.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products Produced or Manufactured in China

April 30, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: April 30, 1993.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–6703. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for Categories 611 and 835 are being increased for shift, reducing the limit for Categories 317/326 to account for the increases.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 57 FR 54976, published on November 23 1992). Also see 57 FR 62304, published on December 30, 1992.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

April 30, 1993.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 23, 1992, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in China and exported during the twelve-month period which began on January 1, 1993 and extends through December 31, 1993.

Effective on April 30, 1993, you are directed to amend further the directive dated December 23, 1993 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the People's Republic of China:

Category	Adjusted twelve-month limit [1]
Levels not in a group	
317/326	18,162,532 square meters of which not more than 3,560,468 square meters shall be in Category 326.
611	5,190,606 square meters.
835	118,599 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1992.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF DEFENSE

Office of the Secretary

Public Hearing Schedule; Defense Base Closure and Realignment Commission

AGENCY: Defense Base Closure and Realignment Commission.

ACTION: Notice.

SUMMARY: Pursuant to Public Law 101–510, as amended, the Defense Base Closure and Realignment Commission publicly announces additions to the public hearing schedule.

The Commission will hold open, public hearings on Friday, May 21 and Saturday, May 22 to deliberate and vote on possible additional bases for consideration for closure and realignment. These hearings will be held in the Washington, DC area at a location and time to be determined. The May 22 hearing will be held only if all deliberations and votes could not be accomplished on May 21st.

The Commission may also deliberate and/or vote on one or more additional bases for consideration at any of the previously announced upcoming regional hearings at which there is a quorum.

FOR FURTHER INFORMATION: Mr. Tom Houston, Director of Communications at (703) 696–0504. Please contact the Commission to confirm any last-minute changes in dates, times and locations of all upcoming hearings.

Dated: May 3, 1993.

Defense Science Board Task Force on Tactical Aircraft Review

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Tactical Aircraft Review will meet in closed session on May 19, 1993 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Director, Defense Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will review and critique outputs generated by the USD(A) Bottoms-Up Tactical Aircraft Review, and provide advice, on an as-needed basis, to the USD(A) in the conduct of the overall Bottoms-Up Review.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. app. II, (1988)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: May 3, 1993.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

Defense Science Board Task Force on Joint Precision Interdiction (JPI)

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Task Force on Joint Precision Interdiction (JPI) will meet in closed session on May 20, 1993 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Director, Defense Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will review acquisition strategies needed for an optimum family of surveillance, reconnaissance, and target acquisition systems, C3I systems and weapon systems required to perform the JPI mission.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. II, (1988)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: May 3, 1993.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Public Law 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, June 1, 1993; Tuesday, June 8, 1993; Tuesday, June 15, 1993; Tuesday, June 22, 1993; and Tuesday, June 29, 1993, at 2 p.m. in room 800, Hoffman Building #1, Alexandria, Virginia.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Force Management and Personnel) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Public Law 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92–463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of

VOL 58 ISS 86 MY 6 1993 UMI

an agency," (5 U.S.C. 552b.(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b.(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy/Equal Opportunity) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b.(c)(2)), and the detailed wage data considered were obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, room 3D264, The Pentagon, Washington, DC 20310.

Dated: May 3, 1993.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000-04-M

Per Diem, Travel and Transportation Allowance Committee; Changes in Per Diem Rates

AGENCY: Per Diem Rates, Per Diem, Travel and Transportation Allowance Committee, DOD.

ACTION: Publication of changes in per diem rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 168. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico, the Northern Mariana Islands and Possessions of the United States. Bulletin Number 168 is being published in the **Federal Register** to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: 1 May 1993.

SUPPLEMENTARY INFORMATION: This document gives notice of changes in per diem rates prescribed by the Per Diem Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Personnel Per Diem Bulletins by mail was discontinued effective 1 June 1979. Per Diem Bulletins published periodically in the **Federal Register** now constitute the only notification of change in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

MAXIMUM PER DIEM RATES FOR OFFICIAL TRAVEL IN ALASKA, HAWAII, THE COMMONWEALTHS OF PUERTO RICO AND THE NORTHERN MARIANA ISLANDS AND POSSESSIONS OF THE UNITED STATES BY FEDERAL GOVERNMENT CIVILIAN EMPLOYEES

Footnotes:
[1] Commercial facilities are not available. The meal and incidental expense rate covers charges for meals in available facilities plus an additional allowance for incidental expenses and will be increased by the amount paid for Government quarters by the traveler.
[2] Commercial facilities are not available. Only Government-owned and contractor operated quarters and mess are available at this locality. This per diem rate is the amount necessary to defray the cost of lodging, meals and incidental expenses.
[3] On any day when U.S. Government or contractor quarters are available and U.S. Government or contractor messing facilities are used, a meal and incidental expense rate of $19.65 is prescribed to cover meals and incidental expenses at Shemya AFB, Clear AFS, Galena APT and King Salmon APT. This rate will be increased by the amount paid for U.S. Government or contractor quarters and by $4 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.
[4] On any day when U.S. Government or contractor quarters are available and U.S. Government or contractor messing facilities are used, a meal and incidental expense rate of $34 is prescribed to cover meals and incidental expenses at Amchitka Island, Alaska. This rate will be increased by the amount paid for U.S. Government or contractor quarters and by $10 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.
[5] On any day when U.S. Government or contractor quarters are available and U.S. Government or contractor messing facilities are used, a meal and incidental expense rate of $25 is prescribed instead of the rate prescribed in the table. This rate will be increased by the amount paid for U.S. Government or contractor quarters.
[6] The meal rates listed below are prescribed for the following locations in Alaska: Cape Lisburne RRL, Cape Newenham RRL, Cape Romanzof APT, Fort Yukon RRL, Indian Mtn RRL, Sparrevohn RRL, Tatalina RRL, Tin City RRL, Barter Island AFS, Point Barrow AFS, Point Lay AFS and Oliktok AFS. The amount to be added to the cost of government quarters in determining the per diem will be $3.50 plus the following amount:

	Daily rate
DOD Personnel	$13
Non-DOD Personnel	30

Dated: May 3, 1993.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

Government-Owned Invention; Availability for Licensing

AGENCY: Department of the Navy, DOD.

ACTION: Notice of availability of invention for licensing.

SUMMARY: An undivided interest in the invention listed below is assigned to the United States Government as represented by the Secretary of the Navy and is made available for licensing by the Department of the Navy.

Request for copies of the patent application should be directed to the Office of Naval Research (Code OOCCIP), Ballston Tower 1, 800 North Quincy Street, Arlington, Virginia 22217–5660 and must include the application serial number.

DATES: May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. R.J. Erickson, Staff Patent Attorney, Office of Naval Research (Code OOCCIP), 800 North Quincy Street, Arlington, Virginia 22217–5660, telephone (703) 696–4001.

Patent Application Serial No. 08/018,394 entitled Titanium Alloy For Plate Applications, filed February 17, 1993.

Dated: April 28, 1993.

Michael P. Rummel,

LCDR, JAGC, USN, Federal Register Liaison Officer.

Department of the Navy

CNO Executive Panel; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Domestic Issues Task Force, will meet May 20-21, 1993, from 9 a.m. to 5 p.m., at Headquarters of U.S. Pacific Fleet Training Command, Point Loma, California, and the Navy Training Center/Recruit Training Command, San Diego, California.

The purpose of this meeting is to continue efforts to examine trends for future training of naval personnel, particularly in terms of managing the diversity of the future naval force. The agenda of the meeting will consist of visits to training centers in San Diego and discussions with key personnel in the training chain of command.

For further information concerning this meeting, contact: J. Kevin Mattonen, Executive Secretary to the CNO Executive Panel, 4401 Ford Avenue, room 601, Alexandria, VA 22302-0268, Telephone (703) 756-1205.

Dated: April 28, 1993.

Michael P. Rummel

BILLING CODE 3810–AE–F

DEPARTMENT OF ENERGY

Federal Assistance Award to Air Products and Chemicals, Inc.

AGENCY: Department of Energy.

ACTION: Notice of noncompetitive financial assistance award.

SUMMARY: The U.S. Department of Energy (DOE), pursuant to the DOE Financial Assistance Rules, 10 CFR 600.7, is announcing its intention to add additional effort to cooperative agreement DE–FC07–89ID12779 currently in place with Air Products and Chemicals Inc. (AP) for development of an active transport membrane device for separation of industrial gasses.

ADDRESSES: Questions regarding this announcement may be addressed to the U.S. Department of Energy, Golden Field Office, 1617 Cole Blvd., Golden, Colorado 80401, Attention: M.A. Barron, Contract Specialist. The Contracting Officer is Dr. Paul K. Kearns.

SUPPLEMENTARY INFORMATION: DOE provided financial assistance to AP to develop active transport membranes for separation of specific industrial gasses. During the first phase, several active transport membranes were developed and tested at the coupon scale and in spiral wound configurations. DOE intends to provide assistance to AP to develop active transport membranes in the hollow fiber configuration. DOE intends to restrict eligibility to AP for this research through development of hollow fiber configurations.

DOE funding for the proposed activity is estimated to be $765,000 and AP's share is estimated to be $235,000 for a total of $1,000,000 over a one year project period.

Issued in Chicago, Illinois, on April 19, 1993.

Johnnie D. Greenwood,

Director, Contracts Division.

[FR Doc. 93–10737 Filed 5–5–93; 8:45 am]

BILLING CODE 6450–01–M

Federal Assistance Award to Bariess Associates

AGENCY: Department of Energy.

ACTION: Notice of financial assistance award in response to an unsolicited financial assistance application.

SUMMARY: The U.S. Department of Energy (DOE), pursuant to the DOE Financial Assistance Rules, 10 CFR 600.14, is announcing its intention to enter into a cooperative agreement with Bariess Associates for transfer of newly developed sensor technologies to the paper industry.

ADDRESSES: Questions regarding this announcement may be addressed to the U.S. Department of Energy, Golden Field Office, 1617 Cole Blvd., Golden, Colorado 80401, Attention: M. A. Barron, Contract Specialist. The Contracting Officer is Paul K. Kearns.

SUPPLEMENTARY INFORMATION: Over the past 12 years DOE's Office of Industrial Processes (OIP) and the Small Business Innovative Research (SBIR) programs have funded sensor and control development projects specific to the pulp and paper industry. Unfortunately, many are not being utilized or are underutilized by the paper industry. In most cases the principal reason for underutilization is that mill operators are unaware of potential improvements offered by the sensors. A demonstration program led by a recognized authority on sensors in the paper industry will gain the attention of the potential users.

The participant will select sensors, seek out users willing and able to undertake demonstration projects at their plant, monitor the demonstrations, note and correct any problems encountered in achieving meaningful evaluations, assist in documenting the demonstrations, and make results known to the broader user community.

The total project is estimated to cost $1,000,000 of which $150,000 will be provided by DOE and $850,000 will be provided by sensor manufacturers, pulp and paper companies, and suppliers of equipment to the paper industry.

VOL 58 ISS 86 MY 6 1993 UMI

Issued in Chicago, Illinois, on April 19, 1993.

Johnnie D. Greenwood,

Director, Contracts Division.

[FR Doc. 93-10731 Filed 5-5-93; 8:45 am]

BILLING CODE 6450-01-M

Financial Assistance Award Intent To Award A Noncompetitive Grant to Benedict College

AGENCY: Savannah River Operations Office, DOE.

ACTION: Notice.

SUMMARY: The DOE announces that it plans to accept an unsolicited proposal and award a grant to Benedict College, Harden and Blanding Streets, Columbia, South Carolina. The grant "Summer Mathematics and Science Enrichment Program," will be awarded for a six-month period with DOE support of $72,643, and cost sharing by Benedict $10,138. Pursuant to 10 CFR 600.7(b) and 600.14, eligibility for this award has been limited to Benedict College as a result of acceptance of their unsolicited proposal, and DOE has determined that award of a grant is appropriate.

FOR FURTHER INFORMATION CONTACT: Elizabeth T. Martin, Prime Contracts and Financial Assistance Branch, U.S. Department of Energy, Savannah River Operations Office, P.O. Box A, Aiken, SC 29802, Telephone: (803) 725-2191.

SUPPLEMENTARY INFORMATION:

Procurement Request Number: 09-93SR18323.000

Project Scope: The objective of this program is to identify, motivate, and begin preparation of students for science-based careers. The proposed program will offer a six-week communication-based science and mathematics enrichment program for 60 youths in grades 4 through 8 during the summer 1993. The participants in this program will be among those underrepresented in science-based careers (minorities and females). This program will provide to participants and their parents assistance in acquiring basic communication, computation and reasoning skills, as well as exposure to a variety of science-based careers through field trips and the use of role models.

Benedict College is a Historically Black College or University (HBCU) and falls within the meaning and intent of Executive Orders 12320 and 12677 pertaining to Government assistance to HBCUs. The participation of HBCUs in federally supported programs is relatively limited. In order to overcome some of these limitations, the Executive Orders directed federal agencies to increase the participation of HBCUs in federally-funded programs and to strengthen their capabilities to provide quality education. This award represents an effort to strengthen the HBCU community. The program proposed in the application is considered meritorious, and the activities to be carried out under this award would not be eligible for financial assistance under any recent, current, or planned solicitation. Based on documentation presented and appropriate evaluation, it is determined to be in the best interest of DOE to award a grant to Benedict College.

Issued in Aiken, South Carolina, on April 27, 1993.

Robert E. Lynch,

DOE Savannah River Operations Office, Head of Contracting Activity.

[FR Doc. 93-10735 Filed 5-5-93; 8:45 am]

BILLING CODE 6450-01-M

Federal Assistance Award to University of Florida

AGENCY: Department of Energy.

ACTION: Notice of financial assistance award in response to an unsolicited financial assistance application.

SUMMARY: The U.S. Department of Energy (DOE), pursuant to the DOE Financial Assistance Rules, 10 CFR 600.14, is announcing its intention to enter into a cooperative agreement with the University of Florida for development of on-line viscometers for kraft black liquor in paper mills.

ADDRESSES: Questions regarding this announcement may be addressed to the U.S. Department of Energy, Golden Field Office, 1617 Cole Blvd., Golden, Colorado 80401, Attention: M. A. Barron, Contract Specialist. The Contracting Officer is Paul K. Kearns.

SUPPLEMENTARY INFORMATION: The project is aimed at improving the efficiency of recovery boilers which burn black liquor from the kraft pulping process in paper making.

The boilers recover chemicals and produce process steam or power for use in the plant. The University of Florida will be working with viscometer manufacturers, equipment manufacturers, and the paper industry to develop on-line viscometers and associated controls. The goal is to sufficiently increase system accuracy and reliability to allow recovery boiler operators to increase solids concentrations in the black liquor without danger of fouling the concentrator, evaporator, and boiler equipment. Success in the endeavor will allow an increase in the flow of black liquor through the recovery system and allow the boiler to deliver more heat and/or power to the mill.

The total project is estimated to cost $1,165,000 of which $315,000 will be provided by the participant and the paper industry, and $85,000 will be provided by DOE.

Issued in Chicago, Illinois, on April 19, 1993.

Johnnie D. Greenwood,

Director, Contracts Division.

[FR Doc. 93-10733 Filed 5-5-93; 8:45 am]

BILLING CODE 6450-01-M

Acceptance of an Unsolicited Application From the University of Maryland

AGENCY: Department of Energy.

ACTION: Notice of acceptance of an unsolicited application.

SUMMARY: The Department of Energy (DOE), DOE Chicago Operations Office, announces that pursuant to the DOE Financial Assistance Rule, 10 CFR 600.14(f), it intends to award a grant based on the acceptance of an unsolicited application to the University of Maryland at College Park. The objective of the work provided by this grant is to quantify the potential Electrohydrodynamic (EHD) technique for heat transfer enhancement of in-tube condensation and in-tube evaporation processes of selected ozone-safe refrigerants and refrigerant mixtures.

FOR FURTHER INFORMATION CONTACT: Esher R. Kweller, CE-422, Department of Energy, Office of Building Technologies, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586-9136.

SUPPLEMENTARY INFORMATION: The University of Maryland at College Park has the necessary personnel, facilities, and other resources to fully perform the work set forth in the grant. Currently, this university is the only known group that has ongoing research specially in the EHD augmentation of heat transfers in heat exchanger. Within the last six years the university has maintained a comprehensive computer search of EHD-enhancement technology world-wide an the state-of-the-art equipment for use in EHD and Chlorofluorocarbons (CFC) substitute research. This University also developed a unique and innovative theoretical computer models to analyze the effects of new EHD configuration and effects. This application is meritorious based on the general evaluation that it will support a DOE mission for the research and development of highly efficient alternatives to, and substitutes for, environmentally harmful CFC and CFC-dependent equipment used in refrigeration application and that it is relevant to the general public purpose of support in the areas of reducing the effects of stratospheric ozone depletion. This application represents unique and innovative idea, method and approach which would not be eligible for financial assistance under a recent, current, or planned solicitation, and, DOE has determined that, a competitive solicitation would be inappropriate. The project period for this grant is a one year period expected to begin May 1, 1993. DOE plans to provide funding in the amount of $115,000.00 for this project period.

Issued in Chicago, Illinois on April 20, 1993.

Johnnie D. Greenwood,

Director, Contracts Division.

BILLING CODE 6450-01-M

Weatherization Assistance Program (WAP), Region VII Technical Working Group (TWG) Project; Availability of Funding

AGENCY: Department of Energy.

ACTION: Notice of availability of funding.

SUMMARY: This document announces the issuance of a Program Solicitation No. DE-FG47-93R701312 by the Department of Energy, Kansas City Support Office (KCSO). The solicitation invites grant application from State WAP grantees located in Federal Region VII (Iowa, Kansas, Missouri & Nebraska) for funding of a project in support of the WAP.

ADDRESSES: Department of Energy, Kansas City Support Office, 911 Walnut, 14th Floor, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Cynthia A. King, Grants Management Division, (816) 426-3815; Patrick G. Lana, Grants Management Division, (816) 426-3815.

SUPPLEMENTARY INFORMATION:

I. Background

The U.S. Department of Energy—Kansas City Support Office (KCSO) is making funds available as part of its Weatherization Assistance Program (WAT) Training and Technical Assistance (T&TA) Program.

The area for which the KCSO is seeking a grant proposal is the Region VII Technical Working Group project.

II. Eligible Grantees

Eligible grantee are the WAP state grantees located in the area serviced by the DOE-KCSO (Iowa, Kansas, Missouri & Nebraska).

III. Eligible Activities

The grant issued pursuant to this Notice is limited to the Technical Working Group Project.

Application Procedures

The Program Solicitation and Grant Applications have been provided to each state WAP grantee in the KCSO area and must be received no later than May 15, 1993. Application content and evaluation criteria are set forth in the Program Solicitation.

It is anticipated that the grant award will be issued by July 1, 1993.

Issued in Chicago, IL on April 26, 1993.

Timothy S. Crawford,

Assistant Manager for Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project Nos. 2113-022, 2212-001, 2239-004, 2255-003, 2256-001, 2291-001, 2292-001, 2476-001, 2590-001 WI/MI]

Wisconsin Valley Improvement Co., et al.; Intent to Prepare an Environmental Impact Statement

April 30, 1993.

In the matter of: Wisconsin Valley Improvement Co., Weyerhaeuser Paper Co., Tomahawk Power & Pulp Co., Nekoosa Papers, Inc., Consolidated Water Power Co., Wisconsin Public Service Corp.

The Federal Energy Regulatory Commission (FERC) has received applications for new license for the Wisconsin Valley Project No. 2113, Rothschild Project No. 2212, Kings Dam Project No. 2239, Centralia Project No. 2255, Wisconsin Rapids Project No. 2256, Port Edwards Project No. 2291, Nekoosa Project No. 2292, Jersey Project No. 2476, and Wisconsin River Division Project No. 2590 located on the Wisconsin River and its tributaries in Vilas, Wood, Oneida, Forest, Portage, Marathon, and Lincoln Counties, Wisconsin, and Gogebic County, Michigan.

The FERC staff has determined that issuing new licenses for these projects would constitute a major federal action significantly affecting the quality of the human environment. Therefore, the staff intends to prepare an environmental impact statement (EIS) on the hydroelectric projects in accordance with the National Environmental Policy Act. The staff's EIS will objectively consider both site specific and cumulative environmental effects of the projects and reasonable alternatives, and will include an economic, financial and engineering analysis.

A draft EIS will be issued and circulated for review by all interested parties. All comments filed on the draft EIS will be analyzed by the staff and considered in a final EIS. The staff's conclusions and recommendations will then be presented for the consideration of the Commission in reaching its final licensing decisions. Pubic and agency scoping meetings will be held at a future date to be announced.

For further information, please contact Michael Dees at (202) 219-2807.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP92-45-004]

ANR Pipeline Co.; Report of Refunds

April 30, 1993.

Take notice that on April 7, 1993, ANR Pipeline Company (ANR) tendered for filing with the Federal Energy Regulatory Commission (Commission) its report of refunds made in compliance with Section 1. of the Offer of Settlement dated July 28, 1992, and approved by the Commission's October 26, 1992 Order issued in Docket No. RP92-45-001. ANR states that the report summarizes repayment amounts ANR made on March 9, 1993, to High Island Offshore System (HIOS).

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on the file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. TM93-5-48-000]

ANR Pipeline Co.; Compliance Filing

April 30, 1993.

Take notice that on April 27, 1993, ANR Pipeline Company ("ANR") tendered for filing the following revised tariff sheets, to be effective April 1, 1993, to ANR's FERC Gas Tariff, First Revised Volume No. 1:

Second Revised Sheet No. 7
Second Revised Sheet No. 8
Second Revised Sheet No. 9
Second Revised Sheet No. 10
Second Revised Sheet No. 11
Second Revised Sheet No. 12
Second Revised Sheet No. 13
Second Revised Sheet No. 14
Second Revised Sheet No. 15

ANR states that the above-referenced tariff sheets are being submitted in compliance with the Commission's order on September 30, 1992, to show the monthly billing applicable to each eligible customer's allocable percentages of total effective transportation and sales entitlements, resulting from the Dakota Gasification Company capacity costs from ANR firm transportation and sales customers. ANR states that the revised tariff sheets reflect the percentages based on such entitlements in effect as of April 1, 1993.

ANR states that copies of the filing have been served to all parties in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP93-316-000]

Arkla Energy Resources, a Division of Arkla, Inc.; Request Under Blanket Authorization

April 30, 1993.

Take notice that on April 26, 1993, Arkla Energy Resources (AER), a division of Arkla, Inc. (Arkla), Post Office Box 21734, Shreveport, Louisiana 71151, filed a prior notice request with the Commission in Docket No. CP93-316-000 pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to construct and operate two sales taps and related facilities for the delivery of natural gas to Arkansas Louisiana Gas Company (ALG), under AER's blanket certificates issued in Docket Nos. CP82-384-000 and CP82-384-001, all as more fully set forth in the application which is open to public inspection.

AER proposes to construct and operate a two-inch sales tap in Logan County, Arkansas, and a one-inch sales tap in Pope County, Arkansas, for initial service to six ALG domestic customers. AER would delivery up to 6 Mcf of natural gas per peak day and 505 Mcf annually for ALG's account via these taps. ALG would reimburse AER for the taps' estimated $5,700 construction costs.

AER states that it has adequate system gas supplies to provide the proposed service for ALG.

Any person or the Commission's staff may, within 45 days after the Commission has issued this notice, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the NGA (18 CFR 157.205) a protest to the request. If no protest is filed within the allowed time, the proposed activity shall be deemed to be authorized effective the date after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP93-306-000]

Caprock Pipeline Co.; Application

April 30, 1993.

Take notice that on April 20, 1993, Caprock Pipeline Company (Caprock), 333 Clay Street, suite 2000, Houston, Texas 77002-9817, filed in Docket No. CP93-306-000, an application requesting permission and approval to abandon certain facilities and services necessary to effectuate ultimate delivery of gas to Pioneer Natural Gas Company (Pioneer) and El Paso Natural Gas Company (El Paso), to construct and operate certain facilities necessary for the delivery of gas to Pioneer and El Paso, and to operate various NGPA section 311 facilities as NGA section 7(c) facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Caprock proposes to abandon certain facilities, including 4.2 miles of 3 and 4-inch pipeline and a compressor station, and specific transportation services in the Texas counties of Terry, Carson, Moore, Gaines, and Yoakum. Caprock indicates that the services have either ceased or the facilities used for the services are no longer required as the reason for abandoning these facilities and services.

Caprock also requests authorization to construct and operate approximately 240 feet of 10-inch pipeline and to install a tap and meter station on the western end of its system that connects with the facilities of El Paso. Caprock indicates that this construction is necessary to permit the reverse flow of gas from El Paso to the American Gas Storage, L.P. storage field.

Caprock also requests authorization to operate the Beckham-Wheeler pipeline facility originally constructed under section 311 (a)(1) of the NGPA in order to offer future services under Order No. 636.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 20, 1993, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate, and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Caprock to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TQ93-7-63-000, TM93-7-63-000]

Carnegie Natural Gas Co; Proposed Changes in FERC Gas Tariff

April 30, 1993.

Take notice that on April 28, 1993, Carnegie Natural Gas Company (Carnegie) tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1, with a proposed effective date of May 1, 1993:

Forty-Third Revised Sheet No. 8
Forty-Third Revised Sheet No. 9

Carnegie states that pursuant to § 154.308 of the Commission's regulations and sections 23 and 26 of the General Terms and Conditions of its FERC Gas Tariff, it is filing a combined Out-of-Cycle Purchased Gas Adjustment ("PGA") and Transportation Cost Adjustment ("TCA") to reflect updated projections affecting the average commodity cost of purchased gas to be incurred by Carnegie for May 1993. Carnegie states that this filing was necessitated by a substantial and unanticipated increase in the price of spot gas supplies available during May 1993, as compared to the projected cost of purchased gas reflected in Carnegie's most recent PGA filed in Docket No. TQ93-6-63-000 on March 30, 1993.

Carnegie states that the above revised tariff sheets reflect a commodity rate increase of $0.5102 per Dth under Rate Schedules CDS, LVWS, and SEGSS, as compared to the rates filed in Carnegie's last fully-supported PGA in Docket No. TQ93-6-3-000, in March 30, 1993, reflecting an increase in Carnegie's average commodity cost of purchased gas from $2.2303 per Dth to $2.7405 per Dth. The revised tariff sheets also reflect a decrease in the TCA charge of $0.0421 per Dth, from $0.2033 per Dth to $0.1612 per Dth, as measured against Carnegie's last TCA in Docket No. TM93-6-63-000, filed on March 30, 1993.

Carnegie states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ93-7-23-000]

Eastern Shore Natural Gas Co.; Proposed Changes in FERC Gas Tariff

April 30, 1993.

Take notice that Eastern Shore Natural Gas Company (ESNG) tendered for filing on April 28, 1993 certain revised tariff sheets included in Appendix A attached to the filing. Such sheets are proposed to be effective May 1, 1993.

ESNG states that the tariff sheets are being filed pursuant to § 154.308 of the Commission's regulations and sections 21.2 and 21.4 of the General Terms and Conditions of ESNG's FERC Gas Tariff to reflect changes in ESNG's jurisdictional rates. The increased gas costs in this instant filing are a result of higher prices being paid to producers/suppliers under ESNG's market-responsive gas supply contracts.

The sales rates set forth in the above referenced tariff sheets reflect an increase of $.7413 per dt in the commodity rate.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 and Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR § 385.211 and § 385.214). All such motions or protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP93-105-000]

National Fuel Gas Supply Corp.; Petition for Waiver of Certain Part 260 Reporting Requirements

April 30, 1993.

Take notice that on April 28, 1993, National Fuel Gas Supply Corporation ("National") filed a Petition For Waiver of Certain part 260 Reporting Requirements. National seeks a waiver of the requirement to file Forms 15 and 16 on an annual basis. National submits that, following the unbundling of pipeline services pursuant to Order No. 636, the information required by these forms will no longer be necessary.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on

BILLING CODE 6717–01–M

[Docket No. RP91–53–009]

Panhandle Eastern Pipe Line Co.; Report of Refunds

April 30, 1993.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on April 14, 1993, tendered for filing with the Federal Energy Regulatory Commission (Commission) a refund report in compliance with a Settlement Agreement (Settlement) dated July 10, 1991, which was approved by Commission orders dated August 2, 1991 and September 25, 1991.

Panhandle states that a Commission letter order dated June 11, 1992, permitted it to delay paying a refund due Columbia Gas Transmission Corporation (Columbia), until the effectiveness of the Settlement with respect to Columbia was confirmed by the Bankruptcy Court overseeing Columbia's Chapter 11 reorganization. Panhandle notes that on January 6, 1993, the Bankruptcy Court issued an order which established a Restricted Investment Account for refunds related to pre-petition periods.

Panhandle states that on April 14, 1993, it paid Columbia $17,194,033.68, which represents the amount which was not paid to Columbia on December 16, 1991 of $15,742,272.82 plus interest through April 14, 1993 calculated in accordance with § 154.67 of the Commission's regulations.

Panhandle states that copies of the letter has been sent to Columbia.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's rules of Practice and Procedure 18 CFR 385.211. All such protest should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP85–203–015]

Panhandle Eastern Pipe Line Co.; Refund Report

April 30, 1993.

Take notice that on April 14, 1993, Panhandle Eastern Pipe Line Company (Panhandle) filed a report of a refund paid to Columbia Gas Transmission Corporation (Columbia) in compliance with Commission order issued February 11, 1993, which approved a settlement dated February 6, 1992.

Panhandle states that on April 14, 1993, it paid Columbia $11,852,277, inclusive of principal and interest, representing the final resolution of any remaining disputed production-related costs applicable to Columbia under Commission Order Nos. 94 and 473.

Panhandle states that copies of the letter has been sent to Columbia.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211. All such protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP92–204–000]

South Georgia Natural Gas Co.; Technical Conference

April 30, 1993.

In the Commission's letter order issued on August 14, 1992, in the above-captioned proceeding, the Commission held that the filing raises issues for which a technical conference is to be convened. The conference to address the issues has been scheduled for Tuesday, May 18, 1993, at 11 a.m. in a room to be designated at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC 20426.

The matters to be addressed at this conference include the following:

1. Explanation of the mechanics of the monthly tracking mechanism for fuel proposed by South Georgia.

2. Any proposed alternatives, such as a tracker, for changes in fuel/line loss reimbursement.

3. Discussion of the relationship between the tariffs of South Georgia and Southern Natural Gas Company related to penalties and fuel use.

4. Any considerations of a balancing agreement between South Georgia and Southern Natural to ameliorate potential for penalties.

All interested persons and Staff are permitted to attend. Any questions concerning this matter should be addressed to Harris Wood, (202) 208–0696.

Lois D. Cashell,

Secretary.

[Docket No. RP92–164–007]

Tarpon Transmission Co.; Compliance Tariff Filing

April 30, 1993.

Take notice that on April 7, 1993, Tarpon Transmission Company ("Tarpon") tendered for filing with the Commission as part of its FERC Gas Tariff, Original Volume No. 1, Tenth Revised Sheet No. 2A and Original Sheet No. 2E, proposed to be effective on November 1, 1992.

Tarpon states that these tariff sheets are filed in compliance with the Commission's order of February 4, 1993 (*Tarpon Transmission Co.*, 62 FERC ¶ 61,114 (1993)), approving an uncontested Offer of Settlement filed by Tarpon on November 3, 1992. Tenth Revised Sheet No. 2A sets forth the settlement rates for Tarpon's Part 284 "open access" interruptible transportation service and Original Sheet No. 2E sets forth the settlement rates for Tarpon's Part 284 "open access" firm transportation service.

Tarpon has requested that the Commission waive its Regulations to the extent necessary to permit this compliance tariff filing to be come effective on November 1, 1992.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–164–006]

Tarpon Transmission Co.; Report of Refunds

April 30, 1993.

Take notice that on April 7, 1993, Tarpon Transmission Company (Tarpon) filed a refund report with the Federal Energy Regulatory Commission (Commission) in accordance with Section 2.5 of the Stipulation and Agreement (settlement) approved by the Commission's February 4, 1993 order, *Tarpon Transmission Co.*, 62 FERC ¶ 61,114 (1993).

Tarpon states that it has made refunds (with interest) to its customers of the difference between Tarpon's filed rate of 14.81 cents per Mcf and the settlement rate of 11.84 cents per Mcf, (both exclusive of the ACA charge) as approved by the Commission in the above-referenced order for the period from November 1, 1992 through December 31, 1992.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211. All such protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. CP93–319–000]

Tennessee Gas Pipeline Co.; Application

April 30, 1993.

Take notice that on April 28, 1993, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP93–319–000 an application pursuant to section 7(b) of the Natural Gas Act for Authorization to abandon a certificated transportation service for Columbia Gas Transmission Company (Columbia Gas), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee seeks authorization to abandon a certificated transportation service for Columbia Gas currently on file as Tennessee's Rate Schedule T–71. Tennessee states that the service was authorized by order issued August 3, 1978, in Docket No. CP78–197 and provided that Tennessee transport gas attributable to Columbia Gas for redelivery to the system of Columbia Gulf Transmission Company at an existing point of interconnect with Tennessee's system near Chalkley, Cameron Parish, Louisiana. Tennessee indicates that Columbia Gas has requested that the service under Rate Schedule T–71 be terminated. No abandonment of facilities is proposed.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 20, 1993, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP93–104–000]

Texas Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

April 30, 1993.

Take notice that Texas Gas Transmission Corporation (Texas Gas), on April 27, 1993, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 2–A:

First Revised Sheet No. 104
Original Sheet No. 104–A

Texas Gas states that these proposed revised tariff sheets provide its Customers with an additional option, both during the term of a transportation agreement and at the termination of a transportation agreement, to eliminate transportation imbalances by electing to "trade" imbalances with another Customer. Such imbalance "trades" would be negotiated between Customers and would allow Customers having positive imbalances to trade their imbalances with a Customer having a negative imbalance.

Texas Gas submits that this additional option for alleviating imbalances will assist Texas Gas and its Customers in eliminating current transportation imbalances before the initiation of restructured services on its system under Order No. 636. Texas Gas requests a proposed effective date of June 1, 1993.

Texas Gas states that copies of the filing are being mailed to all Texas Gas's jurisdictional sales and transportation customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests or motions should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public

April 30, 1993.

Take notice that Williams Natural Gas Company (WNG) on April 27, 1993, tendered for filing Seventeenth Revised Sheet No. 9 to its FERC Gas Tariff, First Revised Volume No. 1.

WNG states that it filed a Stipulation and Agreement (Stipulation) on November 24, 1992 in Docket Nos. RP89–183–045, et al. Article I, Section 4, of the Stipulation requires WNG to file Revised Tariff Sheets within fifteen days after issuance of the Final Commission Order approving the Stipulation. Article I, Section 4 states that such Revised Tariff Sheets shall become effective on the first day of the billing month beginning after the date that the Commission's Order making the Stipulation effective becomes a Final Commission Order. A Commission Order was issued in this docket on March 12, 1993, and became final on April 12, 1993. The Revised Tariff Sheets to be effective May 1, 1993 are being filed in compliance with the Stipulation. WNG respectfully requests waiver of the Commission's regulations to permit such May 1 effective date.

WNG states that a copy of its filing was served on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20428, in accordance with § 385.211 of the Commission's Rules and Regulations. All such protests should be filed on or before May 7, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

Office of Fossil Energy

[FE Docket No. 93–38–NG]

Pan-Alberta Gas (U.S.) Inc.; Order Granting Blanket Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Pan-Alberta Gas (U.S.) Inc. (PAG-US) blanket authorization to import up to 730 Bcf per day of natural gas over a two-year term beginning on the date of first delivery after July 3, 1993.

The order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, April 30, 1993.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

[FR Doc. 93–10736 Filed 5–5–93; 8:45 am]

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4652–4]

Clean Air Act; Contractor Access to Confidential Business Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with 40 CFR 2.301(h)(2) EPA has determined that IOCAD Engineering Services requires access, on a need-to-know basis, to CBI materials submitted to EPA under title II, section 208, of the Clean Air Act (CAA). This access is necessary to this contractor's performance under EPA Contract Number 3A–0226–YASA.

DATES: The transfer of data to this EPA contractor will occur no sooner than May 12, 1993.

FOR FURTHER INFORMATION CONTACT: Clifford D. Tyree, Project Manager/ Freedom of Information Act Officer, Certification Division, Ann Arbor, MI, 48105, telephone (313) 668–4310.

SUPPLEMENTARY INFORMATION: Title II of the Clean Air Act (CAA) requires that manufacturers of light-duty vehicles, light-duty truck, heavy-duty engines, and motorcycles meet applicable exhaust emission standards. Section 208 of the CAA requires these manufacturers to provide such information as the Administrator may reasonably require. Because this information is collected under Section 208 of the Act, EPA possesses the authority to disclose said information to its authorized representatives. EPA provides a recommended application format identifying the information needed to support their assertions their vehicles/ engines comply with the applicable emission standards. Each manufacturer is required to submit an application for certification for a certificate of conformity to the applicable regulations. These data include vehicle descriptions, engine/vehicle descriptions, emission control system descriptions and calibrations, and sales information. EPA is required to provide information to sources both internally and externally by means of memoranda and letters.

Under Contract Number 3A–0226–YASA, IOCAD Engineering Services will provide word processing services for the Certification Division. This service includes mail handling, distribution of incoming mail, and typing letters in response to materials received. Much of the information and data will be classified as confidential by the submitters. Therefore, in order to perform the required clerical responsibilities of this contract, the contractor will have access to CBI. This contractor's responsibility is to maintain confidentiality of all CBI. The contractor's address is: IOCAD Engineering Services, 20123 West Eight Mile Road, Detroit, MI 48219.

The contract with IOCAD Engineering Services will prohibit the use of the information for any purpose not specified in the contract; will prohibit the disclosure, in any form, to a third party; and will require that each official and employee of the contractor sign an agreement to protect the information from unauthorized release or access.

Dated: April 30, 1993.

Michael H. Shapiro,

Acting Assistant Administrator for Air and Radiation.

[FR Doc. 93–10713 Filed 5–5–93; 8:45 am]

BILLING CODE 6560–50–P

[OPP–66175; FRL–4583–5]

Arsenic Acid; Receipt of Request to Cancel; Cancellation Order

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This Notice, issued pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 et seq., announces EPA's receipt of voluntary requests from Elf Atochem North America, Inc. (Atochem) and Voluntary Purchasing Groups, Inc. (VPG) to cancel their registrations for products containing arsenic acid for use on cotton and to provide for existing stocks. EPA grants this voluntary cancellation effective May 6, 1993. Existing stocks will be permitted to be sold until October 31, 1993. Growers will be permitted to use existing stocks until December 31, 1993. Registrants will buy back from customers stocks remaining after the 1993 use season.

DATE: The cancellation order shall become effective May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Regarding voluntary cancellation: Ann Sibold, Special Review and Reregistration Division (H7508W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Special Review Branch, 3rd floor, 2800 Crystal Drive, Arlington, VA 22202 (703) 308–8033. Regarding recovered and converted product, notification of possession of canceled products, and compliance issues: David Stangel, Office of Compliance Monitoring (EN–342W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Office of Compliance Monitoring, 5th floor 2800 Crystal Drive Arlington, VA 22202 (703) 308–8295.

SUPPLEMENTARY INFORMATION: This Notice announces the receipt of a request for cancellation of arsenic acid used on cotton and the Agency's decision.

I. Request for Voluntary Cancellation

Arsenic acid is used as a desiccant on cotton in certain areas of Texas and Oklahoma to facilitate harvest by mechanical cotton strippers. EPA initiated a Rebuttable Presumption against Reregistration ((RPAR), now called a Special Review) on this chemical and other inorganic arsenicals on October 18, 1978 (43 FR 48267). That Notice was based on a determination that use of the inorganic arsenicals met or exceeded the risk criteria for carcinogenicity, teratogenicity, and mutagenicity under 40 CFR 162.11 (now 40 CFR 154.7). EPA issued a Notice of Preliminary Determination to Cancel Registration (PD 2/3) on October 7, 1991 (56 FR 50576), for arsenic acid registered for use as a desiccant on cotton. In the PD 2/3 EPA proposed to cancel all uses of arsenic acid with no provisions for the distribution, sale or use of existing arsenic acid stocks since arsenic acid is classified as a known human (Group A) carcinogen, and the cancer risks to workers outweighed the localized benefits. The comment period was extended until June 6, 1992, at the request of several grower groups and the registrants (57 FR 3755).

After the close of the comment period, the registrants initiated discussions with EPA regarding regulatory options for arsenic acid, including a voluntary cancellation conditioned upon provision for existing stocks through the 1993 use season. During the course of this discussion, the textile industry expressed concern about the costs incurred by the industry to dispose of arsenic acid contaminated waste. For this reason, the textile industry opposed permitting use of existing stocks for one more year. EPA considered these comments, determined that the textile industry's estimates of costs were not consistent with the relatively small percentage of the cotton crop treated with arsenic acid, and decided to continue the discussions with the registrants regarding voluntary cancellation. Copies of documents relating to the discussions with the registrants and the textile industry may be found in the public docket.

Atochem, in a letter dated January 8, 1993, and VPG, in letters dated February 19 and February 25, 1993, requested voluntary cancellation with the following conditions:

1. Existing stocks may be sold until October 31, 1993, and growers may use existing stocks until December 31, 1993.

2. "Existing stocks" include stocks already in the U.S., packaged, labeled, and released for shipment as of August 26, 1992, (Atochem) and October 31, 1992 (VPG).

3. Stocks remaining after the 1993 use season may be sold to the wood preservative industry for reformulation or repackaging into registered wood preservative products, or lawfully disposed.

4. Both registrants waived the 90–day comment period allowed by FIFRA Section 6(f). In addition to these conditions, each registrant described its buy back program. Atochem will buy back leftover product until March 31, 1994. VPG will notify customers by February 1, 1994, that they can return leftover product to VPG within 45 days for a refund. Both registrants agreed that repurchased stocks will be sold to the wood preservative industry for reformulation or repackaging into registered wood preservative products, or lawfully disposed.

II. Existing Stocks Determination

For purposes of this order, existing stocks are defined as those stocks of a previously existing arsenic acid cotton desiccant product which were in the U.S. and were packaged, labeled, and released for shipment prior to October 31, 1992. EPA determined that the date of October 31, 1992, would accommodate the dates specified by both registrants.

EPA grants Atochem's and VPG's requests to distribute and sell their existing stocks of arsenic acid for use on cotton through October 31, 1993. Retailers and distributors also may sell and distribute the product until October 31, 1993. After October 31, 1993, all sale and distribution of existing stocks will be prohibited unless such stocks are being sold or distributed as part of the registrants' buy back program for purposes of disposal or relabeling for wood preservative use. Existing stocks may be used on cotton until December 31, 1993, provided they are used in accordance with the products' existing EPA-approved labeling.

The registrants will buy back any stocks remaining after the 1993 use season in accordance with the plans they have filed with the Agency and which are described above. By April 30, 1994, the registrants will report to the contact listed in unit IV.D.1 how much recovered product was retrieved and the

VOL 58 ISS 86 MY 6 1993 UMI

amount converted to the wood preservative use. Due to the limited region where arsenic acid is used, EPA will not require the registrants to add stickers to remaining stocks, but will allow the National Cotton Council to work with Atochem to inform affected users of the existing stocks provisions.

III. EPA's Decision on Request for Voluntary Cancellation and Cancellation Order

EPA hereby grants Atochem and VPG's requests that the registration of their products Desiccant L-10 (EPA #4581–231) and Arsenic Acid, (EPA #7401–184, 7401–195, and 7401–200), respectively, all of which contain the active ingredient arsenic acid, be voluntarily canceled. Concurrently, EPA issues a Cancellation Order for arsenic acid registered for use as a desiccant on cotton.

Under section 6(f)(1) of FIFRA, a registrant may request at any time that EPA cancel any of its pesticide registrations. EPA must publish in the **Federal Register** a notice of receipt of the request and allow public comment before granting the request unless either the registrant requests a waiver of the comment period or the Administrator determines that the continued use of the pesticide would pose an unreasonable adverse effect on the environment. Both Atochem and VPG requested waiver of the comment period in their letters requesting voluntary cancellation. For this reason, this Cancellation order shall become effective on May 6, 1993. Accordingly, as of May 6, 1993, no person may distribute or sell arsenic acid for use as a pesticide, except existing stocks of the product as permitted in the Existing Stocks provision of this Order. Any distribution, sale or use of existing stocks of the product that is not consistent with the terms of the Existing Stocks Provision of this Order will be considered a violation of FIFRA section 12(a)(2)(K) and if distribution or sale, section 12(a)(1)(A).

EPA notes that the voluntary cancellation will affect the reregistration of arsenic acid that was underway when the registrants initiated discussions of voluntary cancellation of arsenic acid. As a result of this cancellation order, arsenic acid will be removed from List A in the Reregistration process. Once an active ingredient is removed from List A, any person wishing to bring the pesticide back on the market must apply to EPA for a "new chemical" registration. However, it is unlikely such registration would be approved because of the chemical's carcinogenic potential.

IV. Required Notification of Possession of Canceled Products

Pursuant to FIFRA section 6(g), any producer or exporter, registrant, applicant for a registration, applicant or holder of an experimental use permit, commercial applicator, or any person who distributes or sells any pesticide, who possesses any stocks of the pesticide products identified above (hereafter referred to as "affected persons", which includes affected individuals, partnerships, associations, corporations, or any organized group of person whether incorporated or not), must notify the EPA and appropriate State and local officials of (1) Such possession; (2) the quantity of canceled arsenic acid pesticide product possessed; and (3) the place at which the canceled arsenic acid pesticide product is stored. Notification by affected persons to EPA and designated State and local officials pursuant to FIFRA section 6(g) shall be in accordance with the procedures, timeframes, and requirements set out in this Unit. End-users, except commercial applicators, are not required to report their stocks of canceled arsenic acid products.

A. Pesticides Required to be Reported

Affected persons must report, pursuant to FIFRA section 6(g), the information described below for canceled arsenic acid pesticide products which are in the physical possession of that person in locations that the person owns, leases, or operates in the United States, regardless of the ownership of that canceled arsenic acid pesticide product. Canceled arsenic acid product which is owned by one affected person, but in the physical possession of another affected person, who is subject to section 6(g) reporting is to be reported by the person in physical possession of the pesticide.

Registrants and other affected persons are not to include in the FIFRA section 6(g) report the quantity of stocks already reported to the Agency.

The Office of Management and Budget (OMB) has given interim approval for the collection of information under FIFRA section 6(g) and has assigned the OMB control number 2070–0109.

B. Information Which Must be Included in the Submission

To be in compliance with FIFRA section 6(g), affected persons must submit to the designated EPA and State and local officials the following information certified by a responsible company official as true and correct:

1. The identity and address of the affected person (company).
2. Name and phone number of a contact person (in the company).
3. Indication that the FIFRA section 6(g) information is being submitted for canceled pesticide products containing arsenic acid.
4. The relationship of the affected person (company) to the canceled arsenic acid pesticide products being reported under FIFRA section 6(g) (i.e., exporter, producer, registrants, applicant for registration, applicant for, or holder of an experimental use permit, commercial applicator, distributor, retailer, etc.).
5. The street address of each location owned/leased or operated in the United States by the submitter where the canceled arsenic acid pesticide product is held.
6. For each location listed, the total quantity (pounds, gallons, or other appropriate measure) of canceled arsenic acid pesticide product, and the quantity of canceled arsenic acid pesticide product listed by the number of units of each size container (pounds, gallons, or other appropriate measure) and by EPA registration number (e.g., x units of 5 gallon containers of EPA registration number _____-_____).

C. When to Report

Affected persons are required to submit FIFRA section 6(g) information according to the following schedule:

1. Registrants of canceled arsenic acid must report by June 7, 1993.
2. Producers, exporters, applicants for a registration, applicants or holder of an experimental use permit, dealers, distributors, and retailers must report by June 21, 1993.
3. Commercial applicators must report by July 6, 1993.
4. Other end-users are not required to report their possession of canceled products containing arsenic acid.

D. Where to Submit Section 6(g) Information

The FIFRA section 6(g) information is to be sent to each of the following three locations:

1. EPA. Director, Compliance Division, Office of Compliance Monitoring (EN–342), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Envelopes must be marked: "Attention: FIFRA Section 6(g) Information."
2. State. Chief Pesticide Regulatory Official, of the agency in the State government which enforces the State pesticide lawns where the canceled arsenic acid pesticide product is stored. Envelopes must be marked "Attention FIFRA Section 6(g) Information."

Information on the appropriate officials to receive the FIFRA section 6(g) information in Texas and Oklahoma follows:

Oklahoma Department of Agriculture, Plant Industry Division, 2800 N. Lincoln Boulevard, Oklahoma City, OK 73105.

Texas Department of Agriculture, Pesticide Regulation Division, P.O. Box 12847, Austin, TX 78711.

Information for other States is available from the information contact listed at the beginning of this notice.

3. Local. Chair of the Local Emergency Planning Committee (LEPC), for the location where the canceled arsenic acid pesticide is stored. Envelopes should be marked, "Attention: Notification of Possession of Canceled Pesticides." To identify the name and address of the chair of the LEPC contact the State Emergency Response Commission or call the Emergency Planning and Community Right-to-Know (EPCRA) Information Hotline at 1–800–535–0202.

E. Confidentiality of FIFRA Section 6(g) Information

EPA does not consider FIFRA section 6(g) information to be confidential business information (CBI) under the provisions of FIFRA section 10. Such information may be made available by EPA to the public without further notice.

F. Enforcement

Failure to submit complete and accurate FIFRA section 6(g) information, and/or failure to submit accurate section 6(g) information in the required timeframes is a violation of FIFRA section 12(a)(2)(K) and violators may be subject to civil penalties up to $5,000 per offense. Affected persons who possess canceled pesticide in multiple locations may be fined up to $5,000 per offense for each location for which the FIFRA section 6(g) information is not submitted, or is submitted late, incomplete, or inaccurate. Persons who knowingly submit false section 6(g) reports are in violation of FIFRA section 12(a)(2)(M) and may also be subject to civil penalties up to $5,000 per offense. Knowing violations of the requirements of FIFRA section 6(g) may also result in criminal penalties under section 14(b) of FIFRA, or 18 U.S.C. 1001.

V. Availability of the Public Docket

Copies of documents referred to in this Notice are available in the Public Docket, located in CM #2, Rm. 1128, 1921 Jefferson Davis Highway, Arlington, VA 22202. Hours are from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

Dated: April 28, 1993.

Douglas D. Campt,

Director, Office of Pesticide Programs.

[FR Doc. 93–10714 Filed 5–5–93; 8:45 am]

BILLING CODE 6560–50–F

[FRL–4652–5]

Public Water System Supervision Program Revision for the State of Illinois

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Public notice is hereby given in accordance with the provisions of section 1413 of the Safe Drinking Water Act, as amended, 42 U.S.C. 300f et seq., and 40 CFR part 142, subpart B, the National Primary Drinking Water Regulations (NPDWR), that the State of Illinois is revising its Public Water System Supervision (PWSS) primacy program. The Illinois Environmental Protection Agency (IEPA), has adopted: (1) Drinking water regulations for public notification that correspond to the NPDWR for public notification promulgated by the U. S. Environmental Protection Agency (U.S. EPA) on October 28, 1987, (52 FR 41534–41550), (2) drinking water regulations for total coliform that correspond to the NPDWR for total coliform promulgated by the U. S. EPA on June 29, 1989, (54 FR 27544–27568) and (3) drinking water regulations for the treatment of surface water that correspond to the NPDWR for surface water treatment promulgated by the U.S. EPA on June 29, 1989, (54 FR 27486–27541). The U.S. EPA has completed its review of Illinois' PWSS primacy program revision.

The U.S. EPA has determined that the Illinois Public Notification, Total Coliform and Surface Water Treatment rule revisions meet the requirements of the Federal rule. Therefore, the U.S. EPA is proposing to approve the Public Notification, Total Coliform and Surface Water Treatment rule revisions.

All interested parties are invited to submit written comments on these proposed determinations, and may request a public hearing on or before June 7, 1993. If a public hearing is requested and granted, the corresponding determination shall not become effective until such time, following the hearing, at which the Regional Administrator issues an order affirming or rescinding this action.

Requests for a public hearing should be addressed to: Rosemarie Karas (WD–17J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590.

If no timely and appropriate request for a hearing is received, and the Regional Administrator does not elect to hold a hearing on his own motion, these determinations shall become effective June 7, 1993.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing. (2) A brief statement of the requesting person's interest in the Regional Administrator's determinations and of information that the requesting person intends to submit at such hearing. (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Notice of any hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing. Such notice will be made by the Regional Administrator in the **Federal Register** and in newspapers of general circulation in the State of Illinois. A notice will also be sent to the person(s) requesting the hearing as well as to the State of Illinois. The hearing notice will include a statement of purpose, information regarding the time and location, and the address and telephone number where interested persons may obtain further information. The Regional Administrator will issue an order affirming or rescinding his determination upon review of the hearing record. Should the determination be affirmed, it will become effective as of the date of the order.

Should no timely and appropriate request for a hearing be received, and the Regional Administrator does not elect to hold a hearing on his own motion, these determinations shall become effective on June 7, 1993.

Please bring this notice to the attention of any persons known by you to have an interest in these determinations.

All documents relating to these determinations are available for inspection between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Illinois Environmental Protection Agency, Division of Public Water Supplies, 2200 Churchill Road, Springfield, Illinois 62706, (217) 785–0561.

Safe Drinking Water Branch, Drinking Water Section, U.S. Environmental Protection Agency, Region 5, 77 West

VOL 58 ISS 86 MY 6 1993 UMI

Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Rosemarie Karas, Region 5, Drinking Water Section at the Chicago address given above, telephone 312/353–8652.

(Sec. 1413 of the Safe Drinking Water Act, as amended (1986), and 40 CFR 142.10 of the National Primary Drinking Water Regulations)

Signed this 23 day of April, 1993.

Valdas V. Adamkus,

Regional Administrator, U.S. EPA, Region 5

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[PP Docket No. 92–234; FCC 93–175]

Encryption Technology for Satellite Cable Programming

AGENCY: Federal Communications Commission.

ACTION: Notice; Report.

SUMMARY: This report presents the findings of the Commission's inquiry into encryption technology for satellite cable programming. The Report examines the attempt of Titan Corporation to enter the market for decoders used in C-band home satellite dish systems and finds that programmers have failed to accept its product. Moreover, General Instrument Corporation (GIC), the primary patent holder and manufacturer of such decoders, has raised some legitimate questions about the difficulties of coexistence between its system and that of Titan. The Report finds that competition to the GIC encryption system might come from separate systems such as the DBS services scheduled for launch in early 1994. Additionally, the Report finds that access to the GIC Direct Broadcast Satellite (DBS) Center for authorization of decoders from a rival manufacturer is not an insurmountable barrier to entry.

With respect to other technological issues, the Report notes that, while most of the industry supports the concept of a standard decoder interface, there is little support for a mandatory standard. The Report also finds that the transition from analog to digital transmissions is likely to be gradual.

FOR FURTHER INFORMATION CONTACT: Jonathan D. Levy, Office of Plans and Policy, (202) 653–5940.

SUPPLEMENTARY INFORMATION: The Commission initiated this examination of encryption technology in response to a Congressional request to: (1) Review efforts to develop an alternative source for decoder modules compatible with the industry standard for C-band use and (2) examine the feasibility of authorizing legal and compatible modules, regardless of manufacturer, through the GIC DBS Center. The inquiry also addressed related technological issues, such as the feasibility and utility of a standard decoder interface that would permit a single integrated receiver descrambler or IRD (a satellite receiver with a built-in decoder) to function with multiple encryption systems and the implications for encryption technology of the apparent trend toward digital transmission of video.

This inquiry is the Commission's third examination of encryption technology for satellite cable programming. Satellite cable programming is defined in the Communications Act as "video programming which is transmitted via satellite and which is primarily intended for direct receipt by cable operators for their retransmission to cable subscribers." The Commission's earlier encryption technology findings are in Report in General Docket No. 86–336, 2 FCC Rcd. 1669 (1987) 52 FR 10136, March 30, 1987, Second Report in Gen. Docket No. 86–336, 3 FCC Rcd. 1202 (1988) 53 FR 9701, March 24, 1988, and Report in General Docket No. 89–78, 5 FCC Rcd. 2710 (1990) 55 FR 18388, May 2, 1990.

With respect to competition in producing compatible decoders, the Report notes that GIC owns patents on the industry standard Videocipher technology and has developed several generations of decoder. The original was known as Videocipher II and the latest is known as Videocipher Renewable Security. Titan Corporation, the potential rival source, has rights to the basic Videocipher II patents.

The Report finds that programmers, who in the first instance are the consumers of encryption technology, have failed to accept the Titan product. GIC and Titan disagree about the Titan system's security, cost, and ability to coexist smoothly with the GIC system. The Report concludes that GIC raised legitimate questions concerning the impact of "sharing" with Titan on GIC's ability to respond to security breaches and to maintain the reliability and integrity of scrambling equipment at programmer uplink sites. The Report notes that Titan recently suspended its efforts to enter the consumer market. The complexity of the technical considerations involved prevented the Commission from coming to any definitive general conclusion about the prospects for competition in producing compatible Videocipher modules. Although GIC asserted that the presence of Channel Master as a second source of Videocipher modules means that there is competition in module supply, the Report finds that any such competition is limited by the requirement that Channel Master Purchase key proprietary chips from GIC.

The Report notes that competition to the GIC Videocipher encryption system might come from completely separate systems such as the DBS services scheduled for launch in early 1994. Recent agreements for DBS carriage of Home Box Office and Showtime and other Viacom services lend credibility to the idea that delivery systems other than C-band will have comparable cable programming and hence that, for example, DBS, could exert competitive pressure on C-band equipment costs.

The Report finds that lack of access to the GIC DBS Center for authorizing Titan modules is not an insurmountable barrier to entry. Others have built or plan to build their own authorization centers for various other encryption systems. Moreover, Titan has constructed its own center and has concluded that business considerations make it undesirable to utilize an authorization center operated by a competitor. The Report also notes GIC's uncontested legal analysis suggesting that mandatory access to its DBS Center could not be required because the Center is not an essential facility.

With respect to other technological issues, most commenters supports the concept of a standard decoder interface, but generally agree that it should not be mandated by the government. The transition from analog to digital transmissions is expected to be gradual, with simulcasting of digital signals and C-band analog signals for the next nine to 12 years and the development of "hybrid" decoders having both analog and digital capacity.

The complete text of this Report is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW., Washington, DC, and also may be purchased from the Commission's copy contractor, International Transcription Services, Inc., at 1919 M Street, NW., room 246, Washington, DC 20554 (telephone: (202) 857–3800).

Federal Communications Commission.

William F. Caton,

Acting Secretary.

FEDERAL RESERVE SYSTEM

Delegation of Authority Concerning Margins on Stock Index Futures and Options on Stock Index Futures

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice.

SUMMARY: The Board has delegated its authority under the Futures Trading Practices Act of 1992 concerning margins on stock index futures and options thereon to the Commodity Futures Trading Commission.

FOR FURTHER INFORMATION CONTACT: Oliver Ireland, Associate General Counsel (202/452-3625), Legal Division; or Patrick Parkinson, Assistant Director (202/452-3526), Division of Research and Statistics, Board of Governors of the Federal Reserve System. For the hearing impaired *only*, Telecommunications Device for the Deaf (TDD), Dorothea Thompson (202/452-3544), Board of Governors of the Federal Reserve System, 20th and C Street, NW., Washington, DC 20551.

SUPPLEMENTARY INFORMATION: By letter dated March 22, 1993, the Board has delegated its authority under Section 2(a)(1)(B)(vi)(I) and (II) of the Commodity Exchange Act concerning margins on stock index futures and options thereon to the Commodity Futures Trading Commission. The following is the text of the Board's letter delegating its authority and the Commission's letter of response.

March 22, 1993

Mr. William P. Albrecht
Acting Chairman
Commodity Futures Trading Commission
2033 K Street, N.W.
Washington, D.C. 20581

Dear Mr. Chairman:

Section 501 of the Futures Trading Practices Act of 1992 ("FTPA") amended section 2(a)(1)(B) of the Commodity Exchange Act to require any contract market in a stock index future contract (or option thereon) to file with the Board of Governors of the Federal Reserve System any rule establishing or changing the levels of margin (initial and maintenance) for these futures contracts or options. The Board may at any time request any contract market to set margin levels on these futures contracts or options at such levels as the Board, in its judgment, determines are appropriate to preserve the financial integrity of the contract market or its clearing system or to prevent systemic risk. If the contract market fails to do so within the time specified by the Board in its request, the Board may direct the contract market to alter or supplement the rules of the contract market as specified in the request. Subject to such conditions as the Board may determine, the Board may delegate any or all of its authority under this provision to the Commission.

The Board believes that levels of initial and maintenance margin set by contract markets generally are but one component of sophisticated risk control systems that may include frequent marking-to-market of customer and clearing member positions, participant criteria, standby liquidity arrangements, participant audits, market surveillance and active risk management, including the ability to raise levels of margins on short notice and to call for increased margin from specific customers or participants. Further, with the relatively rapid growth of stock index futures options at some contract markets, the determination of margins on such contracts has become an increasingly important issue.

The procedures for determining levels of margins on portfolios of stock index contracts are complex. The Board believes, furthermore, that the appropriateness of particular levels of initial and maintenance margin for meeting the criteria established by section 501 of the FTPA of preserving the financial integrity of contract markets or their clearing systems or preventing systemic risk can be evaluated only in the context of other credit and liquidity safeguards that are integral components of the overall risk control systems for these contract markets. Under section 5a of the Commodity Exchange Act, contract markets must submit rules, other than those relating to levels of margins, to the Commission for approval. Consequently, the Commission is both most familiar with the overall risk control systems of these contract markets and has the most comprehensive authority over these systems. This leads the Board to conclude that the Commission is the most appropriate entity to exercise the functions assigned to the Board under Section 501 of the FTPA.

Accordingly, under Section 2(a)(1)(B)(vi)(III) of the Commodity Exchange Act as added by Section 501 of the FTPA, the Board is hereby delegating its authority under Section 2(a)(1)(B)(vi)(I) and (II) of the Commodity Exchange Act to the Commodity Futures Trading Commission until further notice from the Board.

The Board would expect that, in reviewing such rules establishing or changing levels of margins (initial and maintenance) for stock index futures contracts (or options thereon), the Commission would consider the appropriateness of the margin levels in the context of the overall risk control system employed by the relevant exchange and its clearing system. Particular attention should be paid to the procedures used for determining margin levels on portfolios including futures options, and the ability of the exchange and its clearing system to cover any losses and meet financial obligations in a timely manner in the event of a default by a large participant. The Board expects the Commission to report to the Board annually on its experience in reviewing rules establishing or changing levels of initial and maintenance margins.

Very truly yours,
William W. Wiles
Secretary of the Board

VOL 58 ISS 86 MY 6 1993 UMI

April 14, 1993

Mr. William W. Wiles
Secretary of the Board
Board of Governors of the
Federal Reserve System
Washington, D.C. 20551

Dear Mr. Wiles:

The Commodity Futures Trading Commission hereby acknowledges the delegation by the Board of Governors of the Federal Reserve System to the Commission of the Board's authorities under Section 2(a)(1)(B)(vi)(II) and (III) of the Commodity Exchange Act, as amended by Section 501 of the Futures Trading Practices Act of 1992. The Commission understands that this delegation of authority to review margin levels on stock index futures, and options thereon, is effective beginning March 22, 1993, and that it remains in effect until further notice from the Board.

The Commission has notified all exchanges with stock index futures or option contracts of this delegation of authority. Copies of those notifications are attached.

In its review of the appropriateness of margin levels (initial and maintenance) for stock index futures, or options thereon, the Commission will take into consideration the overall risk control system employed by the relevant exchange and its clearing system as well as the historic and prospective price volatility of the particular stock indices. The Commission also will consider the portfolio margining procedures used by some exchanges.

The Commission will report to the Board annually each April on its experience in exercising this delegated authority. The Commission's staff will also maintain more frequent contact with the Board's staff as appropriate, to keep them advised of stock index margin developments. The Commission and our staff will welcome any counsel that the Board may wish to provide as we develop our policies and procedures for reviewing stock index margin levels.

Sincerely,
William P. Albrecht

Board of Governors of the Federal Reserve System, April 30, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

GENERAL ACCOUNTING OFFICE

Federal Accounting Standards Advisory Board

AGENCY: General Accounting Office

ACTION: May meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. No. 92–463), as amended, notice is hereby given that the monthly meeting the Federal Accounting Standards Advisory Board will be held on Monday, May 24, 1993 from 9 a.m. to 4 p.m. in room 7313 of the General Accounting Office, 441 G St., NW., Washington, DC.

The agenda for the meeting includes discussions of issues in the Exposure Drafts on Financial Reporting Objectives and Accounting for Direct Loans and Loan Guarantees, and the project on Accounting for Liabilities and Future Claims.

Other items may be added to the agenda; interested parties should contact the Staff Director for more specific information and to confirm the date of the meeting.

Any interested person may attend the meeting as an observer. Board discussions and reviews are open to the public.

FOR FURTHER INFORMATION CONTACT: Ronald S. Young, Staff Director, 750 First Street NE., suite 1001, Washington, DC 20002, or call (202) 512–7350.

Authority: Federal Advisory Committee Act Pub. L. No. 92–463, Section 10(a)(2), 86 Stat. 770, 774 (1972) [current version at 5 U.S.C. app. section 10(a)(2) (1988); 41 CFR 101–6.1015 (1990).

Dated: April 30, 1993

Jimmie D. Brown,

Deputy Director.

GENERAL SERVICES ADMINISTRATION

Performance Review Boards for Small Client Agencies Serviced by the General Services Administration, Names of Members

Section 4314(c) (1) through (5) of title 5, U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more Performance Review Boards. The board shall review and evaluate the initial appraisal by the supervisor of a senior executive's performance, along with any recommendations to the appointing authority relative to the performance of the senior executive. The Performance Review Board also shall make recommendations as to whether the career executive should be, conditionally recertified, or not recertified. As provided under section 601 of the Economy Act of 1932, amended 31 U.S.C. 1525, the General Services Administration through its External Services Staff, Personnel Division, provides various personnel management services to a number of diverse Presidential commissions, committees, boards, and other agencies through reimbursable administrative support agreements. This notice is processed on behalf of the client agencies, and it supersedes all other notices in the **Federal Register** on this subject.

Because of their small size, a Performance Review Board register has been established in which SES members from the client agencies participate. The Board is composed of SES members from various agencies. From this register of names, the head of each client agency will appoint executives to a specific board to serve a particular client agency.

The members whose names appear on the Performance Review Board standing roster to serve client agencies are:

Administrative Conference of the U.S.

William J. Olmstead, Executive Director
Gary J. Edles, General Counsel
Jeffrey S. Lubbers, Research Director

Arctic Research Commission

Philip L. Johnson, Executive Director

Barry M. Goldwater Scholarship and Excellence in Education Foundation

Gerald J. Smith, Executive Secretary

Board for International Broadcasting

Mark G. Pomar, Executive Director
Bruce D. Porter, Deputy Executive Director
John A. Lindburg, General Counsel
Patricia H. Schlueter, Director of Financial and Congressional Affairs

Committee for Purchase From People Who Are Blind or Severely Disabled

Beverly L. Milkman, Executive Director

Defense Nuclear Facilities Safety Board

Kenneth M. Pusateri, General Manager
Joseph R. Neubeiser, Deputy General Manager
Robert M. Andersen, General Counsel
Richard A. Azzaro, Deputy General Counsel for Policy and Litigation
George W. Cunningham, General Engineer
Joyce P. Davis, Chief, Health Physics Branch

Harry S. Truman Scholarship Foundation

Louis H. Blair, Executive Secretary

Japan-United States Friendship Commission

Eric J. Gangloff, Executive Director

Office of Navajo and Hopi Indian Relocation

Christopher J. Bavasi, Executive Director
Michael J. McAlister, Deputy Executive Director.

For further information contact: Robert A. Miller, Chief, External Services Staff, (202–708–5370); General Services Administration, National Capital Region (WCPX), Washington, DC, 20407.

Dated: April 20, 1993.

Lenor Reese,

Acting Regional Personnel Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

U.S. Advisory Board on Child Abuse and Neglect; Meeting

AGENCY: U.S. Advisory Board on Child Abuse and Neglect, Administration for Children and Families, ACF, Department of Health and Human Services, DHHS.

ACTION: Notice of the fourteenth meeting of the U.S. Advisory Board on Child Abuse and Neglect in McLean, Virginia from 9 a.m., May 25, 1993 to 3:30 p.m., May 27, 1993.

SUMMARY: The U.S. Advisory Board on Child Abuse and Neglect will hold a meeting in McLean, Virginia from 9 a.m., May 25, 1993 through 3:30 p.m., May 27, 1993. This meeting is open to the public.

ADDRESSES: The meeting will be held at: Ritz Carlton Hotel, 1700 Tyson Boulevard, McLean, Virginia 22102.

FOR FURTHER INFORMATION CONTACT: Joan M. Williams, Special Projects Specialist, U.S. Advisory Board on Child Abuse and Neglect, Room 303D, Humphrey Building, Washington, DC 20201, (202) 690–8178.

SUPPLEMENTARY INFORMATION: During this meeting, the Advisory Board will: Receive a presentation on confidentiality; receive an update on developments relevant to the Board within the National Center on Child Abuse and Neglect; and hold a mini hearing on religious exemption.

Dated: April 23, 1993.

Preston N. Bruce,

Acting Executive Director, U.S. Advisory Board on Child Abuse and Neglect.

BILLING CODE 4184–01–M

Agency for Health Care Policy and Research

Meetings

In accordance with section 10(a) of the Federal Advisory Committee Act (title 5, U.S.C., appendix 2) announcement is made of the following advisory committees scheduled to meet during the month of June 1993:

Name: Health Services Developmental Grants Review Subcommittee.

Date and Time: June 9–11, 1993, 8 a.m.

Place: Hyatt Regency—Bethesda, One Metro Center, Conference Room TBA, Bethesda, Maryland 20814.

Open June 10, 1 p.m. to 2 p.m.
Closed for remainder of meeting.

Purpose

The Subcommittee is charged with the initial review of grant applications proposing experimental, analytical and theoretical research on costs, quality, access, effectiveness, and efficiency of the delivery of health services for the research grant program administered by the Agency for Health Care Policy and Research (AHCPR).

Agenda

The open session of the meeting on June 10 from 1 p.m. to 2 p.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Administrator, AHCPR. During the closed session, the Subcommittee will be reviewing research and demonstration grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, title 5, U.S.C., appendix 2 and title 5, U.S.C., 552b(c)(6), the Administrator, AHCPR, has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Gerald E. Calderone, Ph.D., Agency for Health Care Policy and Research, suite 602, Executive Office Center, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 227–8449.

Name: Health Care Technology Study Section.

Date and Time: June 14–16, 1993, 8:30 a.m.

Place: Marriott Residence Inn, 7335 Wisconsin Avenue, Montgomery II Room, Bethesda, Maryland 20814.

Open June 14, 8:30 a.m. to 9:30 a.m.
Closed for remainder of meeting.

Purpose

The Study Section is charged with conducting the initial review of health services research grant applications addressing the utilization and effects of health care technologies and procedures as well as applications in the area of information and decision sciences relating to health care delivery.

Agenda

The open session of the June 14 from 8:30 a.m. to 9:30 a.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Deputy Administrator, AHCPR. The closed sessions of the meeting will be devoted to a review of health services research grant applications emphasizing medical care technologies and procedures, and relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, title 5, U.S.C., appendix 2 and title 5, U.S.C. 552b(c)(6), the Administrator, AHCPR, has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Alan E. Mayers, Ph.D., Agency for Health Care Policy and Research, Suite 602, Executive Office Center, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 227–8449.

Name: Health Services Research Review Subcommittee.

Date and Time: June 17–18, 1993, 8:30 a.m.

Place: Embassy Suites Hotel, 4300 Military Road, NW., Tenley Town I, Washington, DC 20015.

Open June 17, 8:30 a.m. to 9:15 a.m.
Closed for remainder of meeting.

Purpose

The Subcommittee is charged with the initial review of grant applications proposing analytical and theoretical research on costs, quality, access, and efficiency of the delivery of health services for the research grant program administered by AHCPR.

Agenda

The open session of the meeting on June 17 from 8:30 a.m. to 9:15 a.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Administrator, AHCPR. During the closed sessions, the Subcommittee will be reviewing analytical and theoretical research grant applications relating to the delivery, organization, and financing of health services. In accordance with the Federal Advisory Committee Act, title 5, U.S.C., appendix 2 and title 5, U.S.C. 552b(c)(6), the Administrator, AHCPR, has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Patricia G. Thompson, Ph.D.,

VOL 58 ISS 86 MY 6 1993 UMI

Agency for Health Care Policy and Research, suite 602, Executive Office Center, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 227–8449.

Name: Health Services Research Dissemination Study Section.

Date and Time: June 24–25, 1993, 8:30 a.m.

Place: Marriott Residence Inn, 7335 Wisconsin Avenue, Calvert Room, Bethesda, Maryland 20814.

Open June 24, 8:30–9:15 a.m.

Closed for remainder of meeting

Purpose

The Study Section is charged with the review of and making recommendations on grant applications for Federal support of conferences, workshops, meetings, or projects related to dissemination and utilization of research findings, and AHCPR liaison with health care policy makers, providers, and consumers.

Agenda

The open session of the meeting on June 24 from 8:30 a.m. to 9:15 a.m. will be devoted to a business meeting covering administrative matters and reports. There will also be a presentation by the Deputy Administrator, AHCPR. During the closed portions of the meeting, the Study Section will be reviewing grant applications relating to the dissemination of research on the organization, costs, and efficiency of health care. In accordance with the Federal Advisory Committee Act, title 5, U.S.C., appendix 2 and title 5, U.S.C., 552b(c)(6), the Administrator, AHCPR, has made a formal determination that these latter sessions will be closed because the discussions are likely to reveal personal information concerning individuals associated with the grant applications. This information is exempt from mandatory disclosure.

Anyone wishing to obtain a roster of members, minutes of the meeting, or other relevant information should contact Mrs. Linda Blankenbaker, Agency for Health Care Policy and Research, suite 602, 2101 East Jefferson Street, Rockville, Maryland 20852, Telephone (301) 227–8449.

Agenda items for all meetings are subject to change as priorities dictate.

Dated: April 27, 1993.

J. Jarrett Clinton,

Administrator.

BILLING CODE 4160–90–M

Centers for Disease Control and Prevention

CDC Advisory Committee on the Prevention of HIV Infection (CDC ACPHI): Subcommittee on Developing Partnerships for HIV Prevention; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following subcommittee meeting.

Name: CDC ACPHI Subcommittee on Developing Partnerships for HIV Prevention.

Time and Date: 8 a.m.–5 p.m., May 21, 1993.

Place: Marriott City Center, 30 South Seventh Street, Minneapolis, Minnesota 55402.

Status: Open to the public, limited only by the space available.

Purpose: The purpose of this meeting is for the subcommittee to review the type, extent, and quality of partnerships between CDC and nongovernmental organizations in the planning and implementation of a comprehensive HIV prevention program.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Connie Granoff, Committee Assistant, Office of the Associate Director for HIV/AIDS, CDC, 1600 Clifton Road, NE., Mailstop E–40, Atlanta, Georgia 30333, telephone 404/639–2918.

Dated: May 3, 1993.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 93N–0046]

Westmar Oceanside, Inc.; Opportunity for Hearing on Proposal to Revoke U.S. License No. 828

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for a hearing on a proposal to revoke the establishment license (U.S License No. 828) and the product license issued to Westmar Oceanside, Inc., for the manufacture of Source Plasma. The proposed revocation is based on significant noncompliance with certain provisions of the biologics regulations specified in this document.

DATES: The firm may submit a written request for a hearing to the Dockets Management Branch by June 7, 1993, and any information justifying a hearing by July 6, 1993. Other interested persons may submit written comments on the proposed revocation by July 6, 1993.

ADDRESSES: Submit a written request for a hearing, any information justifying a hearing, and any written comments on the proposed revocation to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Stephen Ripley, Center for Biologics Evaluation and Research (HFM–635), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852–1448, 301–295–9074.

SUPPLEMENTARY INFORMATION: FDA is proposing to revoke the establishment license (U.S. License No. 828) and the product license issued to Westmar Oceanside, Inc., 1024 South Hill St., Oceanside, CA 92504, for the manufacture of Source Plasma.

FDA has determined that Westmar Oceanside, Inc., has failed to conform to the biologics regulations applicable to the manufacture of Source Plasma in 21 CFR parts 600 through 640 and the applicable standards in its license. This failure indicates serious noncompliance with those standards designed to assure the safety, purity, identity, and quality of Source Plasma, as well as the standards for donor protection, which are intended to assure a continuous and healthy donor population.

FDA conducted an inspection of Westmar Oceanside, Inc., from August 14 through September 20, 1991. This inspection and a concurrent investigation documented serious deviations from the Federal regulations. Deviations identified during the inspection included, but were not limited to, the following: (1) Failure to assure the phlebotomy site was prepared by a method that gave maximum assurance of sterility; (2) failure to provide donors with all required information regarding the plasmapheresis process, in that the hazards of the procedure were not explained to donors; and (3) failure to adequately explain acquired immunodeficiency educational materials to donors. In addition, FDA's investigation documented that deviations routinely occurred in areas of the plasmapheresis operation, such as determination of donor suitability and maintenance of Whole Blood weight logs. It was determined that on several occasions employees of the firm had: (1) Abbreviated or omitted donor screening procedures, such as questioning of donors regarding their medical history; (2) abbreviated or omitted predonation examinations, such as blood pressure and pulse; and (3) completed donor records with fabricated data when required screening procedures were not conducted to give the appearance that proper screening had been conducted. Also, evidence obtained in our investigation suggested that during busy

times, blood bags were not weighed and fictitious weights were written into the Whole Blood weight log. Based on the deviations noted, FDA concluded that personnel employed at the firm were inadequately trained and/or supervised to effectively and properly perform their assigned duties.

FDA determined that these deviations from Federal regulations constituted a danger to public health. In a letter to Westmar Oceanside, Inc., dated October 7, 1991, FDA suspended the firm's licenses pursuant to 21 CFR 601.6(a). In a letter to FDA dated October 16, 1991, the firm requested that revocation be held in abeyance pending resolution of the matter involved.

In a letter to FDA dated October 22, 1991, Westmar Oceanside, Inc., addressed the inspection and investigation findings outlined in FDA's October 7, 1991, letter. In a letter to the firm dated December 11, 1991, FDA denied the firm's request that license revocation be held in abeyance based on FDA's findings of the seriousness and willfulness of the deviations outlined above and the firm's inadequate response to those findings. In the same letter, FDA issued the firm notice of FDA's intent to revoke U.S. License No. 828 and announced its intent to offer an opportunity for a hearing pursuant to 21 CFR 601.5(b). In a letter to the legal representative of the firm dated September 25, 1992, FDA indicated that the firm had not responded to the December 11, 1991, letter, and the revocation process was still pending. In conversations with the legal representative of the firm on December 13, 1991, and October 20, 1992, no official response was given regarding the firm's intended action on this matter.

Accordingly, FDA is issuing a notice of an opportunity for a hearing pursuant to 21 CFR 12.21(b) on a proposal to revoke the licenses for Westmar Oceanside, Inc.

FDA has placed copies of documents supporting the proposed license revocation on file with the Dockets Management Branch (address above) under the docket number found in brackets in the heading of this notice. These documents include the following: The List of Observations (Form FDA–483) from the inspection of August 14 through September 20, 1991; FDA letters of October 7 and December 11, 1991, and September 25, 1992; the firm's letters of October 16 and October 22, 1991; and the conversation records of December 13, 1991, and October 20, 1992. These documents are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Westmar Oceanside, Inc., may submit a written request for a hearing to the Dockets Management Branch by June 7, 1993, and any data justifying a hearing must be submitted by July 6, 1993. Other interested persons may submit comments on the proposed license revocation to the Dockets Management Branch by July 6, 1993. The failure of a licensee to file a timely written request for a hearing constitutes an election by the licensee not to avail itself of the opportunity for a hearing concerning the proposed license revocation.

FDA procedures and requirements governing a notice of opportunity for a hearing, notice of appearance and request for a hearing, grant or denial of a hearing, and submission of data and information to justify a hearing on a proposed revocation of a license are contained in 21 CFR parts 12 and 601. A request for a hearing may not rest upon mere allegations or denials but must set forth a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the information and factual analyses submitted in support of the request for a hearing that there is no genuine and substantial issue of fact for resolution at a hearing, or if a request for a hearing is not made with required format or required analyses within the specified time, the Commissioner of Food and Drugs will deny the hearing request, making available the findings and conclusions that justify the denial.

Two copies of any submissions are to be provided to FDA, except that individuals may submit one copy. Submissions are to be identified with the docket number found in brackets in the heading of this document. Such submissions, except for information prohibited from public disclosure under 21 CFR 10.20(j)(2)(i), 21 U.S.C. 331(j), or 18 U.S.C. 1905, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Public Health Service Act (sec. 351 (42 U.S.C. 262)) and the Federal Food, Drug, and Cosmetic Act (secs. 201, 501, 502, 505, 701 (21 U.S.C. 321, 351, 352, 355, 371)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Biologics Evaluation and Research (21 CFR 5.67).

Dated: April 19, 1993.

Kathryn C. Zoon,

Director, Center for Biologics Evaluation and Research.

BILLING CODE 4160–01–F

[Docket No. 93N–0163]

Drug Export; Botulinum Toxin Type A (BOTOX®)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Allergan, Inc., has filed an application requesting approval for the export of the biological product Botulinum Toxin Type A (BOTOX®) to Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Frederick W. Blumenschein, Center for Biologics Evaluation and Research (HFM–660), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852–1448, 301–295–9070.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99–660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of biological products that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the Federal Register within 10 days of the filing of an application for export to facilitate public

participation in its review of the application. To meet this requirement, the agency is providing notice that Allergan, Inc., 2525 Dupont Dr., Irvine, CA 92715, has filed an application requesting approval for the export of the biological product, Botulinum Toxin Type A (BOTOX®), to Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom. The Botulinum Toxin Type A (BOTOX®) is indicated for the treatment of strabismus and blepharospasm associated with dystonia, including benign essential blepharospasm or VII nerve disorders and spasmodic torticollis in patients 12 years of age and above. The application was received and filed in the Center for Biologics Evaluation and Research on March 23, 1993, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by May 17, 1993, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Biologics Evaluation and Research (21 CFR 5.44).

Dated: April 21, 1993.

Thomas S. Bozzo,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

BILLING CODE 4160–01–F

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Fair Housing and Equal Opportunity

[Docket No. N–93–3558; FR–3428–N–05]

Task Force on Occupancy Standards in Public and Assisted Housing

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice of location of subcommittee meetings.

SUMMARY: The Task Force on Occupancy Standards in Public and Assisted Housing was established on December 31, 1992 in accordance with the provisions of section 643 of the Housing and Community development Act of 1992 (Pub. L. 102–550) and the Federal Advisory Committee Act (FACA) (5 U.S.C. app 2). The Task Force's charter was published in the **Federal Register** on January 7, 1993 at 58 FR 3039. The Task Force was created to review all rules, policy statements, handbooks, and technical assistance memoranda issued by the Department on the standards and obligations governing residency in public and assisted housing and to make recommendations to the Secretary for the establishment of reasonable criteria for occupancy. The Task Force has established an Executive Committee and three additional subcommittees—Admissions, Occupancy and Evictions. This is a notice announcing the location of meetings for the subcommittees of the Task Force.

FOR FURTHER INFORMATION CONTACT: Laurence D. Pearl, Office of Fair Housing and Equal Opportunity, room 5226, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Telephone: (202) 708–3727, (TDD) (202) 708–0113 (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Notice of Task Force Subcommittee meetings on May 12–14, 1993 was published in the **Federal Register** on February 25, 1993 at 58 FR 11415. These meetings will take place as follows:

Wednesday, May 12, 9 a.m. to 5 p.m., Occupancy.

Thursday, May 13, 9 a.m. to 5 p.m., Admissions.

Friday, May 14, 9 a.m. to 12 noon, Evictions.

Friday, May 14, 1 p.m. to 5 p.m., Executive.

These meetings will be held at the Georgetown University Law Center, 600 New Jersey Avenue, NW., Washington, DC, room 140 (Wednesday and Thursday) and room 106 (Friday). Please note that the starting time for Wednesday's meeting has been changed to 9 a.m. and that the Occupancy and Admissions Subcommittees will reverse meeting dates from those originally announced.

Agenda: The Admissions, Occupancy and Evictions Subcommittee meetings will consider drafts prepared by their members regarding the Department's occupancy standards in public and assisted housing, and develop proposals to be considered by the full Task Force, circulated to the public and considered at public hearings. The Executive Committee will recommend the time, place and logistics for the public hearings and make such other recommendations to the full Task Force as may be appropriate.

Public Participation: These are open meetings. The public is also invited to submit written comments on any aspect of the Task Force's mandate or activities to Ms. Bonnie Milstein, the Chair of the Task Force, at 1101 Fifteenth Street, NW., suite 1212, Washington, DC 20005–2765.

Dated: April 29, 1993.

Bonnie Milstein,

Chair, Task Force on Occupancy Standards in Public and Assisted Housing.

Leonora L. Guarraia,

General Deputy Assistant Secretary for Fair Housing and Equal Opportunity.

BILLING CODE 4310–GG–M

National Park Service

Proposed Construction and Operation of a Stadium in Washington, DC; Supplemental Notice of Intent To Prepare an Environmental Impact Statement

In a Notice of Intent published in the **Federal Register** on March 15, 1993 (58 FR 13796), the National Park Service and the District of Columbia advised that they were conducting an Environmental Assessment for the proposed construction and operation of a new stadium in Anacostia Park in Washington, DC. The Notice stated that if it became apparent, either through the scoping process or during the analysis and documentation of environmental impacts, that an Environmental Impact Statement was the appropriate environmental document, a Supplemental Notice would be issued. As a result of public scoping meetings held on April 12 and April 16, 1993, as well as written comments received on the scoping issues, and pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as implemented by the Council on Environmental Quality (40 CFR parts 1500–1508), and the District of Columbia Environmental Policy Act of 1989, the National Park Service and the District of Columbia Government now announce their intent to prepare an Environmental Impact Statement.

As indicated in the March 15, 1993 Notice, all comments and responses on the scope of alternatives and potential impacts received in response to that Notice as well as those received during the scoping process and by letters postmarked no later than April 19, 1993, will be considered in the EIS. The public is encouraged to provide additional comments once the Draft EIS is released.

A public meeting to present the significant issues related to the project and to solicit public comment on the findings of the Draft EIS will be held on Monday, June 14, 1993, at 6 p.m. at the D.C. Armory, 2001 East Capitol Street, Washington, DC 20003. Adequate signs will be posted to direct meeting participants. A short formal presentation will precede the request for public comments. National Park Service and District of Columbia representatives will be available to receive comments and questions from the public regarding issues of concern. It is important that Federal, regional and local agencies, and interested individuals and groups take this opportunity to comment on the environmental analysis contained in the Draft EIS. In the interest of available time, each speaker will be asked to limit oral comments to five minutes.

As indicated in the original Notice (and unchanged now), the proposed stadium would seat approximately 78,600 persons and would be located north of Robert F. Kennedy Stadium within an area currently designated as parking lot 6. Existing vehicular parking spaces would be reconfigured within the limits of the approximately 190-acre site area. Although previous proposals for a new stadium in this area sought to utilize portions of Langston Golf Course and Children's Island for parking, these properties are not included within the site of the current proposal. The proposed stadium is scheduled to be completed in time for the 1995 football season.

The site area can be generally defined by Oklahoma Avenue and Benning Road to the north; 21st Street, Constitution Avenue, and 19th Street on the west; the D.C. Armory, Independence Avenue, D.C. General Hospital, and the approximate extension of E Street, SE., to the south, and by Kingman Lake and the Anacostia River to the east.

The EIS will analyze impacts and mitigation options. In addition, the EIS will consider alternative actions. At present, those alternatives may include: (1) Construction of a new stadium substantially in parking lot 6; (2) the renovation and expansion of RFK Stadium; and (3) a No Action alternative, which would result in no new construction and would involve the continued use of RFK Stadium in its current configuration and capacity. Topics for environmental analysis may include short-term construction-related impacts; long-term changes in traffic, parking, socio-economic impacts, land use, and physical/biological conditions within the project area; historic and natural resource protection; and site operations and maintenance.

The responsible officials are: Mr. Robert Stanton, Regional Director, National Capital Region, National Park Service and Mr. George Brown, Assistant City Administrator for Economic Development.

Dated: April 30, 1993.

Robert Stanton,

Regional Director, National Capital Region.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32248]

Hanson Natural Resources Co.—Non-Common Carrier Status—Petition for a Declaratory Order

Decided: April 30, 1993.

By decision served March 1, 1993 (58 FR 12052, March 2, 1993), the Commission sought public comment by March 22, 1993, on a petition for declaratory order filed by Hanson Natural Resources Company (HNRC) that HNRC will not, upon consummation of certain anticipated transactions, become a common carrier by railroad. By subsequent decisions, the latest served April 23, 1993 (58 FR 25848, April 28, 1993), the Commission extended the comment due date to April 30, 1993.

By motion filed April 29, 1993, HNRC requests the proceeding be held in abeyance pending further developments in discussions among interested persons concerning the certain nonrail-related effects of the proposed transaction. HNRC also requests the Commission condition approval of the abeyance request on allowing interested persons to comment if and when the proposed transaction is ready to go forward. The requests will be granted.

It is ordered:

VOL 58 ISS 86 MY 6 1993 UMI

1. The proceeding is held in abeyance pending further order of the Commission.

2. HNRC shall notify the Commission immediately when it determines whether it wishes to go forward with or withdraw its Petition for Declaratory Order.

3. If a further procedural schedule is established, interested persons will have an opportunity to comment.

4. This decision is effective on April 30, 1993.

By the Commission, Sidney L. Strickland, Jr., Secretary.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether section 3504(h) of Public Law 96-511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jefferson B. Hill on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Don Wolfrey, on (202) 514-4115 or facsimile: (202) 514-1534. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Don Wolfrey, DOJ Clearance Officer, SPS/JMD/850 WCTR, Department of Justice, Washington, DC 20530.

New Collection

(1) Guidelines on producing master exhibits for asylum applications.

(2) Immigrations and Naturalization Service.

(3) As Requested.

(4) Non-profit institutions. The Immigration and Naturalization Service will use master exhibits as one means by which credible information on country conditions related to asylum applications are made available to Asylum and Immigration Officers for use in adjudicating cases.

(5) 20 annual responses at 80 hours per response.

(6) 1,700 annual burden hours.

(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

Dated: April 30, 1993.

Don Wolfrey,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410-10-M

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Leith, Inc., d/b/a/ Leith Jeep-Eagle, Inc.*, Civil Action No. 92-314-CIV-5-BR, was lodged on April 26, 1993 with the United States District Court for the Eastern District of North Carolina (Raleigh Division).

The Consent Decree resolves the United States' civil claims against Leith, Inc., for violations of the Clean Air Act's automobile tampering provisions, 42 U.S.C. 7522(a)(3)(A), committed by its dealership, Leith Jeep-Eagle, located in Raleigh, North Carolina. The proposed consent decree requires that Leith pay the United States $15,000 in civil penalties for tampering with the emissions control equipment of three motor vehicles. The proposed consent decree also provides for injunctive relief by requiring Leith to recall and, if necessary, repair certain vehicles that it previously serviced.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Leith, Inc., d/b/a/ Leith Jeep-Eagle, Inc.*, DOJ Ref. #90-5-2-1-1658.

The proposed consent decree may be examined at the office of the United States Attorney, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27601-1461 and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624-0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $6.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 93-10697 Filed 5-5-93; 8:45 am]

BILLING CODE 4410-01-M

Consent Decree In Action Under the Comprehensive Environmental Response Compensation and Liability Act ("CERCLA")

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, and Section 122(d)(2) of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. 9622(d)(2), notice is hereby given that a Consent Decree in *United States* v. *Purolator Products Company*, Civil Action No. 93-CV6184T, was lodged with the United States District Court for the Western District of New York on April 26, 1993. The Consent Decree addresses the hazardous waste contamination at the Facet Enterprises, Inc. Superfund Site located in the Town of Horseheads, Chemung County, New York ("the Facet Site"). The Consent Decree requires the defendant to implement the remedial action selected and cleanup standards set forth in the Record of Decision and Scope of Work for the Facet Site. Additionally, the defendant is required to reimburse the United States for $625,174.09, plus interest, for the past costs which the United Environmental Protection Agency ("EPA") has incurred at the Facet Site.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530 and should refer to *United States* v. *Purolator Products Company*, D.O.J. Ref. No. 90-11-2-862.

The Consent Decree may be examined at the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York; the Office of the United States Attorney, Federal Building, room 620, 100 State Street, Rochester, New York; and at the Consent Decree Library, 1120 G Street NW., 4th floor, Washington, DC 20005, (202) 642-0892. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $26.50 (25 cents per page reproduction charge) payable to the Consent Decree Library.

Myles E. Flint,

Acting Assistant Attorney General, Environment and Naturol Resources Division.

BILLING CODE 6820-07-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.
2. *The title of the information collection:* 10 CFR part 31—General Domestic Licenses for Byproduct Material.
3. *The form number if applicable:* Not applicable.
4. *How often the collection is required:* Reports are submitted as events occur. Registration certificates may be submitted at any time. Changes to the information on the Registration Certificate are submitted as they occur.
5. *Who will be required or asked to report:* Persons desiring to own byproduct material and persons desiring to possess and use byproduct material in certain items.
6. *An estimate of the number of annual responses:* 276.
7. *An estimate of the total number of hours needed annually to complete the requirement or request:* 3,159. (An average of 0.58 hours per response and 0.25 hours per recordkeeper).
8. *An indication of whether section 3504(h), Public Law 96-511 applies:* Not applicable.
9. *Abstract:* 10 CFR part 31 establishes general licenses for the possession and use of byproduct material in certain items and a general license for ownership of byproduct material. General licenses are required to keep records and submit reports identified in part 31 in order to permit NRC to determine with reasonable assurance that devices are operated safely and without radiological hazard to users or the public. The revision reflects an increase in burden primarily because of an increase in the number of general licensees.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street NW. (lower level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs (3150-0016), NEOB-3019, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance officer is Brenda Jo. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 28th day of April 1993.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official.

[Docket No. 50-298]

Cooper Nuclear Station; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: General notice; correction.

SUMMARY: This document corrects a general notice appearing in the Federal Register on April 30, 1993 (58 FR 26174), which considers issuance of an amendment to Facility Operating License No. DPR-46, issued to the Nebraska Public Power District, for operation of the Cooper Nuclear Station, located in Nemaha County, Nebraska. This action is necessary to correct an erroneous date.

FOR FURTHER INFORMATION CONTACT: Michael T. Lesar, Chief, Rules Review Section, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492-7758.

On page 26176, in the first sentence of the third full paragraph in the first column, the date "June 1, 1993" should be changed to read "May 17, 1993".

Dated at Bethesda, Maryland, this 3rd day of May 1993.

For the Nuclear Regulatory Commission.

Michael T. Lesar,

Chief, Rules Review Section, Rules Review and Directives Branch, Division of Freedom of Information and Publication Services, Office of Administration.

BILLING CODE 7590-01-M

[Docket No. 50-423]

Northeast Nuclear Energy Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-49, issued to Northeast Nuclear Energy Company (the licensee), for operation of the Millstone Nuclear Power Station, Unit No. 3 located in New London, Connecticut.

The licensee has requested that technical specifications be changed to extend the interval for surveillance testing of 42 instrumentation and control items presently required to be tested by June 13, 1993, or later, until the next refueling outage, but no later than September 30, 1993.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed changes do not involve a SHC because the changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

The [surveillance test interval] STI increases, in theory, do cause a small increase in the unavailability of the [engineered safety feature actuation system] ESFAS, [reactor trip system] RTS, or other systems associated with the instruments and thereby a resultant small increase in the core damage frequency (CDF). Where quantifications were made, the maximum increase in CDF was found to be of the order of 10^{-7}/yr or less, which is below the level of concern. Furthermore, the small increase is a one-time change and not a permanent increase. Where qualitative assessments were made, a combination of one or more factors, such as: (a) Diverse signals; (b) redundant paths; (c) proven low failure rates based on plant-specific data; (d) relatively low risk significance of the function in core damage prevention/mitigation; and (e) other more frequent tests, were used to justify de minimus low risk increases. In addition, daily channel checks and analog channel operational tests will continue to be performed at the frequencies required by technical specifications. These surveillances will continue to assure that the instrument reliability assumed in the basis of technical specifications is maintained.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

There are no physical design changes in plant operating procedures. Therefore, there can be no impact on plant response to the point where a different accident is created.

3. Involve a significant reduction in a margin of safety

The proposed changes do not involve a change in the safety limits, setpoints, or design margins. Also, the proposed changes do not significantly affect the consequences of an accident or any of the protective boundaries. Therefore, the proposed changes will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the Federal Register a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By June 7, 1993, the licensee may file a request for a hearing with respect to

issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555 and at the local public document room located at the Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 248-5100 (in Missouri 1-(800) 342-6700. The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Mr. John F. Stolz: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Garfield, Esquire, Day, Berry & Howard, City Place, Hartford, Connecticut 06103-3499, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated March 30, 1993, as supplemented April 20 and April 27, 1993, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut.

Dated at Rockville, Maryland, this 29th day of April 1993.

For the Nuclear Regulatory Commission.

Vernon L. Rooney,

Senior Project Manager, Project Directorate I-4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 93-10684 Filed 5-5-93; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-62; Facility Operating License No. R-66; Amendment No. 20]

University of Virginia (University of Virginia Pool Reactor); Order Modifying License

I

The University of Virginia (the licensee or UVA) is the holder of Facility Operating License R-66 issued on June 24, 1960, and subsequently renewed on November 4, 1971, by the

VOL 58 ISS 86 MY 6 1993 UMI

U.S. Atomic Energy Commission and by the U.S. Nuclear Regulatory Commission (the Commission or NRC) on September 30, 1982. The license authorizes operation of the UVA pool reactor at a power level up to 2 megawatts thermal (MWt). The research reactor is located at the UVA Nuclear Reactor Facility, which is about 700 meters west of the city limits of Charlottesville, Virginia. The mailing address is Nuclear Reactor Facility, Department of Mechanical, Aerospace, and Nuclear Engineering, University of Virginia, Charlottesville, Virginia 22903–2442.

II

On February 25, 1986, the Commission promulgated a final rule in § 50.64 of title 10 of the Code of Federal Regulations (10 CFR 50.64) limiting the use of high-enriched uranium (HEU) fuel in domestic research and test reactors (non-power reactors) (see 51 FR 6514). The rule, which became effective on March 27, 1986, requires that each licensee of a non-power reactor replace HEU fuel at its facility with low-enriched uranium (LEU) fuel acceptable to the Commission. This conversion, which is contingent on Federal Government funding for conversion-related costs, is required unless the Commission has determined that the reactor has a unique purpose. The rule is intended to promote the common defense and security by reducing the risk of theft and diversion of HEU fuel used in non-power reactors and the adverse consequences to public health and safety and the environment from such theft or diversion.

Sections 50.64(b)(2) (i) and (ii) require that a licensee of a non-power reactor (1) not initiate acquisition of additional HEU fuel, if LEU fuel that is acceptable to the Commission for that reactor is available when the licensee proposes that acquisition, and (2) replace all HEU fuel in its possession with available LEU fuel acceptable to the Commission for that reactor in accordance with a schedule determined pursuant to 10 CFR 50.64(c)(2).

Section 50.64(c)(2)(i) of the rule, among other things, requires each licensee of a non-power reactor, authorized to possess and to use HEU fuel, to develop and to submit to the Director of the Office of Nuclear Reactor Regulation (Director) by March 27, 1987, and at 12-month intervals thereafter, a written proposal (proposal) for meeting the rule requirements.

Section 50.64(c)(2)(i) also requires the licensee to include the following in its proposal: (1) A certification that Federal Government funding for conversion is available through the U.S. Department of Energy (DOE) or other appropriate Federal agency and (2) a schedule for conversion, based on availability of replacement fuel acceptable to the Commission for that reactor and upon consideration of other factors such as the availability of shipping casks, implementation of arrangements for the available financial support, and reactor usage.

Section 50.64(c)(2)(iii) requires the licensee to include in its proposal, to the extent required to effect conversion, all necessary changes to the license, to the facility, and to licensee procedures (all three types of changes hereafter called modifications). This paragraph also requires the licensee to submit supporting safety analyses so as to meet the schedule established for conversion.

Section 50.64(c)(2)(iii) also requires the Director to review the licensee proposal, confirm the status of Federal Government funding, and determine a final schedule if the licensee has submitted a schedule for conversion.

Section 50.64(c)(3) requires the Director to review the supporting safety analyses and issue an appropriate Enforcement Order directing both the conversion and any necessary modifications to the extent consistent with protection of the public health and safety. In the **Federal Register** notice of the final rule, the Commission explained that in most cases, if not all, the Enforcement Order would be an Order to modify the license.

Section 2.202, the current authority for issuing Orders of all types including Orders to modify licenses, provides, among other things, that the Commission may modify a license by serving an Order on the licensee. The licensee may demand a hearing concerning any part or all of the Order Modifying License within 20 days from the date of the notice or such longer period as the notice may provide. The Order will become effective on the expiration of this 20-day or longer period, unless the licensee requests a hearing during this period, in which case the Order will become effective on the date specified in an Order made after the hearing.

Section 2.714 gives the requirements for a person whose interest may be affected by any proceeding to initiate a hearing or to participate as a party.

III

On November 9, 1989, as supplemented on February 12, 1991, and December 14, 1992, the NRC staff received the licensee proposal, including its proposed modifications, supporting safety analyses, and schedule for conversion. The conversion consists of replacing high-enriched with low-enriched uranium fuel elements. The fuel elements contain materials testing reactor (MTR)-type fuel plates, with the fuel meat consisting of uranium silicide dispersed in an aluminum matrix. These plates contain an enrichment of less than 20 percent with the uranium-235 isotope. The attachments to this Order include (1) the changes to the licensing conditions and technical specifications that are needed to amend the facility license and (2) the outline of the startup report that is required to be submitted within six months following completion of LEU fuel loading. The NRC staff has reviewed the licensee submittals and the requirements of 10 CFR 50.64 and determined that the public health and safety and the common defense and security require the licensee to convert the facility from the use of HEU to LEU fuel, pursuant to the changes to the license and requirements for a startup report stated in the attachments to this Order, in accordance with the schedule included herein.

IV

Accordingly, pursuant to sections 51, 53, 57, 101, 104, 161b., 161i., and 161o. of the Atomic Energy Act of 1954, as amended, and to Commission regulations in 10 CFR 2.202 and § 50.64, *It is hereby ordered that:* On the later date of either receipt of the replacement core of LEU fuel elements by the licensee or 30 days following the date of publication of this Order in the **Federal Register**, Facility Operating License R–66 is modified by amending the license conditions and technical specifications as stated in the "Attachment to Order Modifying Facility Operator License R–66." The licensee shall submit the startup report as stated in the "Attachment to Order of the Outline of Reactor Startup Report" within six months following completion of LEU fuel loading.

V

Pursuant to the Atomic Energy Act of 1954, as amended, the licensee or any other person adversely affected by this Order may request a hearing within 30 days of the date of this Order. Any request for a hearing shall be submitted to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, with a copy to the Assistant General Counsel for Hearings and Enforcement at the same address. If a person other than the licensee requests a hearing, that person shall set forth with particularity in accordance with 10 CFR 2.714 the manner in which their interest is adversely affected by this Order.

If a hearing is requested by the licensee or a person whose interest is adversely affected, the Commission shall issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing is whether this Order should be sustained.

This Order shall become effective on the later date of either the receipt of the replacement core of the LEU fuel elements by the licensee or 30 days following the date of publication of this Order in the **Federal Register** or, if a hearing is requested, on the date specified in an Order after further proceedings on this Order.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland this 29th day of April 1993.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Identification of Priority Foreign Countries

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of identification of Brazil, India, and Thailand as priority foreign countries pursuant to section 182(a) of the Trade Act of 1974, as amended (Trade Act).

SUMMARY: Pursuant to section 182(a) of the Trade Act (19 U.S.C. 2242), the USTR has identified Brazil, India and Thailand as priority foreign countries that deny adequate and effective protection of intellectual property rights or deny fair and equitable market access to persons relying on intellectual property protection. The USTR must decide no later than May 30, 1993, whether to initiate an investigation, pursuant to section 302(b)(2)(A) of the Trade Act, of the acts, policies and practices that led to the identification of these countries.

EFFECTIVE DATE: The USTR's identification was made on April 30, 1993.

FOR FURTHER INFORMATION CONTACT: Jon Huenemann, Director for Southern Cone Affairs (Brazil) (202) 395–5190, Nancy Adams, Deputy Assistant USTR for Asia and the Pacific (India) (202) 395–4755, Robert Godec, Director for Southeast Asian Affairs (Thailand) (202) 395–6813, Gilbert Donahue, Director for Intellectual Property (202) 395–6864, or Catherine Field, Associate General Counsel (202) 395–3432.

SUPPLEMENTARY INFORMATION: Section 182(a) of the Trade Act requires the USTR to identify foreign countries that deny adequate and effective protection or enforcement of intellectual property rights or that deny fair and equitable market access for persons that rely on intellectual property protection. The USTR must then identify as priority foreign countries, Those trading partners that have the most onerous or egregious acts, policies and practices, that have the greatest adverse impact (actual or potential) on relevant U.S. products Countries are not to be identified as priority foreign countries if they are engaged in good faith negotiations, or making significant progress in multilateral or bilateral negotiations to provide adequate and effective protection or enforcement of intellectual property rights. The USTR has identified Brazil, India and Thailand as priority foreign countries.

The Brazilian patent law is deficient in several areas including the scope of patentable subject matter, inclusion of overly broad compulsory licensing provisions and working requirements, and a short term of protection. Brazil is one of only a few countries that does not provide either product or process patent protection for chemical compounds, foodstuffs, or chemical/pharmaceutical substances. Product patent protection is not available for metal alloys or for new uses of products, including species of microorganisms. Brazil requires a patent owner to "work" (i.e., locally produce) the patented invention in that country. A third party may request a compulsory license if a patent owner has failed to work the patent within three years of issuance, or if exploitation has been discontinued for more than one year, unless working is prevented by *force majeure*. The patent term is only 15 years from the date of filing an application.

With respect to copyright protection, computer software is not protected as a literary work, the term of protection for software it too short (only 25 years) and penalties for copyright infringement are insufficient to deter piracy.

Brazil does not provide adequate protection for trade secrets and provides no protection for semi-conductor mask works. Finally, there are high levels of copyright piracy and trademark counterfeiting which require improved enforcement efforts.

India also has a patent law with numerous deficiencies, including the failure to provide product patent protection for a wide range of products, an inadequate term of protection, and overly broad involuntary licensing provisions. India's Patent Act prohibits grant of patents for any invention claiming substances intended for use or capable of being used as a food, medicine or drug or relating to substances prepared or produced by chemical processes.

Processes for making such substances are patentable subject matter but the patent term for these processes is limited to the shorter of five years from patent grant or seven years from patent application filing. This is usually less than the time needed to obtain regulatory approval to market the product. Where available, product patents expire 14 years from the date of patent filing. Stringent compulsory licensing provisions have the potential to render patent protection virtually meaningless. There are broad "licenses of right" that automatically apply to patents for food and drugs.

Copyright enforcement, which is the responsibility of the state governments, is ineffective. Piracy of copyrighted materials (particularly popular fiction works and certain textbooks) is a significant problem for U.S. and Indian producers. Video, record and tape piracy are also widespread.

In Thailand, serious problems exist with respect to enforcement of copyrights. Although the Thai Government has recently conducted raids and taken other steps that have had a dramatic effect on the availability of pirated goods on the market, prosecution of pirates of U.S. works in the Thai courts has not yet been successful. Although cases have been filed, some of those cases have been pending for nearly 2 years with little result. Evidentiary requirements, limits on raids and other problems make enforcement difficult.

The Thai copyright law does not provide adequate and effective protection. Computer software is not expressly protected and problems exist with respect to unauthorized public performances, limitations on the translation right, inadequate penalties and other areas.

Although Thailand passed a Patent law in February 1992, that law contains extremely broad authority to issue compulsory licenses and the law establishes a Pharmaceutical Patent Board with unique and extraordinarily broad authority to require owners of pharmaceutical patents to provide sensitive cost and pricing information and draconian fines for failure to provide such information. In addition,

VOL

the law does not allow importation to satisfy the "working" requirement, and does not provide any pipeline protection for pharmaceuticals.

Ira S. Shapiro,
General Counsel.

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-32237; File No. SR-Amex-92-30]

Self-Regulatory Organizations; American Stock Exchange, Inc.

April 29, 1993.

In the matter of Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 1 to a Proposed Rule Change by the American Stock Exchange, Inc. Relating to the Listing of Options on the Amex Retail Index and Long-Term Options on a Reduced-Value Retail Index.

I. Introduction

On August 27, 1992, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposed rule change to provide for the listing and trading of Index options on the Amex Retail Index ("Retail Index" or "Index"). This order approves the Exchange's proposal.

The proposed rule change was published for comment in Securities Exchange Act Release No. 31255, 57 FR 46205 (October 7, 1992).[3] No comment letters were received on the proposed rule change.

II. Description of Proposal

A. General

The Amex proposes to trade options on the retail Index, a new stock Index developed by the Amex based on retail industry stocks or American Depositary receipts thereon ("ADRs") which are traded on the Amex, the New York Stock Exchange, Inc. ("NYSE"), or are national market system securities traded through the facilities of the National Association of Securities Dealers Automated Quotation System ("NASDAQ-NMS"). The Amex also proposes to list either long-term options on the full-value Index or long-term options on a reduced-value Index that will be computed at one-tenth of the value of the Retail Index ["Retail LEAPS" or "Index LEAPS").[4] Retail LEAPS will trade independent of and in addition to regular Retail Index options traded on the Exchange.

B. Composition of the Index

The Index contains securities of highly-capitalized companies in the retail industry. The retail industry includes companies whose primary business involves merchandising. The Index will include companies which own and/or operate department stores, apparel retail outlets, specialty stores (e.g., toy stores, electronic stores, retail building supply stores, etc.), general merchandise chain, drugstores, and discount retail outlets. The Exchange will use an "equal" dollar-weighted method to calculate the Index.[5] As of July 31, 1992, the Index was at 210.95.

As of July 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $64.29 billion to a low of $1.43 million, with the mean and median being $11.11 billion and $7.39 million, respectively. The market capitalization of all the stocks in the Index was $166.5 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 1.15 billion shares to a low of 69.82 million shares. The average price per share of the stocks in the Index, for a six-month period between February and July 1992, ranged from a high of $65.86 to a low of $17.78. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 1.26 million shares per day to a low of 147,800 shares per day, with the mean and median being 603,100 and 410,500 shares, respectively. Lastly, no one stock comprised more than 6.99% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 34.38% of the Index's value. The percentage weighting of the lowest weighted stock was 6.19% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 32.24% of the Index's value.

C. Maintenance

The Index will be maintained by the Amex. The Amex may change the composition of the Index at any time to reflect the conditions in the retail sector and to ensure that the component securities continue to represent the retail industry. At any time when it is necessary to replace a stock or stocks in the Index, the Exchange represents that it will make every effort to add new stocks that are representative of the retail sector and will take into account a stock's capitalization, liquidity, volatility and name recognition. Further, stocks may be replaced in the event of certain corporate events, such as takeovers or mergers, that change the nature of the security. If, however, the Exchange determines to increase the number of Index component stocks to greater than twenty or reduce the number of component stocks to fewer than ten, the Amex will submit a rule filing with the Commission pursuant to section 19(b) of the Act.

D. Eligibility Standards for the Inclusion of Component Stocks in the Index

Exchange Rule 901C specifies criteria for the inclusion of stocks in an index on which options will be traded on the Exchange. Specifically, Rule 901C states that an index must have a minimum of five stocks, and any index with less than 25 component stocks may not include stocks traded on the Amex.[6] In addition, the Exchange will require, as reflected in amended Commentary .01 to Exchange Rule 901C, that at least 90% of the Index's numerical value, after the Index's quarterly rebalancing, be accounted for by stocks that meet the Exchange's options listing standards.

In choosing among retail industry stocks that meet the minimum criteria set forth in Rule 901C, the Exchange will focus only on stocks that are traded on either the NYSE, Amex (subject to the limitations of Rule 901C) or traded through NASDAQ-NMS. In addition, the proposal requires that the stocks included in the Index have an average monthly trading volume of not less than 500,000 (or ADRs) in the U.S. market over the previous six-month period. Further, the Exchange intends, as an additional listing criteria standard, to focus on stocks that have a minimum market value (in U.S. dollars) of at least $75 million.[7] Although the stocks currently selected for inclusion in the Index meet or surpass the above additional listing criteria standard, the Exchange intends for this standard to be used as a guideline only and reserves the right to include stocks in the Index that may not meet this guideline, but, nevertheless, meet the minimum requirements set forth in Amex Rule 901C.[8]

E. Calculation of the Index

The Index will be calculated using an "equal-dollar weighting" methodology designed to ensure that each of the component securities are represented in approximately "equal" dollar amounts in the Index. The Exchange believes that this method of calculation is important since even among the largest companies in the retail industry there is a great disparity in size. For example, although the stocks included in the Index represent many of the most highly capitalized companies in the retail industry, Wal-Mark Stores, Inc. currently represent over 35% of the aggregate market value of the Index. In addition, while currently there is not as much disparity in the prices of the stocks included in the Index, using a price-weighted method to calculate the Index's value is not the Exchange's preferred method since the prices of such stocks can fluctuate significantly as a result of a corporate action (*e.g.*, a stock split or distribution), rather than as a result of stock performance, causing the relative weightings of the stocks within the Index to fluctuate significantly.

In calculating the "equal dollar weighting" of component stocks, the Amex, using closing prices on July 17, 1992, calculated the number of shares that would represent an investment of $10,000 in each of the stocks contained in the Index (to the nearest whole share). The value of the Index equals the current market value (i.e., based on U.S. primary market prices) of the assigned number of shares of each of the stocks in the Index portfolio divided by the current Index divisor. The Index divisor was initially calculated to yield a benchmark value of $200.00 at the close of trading on July 17, 1992. Each quarter thereafter, following the close of trading on the third Friday of January, April, July and October, the Index portfolio is adjusted by changing the number of shares of each component stock so that each company is again represented in $10,000 "equal" dollar amounts. If necessary, a divisor adjustment is made to ensure continuity of the Index's value. The newly adjusted portfolio becomes the basis for the Index's value on the first trading day following the quarterly adjustment.

The number of shares of each component stock in the Index portfolio will remain fixed between quarterly reviews except in the event of certain types of corporate actions, such as the payment of a dividend, other than an ordinary cash dividend, stock distributions, stock splits, reverse stock splits, rights offerings, or a distribution, reorganization, recapitalization, or some such similar event with respect to an Index component stock. The number of share will also be adjusted in the event of a merger, consolidation, dissolution or liquidation of an issuer of a component stock. When the Index is adjusted between quarterly reviews, the number of shares of the relevant security in the portfolio will be adjusted, to the nearest whole share, to maintain the component's relative weight in the Index at the level immediately prior to the corporate action. In the event of a stock replacement, the average dollar value of the remaining portfolio components will be calculated and that amount invested in the new component stock to the nearest whole share. In both cases, the divisor will be adjusted, if necessary, to ensure Index continuity.

Similar to other stock index values published by the Exchange, the value of the Index will be calculated continuously and disseminated on a real-time basis to market information vendors via the Options Price Reporting Authority.

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. In the case of securities traded through the NASDAQ-NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (i.e., Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the Amex will wait until the end of the trading day on expiration Friday.[9]

F. Contract Specifications

The proposed options on the Index will be cash-settled, European-style options.[10] Standard options trading hours (9:30 a.m. to 4:10 p.m. New York time) will apply to the contracts. Under Amex Rule 903C, the Exchange intends to list up to three near-term calendar months and two additional calendar months in three month intervals in the January cycle. The Exchange also intends to list long-term options series, having up to thirty-six months to expiration, on either the full-value Retail Index or on a reduced-value Retail Index. Strike price interval, bid/ask differential and price continuity rules will not apply to the trading of Retail LEAPS until their time to expiration is less than twelve months.[11]

The options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Since options on the Index will settle based upon the opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full Value or Reduced Value Retail Index

The proposal provides that the Exchange may list long-term index options that expire from 12 to 36

---

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240 19b-4 (1992).

[3] The Amex submitted a letter to the staff clarifying that if the Exchange determines to increase the number of Retail Index component stocks to greater than twenty or reduce the number to fewer than ten the Exchange will give prior written notice to the Commission in the form of a filing pursuant to Rule 19b-4 of the Act. *See* letter from Claire P. McGrath, Senior Counsel, Legal & Regulatory Policy Division, Amex, to Thomas Gira, Branch Chief, Options Regulation, Division of Market Regulation, dated September 30, 1992. The Amex also filed a letter amendment on December 15, 1992 amending the filing to require that no stock will be included in the Index unless it has an average trading volume in the U.S. markets over the prior six month period of at least 500,000 shares. The original filing contained a standard, but not requirement, of trading volume of at least 1,000,000 shares over the prior six month period. The Amex also amended a standard relating to the minimum market value (in U.S. dollars) of Index stocks, changing the minimum amount from $100 million to $75 million. *See* letter from Ellen T. Kander, Special Counsel, Derivative Securities, Amex, to Thomas Gira, Branch Chief, Options Regulation, SEC, dated December 14, 1992 ("Amendment No 1").

[4] LEAPS is an acronym for Long-Term Equity Anticipation Securities.

[5] *See infra* Section E entitled "Calculation of the Index" for a description of this calculation method

[6] Accordingly, the Retail Index as currently constituted does not include Amex-traded stocks. The Amex, however, has submitted a proposal, that, among other things, revises Amex Rule 901C to remove the limitation on the number of Amex stocks that can be included in an index which underlies a stock index option traded on the Exchange. Specifically, the proposal would allow, among other things, Amex-listed stocks to be included in Amex-traded index options that are comprised of less than 25 stocks. See Securities Exchange Act Release No. 30356 (February 10, 1992), 57 FR 5497.

[7] See Amendment No. 1, *supra* note 3

[8] *Id.*

[9] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, the Amex will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[10] A European-style option can be exercised only during a specified period before the option expires.

[11] *See* Securities Exchange Act Release No. 25041 (October 16, 1987), 52 FR 40008 (October 26, 1987) (order approving SR-Amex-87-22)

UMI

months from listing on the full-value Retail Index or a reduced-value Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Retail LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, an Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced-value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced value Index LEAPS will be no less than $2.50 instead of $5.00.

In addition, the proposal provides that full-value or reduced-value Retail LEAPS will be issued at no less than six month intervals and that new strike prices will either be near or bracketing the current Index value.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is a Stock Index Option under Amex Rule 901C(a) and a Stock Index Industry Group under Rule 900C(b)(1), the proposal provides that Exchange rules that are applicable to the trading of narrow-based index options will apply to the trading of options on the Index. Specifically, Exchange rules governing margin requirements,[12] position and exercise limits,[13] and trading halt procedures [14] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that positions in full-value and reduced-value Index options will be aggregated for position and exercise limit purposes. Specifically, under the proposal, ten reduced-value contracts will equal one full-value contract.

[12] Pursuant to Amex Rule 462(d)(2)(D)(iv), the margin requirements for the Index options will be: (1) For each short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value, and(2) for long options positions, 100% of the options premium paid

[13] Pursuant to Amex Rules 904C and 905C, respectively, the position and exercise limits for the Index options will be 8,000 contracts, unless the Exchange determines, pursuant to Rules 904C and 905C, that a lower limit is warranted.

[14] Pursuant to Amex Rule 918C, the trading of Index options will be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in full value and reduced value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[15]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[16] Specifically, the Commission finds that the trading Retail Index options, including full value and reduced value Retail LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the retail industry.[17]

[15] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[16] 15 U.S.C. 78f(b)(5) (1988).

[17] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Retail Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the retail industry in the U.S. stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the retail industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. The Commission also believes that the trading of the Index options and Index LEAPS will allow investors holding positions in some or all of the underlaying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes that the reduced-value Index LEAPS, that will be traded on an Index computed at one-tenth the value of the Retail Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

The trading of options on the Retail Index and on a reduced-value Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the Amex adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Retail Index and reduced-value Retail Index are narrow-based indices. The Retail Index is comprised of only fifteen stocks, all of which are within one industry—the retail industry. In addition, the basic character of the reduced-value Retail, which is comprised of the same component securities as the Retail Index and calculated by dividing the Retail Index value by ten, is essentially identical to the Retail Index.[18] Accordingly, the Commission believes it is appropriate for the Amex to apply its rules governing narrow-based index options to trading in the Index options.[19]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 603,100 and 410,500 shares, respectively.[20] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $64.29 billion to a low of $1.43 million as of July 31, 1992, with the mean and median being $11.11 billion and $7.39 million, respectively. Third, although the Index is only comprised of fifteen stocks, no one particular stock or group of stocks dominates the Index. Specifically, no one stock comprises more than 6.99% of the Index's total value and the percentage weighting of the three largest issues in the Index accounts for 20.64% of the Index's value.[21] Fourth, all of the component

[18] See generally Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index rather than a narrow-based index)

[19] See *supra* notes 12 through 14, and accompanying text.

[20] In addition, for the six-month period between February and July 1992, all of companies within the Index had an average daily trading volume greater than 147,800 shares per day.

[21] For an index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion

stocks in the Index currently are eligible for options trading.[22] Fifth, the Amex, prior to increasing the number of component stocks to more than twenty or decreasing that number to less than ten, will be required to seek Commission approval pursuant to section 19(b)(2) of the Act before effecting such change. This will help protect against material changes in the composition and design of the Index that might adversely effect the Amex's obligations to protect investors and to maintain fair and orderly markets in Retail Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Retail Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

In addition, the Commission does not believe that the fact that the Index is equal dollar-weighted instead of market-weighted or price-weighted results in the Index being readily susceptible to manipulation. Because the use of an equal dollar-weighting method could give securities with relatively small floats or prices a greater weight in the Index than if the Index were capitalization weighted or price weighted, the Commission is concerned that this calculation method could make the Index more readily susceptible to manipulation. The Amex, however, has developed several composition and maintenance criteria for the Index that the Commission believes will minimize the possibility that the Index could be manipulated through trading in less actively traded securities or securities with smaller prices or floats. First, after each quarterly rebalancing, the Amex proposal requires that 90% of the weighting of the Index be accounted for by stocks that are eligible for standardized options trading. The Commission believes that this requirement will ensure that the Index will be almost entirely made up of stocks with large public floats that are actively traded, thus reducing the likelihood that the Index could be manipulated by abusive trading in the smaller stocks contained in the Index. Second, the proposal provides that only stocks with an average monthly trading volume of not less than 500,000 shares over the previous six months will be eligible for inclusion in the Index. This trading volume requirement is considerably higher than the requirement contained in the options listing standards for individual equity options. Third, the Commission believes that the quarterly rebalancing of the Index will further serve to reduce the susceptibility of the Index to manipulation. Through the quarterly rebalancing, any "overweight" stock [23] will be brought back into line with the other stocks, thus ensuring that less capitalized stocks do not become excessively weighted. Fourth, because the Index is narrow-based, the applicable position and exercise limits and margin requirements will further reduce the susceptibility of the Index to manipulation. Lastly, the Amex represents that it will make every effort to add new stocks to the Index that are representative of the retail sector and will take into account a stock's capitalization, liquidity, and volatility.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Retail Index options including full-value and reduced-value Retail LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the Amex, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Retail Index options and Index LEAPS.

The Commission also has some concern that the quarterly rebalancing of the Index could result in investor confusion because the number of stocks of each issuer in the Index could fluctuate each quarter. Such fluctuation, among other things, could make it difficult for investors to maintain any corresponding cash positions in the stocks underlying the Index. The Commission does not believe that the quarterly rebalancing will result in dramatic changes in the weightings of the component securities. Moreover, the Commission believes the benefits to be derived from using a quarterly rebalancing will more than offset the potential confusion for investors. Specifically, the Commission believes that quarterly rebalancing will ensure that no stock or group of stocks will have a disproportionate impact on the Index.

Finally, the Amex has developed procedures to ensure that investors are adequately notified of any changes due to the quarterly rebalancing of the Index. In particular, the Amex represents that it will send informational circulars to its members notifying them of any changes to the Index as a result of the quarterly rebalancing. In addition, the Amex has stated that it will include a description of the equal dollar weighting methodology in all its promotional and marketing materials for the Index. The Commission believes these procedures should help to avoid any investor confusion, while providing important information about the special characteristics of the Index.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[24] In this regard, the NYSE, which currently is the primary market for all of the Index's component stocks, is a member of the Intermarket Surveillance Group ("ISG"), which

if only three stocks accounted for more than 55% of the index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[22] The Amex's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See Amex Rule 915.

[23] A stock would be "overweight" if its weight in the Index were greater than the average weight of all of the stocks in the Index. This would occur, for example, if the price of a component stock significantly increased relative to the other stocks in the Index during a particular quarter and prior to the rebalancing.

[24] See Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

VOL
58

19 93
UMI

provides for the exchange of all necessary surveillance information.[25]

D. Market Impact

The Commission believes that the listing and trading of Retail Index options, including full value and reduced value Index LEAPS on the Amex will not adversely impact the underlying securities markets. First, as described above, due to the "equal-dollar" weighting method, no one stock or group of stocks dominates the Index. Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Third, the 8,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Retail Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is reasonable and consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[26]

The Commission finds good cause for approving Amendment No. 1 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 1 provides for a requirement to the proposal that stocks comprising the Index must have an average trading volume in the U.S. markets over the prior six month period of at least 500,000 shares. Amendment No. 1 also reduces the minimum market value (in U.S. dollars) requirement for stocks comprising the Index from $100 million to $75 million. The Commission believes that the new trading volume requirement strengthen the integrity of the Index and does not raise new issues. Although Amendment No. 1 reduced the necessary market capitalization for stocks comprising the Index from the originally proposed level, the $75 million requirement is an adequately high level to protect investor and market concerns. Moreover, the Commission finds that both modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 1 to the Amex's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[27] that the proposed rule change (SR–Amex–92–30), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[28]

Jonathan G. Katz,

Secretary.

[FR Doc. 93–10722 Filed 5–5–93; 8:45 am]

BILLING CODE 8010–01–M

[25] See *supra* note 15. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing retail industry stocks. If the Amex were to change the composition of the Index so that greater than 20% of the Index was represented by ADRs whose underlying securities were not subject to an effective surveillance sharing arrangement with the Amex, then it would be difficult for the Commission to reach the conclusions reached in this order and the Commission would have to determine whether it would be suitable to continue to trade options on the Index.

[Release No. 34–32243; File No. SR–CBOE–92–29]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.

April 29, 1993.

In the matter of Self-Regulatory Organizations; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the CBOE Environmental Index and Long-Term Options on a Reduced-Value Environmental Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the CBOE Environmental Index ("Environmental Index" or "Index").

Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on December 23, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, among other things, the proposed maintenance listing standards.[5] This order approves the proposal as amended.

II. Description of Proposal

A. General

Pursuant to Exchange Rule 24.2, the CBOE proposes to list and trade cash-settled, European-style[6] stock index options on an industry index, the Environmental Index. The CBOE also proposes to amend Exchange Rule 24.9 to provide for the listing of long-term, reduced-value index options that will be computed at one-tenth of the value of the Environmental Index ("Environment LEAPS").[7] Environment LEAPS will trade independent of and in addition to regular Environmental Index options traded on the Exchange.[8]

B. Composition of the Index

The Index is based on 15 stocks in the environmental industry sector that trade on the American Stock Exchange, Inc. ("Amex") or the New York Stock Exchange, Inc. ("NYSE"), or through the facilities of the National Association of Securities Dealers Automated Quotation System and are reported national market system securities ("NASDAQ/NMS").[9] Currently, eleven of the stocks are listed on the NYSE, three trade on the NASDAQ/NMS and the remaining one is listed on the Amex. The Index is price-weighted [10] and will be calculated real time using last sales prices. As of August 31, 1992, the Index was at 160.99.

As of September 16, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $17.6 billion to a low of $89 million, with the mean and median being $2.3 billion and $663 million, respectively. The market capitalization of all the stocks in the Index was $34.8 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 495.5 million shares to a low of 7.9 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $37.12 to a low of $6.31. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 1.1 million shares per day to a low of 22,000 shares per day, with the mean and median being 219.067 and 107,000 shares, respectively. Lastly, no one stock comprised more than 13.73% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 53.13% of the Index's value. The percentage weighting of the lowest weighted stock was 2.12% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 16.38% of the Index's value.[11]

C. Maintenance

The Index will be maintained by the CBOE. The CBOE may change the composition of the Index at any time to reflect the conditions in the environmental industry. If it becomes necessary to replace a stock in the Index, the Exchange represents that it will make every effort to add new stocks that are representative of the environmental industry and will take into account a stock's capitalization, liquidity, volatility, and name recognition. Further, stocks may be replaced in the event of certain corporate events, such as takeovers or mergers, that change the nature of the security. If, however, the Exchange determines to increase the number of Index component stocks to greater than twenty or reduce the number of component stocks to fewer than ten, the proposal provides that the CBOE will submit a rule filing with the Commission pursuant to section 19(b) of the Act.[12] In addition, in choosing replacement stocks for the Index, the CBOE will be required to ensure that at least 90% of the weight of the Index continues to be made up of stocks that are eligible for standardized options trading.[13]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this order, the rules in chapter XXIV of the CBOE Rules will be applicable to Environmental Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for narrow based index options.

In addition, the CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT–SE (U.K.) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related industries. An industry index contract such as the Environmental Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

E. Calculation of the Index

The Index will be calculated continuously and disseminated to the Options Price Reporting Authority ("OPRA") every 15 seconds by the CBOE or a designated agent of the CBOE, based on the last-sale prices of the component stocks. OPRA, in turn, will disseminate the Index value to other financial vendors such as Reuters, Telerate, and Quotron.[14]

The Index is price-weighted and reflects changes in the prices of the component stocks relative to the base date. Specifically, the Index value is calculated by adding the prices of the component stocks and then dividing this summation by a divisor that is equal to the number of stocks in the Index to get the average price. To maintain the continuity of the Index, the divisor will be adjusted to reflect non-market changes in the prices of the component securities as well as changes in the composition of the Index. Changes which may result in divisor adjustments include, but are not limited to, stock splits and dividends, spin-offs,

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1992).

[3] On September 28, 1992, the CBOE amended the proposal to amend Exchange Rule 24.9 to provide that Environmental Index options will be A.M.-settled options ("Amendment No. 1"). See File No. SR–CBOE–92–29, Amendment No. 1. On November 9, 1992, the CBOE submitted an amendment to the proposal that made clarifying, non-substantive changes to conform the proposal to existing Exchange rules ("Amendment No. 2"). See File No. SR–CBOE–92–29, Amendment No. 2.

[4] See Securities Exchange Act Release No. 31618 (December 17, 1992), 57 FR 61133 (December 23, 1992).

[5] More specifically, on April 7, 1993, the proposal was amended to require that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards enumerated in CBOE Rule 5.3 and that the CBOE submit a rule filing pursuant to section 19(b) of the Act if the number of component securities in the Index changes to either less than 10 or more than 20. This amendment also provided for the listing of long-term, reduced-value Index options that will be computed at one-tenth the value of the Environmental Index.

[6] A European-style option can be exercised only during a specified period before the option expires.

[7] LEAPS is an acronym for Long-Term Equity Anticipation Securities.

[8] Although the CBOE, at this time, intends to list Environmental Index LEAPS only on a reduced value Index ("Environmental LEAPS"), CBOE Rule 24.9 would permit the listing of full value Environmental Index LEAPS.

[9] Real-time last sale reporting recently has been extended to all securities traded over NASDAQ, however, NASDAQ/NMS securities, among other things, are subject to higher listing standards.

[10] The calculation of a price-weighted index involves taking the summation of the prices of the stocks in the index. In contrast, the calculation of a capitalization-weighted index involves taking the summation of the product of the price of each stock in the index and the shares outstanding for each issue.

[11] The six highest weighted securities in the Index, as of September 16, 1992, were: Waste Management, Inc.; Whelabrator Technologies, Inc.; Safety-Kleen Corp.; Browning-Ferris Industries, Inc.; Mid-American Waste Systems, Inc.; and Groundwater Technology, Inc. (the last two companies each represent 6.65% of the value of the Index). The five least weighted securities in the Index were: Allwaste, Inc.; Chambers Development Co., Inc.; Clean Harbors, Inc.; Laidlaw Inc.; and Rollins Environmental Services, Inc.

[12] See Amendment No. 3, *supra* note 5.

[13] See Amendment No. 3, *supra* note 5. The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The Public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See CBOE Rule 5.3.

[14] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, the CBOE will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

VOL 58 ISS 86 MY 6 1993 UMI

certain rights issuances, and mergers and acquisitions.

The Index value for the purpose of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration.[15] In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the settlement value for the options. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for the purpose of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[16]

F. Contract Specifications

The proposed options on the Index will be cash-settled, European-style options. Standard index options trading hours (8:30 a.m. to 3:15 p.m. Central Time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[17] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several additional reduced-value long-term options series with up to three years to expiration ("LEAPS").

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to last business day before expiration (normally a Thursday).

G. Listing of Options on a Reduced-Value Environmental Index

The proposal further provides for the listing of long-term Index options that expire from 12 to 36 months from listing, on a reduced-value Environmental Index that will be computed at one-tenth the value of the Index. The current and closing index value for reduced-value Environment LEAPS will be computed by dividing the Index value by ten and rounding the resulting figure to the nearest one-hundredth. For example, an Environmental Index value of 185.46 would be 18.55 for the reduced-value LEAPS and 185.43 would become 18.54. Other than the reduced value, all other specifications and calculations for reduced-value Environment LEAPS will remain the same.[18] Pursuant to Exchange Rule 24.3, the reduced-value Index will be continuously calculated and disseminated.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value Standard & Poor's 100 and 500 Indexes ("OEX" and "SPX," respectively) [19] will be applicable to the trading of reduced-value Environment LEAPS. For example, Environment LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Specifically, the proposal provides that reduced-value Environment LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential, and continuity rules will not apply to the trading of reduced-value Environment LEAPS (or long-term, full-value Index options) until their time to expiration is less than 12 months. The strike price interval for reduced-value Environment LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional long-term options series may be added when the value to the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value DEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Environmental Index options and Environment LEAPS. Specifically, Exchange rules governing margin requirements,[20] position and exercise limits,[21] and trading halt procedures [22] that are applicable to the trading of narrow-based Index options will apply to options traded on the Index. The proposal further provides that, for purposes of determining whether a given position in Environment LEAPS complies with applicable position and exercise limits, positions in reduced-value Environment LEAPS will be aggregated with positions in the Index options. Under the proposal, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will be used to monitor trading in options on the Index. These procedures include complete access to trading activity in the underlying securities. In addition, the Intermarket Surveillance Group Agreement ("ISG Agreement"), dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[23]

[15] The last trading day prior to expiration is the third Friday of the expiration month. For a more detailed discussion of the trading days for the Index options, see *infra* section II, F.

[16] See *supra* note 14.

[17] For a description of the strike price intervals for reduced-value Index options and long-term Index options, see *infra* section II, G.

[18] See discussion below, at section II, for position and exercise limit adjustments for reduced-value Environment Leaps.

[19] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[20] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) For each short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value; and (2) for long options positions, 100% of the options premium paid.

[21] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 6,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that a lower limit is warranted.

[22] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

[23] ISG was formed on July 14, 1983, to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[24] Specifically, the Commission finds that the trading of Environmental Index options, including full-value and reduced-value LEAPS options,[25] will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the Environmental industry.[26] The trading of options on the Environmental Index and LEAPS on a reduced-value Environmental Index, however, raises several concerns, namely issues related to index design, customer production, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Index and the reduced-value Index are narrow-based because the Environmental Index is only comprised of 15 stocks, all of which are within one industry—the Environmental industry.[27] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options and reduced-value Environment LEAPS.[28]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 621,867 and 471,000 shares respectively.[29] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $21.7 billion to a low of $122 million, with the mean and median being $2.7 billion and $754 million, respectively. Third, no particular stock dominates the Index, in that no one stock comprises more than 18.02% of the Index's total value. Although the percentage weighting of the three largest issues in the Index accounts for 37% of the Index's value, this is not unreasonable given the nature of the environmental industry, the limited number of stocks in the Index, and the large capitalization active trading markets of the three stocks.[30] Fourth, fourteen of the fifteen component stocks in the Index currently are eligible for options trading.[31]

Fifth, if the CBOE increases the number of component stocks to more than twenty or decreases that number to less than ten, the CBOE will be required to seek Commission approval, pursuant to section 19(b)(2) of the Act, before listing new strike price or expiration month series of the Environmental Index. This will help protect against material changes in the composition and design of the Index that might adversely effect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Environmental Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Environmental Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

In addition, the Commission does not believe that the fact that the Index is price-weighted instead of market-weighted results in the Index being readily susceptible to manipulation. Because the use of price-weighting could give securities with relatively small floats or prices a greater weight in the Index than if the Index were capitalization weighted, the Commission is concerned that this calculation method could make the Index more readily susceptible to manipulation. The CBOE, however, has developed several composition and maintenance criteria for the Index that the Commission believes will minimize the possibility that the Index could be manipulated through trading in less actively traded securities or securities with smaller prices or smaller floats. First, the CBOE proposal requires that 90% of the weighting of the Index be comprised of stocks that are eligible for standardized options trading. The Commission believes that this requirement will ensure that the Index will be almost entirely made up of stocks with large public floats that are actively traded, thus reducing the likelihood that the Index could be manipulated by abusive trading in the smaller stocks contained in the Index. Second, because the Index is narrow-based, the applicable position and exercise limits and margin requirements will further reduce the susceptibility of the Index to manipulation. Lastly, the CBOE represents that it will make every effort to add new stocks to the Index that are representative of the environmental industry sector and will take into account a stock's capitalization, liquidity, and volatility.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Environmental Index options and Environment LEAPS, can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only

[24] 15 U.S.C. 78f(b)(5) (1988).

[25] See *supra* note 8.

[26] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Environmental Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the environmental industry in the U.S stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the environmental industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. The Commission also believes that the trading of Environmental Index options and Environment LEAPS will allow investors holding positions in some or all of the underlying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes that Environment LEAPS, which will be traded on an index computed at one-tenth the value of the Environmental Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[27] See Securities Exchange Act Release No. 29994 (November 26, 1991), 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index, rather than a narrow-based index).

[28] See *supra* notes 20 through 22 and accompanying text.

[29] In addition, for the six-month period between March and August 1992, all of the companies within the Index had an average daily trading volume greater than 22,000 shares per day.

[30] For an index with a significantly greater number of stocks than 15 issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[31] For a description of the options listing standards, see *supra* note 13.

VOL 58 ISS 86 MY 6 1993 UMI

investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Environment LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Environmental Index options and Environment LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities market.[32] Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation. In this regard, the CBOE, the NYSE, and the NASD are members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[33]

D. Market Impact

The Commission believes that the listing and trading of Environmental Index options and Environment LEAPS on the CBOE will not adversely impact the underlying securities markets.[34] First, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Second, existing CBOE stock index options rules and surveillance procedures will apply to the Index options and Environment Leaps. Third, the 6,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contraparty non-performance will be minimized because the Index options and Environment LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Environmental Index options and reduced-value Environment LEAPS based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[35]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the listing of reduced-value Environment LEAPS. Because the index underlying Environment LEAPS is identical to the Index and Environment LEAPS will be subject to the same rules that apply to other index LEAPS traded on the Exchange, the Commission believes the CBOE's Environment LEAPS proposal raises no new regulatory issues. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to section 19(b) of the Act if the number of component securities in the Index changes to either less than 10 or more than 20. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[36] that the proposed rule change (SR–92–29), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[37]

Jonathan G. Katz,

Secretary.

[FR Doc. 93–10632 Filed 5–5–93; 8:45 am]

BILLING CODE 8010–01–M

(Release No. 34–32242; File No. SR–CBOE–92–30)

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.

April 29, 1993.

In the matter of Self-Regulatory Organizations; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options on the CBOE Computer Software Index and Long-Term Options on a Reduced-Value Computer Software Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the CBOE

[1] 15 U.S.C. 78s(b)(1) (1990).

[2] 17 CFR 240.19b–4 (1992).

Computer Software Index ("Computer Software Index" or "Index").

Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on December 23, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, among other things, the proposed maintenance listing standards.[5] This order approves the proposal as amended.

II. Descripton of Proposal

A. General

Pursuant to Exchange Rule 24.2, the CBOE proposes to list and trade cash-settled, European-style[6] stock index options on an industry index, the Computer Software Index. The CBOE also proposes to amend Exchange Rule 24.9 to provide for the listing of long-term, reduced-value index options that will be computed at one-tenth of the value of the Computer Software Index ("Computer LEAPS").[7] Computer LEAPS will trade independent of and in addition to regular Computer Software Index options traded on the Exchange.[8]

B. Composition of the Index

The Index is based on 15 stocks in the computer software sector that trade on the New York Stock Exchange, Inc. ("NYSE") or through the facilities of the National Association of Securities Dealers Automated Quotation System and are reported national market system securities ("NASDAQ/NMS").[9] Currently, fourteen of the stocks trade on NASDAQ/NMS and the remaining stock is listed on the NYSE. The Index is price-weighted [10] and will be calculated real time using last sales prices. As of August 31, 1992, the Index was at 143.80.

As of September 16, 1992, the market capitalizations of the individuals stocks in the Index ranged from a high of $21.7 billion to a low of $122 million, with the mean and median being $2.8 billion and $754 million, respectively. The market capitalization of all the stocks in the Index was $41.5 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 269.5 million shares to a low of 9.3 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $51.64 to a low of $13.85. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 1.5 million shares per day to a low of 160,000 shares per day, with the mean and median being 621,867 and 471,000 shares, respectively. Lastly, no one stock comprised more than 18.02% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 61.61% of the Index's value. The percentage weighting of the lowest weighted stock was 2.18% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 13.24% of the Index's value.[11]

C. Maintenance

The Index will be maintained by the CBOE. The CBOE may change the composition of the Index at any time to reflect the conditions in the computer software industry. If it becomes necessary to replace a stock in the Index the Exchange represents that it will make every effort to add new stocks that are representative of the computer software industry and will take into account a stock's capitalization, liquidity, volatility and name recognition. Further, stocks may be replaced in the event of certain corporate events, such as takeovers or mergers, that change the nature of the security. If, however, the Exchange determines to increase the number of Index component stocks to greater than twenty or reduce the number of component stocks to fewer than ten, the proposal provides that the CBOE will submit a rule filing with the Commission pursuant to section 19(b) of the Act.[12] In addition, in choosing replacement stocks for the Index, the CBOE will be required to ensure that at least 90% of the weight of the Index continues to be made up of stocks that are eligible for standardized options trading.[13]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this order, the rules in chapter XXIV of the CBOE Rules will be applicable to Computer Software Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT-SE (U.K.) 100, and the FT-SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related industries. An industry index contract such as the Computer Software Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

[3] On September 28, 1992, the CBOE amended the proposal to amend Exchange Rule 24.9 to provide that Computer Software Index options will be A.M.-settled options ("Amendment No. 1"). See File No. SR–CBOE–92–30, Amendment No. 1. On November 9, 1992, the CBOE submitted an amendment to the proposal that made clarifying, non-substantive changes to conform the proposal to existing Exchange rules ("Amendment No. 2"). See File No. SR–CBOE–92–30, Amendment No. 2.

[4] See Securities Exchange Act Release No. 31617 (December 17, 1992), 57 FR 61135 (December 23, 1992).

[5] More specifically, on April 7, 1993, the proposal was amended to require that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards enumerated in CBOE Rule 5.3 and that the CBOE submit a rule filing pursuant to Section 19(b) of the Act if the number of component securities in the Index changes to either less than 10 or more than 20. This amendment also provided for the listing of long-term, reduced-value Index options that will be computed at one-tenth the value of the Computer Software Index.

[6] A European-style option only can be exercised during a limited period of time before the option expires.

[7] LEAPS is an acronym for Long-Term Equity Anticipation Securities.

[8] Although the CBOE, at this time, intends to list Computer Software Index LEAPS only on a reduced value Index ("Computer LEAPS"), CBOE Rule 24.9 permit the listing of full value Computer Software Index LEAPS.

[9] Real-time last sale reporting recently has been extended to all securities traded over NASDAQ, however, NASDAQ/NMS securities, among other things, are subject to higher listing standards.

[10] The calculation of a price-weighted index involves taking the summation of the prices of the stocks in the index. In contrast, the calculation of a capitalization-weighted index involves taking the summation of the product of the price of each stock in the index and the shares outstanding for each issue.

[11] The five highest weighted securities in the Index, as of September 16, 1992, were: Microsoft Corporation; BMC-Software, Inc.; Novell, Inc.; Borland International, Inc.; and Adobe Systems, Inc. The five least weighted securities in the Index were: American Software, Inc.; Software Publishing Corp.; Symantec; Aldus Corporation; and Computer Associates International, Inc.

[12] See Amendment No. 3, *supra* note 5.

[13] See Amendment No. 3, *supra* note 5. The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See CBOE Rule 5.3.

VOL 58 ISS 86 MY 6 1993 UMI

E. Calculation of the Index

The Index will be calculated continuously and disseminated to the Options Price Reporting Authority ("OPRA") every 15 seconds by the CBOE or a designated agent of the CBOE, based on the last-sale prices of the component stocks. OPRA, in turn, will disseminate the Index value to other financial vendors such as Reuters, Telerate, and Quotron.[14]

The Index is price-weighted and reflects changes in the prices of the component stocks relative to the base date. Specifically, the Index value is calculated by adding the prices of the component stocks and then dividing this summation by a divisor that is equal to the number of stocks in the Index to get the average price. To maintain the continuity of the Index, the divisor will be adjusted to reflect non-market changes in the prices of the component securities as well as changes in the composition of the Index. Changes which may result in divisor changes include, but are not limited to, stock splits and dividends, spin-offs, certain rights issuances, and mergers and acquisitions.

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration.[15] In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the settlement value for the options. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for the purpose of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[16]

[14] For purpose of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, the CBOE will use the closing value of that stock on the prior trading days when calculating the value of the Index, until the stock opens for trading.

[15] The last trading day prior to expiration is the third Friday of the expiration month. For a more detailed discussion of the trading days for the Index options, see *infra* section II, F.

[16] See *supra* note 14.

F. Contract Specifications

The proposed options on the Index will be cashed-settled, European-style options. Standard index options trading hours (8:30 a.m. to 3:15 p.m. Central Time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[17] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several additional reduced-value long-term options series with up to three years to expiration ("LEAPS").

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Options on a Reduced-Value Computer Software Index

The proposal further provides for the listing of long-term index options that expire from 12 to 36 months from listing, on a reduced-value Computer Software Index that will be computed at one-tenth the value of the Index. The current and closing index value for reduced-value Computer LEAPS will be computed by dividing the Index value by ten and rounding the resulting figure to the nearest one-hundredth. For example, a Computer Software Index value of 185.46 would be 18.55 for the reduced-value LEAPS and 185.43 would become 18.54. Other than the reduced-value, all other specifications and calculations for reduced-value Computer LEAPS will remain the same.[18] Pursuant to Exchange Rule 24.3, the reduced-value Index will be continuously calculated and disseminated.

[17] For a description of the strike price intervals for reduced-value Index options and long-term Index options, see *infra* section II, G.

[18] See discussion below, at Section H, for position and exercise limit adjustments for reduced-value Computer Leaps.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value Standard & Poor's 100 and 500 Indexes ("OEX" and "SPX," respectively)[19] will be applicable to the trading of reduced-value Computer LEAPS. For example, Computer LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Specifically, the proposal provides that reduced-value Computer LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential and continuity rules will not apply to the trading of reduced-value Computer LEAPS (or long-term, full-value Index options) until their time to expiration is less than 12 months. The strike price interval for reduced-value Computer LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional long-term options series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-values OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Computer Software Index options and Computer LEAPS. Specifically, Exchange rules governing margin requirements,[20] position and exercise limits,[21] and trading halt procedures[22] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that, for the purpose of determining whether a given position in Computer LEAPS complies

[19] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[20] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) For each short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value; and (2) for long options positions, 100% of the options premium paid.

[21] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 6,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that a lower limit is warranted.

[22] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

with applicable position and exercise limits, positions in reduced-value Computer LEAPS will be aggregated with positions in the Index options. Under the proposal, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in options on the Index. These procedures include complete access to trading activity in the underlying securities. In addition, the Intermarket Surveillance Group Agreement ("ISG Agreement"), dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[23]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[24] Specifically, the Commission finds that the trading of Computer Software Index options, including full-value and reduced-value LEAPS on the Index,[25] will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the computer software industry.[26] The trading of options on the Computer Software Index and LEAPS on a reduced-value Computer Software Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Index and the reduced-value Index are narrow-based because the Computer Software Index is only comprised of 15 stocks, all of which are within one industry—the computer software industry.[27] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based Index options to trading in the Index options and reduced-value Computer LEAPS.[28]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 621,867 and 471,000 shares, respectively.[29] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $21.7 billion to a low of $122 million, with the mean and median being $2.7 billion and $754 million, respectively. Third, no particular stock dominates the Index, in that no one stock comprises more than 18.02% of the Index's total value. Although the percentage weighting of the three largest issues in the Index accounts for 43% of the Index value, this is not unreasonable given the nature of the computer software industry, the limited number of stocks in the Index, and the large capitalization and active trading markets of the three stocks.[30] Fourth, fourteen of the fifteen component stocks in the Index currently are eligible for options trading.[31] Fifth, if the CBOE increases the number of component stocks to more than twenty or decreases that number to less than ten, the CBOE will be required to seek Commission approval, pursuant to section 19(b)(2) of the Act, before listing new strike prior or expiration month series of the Computer Software Index. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Computer Software Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Computer Software Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

In addition, the Commission does not believe that the fact that the Index is price-weighted instead of market-weighted results in the Index being readily susceptible to manipulation. Because the use of price-weighting could give securities with relatively small floats or prices a greater weight in the Index than if the Index were capitalization weighted, the Commission is concerned that this calculation method could make the Index more readily susceptible to manipulation. The CBOE, however, has developed several composition and maintenance criteria for the Index that the Commission believes will minimize the possibility that the Index could be manipulated through trading in less actively traded securities or securities with smaller prices or smaller floats. First, the CBOE proposal requires that 90% of the weighting of the Index be comprised of stocks that are eligible for standardized options trading. The Commission believes that this requirement will ensure that the Index will be almost entirely made up of stocks with large public floats that are

[23] ISG was formed on July 14, 1983, to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[24] 15 U.S.C. 78f(b)(5) (1988).

[25] See supra note 8.

[26] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Computer Software Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the computer software industry in the U.S. stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the computer software industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. The Commission also believes that the trading of Computer Software Index options and Computer LEAPS will allow investors holding positions in some or all of the underlying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes the Computer LEAPS, which will be traded on an index computed at one-tenth the value of the Computer Software Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[27] See Securities Exchange Act Release No. 29994 (November 26, 1991), 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index, as opposed to narrow).

[28] See *supra* notes 20 through 22 and accompanying text.

[29] In addition, for the six-month period between March and August 1992, all of the companies within the Index had an average daily trading volume greater than 160,000 shares per day.

[30] For an index with a significantly greater number of stocks than 15 issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the index's weighting. Further, if an Index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[31] For a description of the options listing standards, see *supra* note 13.

VOL 58 ISS 86 MY 6 1993 UMI

actively traded, thus reducing the likelihood that the Index could be manipulated by abusive trading in the smaller stocks contained in the Index. Second, because the Index is narrow-based, the applicable position and exercise limits and margin requirements will further reduce the susceptibility of the Index to manipulation. Lastly, the CBOE represents that it will make every effort to add new stocks to the Index that are representative of the computer software sector and will take into account a stock's capitalization, liquidity, and volatility.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Computer Software Index options and Computer LEAPS, can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Computer LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Computer Software Index options and Computer LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities market.[32] Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation. In this regard, the CBOE, the NYSE, and the NASD are members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance informations.[33]

D. Market Impact

The Commission believes that the listing and trading of Computer Software Index options and Computer LEAPS on the CBOE will not adversely impact the underlying securities markets.[34] First, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-trade, highly-capitalized stocks. Second, existing CBOE stock index options rules and surveillance procedures will apply to the Index options and Computer Leaps. Third, the 6,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contraparty non-performance will be minimized because the Index options and Computer LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that setting expiring Computer Software Index options and reduced-value Computer LEAPS based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[35]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the listing of reduced-value Computer LEAPS. Because the index underlying Computer LEAPS is identical to the Index and Computer LEAPS will be subject to the same rules that apply to other Index LEAPS traded on the Exchange, the Commission believes the CBOE's Computer LEAPS proposal raises no new regulatory issues. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to section 19(b) of the Act if the number of component securities in the Index changes to either less than 10 or more than 20. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore, ordered, pursuant to Section 19(b)(2) of the Act[36], that the proposed rule change (SR-CBOE-92-30), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[37]

[32] See eg. Securities Exchange Act Release No. 31243 (September 28, 1992), 57 FR 45849 (October 5, 1992).

[33] See *supra* note 23.

[34] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and reduced-value Computer LEAPS. See Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1992 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

[Release No. 34-32244; File No. SR-CBOE-92-27]

Self-Regulatory Organizations; Chicago Board Options Exchange

April 29, 1993.

In the Matter of Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the S&P Chemicals Index and Long-Term Options on a Reduced-Value Chemicals Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the Standard & Poor's Corporation ("S&P") Chemicals Index ("Chemicals Index" or "Index"). Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on November 20, 1992.[4] No comment letters were received on the proposed rule change.

Thereafter, the CBOE amended the proposal to clarify, among other things, several proposal listing and maintenance standards.[5] This order approves the Exchange's proposal, as amended.

II. Description of Proposal

A. General

The CBOE proposes to list and trade options on the Chemicals Index, an index developed by S&P. The CBOE also proposes to list either long-term options on the full-value Index or long-term options on a reduced-value Index that will be computed at one-tenth of the value of the Chemicals Index ("Chemicals LEAPS" or "Index LEAPS").[6] Chemicals LEAPS will trade independent of and in addition to regular Chemicals Index options traded on the Exchange.[7]

B. Composition of the Index

The Index is based on twenty-two diversified and specialty chemical industry stocks that are included in the S&P 500 Index. All twenty-two of those stocks currently trade on the New York Stock Exchange ("NYSE"). The Index is capitalization-weighted, meaning that the price of each stock is multiplied by that company's shares outstanding in order to calculate the current Index level. The Index will be calculated on a real-time basis using last sale prices.

As of August 31, 1992, the Index was at 207. As of August 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $33.14 billion to a low of $169.71 million, with the mean and median being $4.61 billion and $2.5 billion, respectively. The market capitalization of all the stocks in the Index was $101.409 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 672.242 million shares to a low of 19.676 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $61.66 to a low of $8.04. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 750,546 shares per day to a low of 22,848 shares per day, with the mean and median being 226,411 and 154,558 shares, respectively. Lastly, no one stock comprised more than 32.68% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 65.06% of the Index's value. The percentage weighting of the lowest weighted stock was .17% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 3.57% of the Index's value.

C. Maintenance

The Index will be maintained by S&P and the CBOE has represented that it will not influence any S&P decisions concerning maintenance of the Index. To maintain continuity in the Index following an adjustment to a component security, the divisor will be adjusted. Changes which may result in divisor adjustments include, but are not limited to, spin-offs, certain rights issuances, mergers, and acquisitions involving component securities.

If it becomes necessary for S&P to remove a Chemicals Index component stock from the S&P 500 Index (generally due to a takeover or merger), the stock will also be removed from the Chemicals Index. Because the S&P is not required to replace the stock chosen as a replacement for the S&P 500 Index with another chemicals industry, the replacement stock may or may not be in the chemicals industry. As a result, the number of stocks in the S&P Chemicals Index may increase or decrease due to changes in the composition of the S&P 500.[8]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this rule filing, the rules in Chapter XXIV of the CBOE Rules will be applicable to S&P Chemicals Index options. Those rules address, among other things, the

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b-4 (1992).

[3] On September 28, 1992 the CBOE amended the proposal to clarify and confirm that S&P Chemicals Index options will be A.M. settled options subject to the provisions of CBOE Rule 24.9(e) ("Amendment No. 1"). *See* File No. SR-CBOE-92-27, Amendment No. 1. On November 9, 1992, the proposal was amended to reflect changes to the CBOE rules made by the effectiveness of SR-CBOE-91-51 (CBOE Biotech Index, approved September 28, 1992) and SR-CBOE-92-32 (non-substantive amendments to Chapter XXIV of the CBOE rules, effective upon filing) ("Amendment No. 2"). *See* File No. SR-CBOE-92-27, Amendment No. 2. *See infra* note 5.

[4] *See* Securities Exchange Act Release No. 31448, 57 FR 54867 (November 20, 1992).

[5] More specifically, on April 20, 1993 the proposal was amended to: (1) Require as a maintenance standard that, if the Index increases to more than twenty-nine stocks or decreases to less than fifteen stocks, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change; (2) require as a maintenance standard that, if less than 90% of the Index's weighting becomes comprised of stocks that are not eligible for standardized options trading on the CBOE pursuant to CBOE Rule 5.3, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change; and (3) clarify that the current and closing Index value for reduced-value long-term options based on the Index will be computed by dividing the value of the full-value Index by ten and rounding the resulting figure to the nearest one-hundredth ("Amendment No. 3"). See File No. SR-CBOE-92-27, Amendment No. 3.

[6] LEAPS is an acronym for Long-Term Equity Anticipation Securities. LEAPS are long term index option series that expire from twelve to thirty-six months from their date of issuance. See CBOE Rule 24.9(b)(1).

[7] According to the CBOE, the S&P Chemicals Index represents a segment of the U.S. equity market that is not currently represented in the derivative markets and, as such, the CBOE concludes, should offer investors a low-cost means to achieve diversification of their portfolios toward or awey from the chemicals industry. The CBOE believes that Index will provide retail and institutional investors with a means to benefit from their forecasts of that industry's market performance. Options on the Index also can be utilized by portfolio managers and investors to provide a performance measure and evaluation guide for passively or actively managed chemicals industry funds, as well as a means of hedging the risks of investing in the chemicals industry.

[8] *See supra* note 5. If the Index increases to more than twenty-nine stocks or decreases to less than fifteen stocks, no new series of Index options will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change.

applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT–SE (U.K.) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in Chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related industries. An industry index contract such as the S&P Chemicals Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

E. Calculation of the Index

Similar to the broad-based S&P 500 Stock Index, the S&P Chemicals Index is capitalization-weighted and reflects changes in the total capitalization of the component stocks relative to the capitalization of the Index on the base date. The Index is calculated by taking the summation of capitalizations of the component stocks (share price multiplied by the number of shares outstanding) and dividing the result by the divisor.

The Index will be calculated continuously by S&P or its designee and will be disseminated to the Options Price Reporting Authority ("OPRA") every fifteen seconds by the CBOE. If a component stock is not currently being traded, the most recently traded price will be used in the Index calculation.[9]

The Index value for purposes of setting outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[10]

F. Contract Specifications

The proposed options on the Index will be cash-settled, European-style options.[11] Standard options trading hours (8:30 a.m. to 3:10 p.m. Central Standard time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[12] In addition, pursuant to CBOE Rule 24.9 there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several Index LEAP series that expire from twelve to thirty-six months from the date of issuance.

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full-Value or Reduced-Value Chemicals Index

The proposal provides that the Exchange may list long-term Index options that expire from 12 to 36 months from listing on the full-value Chemicals Index or a reduced-value Chemicals Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Chemicals LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, a Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced-value Index LEAPS will be no less than $2.50 instead of $5.00.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value S&P 100 and 500 Indexes ("OEX" and "SPX," respectively)[13] will be applicable to the trading of reduced-value Index LEAPS. For example, Index LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Moreover, the proposal provides that either full-value or reduced-value Index LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential and continuity rules will not apply to the trading of the full-value or reduced-value Index LEAPS until their time to expiration is less than 12 months. The strike price interval for reduced-value Index LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional LEAPS series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Chemicals Index options and reduced-value Chemicals Index options. Specifically, Exchange rules governing margin requirements,[14] position and exercise limits,[15] and trading halt

[9] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, S&P will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[10] See *supra* note 9.

[11] A European-style option can be exercised only during a specified period before the option expires.

[12] For a description of the strike price intervals for reduced-value index options and long-term Index options, See Section G, *infra*.

[13] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[14] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) for short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value; and (2) for long term options positions, 100% of the options premium paid.

[15] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the

procedures[16] that are applicable to the trading of narrow-based index options will apply to options on the Index. The proposal further provides that, for purposes of determining whether a given position in reduced-value Index options complies with applicable position and exercise limits, positions in reduced-value Index options will be aggregated with positions in the full-value Index options. For these purposes, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in full-value and reduced-value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[17]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[18] Specifically, the Commission finds that the trading of Chemicals Index options, including full-value and reduced-value Chemicals LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the chemicals industry.[19]

The trading of options on the Chemicals Index, including full-value and reduced-value LEAPS on the Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Chemicals Index and reduced-value Chemicals Index are narrow-based indices. The Chemicals Index is comprised of only twenty-two stocks, all of which are within one industry—the chemicals industry. In addition, the basic character of the reduced-value Chemicals Index, which is comprised of the same component securities as the Chemicals Index and calculated by dividing the Chemicals Index value by ten, is essentially identical to the Chemicals Index.[20] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options.[21]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 226,411 and 154,558 shares, respectively.[22] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $33.14 billion to a low of $169.71 million as of August 31, 1992, with the mean and median being $4.61 billion and $2.5 billion, respectively. Third, although the Index is only comprised of twenty-two stocks, for the most part, no one particular stock or group of stocks dominates the Index. Although one stock in the Index comprises approximately 32.68% of the Index's total value, the Index is comprised of a total of twenty-two stocks with the percentage weighting of the three largest issues in the Index accounting for 54.05% of the Index's value.[23] Fourth, all of the component stocks in the Index currently are eligible for options trading.[24] The proposed CBOE maintenance requirement that 90% of the weighting of the Index be comprised of stocks that are eligible for options trading will ensure that the Index is almost completely comprised of options eligible stocks. Fifth if S&P increases the number of component stocks to more than twenty-nine or decreases that number to less than fifteen the CBOE will be required to seek Commission approval pursuant to Section 19(b)(2) of the Act before listing new strike price or expiration month series of Chemicals Index options. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Chemicals Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Chemicals Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Chemicals Index options (including full-value and reduced-value Chemicals LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) the special risks of options are disclosed to public customers; (2) only investors capable of

Index options will be 4,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that a lower limit is warranted.

[16] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

[17] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[18] 15 U.S.C. 78f(b)(5) (1988).

[19] The Commission also believes that the trading of the Index options and Index LEAPS will allow investors holding positions in some or all of the underlying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes that the reduced-value Index LEAPS, that will be traded on an Index computed at one-tenth the value of the Chemicals Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[20] *See generally* Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991).

[21] *See supra* notes 14 through 16, and accompanying text.

[22] In addition, for the six-month period between March and August 1992, all of the companies comprising the Index had an average daily trading volume greater than 22,848 shares per day.

[23] For an index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the Index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[24] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. *See* CBOE Rule 5.3.

VOL 58 ISS 86 MY 6 1993 UMI

evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Chemicals Index options and Chemicals Index LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[25] In this regard, both the CBOE and NYSE are members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[26]

D. Market Impact

The Commission believes that the listing and trading of Chemicals Index options, including full-value and reduced-value Index LEAPS on the CBOE will not adversely impact the underlying securities markets.[27] First, as described above, for the most part, no one stock or group of stocks dominates the Index.[28] Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Third, the 4,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Chemicals Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[29]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the rounding of the current and closing Index value for purposes of Index LEAPS trading to the nearest one-hundredth. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to Section 19(b)(2) of the Act if the number of component securities in the Index changes to either greater than twenty-nine or fewer than fifteen. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is Therefore Ordered, Pursuant to section 19(b)(2) of the Act,[30] that the proposed rule change (SR–CBOE–92–27), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[31]

Jonathan G. Katz,

Secretary

[FR Doc. 93–10709 Filed 5–5–93; 8:45 am]

BILLING CODE 8010–01–M

[25] *See* Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

[26] *See supra* note 17. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing the chemicals industry stocks. If the composition of the Index would change so that greater than 20% of the Index was represented by ADRs whose underlying securities were not subject to a comprehensive surveillance sharing arrangement, then it would be difficult for the Commission to reach the conclusions reached in this order and the Commission would have to determine whether it would be suitable to continue to trade options on the Index. The CBOE should, accordingly, notify the Commission immediately if more than twenty percent of the numerical value of the Index is represented by ADRs whose underlying securities are not subject to a comprehensive surveillance sharing agreement, so that the Commission can decide whether trading on the Index should be ceased or phased out.

[27] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and Index LEAPS. *See* Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1993 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

[28] As noted above, one stock in the Index represents approximately 32.68% of the Index value. The Index, however, is comprised of twenty-two highly capitalized and actively traded stocks.

[Release No. 34–32236; File No. SR–CBOE–92–22]

Self-Regulatory Organizations; Chicago Board Options Exchange

April 29, 1993.

In the matter of Self-Regulatory Organizations; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the S&P Transportation Index and Long-Term Options on a Reduced-Value Transportation Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the Standard & Poor's Corporation ("S&P") Transportation Index ("Transportation Index" or "Index"). Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on November 20, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, among other things, several proposed listing and maintenance standards.[5] This order approves the Exchange's proposal, as amended.

II. Description of Proposal

A. General

The CBOE proposes to list and trade options on the Transportation Index, an index developed by S&P. The CBOE also proposes to list either long-term options on the full-value Index or long-term, options on a reduced-value Index that will be computed at one-tenth of the value of the Transportation Index ("Transportation LEAPS" or "Index LEAPS").[6] Transportation LEAPS will trade independent of and in addition to regular Transportation Index options traded on the Exchange.[7]

B. Composition of the Index

The Index is based on fifteen airline, railroad, trucking, and miscellaneous transportation industry stocks that are included in the S&P 500 Index. Thirteen of those stocks currently trade on the New York Stock Exchange ("NYSE") and two are national market system ("NMS") securities that currently trade through the facilities of the National Association of Securities Dealers Automated Quotation System ("NASDAQ–NMS"). The Index is capitalization-weighted, meaning that the price of each stock is multiplied by that company's shares outstanding in order to calculate the current Index level. The Index will be calculated on a real-time basis using last sale prices.

As of August 31, 1992, the Index was at 313.21. As of August 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $10.5 billion to a low of $447 million, with the mean and median being $3.3 billion and $2.5 billion, respectively. The market capitalization of all the stocks in the Index was $49.743 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 202.844 million shares to a low of 23.758 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $122.90 to a low of $12.11. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 581,527 shares per day to a low of 75,148 shares per day, with the mean and median being 242,727 and 180,521 shares, respectively. Lastly, no one stock comprised more than 21.1% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 63.84% of the Index's value. The percentage weighting of the lowest weighted stock was .9% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 11.11% of the Index's value.

C. Maintenance

The Index will be maintained by S&P and the CBOE has represented that it will not influence any S&P decisions concerning maintenance of the Index. To maintain continuity in the Index following an adjustment to a component security, the divisor will be adjusted. Changes which may result in divisor adjustments include, but are not limited to, spin-offs, certain rights issuances, mergers, and acquisitions involving component securities.

If it becomes necessary for S&P to remove a Transportation Index component stock from the S&P 500 Index (generally due to a takeover or merger), the stock will also be removed form the Transportation Index. Because the S&P is not required to replace the stock chosen as a replacement for the S&P 500 Index with another transportation industry, the replacement stock may or may not be in the transportation industry. As a result, the number of stocks in the S&P Transportation Index may increase or decrease due to changes in the composition of the S&P 500.[8]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this rule filing, the rules in chapter XXIV of the CBOE Rules will be applicable to S&P Transportation Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT–SE (U.K) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in Chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1992).

[3] On September 28, 1992 the CBOE amended the proposal to clarify and confirm that S&P Transportation Index options will be A.M. settled options subject to the provisions of CBOE Rule 24.9(e) ("Amendment No. 1"). See File No. SR–CBOE–92–22, Amendment No. 1. On November 9, 1992, the proposal was amended to reflect changes to the CBOE rules made by the effectiveness of SR–CBOE–91–51 (CBOE Biotech Index, approved September 28, 1992) and SR–CBOE–92–32 (nonsubstantive amendments to Chapter XXIV of the CBOE rules, effective upon filing) ("Amendment No. 2"). See File No. SR–CBOE–92–22, Amendment No. 2. See *infra* note 5.

[4] *See* Securities Exchange Act Release No. 31443, 57 FR 54867 (November 20, 1992).

[5] More specifically, on April 20, 1993 the proposal was amended to: (1) Require as a maintenance standard that, if the Index increases to more than twenty stocks or decreases to less than ten stocks, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change; (2) require as a maintenance standard that, if less than 90% of the Index's weighting becomes comprised of stocks that are not eligible for standardized options trading on the CBOE pursuant to CBOE Rule 5.3, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change; and (3) clarify that the current and closing Index value for reduced-value long-term options based on the Index will be computed by dividing the value of the full-value Index by ten and rounding the resulting figure to the nearest one-hundredth ("Amendment No. 3"). See File No. SR–CBOE–92–22, Amendment No. 3.

[6] LEAPS is an acronym for Long-Term Equity Anticipation Securities. LEAPS are long term index option series that expire from twelve to thirty-six months from their date of issuance. See CBOE Rule 24.9(b)(1).

[7] According to the CBOE, the S&P Transportation Index represents a segment of the U.S. equity market that is not currently represented in the derivative markets and, as such, the CBOE concludes, should offer investors a low-cost means to achieve diversification of their portfolios toward or away from the transportation industry. The CBOE believes the Index will provide retail and institutional investors with a means to benefit from their forecasts of that industry's market performance. Options on the Index also can be utilized by portfolio managers and investors to provide a performance measure and evaluation guide for passively or actively managed transportation industry funds, as well as a means of hedging the risks of investing in the transportation industry.

[8] *See supra* note 5. If the Index increases to more than twenty stocks or decreases to less than ten stocks, no new series of Index options will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change.

1993
UMI

industries. An industry index contract such as the S&P Transportation Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

E. Calculation of the Index

Similar to the broad-based S&P 500 Stock Index, the S&P Transportation Index is capitalization-weighted and reflects changes in the total capitalization of the component stocks relative to the capitalization of the Index on the base date. The Index is calculated by taking the summation of capitalizations of the component stocks (share price multiplied by the number of shares outstanding) and dividing the result by the divisor.

The Index will be calculated continuously by S&P or its designee and will be disseminated to the Options Price Reporting Authority ("OPRA") every fifteen seconds by the CBOE. If a component stock is not currently being traded, the most recently traded price will be used in the Index calculation.[9]

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (i.e., Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[10]

F Contract Specifications

The proposed options on the Index will be cash-settled, European-style options.[11] Standard options trading hours (8:30 a.m. to 3:10 p.m. Central Standard time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[12] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several Index LEAP series that expire from twelve to thirty-six months from the date of issuance.

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full-Value or Reduced-Value Transportation Index

The proposal provides that the Exchange may list long-term Index options that expire from 12 to 36 months from listing on the full-value Transportation Index or a reduced-value Transportation Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Transportation LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, an Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced-value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced-value Index LEAPS will be no less than $2.50 instead of $5.00.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value S&P 100 and 500 Indexes ("OEX" and "SPX," respectively)[13] will be applicable to the trading of reduced-value Index LEAPS. For example, Index LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Moreover, the proposal provides that either full-value or reduced-value Index LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential, and continuity rules will not apply to the trading of the full-value or reduced-value Index LEAPS until their time to expiration is less than 12 months. The strike price interval for reduced-value Index Leaps will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional LEAPS series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Transportation Index options and reduced-value Transportation Index options. Specifically, Exchange rules governing margin requirements,[14] position and exercise limits,[15] and trading halt procedures[16] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that, for purposes of determining whether a given position in reduced-value Index

[9] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, S&P will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[10] *See supra* note 9.

[11] A European-style option can be exercised only during a specified period before the option expires.

[12] For a description of the strike price intervals for reduced-value Index options and long-term Index options, See Section G, *infra*.

[13] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990.

[14] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) For short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value, and (2) for long term options positions, 100% of the options premium paid.

[15] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 6,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that lower limit is warranted.

[16] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

options complies with applicable position and exercise limits, positions in reduced-value Index options will be aggregated with positions in the full-value Index options. For these purposes, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in full-value and reduced-value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[17]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[18] Specifically, the Commission finds that the trading of Transportation Index options, including full-value and reduced-value Transportation LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the transportation industry.[19] The trading of options on the Transportation Index, including full-value and reduced-value LEAPS on the Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Transportation Index and reduced-value Transportation Index are narrow-based indices. The Transportation Index is comprised of only fifteen stocks, all of which are within one industry—the transportation industry. In addition, the basic character of the reduced-value Transportation Index, which is comprised of the same component securities as the Transportation Index and calculated by dividing the Transportation Index value by ten, is essentially identical to the Transportation Index.[20] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options.[21]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 242,727 and 180,521 shares, respectively.[22] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $10.5 billion to a low of $447 million as of August 31, 1992, with the mean and median being $3.3 billion and $2.5 billion, respectively. Third, although the Index is only comprised of fifteen stocks, no one particular stock or group of stocks dominates the Index. Specifically, no one stock comprises more than 21.1% of the Index's total value and the percentage weighting of the three largest issues in the Index accounting for 49.05% of the Index's value.[23] Fourth, all of the component stocks in the Index currently are eligible for options trading.[24] The proposed CBOE maintenance requirement that 90% of the weighting of the Index be comprised of stocks that are eligible for options trading will ensure that the Index is almost completely comprised of options eligible stocks. Fifth, if S&P increases the number of component stocks to more than twenty or decreases that number to less than ten, the CBOE will be required to seek Commission approval pursuant to section 19(b)(2) of the Act before listing new strike price or expiration month series of Transportation Index options. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Transportation Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Transportation Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Transportation Index options (including full-value and reduced-value Transportation LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is

[17] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[18] 15 U.S.C. 78f(b)(5) (1986).

[19] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Transportation Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the transportation industry in the U.S. stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the transportation industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. Moreover, the Commission believes that the reduced-value Index LEAPS, that will be traded on an index computed at one-tenth the value of the Transportation Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[20] See generally Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index rather than a narrow-based index).

[21] See *supra* notes 14 through 18, and accompanying text.

[22] In addition, for the six-month period between March and August 1992, all of the companies comprising the Index had an average daily trading volume greater than 75,148 shares per day.

[23] For an index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[24] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. *See* CBOE Rule 5.3.

VOL 58 ISS 86 MY 6 1993 UMI

designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Transportation Index options and Transportation Index LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[25] In this regard, the CBOE, NYSE, and NASD are all members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[26]

D. Market Impact

The Commission believes that the listing and trading of Transportation Index options, including full-value and reduced-value Index LEAPS on the CBOE will not adversely impact the underlying securities markets.[27] First, as described above, no one stock or group of stocks dominates the Index. Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Third, the 6,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Transportation Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[28]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the rounding of the current and closing Index value for purposes of Index LEAPS trading to the nearest one-hundredth. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to Section 19(b) of the Act if the number of component securities in the Index changes to either greater than twenty or fewer than ten. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[29] that the proposed rule change (SR–CBOE–92–22), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[30]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[25] See Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

[26] See *supra* note 17. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing transportation industry stocks. If the composition of the Index would change so that greater than 20% of the Index was represented by ADRs whose underlying securities were not subject to a comprehensive surveillance sharing arrangement, then it would be difficult for the Commission to reach the conclusions reached in this order and the Commission would have to determine whether it would be suitable to continue to trade options on the Index. The CBOE should, accordingly, notify the Commission immediately if more than twenty percent of the numerical value of the Index is represented by ADRs whose underlying securities are not subject to a comprehensive surveillance sharing agreement, so that the Commission can decide whether trading on the Index should be ceased or phased out.

[27] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and Index LEAPS. See Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1993 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

Self-Regulatory Organizations; Chicago Board Options Exchange

April 29, 1993.

In the matter of Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the S&P Health Care Index and Long-Term Options on a Reduced-Value Health Care Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the Standard & Poor's Corporation ("S&P") Health Care Index ("Health Care Index" or "Index"). Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on November 20, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, among other things, several proposed listing and maintenance standards.[5] This order approves the Exchange's proposal, as amended.

II. Description of Proposal

A. General

The CBOE proposes to list and trade options on the Health Care Index, an index developed by S&P. The CBOE also proposes to list either long-term options on the full-value Index or long-term options on a reduced-value Index that will be computed at one-tenth of the value of the Health Care Index ("Health Care LEAPS" or "Index LEAPS").[6] Health Care LEAPS will trade independent of and in addition to regular Health Care Index options traded on the Exchange.[7]

B. Composition of the Index

The Index is based on twenty-eight management, drug, medical product, diversified, and miscellaneous health care industry stocks that are included in the S&P 500 Index. Twenty-five of those stocks currently trade on the New York Stock Exchange, Inc. ("NYSE") and three are national market system ("NMS") securities that currently trade through the facilities of the National Association of Securities Dealers Automated Quotation System ("NASDAQ–NMS"). The Index is capitalization-weighted, meaning that the price of each stock is multiplied by that company's shares outstanding in order to calculate the current Index level. The Index will be calculated on a real-time basis using last sale prices.

As of August 31, 1992, the Index was at 229.76. As of August 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $56.38 billion to a low of $438.81 million, with the mean and median being $10.98 billion and $5 billion, respectively. The market capitalization of all the stocks in the Index was $307.49 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 1.159 billion shares to a low of 46.19 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $100.08 to a low of $8.40. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 1,210,116 shares per day to a low of 77,346 shares per day, with the mean and median being 446,487 and 419,146 shares, respectively. Lastly, no one stock comprised more than 18.34% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 56.97% of the Index's value. The percentage weighting of the lowest weighted stock was .14% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 1.76% of the Index's value.

C. Maintenance

The Index will be maintained by S&P and the CBOE has represented that it will not influence any S&P decisions concerning maintenance of the Index. To maintain continuity in the Index following an adjustment to a component security, the divisor will be adjusted. Changes which may result in divisor adjustments include, but are not limited to, spin-offs, certain rights issuances, mergers, and acquisitions involving component securities.

If it becomes necessary for S&P to remove a Health Care Index component stock from the S&P 500 Index (generally due to a takeover or merger), the stock will also be removed from the Health Care Index. Because the S&P is not required to replace the stock chosen as a replacement for the S&P 500 Index with another health care industry, the replacement stock may or may not be in the health care industry. As a result, the number of stocks in the S&P Health Care Index may increase or decrease due to changes in the composition of the S&P 500.[8]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this rule filing, the rules in Chapter XXIV of the CBOE Rules will be applicable to S&P Health Care Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT–SE (U.K.) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in Chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1992).

[3] On September 28, 1992 the CBOE amended the proposal to clarify and confirm that S&P Health Care Index options will be A.M. settled options subject to the provisions of CBOE Rule 24.9(e) ("Amendment No. 1"). See File No. SR–CBOE–92–24, Amendment No. 1. On November 9, 1992, the proposal was amended to reflect changes to the CBOE rules made by the effectiveness of SR–CBOE–91–51 (CBOE Biotech Index, approved September 28, 1992) and SR–CBOE–92–32 (non-substantive amendments to Chapter XXIV of the CBOE rules, effective upon filing) ("Amendment No. 2"). See File No. SR–CBOE–92–24, Amendment No. 2. See *infra* note 5.

[4] See Securities Exchange Act Release No. 31445, 57 FR 54871 (November 20, 1992).

[5] More specifically, on April 20, 1993 the proposal was amended to: (1) Require as a maintenance standard that, if the Index increases to more than thirty-seven stocks or decreases to less than nineteen stocks, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change; (2) require as a maintenance standard that, if less than 90% of the Index's weighting becomes comprised of stocks that are not eligible for standardized options trading on the CBOE pursuant to CBOE Rule 5.3, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change; and (3) clarify that the current and closing Index value for reduced-value long-term options based on the Index will be computed by dividing the value of the full-value Index by ten and rounding the resulting figure to the nearest one-hundredth ("Amendment No. 3"). See File No. SR–CBOE–92–24, Amendment No. 3.

[6] LEAPS is an acronym for Long-Term Equity Anticipation Securities. LEAPS are long term index option series that expire from twelve to thirty-six months from their date of issuance. See CBOE Rule 24.9(b)(1).

[7] According to the CBOE, the S&P Health Care Index represents a segment of the U.S. equity market that is not currently represented in the derivative markets and, as such, the CBOE concludes, should offer investors a low-cost means to achieve diversification of their porfolios toward or away from the health care industry. The CBOE believes the Index will provide retail and institutional investors with a means to benefit from their forecasts of that industry's market performance. Options on the Index also can be utilized by portfolio managers and investors to provide a performance measure and evaluation guide for passively or actively managed health care industry funds, as well as a means of hedging the risks of investing in the health care industry.

[8] See *supra* note 5. If the Index increases to more than thirty-seven stocks or decreases to less than nineteen stocks, no new series of Index options will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change.

VOL 58 ISS 86 MY 6 1993 UMI

particular industry or a group of related industries. An industry index contract such as the S&P Health Care Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

E. Calculation of the Index

Similar to the broad-based S&P 500 Stock Index, the S&P Health Care Index is capitalization-weighted and reflects changes in the total capitalization of the component stocks relative to the capitalization of the Index on the base date. The Index is calculated by taking the summation of capitalizations of the component stocks (share price multiplied by the number of shares outstanding) and dividing the result by the divisor.

The Index will be calculated continuously by S&P or its designee and will be disseminated to the Options Price Reporting Authority ("OPRA") every fifteen seconds by the CBOE. If a component stock is not currently being traded, the most recently traded price will be used in the Index calculation [9]

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[10]

F. Contract Specifications

The proposed options on the Index will be cashed-settled, European-style options.[11] Standard options trading hours (8:30 a.m. to 3:10 p.m. Central Standard time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[12] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several Index LEAP series that expire from twelve to thirty-six months from the date of issuance.

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full-Value or Reduced-Volue Health Care Index

The proposal provides that the Exchange may list long-term Index options that expire from 12 to 36 months from listing on the full-value Health Care Index or a reduced-value Health Care Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Health Care LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, a Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced-value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's Index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced-value Index LEAPS will be no less than $2.50 instead of $5.00.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value S&P 100 and 500 Indexes ("OEX" and "SPX," respectively) [13] will be applicable to the trading of reduced-value Index LEAPS. For example, Index LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Moreover, the proposal provides that either full-value or reduced-value Index LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential and continuity rules will not apply to the trading of the full-value or reduced-value Index LEAPS until their time to expiration is less than 12 months. The strike price interval for reduced-value Index LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional LEAPS series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Health Care Index options and reduced-value Health Care Index options. Specifically, Exchange rules governing margin requirements,[14] position and exercise limits,[15] and trading halt procedures [16] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that, for purposes of determining whether a given position in reduced-value Index options complies with

[9] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, S&P will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[10] See *supra* note 9.

[11] A European-style option can be exercised only during a specified period before the option expires.

[12] For a description of the strike price intervals for reduced-value Index options and long-term Index options, See Section G, *infra*

[13] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[14] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) For short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying index value; and (2) for long term options positions, 100% of the options premium paid.

[15] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 6,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that a lower limit is warranted.

[16] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

applicable position and exercise limits, positions in reduced-value Index options will be aggregated with positions in the full-value Index options. For these purposes, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in full-value and reduced-value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[17]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[18] Specifically, the Commission finds that the trading of Health Care Index options, including full-value and reduced-value Health Care LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the health care industry.[19]

The trading of options on the Health Care Index, including full-value and reduced-value LEAPS on the Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Health Care Index and reduced-value Health Care Index are narrow-based indices. The Health Care Index is comprised of only twenty-eight stocks, all of which are within one industry—the health care industry. In addition, the basic character of the reduced-value Health Care Index, which is comprised of the same component securities as the Health Care Index and calculated by dividing the Health Care Index value by ten, is essentially identical to the Health Care Index.[20] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options.[21]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 446,487 and 419,146 shares, respectively.[22] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $56.38 billion to a low of $438.81 million as of August 31, 1992, with the mean and median being $10.98 billion and $5 billion, respectively. Third, although the Index is only comprised of twenty-eight stocks, no one particular stock or group of stocks dominates the Index. Specifically, no one stock comprises more than 18.34% of the Index's total value and the percentage weighting of the three largest issues in the Index account for 40.25% of the Index's value.[23] Fourth, all of the component stocks in the Index currently are eligible for options trading. The proposed CBOE maintenance requirement that 90% of the weighting of the Index be comprised of stocks that are eligible for options trading will ensure that the Index is almost completely comprised of options eligible stocks.[24] Fifth, if S&P increases the number of component stocks to more than thirty-seven or decreases that number to less than nineteen, the CBOE will be required to seek Commission approval pursuant to section 19(b)(2) of the Act before listing new strike price or expiration month series of Health Care Index options. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Health Care Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Health Care Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Health Care Index options (including full-value and reduced-value Health Care LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-

[17] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[18] 15 U.S.C. 78f(b)(5) (1988).

[19] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Health Care Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the health care industry in the U.S. stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the health care industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. The Commission also believes that the trading of the Index options and Index LEAPS will allow investors holding positions in some or all of the underlying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes that the reduce-value Index LEAPS, that will be traded on an index computed at one-tenth the value of the Health Care Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios form long-term market moves at a reduced cost.

[20] See generally Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index rather than a narrow-based index).

[21] See supra notes 14 through 16, and accompanying text.

[22] In addition, for the six-month period between March and August 1992, all of the companies comprising the Index had an average daily trading volume greater than 77,346 shares per day.

[23] For an Index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[24] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See CBOE Rule 5.3.

VOL 58 ISS 86 MY 6 1993 UMI

traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Health Care Index options and Health Care Index LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[25] In this regard, the CBOE, NYSE, and NASD are all members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[26]

D. Market Impact

The Commission believes that the listing and trading of Health Care Index options, including full-value and reduced value Index LEAPS on the CBOE will not adversely impact the underlying securities markets.[27] First, as described above, no one stock or group of stocks dominates the Index. Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Third, the 6,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contraparty non-performance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Health Care Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[28]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the rounding of the current and closing Index value, for purposes of Index LEAPS trading, to the nearest one-hundredth. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to section 19(b)(2) of the Act if the number of component securities in the Index changes to either greater than thirty-seven or fewer than nineteen. The Commission believes that these modifications strengthen the integrity of the Index and do not rise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities an Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[29] that the proposed rule change (SR–CBOE–92–24), as amended, is approved.

For the Commission, by the Division of market Regulation, pursuant to delegated authority.[30]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[25] Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

[26] See *Supra* note 17. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing health care industry stocks. If the composition of the Index would change so that greater than 20% of the index was represented by ADRs whose underlying securities were not subject to a comprehensive surveillance sharing arrangement, then it would be difficult for the Commission to reach the conclusions reached in this order and the commission would have to determine whether it would be suitable to continue to trade options on the Index. The CBOE should accordingly, notify the Commission immediately if more than twenty percent of the numerical value of the Index is represented by ADRs whose underlying securities are not subject to a comprehensive surveillance sharing agreement, so to that the Commission can decide whether trading on the Index should be ceased or phased out.

[27] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and Index LEAPS. See Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1993 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

[Release No. 34–32240; File No. SR–CBOE–92–23]

Self-Regulatory Organizations; Chicago Board Options Exchange

April 29, 1993.

In the Matter of Self-Regulatory Organizations; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the S&P Retail Index and Long-Term Options on a Reduced-Value Retail Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE"

on "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the Standard & Poor's Corporation ("S&P") Retail Index ("Retail Index" or "Index"). Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on November 20, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, among other things, several proposed listing and maintenance standards.[5] This order approves the Exchange's proposal, as amended.

II. Description of Proposal

A. General

The CBOE proposes to list and trade options of the Retail Index, an index developed by S&P. The CBOE also proposes to list either long-term options on the full-value Index or long-term options on a reduced-value Index that will be computed at one-tenth of the value of the Retail Index ("Retail LEAPS" or "Index LEAPS").[6] Retail LEAPS will trade independent of and in addition to regular Retail Index options traded on the Exchange.[7]

B. Composition of the Index

The Index is based on thirty-three department, drug and food store, general merchandise, specialty, and specialty apparel industry stocks that are included in the S&P 500 Index. Twenty-eight of those stocks currently trade on the New York Stock Exchange, Inc. ("NYSE"), one trades on the American Stock Exchange, Inc. ("Amex") and four are national market system ("NMS") securities that currently trade through the facilities of the National Association of Securities Dealers Automated Quotation System ("NASDAQ–NMS"). The Index is capitalization-weighted, meaning that the price of each stock is multiplied by that company's shares outstanding in order to calculate the current Index level. The Index will be calculated on a real-time basis using last sale prices.

As of August 31, 1992, the Index was at 589.85.[8] As of August 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $65.501 billion to a low of $728.21 million, with the mean and median being $6.14 billion and $2.55 billion, respectively. The market capitalization of all the stocks in the Index was $202.776 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 1.149 billion shares to a low of 20.441 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $82.52 to a low of $13.53. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 1,077,222 shares per day to a low of 28,025 shares per day, with the mean and median being 324,119 and 216,643 shares, respectively. Lastly, no one stock comprised more than 32.3% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 57.74% of the Index's value. The percentage weighting of the lowest weighted stock was .36% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 2.52% of the Index's value.

C. Maintenance

The Index will be maintained by S&P and the CBOE has represented that it will not influence any S&P decisions concerning maintenance of the Index. To maintain continuity in the Index following an adjustment to a component security, the divisor will be adjusted. Changes which may result in divisor adjustments include, but are not limited to, spin-offs, certain rights issuances, mergers, and acquisitions involving component securities.

If it becomes necessary for S&P to remove a Retail index component stock from the S&P 500 Index (generally due to a takeover or merger), the stock will also be removed from the Retail Index. Because the S&P is not required to replace the stock chosen as a replacement for the S&P 500 Index with another retail industry, the replacement stock may or may not be in the retail industry. As a result, the number of stocks in the S&P Retail Index may increase or decrease due to changes in the composition of the S&P 500.[9]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this rule filing, the rules in Chapter XXIV of the CBOE Rules will be applicable to S&P Retail Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT–SE (U.K.) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in Chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1992).

[3] On September 28, 1992 the CBOE amended the proposal to clarify and confirm that S&P Retail Index options will be A.M. settled options subject to the provisions of CBOE Rule 24.9(e) ("Amendment No. 1"). See File No. SR–CBOE–92–23, Amendment No. 1. On November 9, 1992, the proposal was amended to reflect changes to the CBOE rules made by the effectiveness of SR–CBOE–91–51 (CBOE Biotech Index, approved September 28, 1992) and SR–CBOE–92–32 (non-substantive amendments to Chapter XXIV of the CBOE rules, effective upon filing) ("Amendment No. 2"). See File No. SR–CBOE–92–23, Amendment No. 2. See *infra* note 5.

[4] See Securities Exchange Act Release No. 31444, 57 FR 54869 (November 20, 1992).

[5] More specifically, on April 20, 1993 the proposal was amended to: (1) Require as a maintenance standard that, if the Index increases to more than forty-four stocks or decreases to less than twenty-two stocks, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change; (2) require as a maintenance standard that, if less than 90% of the Index's weighting becomes comprised of stocks that are not eligible for standardized options trading on the CBOE pursuant to CBOE Rule 5.3, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change; and (3) clarify that the current and closing Index value for reduced-value long-term options based on the Index will be computed by dividing the value of the full-value Index by ten and rounding the resulting figure to the nearest one-hundredth ("Amendment No. 3"). See File No. SR–CBOE–92–23, Amendment No. 3.

[6] LEAPS is an acronym for Long-Term Equity Anticipation Securities. LEAPS are long term index option series that expire from twelve to thirty-six months from their date of issuance. See CBOE Rule 24.9(b)(1).

[7] According to the CBOE, the S&P Retail Index represents a segment of the U.S. equity market that is not currently represented in the derivative markets and, as such, the CBOE concludes, should offer investors a low-cost means to achieve diversification of their portfolios toward or away from the retail industry. The CBOE believes the Index will provide retail and institutional investors with a means to benefit from their forecasts of that industry's market performance. Options on the Index also can be utilized by portfolio managers and investors to provide a performance measure and evaluation guide for passively or actively managed retail industry funds, as well as a means of hedging the risks of investing in the retail industry.

[8] The CBOE believes that a lower Index level is necessary for successful trading of Retail Index options. Therefore, the CBOE intends to base trading on Retail Index options at one-half the value calculated by S&P or its designee. Thus, for purposes of trading Retail Index options, as of August 31, 1992, the Index level was 294.93.

[9] See *supra* note 5. If the Index increases to more than forty-four stocks or decreases to less than twenty-two stocks, no new series of Index options will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change

VOL 58 ISS 86 MY 6 1993 UMI

options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related industries. An industry index contract such as the S&P Retail Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

E. Calculation of the Index

Similar to the broad-based S&P 500 Stock Index, the S&P Retail Index is capitalization-weighted and reflects changes in the total capitalization of the component stocks relative to the capitalization of the Index on the base date. The Index is calculated by taking the summation of capitalizations of the component stocks (share price multiplied by the number of shares outstanding) and dividing the result by the divisor.

The Index will be calculated continuously by S&P or its designee and will be disseminated to the Options Price Reporting Authority ("OPRA") every fifteen seconds by the CBOE. If a component stock is not currently being traded, the most recently traded price will be used in the Index calculation.[10]

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[11]

[10] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, S&P will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[11] See supra note 10.

F. Contract Specifications

The proposed options on the Index will be cash-settled, European-style options.[12] Standard options trading hours (8:30 a.m. to 3:10 p.m. Central Standard time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[13] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several Index LEAP series that expire from twelve to thirty-six months from the date of issuance.

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full-Value or Reduced-Value Retail Index

The proposal provides that the Exchange may list long-term Index options that expire from 12 to 36 months from listing on the full-value Retail Index or a reduced-value Retail Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Retail LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, a Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced-value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced-value Index LEAPS will be no less than $2.50 instead of $5.00.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value S&P 100 and 500 Indexes ("OEX" and "SPX," respectively)[14] will be applicable to the trading of reduced-value Index LEAPS. For example, Index LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Moreover, the proposal provides that either full-value or reduced-value Index LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential, and continuity rules will not apply to the trading of the full-value or reduced-value Index LEAPS until their time to expiration is less than 12 months. The strike price interval for reduced-value Index LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional LEAPS series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Retail Index options and reduced-value Retail Index options. Specifically, Exchange rules governing margin requirements,[15] position and exercise limits,[16] and trading halt procedures[17] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that, for purposes of determining whether a

[12] A European-style option can be exercised only during a specified period before the option expires.

[13] For a description of the strike price intervals for reduced-value Index options and long-term Index options, See Section G, *infra*.

[14] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[15] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) for short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value; and (2) for long-term options positions, 100% of the options premium paid.

[16] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 4,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that a lower limit is warranted.

[17] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

given position in reduced-value Index options complies with applicable position and exercise limits, positions in reduced-value Index options will be aggregated with positions in the full-value Index options. For these purposes, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the exchange's other index options will also be used to monitor trading in full-value and reduced-value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[18]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5)[19] Specifically, the Commission finds that the trading of Retail Index options, including full-value and reduced-value Retail LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the retail industry.[20] The trading of options on the Retail Index, including full-value and reduced-value LEAPS on the Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Retail Index and reduced-value Retail Index are narrow-based indices. The Retail Index is comprised of only thirty-three stocks, all of which are within one industry—the retail industry. In addition, the basic character of the reduced-value Retail Index, which is comprised of the same component securities as the Retail Index and calculated by dividing the Retail Index value by ten, is essentially identical to the Retail Index.[21] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options.[22]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 324,119 and 216,643 shares, respectively.[23] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $65.501 billion to a low of $728.21 million as of August 31, 1992, with the mean and median being $6.14 billion and $2.55 billion, respectively. Third, although the Index is only comprised of thirty-three stocks, for the most part, no none particular stock or group of stocks dominates the Index. Although one stock in the Index comprises approximately 32.3% of the Index's total value, the Index is comprised of a total of thirty-three stocks with the percentage weighting of the three largest issues in the Index accounting for 47.63% of the Index's value.[24] Fourth, thirty-one of the thirty-three stocks in the Index (representing 99.1% of the weighting of the Index) currently are eligible for options trading.[25] The proposed CBOE maintenance requirement that 90% of the weighting of the Index be comprised of stocks that are eligible for options trading will ensure that the Index is almost completely comprised of options eligible stocks. Fifth, if S&P increases the number of component stocks to more than forth-four or decreases that number to less than twenty-two, the CBOE will be required to seek Commission approval pursuant to Section 19(b)(2) of the Act before listing new strike price or expiration month series of Retail Index options. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Retail Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Retail Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Retail Index options (including full-value and reduced-value Retail LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an

[18] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stork and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[19] 15 U.S.C. 78f(b)(5) (1988).

[20] Pursuant to Section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Retail Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the retail industry in the U.S. stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the retail industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. Moreover, the Commission believes that the reduced-value Index LEAPS, that will be traded on an index computed at one-tenth the value of the Retail Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[21] See generally Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index rather than a narrow-based index).

[22] See *supra* notes 15 through 17, and accompanying text.

[23] In addition, for the six-month period between March and August 1992, all of the companies comprising the Index had an average daily trading volume greater than 28,025 shares per day.

[24] For an index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[25] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) the public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See CBOE Rule 5.3.

VOL 58 ISS 86 MY 6 1993 UMI

environment that is designed to ensure, among other things, that: (1) the special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Retail Index options and Retail Index LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[26] In this regard, the CBOE, NYSE, Amex, and NASD are all members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[27]

D. Market Impact

The Commission believes that the listing and trading of Retail Index options, including full-value and reduced-value Index LEAPS on the CBOE will not adversely impact the underlying securities markets.[28] First, as described above, for the most part, no one stock or group of stocks dominates the Index.[29] Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks.[30] Third, the 4,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party nonperformance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Retail Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[31]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the Federal Register. Amendment No. 3 provides for the rounding of the current and closing Index value for purposes of Index LEAPS trading to the nearest one-hundredth. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to Section 19(b) of the Act if the number of component securities in the Index changes to either greater than forty-four or fewer than twenty-two. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with Section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[32] that the proposed rule change (SR–CBOE–92–23), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[33]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–P

[26] Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

[27] *See supra* note 18. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing retail industry stocks. If the composition of the Index would change so that greater than 20% of the Index was represented by ADRs whose underlying securities were not subject to a comprehensive surveillance sharing arrangement, then it would be difficult for the Commission to reach the conclusions reached in this order and the Commission would have to determine whether it would be suitable to continue to trade options on the Index. The CBOE should, accordingly, notify the Commission immediately if more than twenty percent of the numerical value of the Index is represented by ADRs whose underlying securities are not subject to a comprehensive surveillance sharing agreement, so that the Commission can decide whether trading on the Index should be ceased or phased out.

[28] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and Index LEAPS. *See* Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1993 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

[29] As noted above, one stock in the Index represents approximately 32.3% of the Index value. The Index is, however, comprised of thirty-three highly capitalized and actively traded stocks.

[30] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. *See* CBOE Rule 5.3.

Self-Regulatory Organizations; Chicago Board Options Exchange

April 29, 1993.

In the matter of Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the S&P Banking Index and Long-Term Options on a Reduced-Value Banking Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the Standard & Poor's Corporation ("S&P") Banking Index ("Banking Index" or "Index"). Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on November 20, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, amount other things, several proposed listing and maintenance standards.[5] This order approves the Exchange's proposal, as amended.

II. Description of Proposal

A. General

The CBOE proposes to list and trade options on the Banking Index, an index developed by S&P. The CBOE also proposes to list either long-term options on the full-value Index or long-term options on a reduced-value Index that will be computed at one-tenth of the value of the Banking Index ("Banking LEAPS" or "Index LEAPS").[6] Banking LEAPS will trade independent of and in addition to regular Banking Index options traded on the Exchange.[7]

B. Composition of the Index

The Index is based on twenty-five money center, major regional, and other major banking industry stocks that are included in the S&P 500 Index. Twenty-two of those stocks currently trade on the New York Stock Exchange ("NYSE") and three are national market system ("NMS") securities that currently trade through the facilities of the National Association of Securities Dealers Automated Quotation System ("NASDAQ–NMS"). The Index is capitalization-weighted, meaning that the price of each stock is multiplied by that company's shares outstanding in order to calculate the current Index level. The Index will be calculated on a real-time basis using last sale prices.

As of August 31, 1992, the Index was at 187.20. As of August 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $14.75 billion to a low of $1.25 billion, with the mean and median being $4.79 billion and $3.55 billion respectively. The market capitalization of all the stocks in the Index was $119.841 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 346.25 million shares to a low of 40.261 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $72.53 to a low of $15.91. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 1,228,379 shares per day to a low of 104,390 shares per day, with the mean and median being 371,314 and 339,521 shares, respectively. lastly, no one stock comprised more than 12.31% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 44.18% of the Index's value. The percentage weighing of the lowest weighted stock was 1.05% of the Index and the percentage weighting of the five smallest issues in the Index accounted for 7.77% of the Index's value.

C. Maintenance

The Index will be maintained by S&P and the CBOE has represented that it will not influence any S&P decisions concerning maintenance of the Index. To maintain continuity in the Index following an adjustment to a component security, the divisor will be adjusted. Changes which may result in divisor adjustments include, but are not limited to, spin-offs, certain rights issuances, mergers, and acquisitions involving component securities.

If it becomes necessary for S&P to remove a Banking Index component stock from the S&P 500 Index (generally due to a takeover or merger), the stock will also be removed from the Banking Index. Because the S&P is not required to replace the stock chosen as a replacement for the S&P 500 Index with another banking industry, the replacement stock may or may not be in the banking industry. As a result, the number of stocks in the S&P Banking Index may increase or decrease due to changes in the composition of the S&P 500.[8]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this rule filing, the rules in chapter XXIV of the CBOE Rules will be applicable to S&P Banking Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100,

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1992).

[3] On September 28, 1992 the CBOE amended the proposal to clarify and confirm that S&P Banking Index options will be A.M. settled options subject to the provisions of CBOE Rule 24.9(e) ("Amendment No. 1"). See File No. SR–CBOE–92–25, Amendment No. 1. On November 9, 1992, the proposal was amended to reflect changes to the CBOE rules made by the effectiveness of SR–CBOE–91–51 (CBOE Biotech Index, approved September 28, 1992) and SR–CBOE–92–32 (non-substantive amendments to Chapter XXIV of the CBOE rules, effective upon filing) ("Amendment No. 2"). See File No. SR–CBOE–92–25, Amendment No. 2. See *infra* note 5.

[4] See Securities Exchange Act Release No. 31446, 57 FR 54872 (November 20, 1992).

[5] More specifically, on April 20, 1993 the proposal was amended to: (1) Require as a maintenance standard that, if the Index increases to more than thirty-three stocks or decreases to less than seventeen stocks, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change; (2) require as a maintenance standard that, if less than 90% of the Index's weighting becomes comprised of stocks that are not eligible for standardized options trading on the CBOE pursuant to CBOE Rule 5.3, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to Section 19(b) of the Act reflecting such change; and (3) clarify that the current and closing index value for reduced-value long-term options based on the Index will be computed by dividing the value of the full-value Index by ten and rounding the resulting figure to the nearest one-hundredth ("Amendment No. 3"). See File No. SR–CBOE–92–25, Amendment No. 3.

[6] LEAPS is an acronym for Long-Term Equity Anticipation Securities. LEAPS are long term index option series that expire from twelve to thirty-six months from their date of issuance. See CBOE Rule 24.9(b)(1).

[7] According to the CBOE the S&P Banking Index represents a segment of the U.S. equity market that is not currently represented in the derivative markets and, as such, the CBOE concludes, should offer investors a low-cost means to achieve diversification of their portfolios toward or awey from the banking industry. The CBOE believes the Index will provide retail and institutional investors with a means to benefit from their forecasts of that industry's market performance. Options on the Index also can be utilized by portfolio managers and investors to provide a performance measure and evaluation guide for passively or actively managed banking industry funds, as well as a means of hedging the risks of investing in the banking industry.

[8] *See supra* note 5. If the Index increases to more than thirty-three stocks or decreases to less than seventeen stocks, no new series of Index options will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change.

VOL 58 ISS 86 MY 6 1993 UMI

the FT–SE (U.K.) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in Chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related industries. An industry index contract such as the S&P Banking Index option will, therefore, be deemed to be "narrow-based" for purposes of the position limit requirements of Rule 24.4A.

E. Calculation of the Index

Similar to the broad-based S&P 500 Stock Index, the S&P Banking Index is capitalization-weighted and reflects changes in the total capitalization of the component stocks relative to the capitalization of the Index on the base date. The Index is calculated by taking the summation of capitalizations of the component stocks (share price multiplied by the number of shares outstanding) and dividing the result by the divisor.

The Index will be calculated continuously by S&P or its designee and will be disseminated to the Options Price Reporting Authority ("OPRA") every fifteen seconds by the CBOE. If a component stock is not currently being traded, the most recently traded price will be used in the index calculation.[9]

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (i.e., Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[10]

F. Contract Specifications

The proposed options on the Index will be cash-settled, European-style options.[11] Standard options trading hours (8:30 a.m. to 3:10 p.m. Central Standard time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[12] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several index LEAP series that expire from twelve to thirty-six months from the date of issuance.

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full-Value or Reduced-Value Banking Index

The proposal provides that the Exchange may list long-term Index options that expire from 12 to 36 months from listing on the full-value Banking Index or a reduced-value Banking Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Banking LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, an Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced-value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced-value Index LEAPS will be no less than $2.50 instead of $5.00.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value S&P 100 and 500 Indexes ("OEX" and "SPX," respectively) [13] will be applicable to the trading of reduced-value Index LEAPS. For example, Index LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Moreover, the proposal provides that either full-value or reduced-value Index LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential and continuity rules will not apply to the trading of the full-value or reduced-value Index LEAPS until their time to expiration is less than 12 months. The strike price interval for reduced-value Index LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional LEAPS series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Banking Index options and reduced-value Banking Index options. Specifically, Exchange rules governing margin requirements,[14] position and exercise limits,[15] and trading halt

[9] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, S&P will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[10] See *supra* note 9.

[11] A European-style option can be exercised only during a specified period before the option expires.

[12] For a description of the strike price intervals for reduced value Index options and long-term Index options, see section G, *infra*.

[13] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[14] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) For short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value, and (2) for long term options positions, 100% of the options premium paid.

[15] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 8,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5, that a lower limit is warranted.

procedures [16] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that, for purposes of determining whether a given position in reduced-value Index options complies with applicable position and exercise limits, positions in reduced-value Index options will be aggregated with positions in the full-value Index options. For these purposes, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in full-value and reduced-value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[17]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[18] Specifically, the Commission finds that the trading of Banking Index options, including full-value and reduced-value Banking LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the banking industry.[19] The trading of options on the Banking Index, including full-value and reduced-value LEAPS on the Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Banking Index and reduced-value Banking Index are narrow-based indices. The Banking Index is comprised of only twenty-five stocks, all of which are within one industry—the banking industry. In addition, the basic character of the reduced-value Banking Index, which is comprised of the same component securities as the Banking Index and calculated by dividing the Banking Index value by ten, is essentially identical to the Banking Index.[20] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options.[21]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index. First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 371,314 and 339,521 shares, respectively.[22] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $14.75 billion to a low of $1.25 billion as of August 31, 1992, with the mean and median being $4.79 billion and $3.55 billion, respectively. Third, although the Index is only comprised of twenty-five stocks, no one particular stock or group of stocks dominates the Index. Specifically, no one stock comprises more than 12.31% of the Index's total value and the percentage weighting of the three largest issues in the Index account for 30.41% of the Index's value.[23] Fourth, all of the component stocks in the Index currently are eligible for options trading.[24] The proposed CBOE maintenance requirement that 90% of the weighting of the Index be comprised of stocks that are eligible for options trading will ensure that the Index is almost completely comprised of options eligible stocks. Fifth, if S&P increases the number of component stocks to more than thirty-three or decreases that number to less than seventeen, the CBOE will be required to seek Commission approval pursuant to section 19(b)(2) of the Act before listing new strike price or expiration month series of Banking Index options. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Banking Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Banking Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Banking Index options (including full-value and reduced-value Banking LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of

[16] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

[17] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[18] 15 U.S.C. 78f(b)(5) (1988).

[19] The Commission also believes that the trading of the Index options and Index LEAPS will allow investors holding positions in some or all of the underlying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes that the reduced-value Index LEAPS, that will be traded on an Index computed at one-tenth the value of the Banking Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[20] See generally Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index rather than a narrow-based index).

[21] See *supra* notes 14 through 16, and accompanying text.

[22] In addition, for the six-month period between March and August 1992, all of the companies comprising the Index had an average daily trading volume greater than 104,390 shares per day.

[23] For an index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the Index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[24] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See CBOE Rule 5.3.

VOL 58 ISS 86 MY 6 1993 UMI

options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Banking Index options and Banking Index LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[25] In this regard, the CBOE, NYSE, and NASD are all members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[26]

D. Market Impact

The Commission believes that the listing and trading of Banking Index options, including full-value and reduced-value Index LEAPS on the CBOE will not adversely impact the underlying securities markets.[27] First, as described above, no one stock or group of stocks dominates the Index. Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Third, the 8,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Banking Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[28]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the rounding of the current and closing Index value for purposes of Index LEAPS trading to the nearest one-hundredth. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to section 19(b)(2) of the Act if the number of component securities in the Index changes to either greater than thirty-three or fewer than seventeen. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[29] that the proposed rule change (SR–CBOE–92–25), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[30]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[25] See Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

[26] See *supra* note 17. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing banking industry stocks. If the composition of the Index would change so that greater than 20% of the Index was represented by ADRs whose underlying securities were not subject to a comprehensive surveillance sharing arrangement, then it would be difficult for the Commission to reach the conclusions reached in this order and the Commission would have to determine whether it would be suitable to continue to trade options on the Index. The CBOE should, accordingly, notify the Commission immediately if more than twenty percent of the numerical value of the Index is represented by ADRs whose underlying securities are not subject to a comprehensive surveillance sharing agreement, so that the Commission can decide whether trading on the Index should be ceased or phased out.

[27] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and Index LEAPS. See Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1993 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

Self-Regulatory Organizations; Chicago Board Options Exchange

April 29, 1993.

In the Matter of Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 3 to a Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing of Options and Long-Term Options on the S&P Insurance Index and Long-Term Options on a Reduced-Value Insurance Index.

I. Introduction

On September 18, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the listing and trading of index options on the Standard & Poor's Corporation ("S&P") Insurance Index ("Insurance Index" or "Index"). Notice of the proposal, as amended through November 9, 1992,[3] appeared in the **Federal Register** on November 20, 1992.[4] No comment letters were received on the proposed rule change. Thereafter, the CBOE amended the proposal to clarify, among other things, several proposed listing and maintenance standards.[5] This order approves the Exchange's proposal, as amended.

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1992).

[3] On September 28, 1992 the CBOE amended the proposal to clarify and confirm that S&P Insurance Index options will be A.M. settled options subject to the provisions of CBOE Rule 24.9(e) ("Amendment No. 1"). See File No. SR–CBOE–92–28, Amendment No. 1. On November 9, 1992, the proposal was amended to reflect changes to the CBOE rules made by the effectiveness of SR–CBOE–91–51 (CBOE Biotech Index, approved September 28, 1992) and SR–CBOE–92–32 (non-substantive amendments to Chapter XXIV of the CBOE rules, effective upon filing) ("Amendment No. 2"). See File No. SR–CBOE–92–28, Amendment No. 2. See *infra* note 5.

[4] See Securities Exchange Act Release No. 31449, 57 FR 54877 (November 20, 1992).

[5] More specifically, on April 20, 1993 the proposal was amended to: (1) Require as a maintenance standard that, if the Index increases to more than twenty-one stocks or decreases to less than eleven stocks, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change, (2) require as a maintenance standard that, if less than 90% of the Index's weighting becomes comprised of stocks that are not eligible for standardized options trading on the CBOE pursuant to CBOE Rule 5.3, no new series of options based on the Index will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change, and (3) clarify that the current and closing Index value for reduced-value long-term options based on the Index will be computed by dividing the value of the full-value Index by ten and rounding the resulting figure to the nearest one-hundredth ("Amendment No. 3"). See File No. SR–CBOE–92–28, Amendment No. 3.

[6] LEAPS in an acronym for Long-Term Equity Anticipation Securities. LEAPS are long term index option series that expire from twelve to thirty-six months from their date of issuance. See CBOE Rule 24.9(b)(1).

II. Description of Proposal

A. General

The CBOE proposes to list and trade options on the Insurance Index, an index developed by S&P. The CBOE also proposes to list either long-term options on the full-value Index or long-term options on a reduced-value Index that will be computed at one-tenth of the value of the Insurance Index ("Insurance LEAPS" or "Index LEAPS").[6] Insurance LEAPS will trade independent of and in addition to regular Insurance Index options traded on the Exchange.[7]

B. Composition of the Index

The Index is based on sixteen life, property and casualty, and multiline insurance industry stocks that are included in the S&P 500 Index. Fifteen of those stocks currently trade on the New York Stock Exchange ("NYSE") and one is a national market system ("NMS") security that currently trades through the facilities of the National Association of Securities Dealers Automated Quotation System ("NASDAQ–NMS"). The Index is capitalization-weighted, meaning that the price of each stock is multiplied by that company's shares outstanding in order to calculate the current Index level. The Index will be calculated on a real-time basis using last sale prices.

As of August 31, 1992, the Index was at 197.43. As of August 31, 1992, the market capitalizations of the individual stocks in the Index ranged from a high of $20.43 billion to a low of $715 million, with the mean and median being $4.45 billion and $3.26 billion, respectively. the market capitalization of all the stocks in the Index was $71.166 billion. The total number of shares outstanding for the stocks in the Index ranged from a high of 212.270 million shares to a low of 15.025 million shares. The average price per share of the stocks in the Index, for a six-month period between March and August 1992, ranged from a high of $88.59 to a low of $11.56. In addition, the average daily trading volume of the stocks in the Index, for the same six-month period, ranged from a high of 287,928 shares per day to a low of 15,388 shares per day, with the mean and median being 140,159 and 177,613 shares, respectively. Lastly, no one stock comprised more than 28.71% of the Index's total value and the percentage weighting of the five largest issues in the Index accounted for 62.8% of the Index's value. The percentage weighting of the lowest weighted stock was 1.01% of the Index and the percentage weighing of the five smallest issues in the Index accounted for 10.58% of the Index's value.

C. Maintenance

The Index will be maintained by S&P and the CBOE has represented that it will not influence any S&P decisions concerning maintenance of the Index. To maintain continuity in the Index following an adjustment to a component security, the divisor will be adjusted. Changes which may result in divisor adjustments include, but are not limited to, spin-offs, certain rights issuances, mergers, and acquisitions involving component securities.

If it becomes necessary for S&P to remove a Insurance Index component stock from the S&P 500 Index (generally due to a takeover or merger), the stock will also be removed from the Insurance Index. Because the S&P is not required to replace the stock chosen as a replacement for the S&P 500 Index with another insurance industry, the replacement stock may or may not be in the insurance industry. As a result, the number of stocks in the S&P Insurance Index may increase or decrease due to changes in the composition of the S&P 500.[8]

D. Applicability of CBOE Rules Regarding Index Options

Except as modified by this rule filing, the rules in chapter XXIV of the CBOE Rules will be applicable to S&P Insurance Index options. Those rules address, among other things, the applicable position and exercise limits, policies regarding trading halts and suspensions, and margin treatment for both broad and narrow based index options.

The CBOE is amending Rule 24.1 to make clear that a "market index," a term which includes the S&P 500, S&P 100, the FT–SE (U.K.) 100, and the FT–SE Eurotrack 200 indexes, also is a "broad-based index" within the meaning of the rules in Chapter XXIV of the CBOE Rules, including Rule 24.4 which relates to position limits for broad-based index options. The amendment to Rule 24.1 further provides that the terms "narrow-based index" and the previously defined "industry index" both mean an index designed to be representative of a particular industry or a group of related industries. An industry index contract such as the S&P Insurance Index option will, therefore, be deemed to be "narrow-based" for purposes of the

[7] According to the CBOE, the S&P Insurance Index represents a segment of the U.S. equity market that is not currently represented in the derivative markets and, as such, the CBOE concludes, should offer investors a low-cost means to achieve diversification of their portfolios toward or away from the insurance industry. The CBOE believes the Index will provide retail and institutional investors with a means to benefit from their forecasts of that industry's market performance. Options on the Index also can be utilized by portfolio managers and investors to provide a performance measure and evaluation guide for passively or actively managed insurance industry funds, as well as a means of hedging the risks of investing in the insurance industry.

[8] See *supra* note 5. If the Index increases to more than twenty-one stocks or decreases to less than eleven stocks, no new series of Index options will be listed for trading unless and until the Commission approves a rule filing pursuant to section 19(b) of the Act reflecting such change.

VOL 58 ISS 86 MY 6 1993 UMI

position limit requirements of Rule 24.4A.

E. Calculation of the Index

Similar to the broad-based S&P 500 Stock Index, the S&P Insurance Index is capitalization-weighted and reflects changes in the total capitalization of the component stocks relative to the capitalization of the Index on the base date. The Index is calculated by taking the summation of capitalizations of the component stocks (share price multiplied by the number of shares outstanding) and dividing the result by the divisor.

The Index will be calculated continuously by S&P or its designee and will be disseminated to the Options Price Reporting Authority ("OPRA") every fifteen seconds by the CBOE. If a component stock is not currently being traded, the most recently traded price will be used in the Index calculation.[9]

The Index value for purposes of settling outstanding Index options contracts upon expiration will be calculated based upon the regular way opening sale prices for each of the Index's component stocks in their primary market on the last trading day prior to expiration. In the case of securities traded through the NASDAQ–NMS system, the first reported sale price will be used. Once all of the component stocks have opened, the value of the Index will be determined and that value will be used as the final settlement value for expiring Index options contracts. If any of the component stocks do not open for trading on the last trading day before expiration, then the prior trading day's (*i.e.*, Thursday's) last sale price will be used in the Index calculation. In this regard, before deciding to use Thursday's closing value of a component stock for purposes of determining the settlement value of the Index, the CBOE will wait until the end of the trading day on expiration Friday.[10]

F. Contract Specifications

The proposed options on the Index will be cashed-settled, European-style options.[11] Standard options trading hours (8:30 a.m. to 3:10 p.m. Central Standard time) will apply to the contracts. The Index multiplier will be 100. The strike price interval will be $5.00 for full-value Index options with a duration of one year or less to expiration.[12] In addition, pursuant to CBOE Rule 24.9, there will be five expiration months outstanding at any given time. Specifically, there will be three expiration months from the March, June, September, and December cycle plus two additional near-term months so that the two nearest term months will always be available. As described in more detail below, the Exchange also intends to list several Index LEAP series that expire from twelve to thirty-six months from the date of issuance.

Lastly, the options on the Index will expire on the Saturday following the third Friday of the expiration month ("Expiration Friday"). Accordingly, since options on the Index will settle based upon opening prices of the component stocks on the last trading day before expiration (normally a Friday), the last trading day for an expiring Index option series will normally be the second to the last business day before expiration (normally a Thursday).

G. Listing of Long-Term Options on the Full-Value or Reduced-Value Insurance Index

The proposal provides that the Exchange may list long-term Index options that expire from 12 to 36 months from listing on the full-value Insurance Index or a reduced-value Insurance Index that will be computed at one-tenth the value of the full-value Index. The current and closing Index value for reduced-value Insurance LEAPS will be computed by dividing the value of the full-value Index by 10 and rounding the resulting figure to the nearest one-hundredth. For example, an Index value of 185.46 would be 18.55 for the Index LEAPS and 185.43 would become 18.54. The reduced-value LEAPS will have a European-style exercise and will be subject to the same rules that govern the trading of all the Exchange's index options, including sales practice rules, margin requirements and floor trading procedures. The strike price interval for the reduced-value Index LEAPS will be no less than $2.50 instead of $5.00.

Under the proposal, the same rules which are applicable to the trading of long-term, reduced-value S&P 100 and 500 Indexes ("OEX" and "SPX," respectively)[13] will be applicable to the trading of reduced-value Index LEAPS. For example, Index LEAPS may expire from 12 to 36 months from the date of listing, and there may be up to six expiration months beyond one year to expiration. Moreover, the proposal provides that either full-value or reduced-value Index LEAPS may be issued at six month intervals and that new strike prices will either be near or bracketing the current Index value. Strike price interval, bid/ask differential and continuity rules will not apply to the trading of the full-value or reduced-value Index LEAPS until their time to expiration is less than 12 months. The strike price interval for reduced-value Index LEAPS will be no less than $2.50, instead of $5.00. Lastly, the proposal provides that additional LEAPS series may be added when the value of the underlying Index increases or decreases by ten to fifteen percent. These provisions currently apply to the listing and trading of reduced-value OEX and SPX LEAPS.

H. Position and Exercise Limits, Margin Requirements, and Trading Halts

Because the Index is classified as an Industry Index under CBOE rules, Exchange rules that are applicable to the trading of options on narrow-based indexes will apply to the trading of Insurance Index options and reduced-value Insurance Index options. Specifically, Exchange rules governing margin requirements,[14] position and exercise limits,[15] and trading halt procedures[16] that are applicable to the trading of narrow-based index options will apply to options traded on the Index. The proposal further provides that, for purposes of determining whether a given position in reduced-value Index options complies with applicable position and exercise limits, positions in reduced-value Index options will be aggregated with positions in the full-value Index options. For these purposes, ten reduced-value contracts will equal one full-value contract for purposes of aggregating these positions.

I. Surveillance

Surveillance procedures currently used to monitor trading in each of the Exchange's other index options will also be used to monitor trading in full-value and reduced-value Index options. These procedures include complete access to trading activity in the underlying securities. Further, the Intermarket Surveillance Group Agreement, dated July 14, 1983, as amended on January 29, 1990, will be applicable to the trading of options on the Index.[17]

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).[18] Specifically, the Commission finds that the trading of Insurance Index options, including full-value and reduced-value Insurance LEAPS, will serve to promote the public interest and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with securities in the insurance industry.[19] The trading of options on the Insurance Index, including full-value and reduced-value LEAPS on the Index, however, raises several concerns, namely issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the CBOE adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that the Insurance Index and reduced-value Insurance Index are narrow-based indices. The Insurance Index is comprised of only sixteen stocks, all of which are within one industry—the insurance industry. In addition, the basic character of the reduced-value Insurance Index, which is comprised of the same component securities as the Insurance Index and calculated by dividing the Insurance Index value by ten, is essentially identical to the Insurance Index.[20] Accordingly, the Commission believes it is appropriate for the CBOE to apply its rules governing narrow-based index options to trading in the Index options.[21]

The Commission also finds that the large capitalizations, liquid markets, and relative weightings of the Index's component stocks significantly minimize the potential for manipulation of the Index: First, the overwhelming majority of the stocks that comprise the Index are actively traded, with a mean and median average daily trading volume of 140,159 and 177,613 shares, respectively.[22] Second, the market capitalizations of the stocks in the Index are very large, ranging from a high of $20.43 billion to a low of $715 million as of August 31, 1992, with the mean and median being $4.45 billion and $3.26 billion, respectively. Third, although the Index is only comprised of sixteen stocks, no one particular stock or group of stocks dominates the Index. Specifically, no one stock comprises more than 28.71% of the Index's total value and the percentage weighting of the three largest issues in the Index account for 49.16% of the Index's value.[23] Fourth, fifteen of the sixteen stocks in the Index (representing 99% of the weighting of the Index) currently are eligible for options trading.[24] The proposed CBOE maintenance requirement that 90% of the weighting of the Index be comprised of stocks that are eligible for options trading will ensure that the Index is almost completely comprised of options eligible stocks. Fifth, if S&P increases the number of component stocks to more than twenty-one or decreases that number to less than eleven, the CBOE will be required to seek Commission approval pursuant to section 19(b)(2) of the Act before listing new strike price or expiration month series of Insurance Index options. This will help protect against material changes in the composition and design of the Index that might adversely affect the CBOE's obligations to protect investors and to maintain fair and orderly markets in Insurance Index options. Finally, the Commission believes that the expense of attempting to manipulate the value of the Insurance Index in any significant way through trading in component stocks (or options on those stocks) coupled with, as discussed below, existing mechanisms to monitor trading activity in those securities, will help deter such illegal activity.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Insurance Index options (including full-value and reduced-value Insurance LEAPS), can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of

[9] For purposes of the daily dissemination of the Index value, if a stock included in the Index has not opened for trading, S&P will use the closing value of that stock on the prior trading day when calculating the value of the Index, until the stock opens for trading.

[10] See *supra* note 9.

[11] A European-style option can be exercised only during a specified period before the option expires.

[12] For a description of the strike price intervals for reduced-value Index options and long-term Index options, See Section G, *infra*.

[13] See Securities Exchange Act Release No. 28686, 55 FR 51517 (December 14, 1990).

[14] Pursuant to CBOE Rule 24.11, the margin requirements for the Index options will be: (1) For short options positions, 100% of the current market value of the options contract plus 20% of the underlying aggregate Index value, less any out-of-the-money amount, with a minimum requirement of the options premium plus 10% of the underlying Index value; and (2) for long term options positions, 100% of the options premium paid.

[15] Pursuant to CBOE Rules 24.4A and 24.5, respectively, the position and exercise limits for the Index options will be 6,000 contracts, unless the Exchange determines, pursuant to Rules 24.4A and 24.5 that a lower limit is warranted.

[16] Pursuant to CBOE Rule 24.7, the trading on the CBOE of Index options may be halted or suspended whenever trading in underlying securities whose weighted value represents more than 20% of the Index value are halted or suspended.

[17] ISG was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. See Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. See Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990.

[18] 15 U.S.C. 78f(b)(5) (1988).

[19] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options on the Insurance Index will provide investors with a hedging vehicle that should reflect the overall movement of the stocks comprising the insurance industry in the U.S. stock markets. The Commission also believes that these Index options will provide investors with a means by which to make investment decisions in the insurance industry sector of the U.S. stock markets, allowing them to establish positions or increase existing positions in such markets in a cost effective manner. The Commission also believes that the trading of the Index options and Index LEAPS will allow investors holding positions in some or all of the underlying securities in the Index to hedge the risks associated with their portfolios more efficiently and effectively. Moreover, the Commission believes that the reduced-value Index LEAPS, that will be traded on an index computed at one-tenth the value of the Insurance Index, will serve the needs of retail investors by providing them with the opportunity to use a long-term option to hedge their portfolios from long-term market moves at a reduced cost.

[20] See generally Securities Exchange Act Release No. 29994, 56 FR 63536 (December 4, 1991) (order designating the PSE Technology Index as a broad-based index rather than a narrow-based index).

[21] See *supra* notes 14 through 16, and accompanying text.

[22] In addition, for the six-month period between March and August 1992, all of the companies comprising the Index had an average daily trading volume greater than 15,388 shares per day.

[23] For an index with a significantly greater number of stocks than fifteen issues, the Commission might come to a different conclusion if only three stocks accounted for more than 55% of the index's weighting. Further, if an index contained only a few stocks, the Commission might question whether it can be traded as an index product.

[24] The CBOE's options listing standards, which are uniform among the options exchanges, provide that a security underlying an option must, among other things, meet the following requirements: (1) The public float must be at least 7,000,000; (2) there must be a minimum of 2,000 stockholders; (3) trading volume must have been at least 2.4 million over the preceding twelve months; and (4) the market price must have been at least $7.50 for a majority of the business days during the preceding three calendar months. See CBOE Rule 5.3.

options trading are engaged in such trading; and (3) special compliance procedures are applicable to options accounts. Accordingly, because the Index options and Index LEAPS will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Insurance Index options and Insurance Index LEAPS.

C. Surveillance

The Commission believes that a surveillance sharing agreement between an exchange proposing to list a stock index derivative product and the exchange(s) trading the stocks underlying the derivative product is an important measure for surveillance of the derivative and underlying securities markets. Such agreements ensure the availability of information necessary to detect and deter potential manipulations and other trading abuses, thereby making the stock index product less readily susceptible to manipulation.[25] In this regard, the CBOE, NYSE, and NASD are all members of the Intermarket Surveillance Group ("ISG"), which provides for the exchange of all necessary surveillance information.[26]

D. Market Impact

The Commission believes that the listing and trading of Insurance Index options, including full-value and reduced-value Index LEAPS on the CBOE will not adversely impact the underlying securities markets.[27] First, as described above, no one stock or group of stocks dominates the Index. Second, because 90% of the numerical value of the Index must be accounted for by stocks that meet the options listing standards, the component securities generally will be actively-traded, highly-capitalized stocks. Third, the 6,000 contract position and exercise limits will serve to minimize potential manipulation and market impact concerns. Fourth, the risk to investors of contra-party non-performance will be minimized because the Index options and Index LEAPS will be issued and guaranteed by the Options Clearing Corporation just like any other standardized option traded in the United States.

Lastly, the Commission believes that settling expiring Insurance Index options (including full-value and reduced-value Index LEAPS) based on the opening prices of component securities is consistent with the Act. As noted in other contexts, valuing options for exercise settlement on expiration based on opening prices rather than closing prices may help reduce adverse effects on markets for securities underlying options on the Index.[28]

The Commission finds good cause for approving Amendment No. 3 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 3 provides for the rounding of the current and closing Index value, for purposes of Index LEAPS trading, to the nearest one-hundredth. Amendment No. 3 also requires that at least 90% of the Index's numerical value be accounted for by stocks that meet the options listing standards and that the CBOE submit a rule filing pursuant to section 19(b)(2) of the Act if the number of component securities in the Index changes to either greater than twenty-one or fewer than eleven. The Commission believes that these modifications strengthen the integrity of the Index and do not raise new issues. Moreover, the Commission finds that these modifications to the proposal are designed to reduce the likelihood that the Index could be susceptible to manipulation. Therefore, the Commission believes it is consistent with section 6(b)(5) of the Act to approve Amendment No. 3 to the CBOE's proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 3 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1993.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[29] that the proposed rule change (SR–CBOE–92–28), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[30]

Jonathan G. Katz,

Secretary.

[FR Doc. 93–10723 Filed 5–5–93; 8:45 am]

BILLING CODE 8010–01–M

[25] See Securities Exchange Act Release No. 31243, 57 FR 45849 (October 5, 1992).

[26] See supra note 17. Although the Index currently does not contain ADRs, the proposal provides that the Index could contain ADRs representing insurance industry stocks. If the composition of the Index would change so that greater than 20% of the Index was represented by ADRs whose underlying securities were not subject to a comprehensive surveillance sharing arrangement, then it would be difficult for the Commission to reach the conclusions reached in this order and the Commission would have to determine whether it would be suitable to continue to trade options on the Index. The CBOE should, accordingly, notify the Commission immediately if more than twenty percent of the numerical value of the Index is represented by ADRs whose underlying securities are not subject to a comprehensive surveillance sharing agreement, so that the Commission can decide whether trading on the Index should be ceased or phased out.

[27] In addition, the CBOE has represented that the CBOE and the Options Price Reporting Authority ("OPRA") have the necessary systems capacity to support those new series of index options that would result from the introduction of Index options and Index LEAPS. See Letter from Charles J. Henry, President and Chief Operating Officer, CBOE, to Sharon Lawson, Assistant Director, Division of Market Regulation, SEC, dated March 22, 1993 and memorandum from Joe Corrigan, Executive Director, OPRA, to Eileen Smith, CBOE, dated March 19, 1993.

[Release No. 34–32230; File No. SR–PHILADEP–92–04]

Self-Regulatory Organizations; Philadelphia Depository Trust Company; Proposed Rule Change Relating to Definition of Signature Guarantee

April 27, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 22, 1992, the Philadelphia Depository Trust Company ("PHILADEP") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by PHILADEP. PHILADEP amended the filing to correct citations contained in the original filing, to revise the language of its Rule 1 describing an acceptable signature guarantee, and to provide additional information regarding the purpose of certain amendments.[2] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

PHILADEP proposes to amend PHILADEP Rule 1 to define "signature guarantee" as a medallion or stamp of a "signature guarantee program" as defined in Rule 17Ad–15 under the Act.[3] The rule change also would clarify the language in PHILADEP Rule 1 regarding the warranties provided by a signature guarantee.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, PHILADEP included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. PHILADEP has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to amend the definition of "signature guarantee" so that a medallion imprint or stamp evidencing participation or membership in a "signature guarantee program" as defined by Rule 17Ad–15 will constitute a signature guarantee acceptable to PHILADEP. Such programs are being offered by entities unaffiliated with PHILADEP or its parent corporation, the Philadelphia Stock Exchange, Inc. ("PHLX").

In addition, the proposed rule change adds language, based on the Uniform Commercial Code Section 8–312, stating that a signature guarantee is a warranty of the genuineness of the signature, the appropriateness of the endorser, and the legal capacity of the endorser. This addition is made in an effort to create a more uniform standard in the securities industry.[4]

Philadep believes the proposed rule change is consistent with the Act, in general, and with section 17A(b)(3)(F) of the Act, in particular, because it is designed to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions, and to remove impediments and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions.

The proposed rule change also is consistent with the requirements of section 17A(a)(1) of the Act because it should foster the prompt and accurate clearance and settlement of securities transactions by facilitating the signature guarantee process and related activities. In addition, the proposal is consistent with section 17A(d)(5) of the Act, which requires transfer agents to comply with Commission rules regarding the acceptance or rejection of signature guarantees and Rule 17Ad–15 thereunder.

B. Self-Regulatory Organization's Statement on Burden on Competition

PHILADEP does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such date if it finds such longer period: (i) As the Commission may designate up to ninety days of such date if it finds such longer period is appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve the proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR-PHILADEP-92–04 and should be submitted by May 27, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Proposed Rule Change Relating to Requirement that Members Become Participants in a "Signature Guarantee Program"

April 27, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 21, 1992, the Philadelphia Stock Exchange, Inc. ("PHLX") filed with the Securities and Exchange Commission ("Commission") a proposed rule change that requires members to participate in a "signature guarantee program" and defined in Rule 17Ad–15(g)(3) under the Act [2] and

[1] 15 U.S.C. 78s(b)(1).

eliminates PHLX's existing signature guarantee program. Subsequently, PHLX amended the filing to eliminate two additional sections deemed obsolete, to correct citations contained in the original filing, to provide a description of the existing signature guarantee program and to provide additional information regarding the purpose of certain amendments.[3] The proposed rule change, as amended, is described in Items I, II, and III below, which Items have been prepared primarily by PHLX. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

PHLX proposes to amend PHLX Rules 325 through 331 and 338 through 340 in order to comply with the requirements of Rule 17Ad–15 adopted under the Act pertaining to signature guarantees. The proposed rule change also deletes as obsolete or unnecessary PHLX Rules 334 through 336 and corollary forms 9 and 10.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, PHLX included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. PHLX has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to eliminate PHLX's signature guarantee program and to enable PHLX to convert its Rules respecting signatures effecting assignments, powers of substitutions, signature guarantees, and other certifications and guarantees incident to the transfer, payment, exchange, purchase or delivery of certificates representing securities (including, but not limited to, erasure guarantees, one-and-the-same guarantees and situs certifications) to require members and member organizations to use a medallion imprint or stamp which signifies their participation in a "signature guarantee program" as defined by Rule 17Ad–15 (a "Rule 17Ad–15 Signature Guarantee Program"). Such programs are being offered and administered by entities unaffiliated with PHLX.

In order to facilitate compliance with transfer agents' requirements for verification of signatures on guarantees made by member organizations, PHLX and its subsidiary, the Stock Clearing Corporation of Philadelphia ("SCCP"), jointly administered a signature guarantee program for their members. PHLX and SCCP members could subscribe to the joint PHLX/SCCP signature guarantee program, in an arrangement under which PHLX and SCCP provided sample signatures to transfer agents of certain authorized officers and/or employees under powers of attorney filed with PHLX and SCCP under PHLX Rules 327 and 340 and guaranteed the signature to any assignment or power of substitution executed by such authorized persons. The Offices of the Secretary of PHLX and SCCP required each member of the program to execute and submit an Agreement regarding Signature Guarantees, a power of attorney providing the name and sample signature of each authorized signatory, and certified resolutions of the Board of Directors appointing its authorized signatory. Under the Agreement regarding Signature Guarantees, the participant agrees to indemnify and hold harmless PHLX and SCCP for any loss resulting from its guarantee. The power of attorney remained in effect until written notice of revocation was received by SCCP. SCCP maintained an extensive file of sample authorized signatures provided by participating organizations and made these samples available to transfer agents. The SCCP transfer department notified issuers and transfer agents of changes in authorized signatories on behalf of member organizations. This program enabled members to send listed or over the counter securities directly to transfer agents without having each certificate individually guaranteed by a New York Stock Exchange member organization, a national bank, or the SCCP transfer department. PHLX's signature guarantee program had been approved by the Stock Transfer Association. Additional insurance coverage was maintained by PHLX under a separate binder to its blanket bond coverage for SCCP for signature guarantee purposes in the amount of 25 million dollars for a single loss and 50 million dollars aggregate to cover certificates on which the signature (or authorized power of attorney) was guaranteed by a participating member of the signature guarantee program.

Pursuant to Rule 17Ad–15, recently adopted under the Act, transfer agents were empowered to establish guidelines for acceptable signature guarantee programs as contemplated by that Rule. Non-participants in such a signature guarantee program risk rejection of transfers. PHLX does not desire to administer a Rule 17Ad–15 Signature Guarantee Program and has determined that its signature guarantee program would not qualify under Rule 17Ad–15. PHLX has notified all members and participants in its signature guarantee program that as of October 26, 1992, the PHLX administered program would no longer be in compliance with Rule 17Ad–15 and PHLX was therefore discontinuing the program. It should be noted that PHLX's signature guarantee program was not documented in PHLX's rules. The references to the former signature guarantee program were contained in Rule 1 of the SCCP's Rules and Rule 1 of the Philadelphia Depository Trust Company's ("Philadep") Rules. Each of these organizations have filed with the Commission proposals to amend their respective Rule 1.

Incidental to the foregoing, the rule change also reflects the restatement of certain PHLX rules relating to guarantees, transfers and deliveries of securities. Specifically, PHLX Rules 327, 338 and 339 have been amended to require members to use a medallion or stamp of a Rule 17Ad–15 Signature Guarantee Program to guarantee signatures, and to define a signature guarantee acceptable to PHLX as a medallion or stamp of a Rule 17Ad–15 Signature Guarantee Program. PHLX Rules 325, 328, 329, 330 and 331 have been amended to add cross references to the PHLX rules defining an acceptable signature guarantee or to substitute language regarding the use of a medallion or stamp of a Rule 17Ad–15 Signature Guarantee Program. In addition, the proposal eliminates certain unnecessary or obsolete rules[4] and, where necessary in the interests of uniformity in the industry, amends certain PHLX rules in this area to conform to the corresponding rules of

[3] Letter from Murray Ross, Secretary, Philadelphia Stock Exchange, to Christine Sibille, Attorney, Commission (January 26, 1993); Letter from Murray Ross, Secretary, Philadelphia Stock Exchange, to Christine Sibille, Attorney, Commission (February 9, 1993).

[4] PHLX Rules 334 through 336 and corollary forms 9 and 10, which are designed to require a married woman to obtain the consent of her husband to the transfer of her property, are being deleted as obsolete.

the New York Stock Exchange ("NYSE").[5]

The proposed rule change is consistent with the Act, in general, and in furtherance of section 6(b)(5), in particular, in that it generally is designed to prevent fraudulent and manipulative acts and practices, to foster coordination among persons engaged in regulating, clearing, settling, and processing information with respect to transactions in securities, and to remove impediments and perfect the mechanism of a free and open market.

The proposed rule change also is consistent with the requirements of section 17A of the Act in that it fosters the prompt and accurate clearance and settlement of securities transactions by facilitating the signature guarantee process and related activities. In addition, the proposal is consistent with section 17A(d)(5) of the Act and rule 17Ad–15 thereunder.

B. Self-Regulatory Organization's Statement on Burden on Competition

PHLX doe not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the Federal Register or within such longer period: (i) as the Commission may designate up to ninety days of such date if it finds such longer period is appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve the proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

[5] PHLX Rule 328 is being amended, consistent with NYSE Rule 201, to permit an assignment or power of substitution to be executed by a domestic executor, trustee or guardian, without additional documentation. PHLX Rule 340 is being amended, consistent with NYSE Rule 210 and the Uniform Commercial Code Section 8–312, to define the warranties provided by a signature guarantee.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those than may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR–PHLX–92–39 and should be submitted by May 27, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–32229; File No. SR–SCCP–92–03]

Self-Regulatory Organizations; Stock Clearing Corporation of Philadelphia; Proposed Rule Change Relating to Definition of Signature Guarantee

April 27, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 28, 1992, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by SCCP. SCCP amended the filing to correct citations contained in the original filing, to provide a description of its current signature guarantee program and to provide additional information regarding the purpose of certain amendments.[2] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

SCCP proposes to amend SCCP Rule 1 to define a "signature guarantee" as a medallion or stamp of a "signature guarantee program" under Rule 17Ad–15 adopted under the Act.[3] The rule change also would clarify the language in SCCP Rule 1 regarding the warranties provided by a signature guarantee and would eliminate SCCP's existing signature guarantee program.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, SCCP included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. SCCP has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to eliminate SCCP's existing signature guarantee program and amend the definition of "signature guarantee" so that a medallion imprint or stamp evidencing participation in a "signature guarantee program" as defined by Rule 17Ad–15 will constitute a signature guarantee acceptable to SCCP. Such programs are being offered by entities unaffiliated with SCCP or its parent corporation, the Philadelphia Stock Exchange, Inc. ("PHLX").

In order to facilitate compliance with transfer agents' requirements for verification of signatures on guarantees made by member organizations, SCCP and PHLX jointly administered a signature guarantee program for their members. PHLX and SCCP members could subscribe to the joint PHLX/SCCP signature guarantee program, in an arrangement under which PHLX and SCCP provided sample signatures to

transfer agents of certain authorized officers and/or employees under powers of attorney filed with PHLX and SCCP under PHLX Rules 327 and 340 and guaranteed the signature to any assignment or power of substitution executed by such authorized persons. The Offices of the Secretary of PHLX and SCCP required each member of the program to execute and submit an Agreement regarding Signature Guarantees, a power of attorney providing the name and sample signature of each authorized signatory, and certified resolutions of the Board of Directors appointing its authorized signatory. Under the Agreement regarding Signature Guarantees, the participant agrees to indemnify and hold harmless PHLX and SCCP for any loss resulting from its guarantee. The power of attorney remained in effect until written notice of revocation was received by SCCP. SCCP maintained an extensive file of sample authorized signatures provided by participating organizations and made these samples available to transfer agents. The SCCP transfer department notified issuers and transfer agents of changes in authorized signatories on behalf of member organizations. This program enabled members to send listed or over the counter securities directly to transfer agents without having each certificate individually guaranteed by a New York Stock Exchange member organization, a national bank, or the SCCP transfer department. SCCP's signature guarantee program had been approved by the Stock Transfer Association. Additional insurance coverage was maintained by PHLX under a separate binder to its blanket bond coverage for SCCP for signature guarantee purposes in the amount of 25 million dollars for a single loss and 50 million dollars aggregate to cover certificates on which the signature (or authorized power of attorney) was guaranteed by a participating member of the signature guarantee program.

Pursuant to Rule 17Ad–15, transfer agents were empowered to establish guidelines for acceptable "signature guarantee programs" as contemplated by Rule 17Ad–15. Non-participants in such a "signature guarantee program" risk rejection of transfers. SCCP does not desire to administer a "signature guarantee program" as contemplated by Rule 17Ad–15 on SCCP's own or PHLX's behalf. Instead, SCCP proposes to eliminate its existing signature guarantee program, and accept guarantees from a guarantor institution that is in a signature guarantee program as defined in Rule 17Ad–15 and has attached a medallion or stamp evidencing participation in such a signature guarantee program on the certificate or other documentation.

In addition, the proposed rule change adds language, based on the Uniform Commercial Code Section 8–312, stating that a signature guarantee is a warranty of the genuineness of the signature, the appropriateness of the endorser, and the legal capacity of the endorser. This addition is made in an effort to create a more uniform standard in the securities industry.[4]

The proposed rule change is consistent with the Act, in general, and in furtherance of section 17A(b)(3)(F) of the Act, in particular, in that it generally is designed to foster cooperation and coordination with persons engaged in clearance and settlement of securities transactions, and to remove impediments and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions.

The proposed rule change also is consistent with the requirements of section 17A(a)(1) of the Act in that it fosters the prompt and accurate clearance and settlement of securities transactions by facilitating the signature guarantee process and related activities. In addition, the proposal is consistent with section 17A(d)(5) of the Act and Rule 17Ad–15 thereunder.

B. Self-Regulatory Organization's Statement on Burden on Competition

SCCP does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to ninety days of such date if it finds such longer period is appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve the proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to File No. SR–SCCP–92–03 and should be submitted by May 27, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[4] The New York Stock Exchange has adopted similar language in its Rule 210. The Midwest Stock Exchange is considering adding a corresponding provision to its rules. Conversation between Murray Ross, Secretary, SCCP, and Christine Sibille, Staff Attorney, Division of Market Regulation, Commission (January 12, 1993).

[Rel. No. IC–19443; File No. 812–8336]

ITT Life Insurance Corp., et al.; Applications

April 29, 1993.

AGENCY: Securities and Exchange Commission (the "Commission" or the "SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: ITT Life Insurance Corporation ("ITT Life"), ITT Life Insurance Corporation Separate Account Two (the "Separate Account") and Hartford Equity Sales Company, Inc.

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) for exemptions from sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act.

SUMMARY OF APPLICATION: Applicants seek an order to permit the deduction of a mortality and expense risk charge from the assets of the Separate Account under a flexible premium deferred variable annuity contract (the "Contract").

FILING DATE: The application was filed on April 1, 1993 and amended on April 23, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on May 24, 1993, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Applicants, c/o Kathleen McGah, Esq., Hartford Life Insurance Companies, 200 Hopmeadow Street, Simsbury, CT 06070.

FOR FURTHER INFORMATION CONTACT: Thomas Bisset, Senior Attorney, at (202) 272–2058, or Wendell Faria, Deputy Chief, at (202) 272–2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the Commission's Public Reference Branch.

APPLICANTS' REPRESENTATIONS

1. ITT Life is a stock life insurance company engaged in the business of writing individual and group life insurance and annuities in the District of Columbia and all states except New York.

2. The Separate Account was established by ITT Life and has filed a registration statement under the 1940 Act as a unit investment trust. It will issue only flexible premium deferred variable annuity contracts (the "Contracts"). The Separate Account will initially be the variable option for certain contract owners who previously purchased fixed annuity contracts from Fidelity Bankers Life Insurance Company ("FBL Contract Owners"). On May 13, 1991, a receiver was appointed for Fidelity Bankers Life Insurance Company, an insurer domiciled in Virginia. The receiver selected Hartford Life Insurance Company, an affiliated insurer of ITT Life, to assume and reinsure certain FBL contracts. FBL Contract Owners may select a fixed annuity option sponsored by the Hartford Life Insurance Company. On or after May 15, 1993, the FBL Contract Owners may transfer into the Separate Account.

The Separate Account invests in the following Putnam Capital Manager ("PCM") Funds: PCM Voyager Fund, PCM Growth and Income Fund, PCM High Yield Fund, PCM Money Market Fund, PCM U.S. Government and High Quality Bond Fund, PCM Multi-Strategy Fund, PCM Global Growth Fund and PCM Utilities Growth and Income Fund.

3. Hartford Equity Sales Company, Inc., the principal underwriter for the Contracts, is a broker-dealer registered under the Securities Exchange Act of 1934 and is a member of the National Association of Securities Dealers, Inc.

4. There is no deduction for sales expenses from purchase payments when made, but a contingent deferred sales charge ("CDSC") may be assessed when a Contract is surrendered. CDSCs are assessed first from purchase payments in the order received and then from other Contract values. The CDSC is a percentage of the amount withdrawn (not to exceed the aggregate amount of the purchase payments made), as follows:

Charge	Number of years from purchase payment
7 percent	1
6 percent	2
5 percent	3
4 percent	4
3 percent	5
2 percent	6
1 percent	7
0 percent	8 or more

5. An annual maintenance fee of $25 is deducted from Contract values each Contract year. ITT Life also assesses a daily charge at the rate of .15% per annum against all Contracts held in the Separate Account during both the accumulation and annuity phases of the Contracts. ITT Life guarantees that it will not increase the annual maintenance fee of $25.00 and the administrative fee of .15% per annum. In addition, Applicants represent that the annual maintenance fee and the daily administrative charge will not be more than the actual cost of the administrative services provided.

6. For assuming mortality and expense risks under the Contracts, ITT Life will make a daily charge at the annual rate of 1.25% against all Contract values held in the Separate Account. Approximately 0.90% of that charge is for assuming mortality risks and 0.35% is for assuming expense risks. The rate of the mortality and expense risk charge cannot be increased. ITT Life assumes mortality risks by undertaking to make annuity payments under the Contract option selected by the Contract owner regardless of how long an annuitant may live, and regardless of how long all annuitants as a group may live. ITT Life also assumes mortality risks by undertaking payment of a minimum death benefit under the Contract. ITT Life assumes the expense risk that administrative fees may be insufficient to cover the actual expenses. If the mortality and expense risk charge is insufficient to cover the actual cost of the expense risk undertaking, ITT Life will bear the loss. Conversely, if the charge proves more than sufficient, the excess will be surplus to ITT Life and will be available for any proper corporate purpose. ITT Life expects a reasonable profit from the mortality and expense risk charge.

Applicants' Legal Analysis and Conditions

1. Section 6(c) of the 1940 Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any persons, securities, or transactions from any provision of the 1940 Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Applicants request an order under section 6(c) for exemptions from sections 26(a)(2)(C) and 27(c)(2) to deduct a mortality and expense risk charge from the assets of the Separate Account. Section 27(c)(2) of the 1940 Act prohibits the sale of periodic payment plan certificates unless the proceeds of all payments (except such amounts as are deducted for sales load) are held under an indenture or agreement containing in substance the provisions required by sections 26(a) (2) and (3). Section 26(a)(2)(C) provides that no payment to the depositor of, or principal underwriter for, a registered unit investment trust shall be allowed the trustee or custodian as an expense

VOL 58 ISS 86 MY 6 1993 UMI

(except that provision may be made for the payment to any such person of a fee, not exceeding such reasonable amount as the Commission may prescribe, as compensation for performing bookkeeping or other administrative services).

3. Applicants represent that the mortality and expense risk charge of 1.25% is within the range of industry practice for comparable annuity contracts as determined by a survey of comparable contracts issued by other insurance companies. Applicants' Contract is comparable to the Contracts of other insurance companies in that (i) current charge levels are approximately the same; (ii) all provide minimum death benefit guarantees the same or lower than Applicants' Contracts; (iii) all have guaranteed annuity purchase rates; (iv) all have the same special accounting system for separate account unit value administration; and (v) all are offered in the same market. ITT Life undertakes to maintain at its home office, available to the Commission upon request, a memorandum setting forth in detail the methodology underlying this representation and the contracts analyzed.

4. Applicants state that there is a likelihood that the proceeds from explicit sales loads will be insufficient to cover the expected costs of distributing the Contracts. Any shortfall will be covered from the assets of ITT Life's general account, which may include profit from the mortality and expense risk charge. Therefore, Applicants have concluded that there is a reasonable likelihood that the Separate Account's distribution financing arrangement will benefit the Separate Account and Contract owners. ITT Life undertakes to maintain at its home office, and make available to the Commission upon request a memorandum setting forth the basis of this representation.

5. Applicants represent that the Separate Account will invest only in open-end management investment companies that have undertaken to have a board of directors, a majority of whom are not interested persons of the company, formulate and approve any plan to finance distribution expenses pursuant to Rule 12b–1 under the 1940 Act.

Conclusion

Applicants assert that, for the reasons and upon the facts set forth above, the requested exemption from sections 26(a)(2)(C) and 27(c)(2) of the 1840 Act to deduct the mortality and expense risk charge from the assets of the Separate Account under the Contract meets the standards in section 6(c) of the 1940 Act. Applicants assert that the exemption requested is necessary and appropriate in the public interest and consistent with the protection of investors and the policies and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF STATE

[Public Notice 1778]

Participation of Private-sector Representatives on U.S. Delegations

As announced in Public Notice No. 655 (44 FR 17846), March 23, 1979, the Department is submitting its January 14, 1992–January 26, 1993 list of U.S. accredited Delegations which included private-sector representatives.

Publication of this list is required by Article III (c) of the guidelines published in the **Federal Register** on March 23, 1979.

Dated: March 9, 1993.

Frank R. Provyn,

Managing Director, Office of International Conferences.

United States Delegation to the 3rd Meeting of the Aeronautical Fixed Service Systems Planning for Data Interchange Panel International Civil Aviation Organization (ICAO) Montreal, January 14–January 30, 1992

Representative

Cindy J.H. Peak, Manager, Communications Systems Engineering Division, Federal Aviation Administration, Department of Transportation

Alternate Representative

Terence B. Wendel, General Engineer, Communications Systems Engineering Division, Federal Aviation Administration, Department of Transportation

Private Sector Advisers

Forrest W. Colliver, Jr., Lead Engineer, Aeronautical Telecommunications, MITRE Corp, McLean, Virginia
Donald L. Trombley, Director, Communications and Meteorology, Air Transport Association, Washington, DC
Valgene E. White, Telecommunications Consultant, Network Management Service Inc, Annapolis Maryland

United States Delegation to the Group of Rapporteurs and Pollution and Energy, Twenty-Third Session, Economic Commission for Europe (ECE) Geneva, January 20–22, 1992

Representative

Thomas Baines, Senior Project Director, Office of Mobile Sources, Environmental Protection Agency, Ann Arbor, Michigan

Private Sector Advisers

Louis Broering, Cummings Engine Company, Columbus, Indiana
Marcel Halberstadt, Motor Vehicle Manufacturers Association, Detroit, Michigan

United States Delegation to the Working Party on Gas, Second Session, Economic Commission for Europe (ECE) Geneva, January 20–22, 1992

Representative

Jeffrey P. Hardy, Office of International Affairs, Department of Energy

Alternate Representative

Ralph Anske, Office of Global Energy, Bureau of Economic and Business Affairs, Department of State

Private Sector Adviser

Stewart B. Kean, President, Utility Propane, Elizabeth, New Jersey

United States Delegation to the Meeting of Study Group III and Working Party 4 of the International Telegraph and Telephone Consultative Committee, International Telecommunication Union, Geneva, Switzerland, January 21–23, 1992

Representative

Earl S. Barbely, Director, Telecommunications and Information Standards, Department of State

Advisers

William Kirsch, Deputy Assistant Bureau Chief/International, Federal Communications Commission
Suzanne Settle, Program Manager, National Telecommunications and Information Administration, Department of Commerce

Private Sector Advisers

Beverly Andrews, COMSAT, WSD, Washington, DC
Donald P. Casey, Director Regulatory, Western Union Corporation, Upper Saddle River, New Jersey
Kenneth Leeson, Telecommunications Advisor, International Business Machines, Purchase, New York
Robert Madden, Manager, American Telephone & Telegraph Co., Morristown, New Jersey

Mark Niebert, COMSAT, Washington, DC
Philip Onstad, Consultant, International Communications Association, Washington, DC
Marcel E. Scheidegger, MCI International, Rye Brook, New York
Richard W. Stone, Cable and Wireless Communications, Ltd., Vienna, Virginia
Carmine Taglialatela, Jr., Advisory Engineer, MCI Telecommunications, Inc., Washington, DC

United States Delegation to the Technical Subgroup on Controls (January 25–26), Technical Subgroup on Indicator Prices (January 27–29), International Coffee Organization Council and Negotiating Session (February 1–5), International Coffee Organization (ICO), London, January 25–February 5, 1992

Technical Subgroup on Controls (January 25–26)

Representative

Ralph Ives, Director for Andean Affairs, Office of the United States Trade Representative, Executive Office of the President

Alternate Representative

Michael Glover, Economic Officer, United States Embassy, London

Technical Subgroup on Indicator Prices (January 27–29)

Representative

Ralph Ives, Director for Andean Affairs, Office of the United States Trade Representative, Executive Office of the President

Alternate Representative

Thomas L. Robinson, Director, Office of Food Policy Programs, Bureau of Economic and Business Affairs, Department of State

Adviser

Michael Glover, Economic Officer, United States Embassy, London

International Coffee Organization Council and Negotiating Session (February 1–5)

Representative

Myles R. R. Frechette, Assistant United States Trade Representative, Latin America, Caribbean, and Africa, Office of the United States Trade Representative, Executive Office of the President

Alternate Representative

Ralph Ives, Director for Andean Affairs, Office of the United States Trade Representative, Executive Office of the President

Advisers

Michael Glover, Economic Officer, United States Embassy, London
Thomas L. Robinson, Director, Office of Food Policy Programs, Bureau of Economic and Business Affairs, Department of State

Private Sector Advisers

David A. Brown, Maxwell House Coffee Company, White Plains, New York
Richard Emanuelle, Tardivat International Coffee Corporation, New York, New York
Stephen H. Gluck, Cargill Coffee PLC, Surrey, United Kingdom
James P. McCree, Louis Dreyfus Coffee Company, Wilton, Connecticut
Howard C. Katz, J. Aron and Company, New York, New York
John Sutherland, Continental Coffee Products, Chicago, Illinois
Richard L. Thompson, Nestle Beverages, San Francisco, California
Gregory W. White, Folger Coffee Company, Chicago, Illinois

United States Delegation to the 43rd Session of the Subcommittee on the Carriage of Dangerous Goods (CDG), International Maritime Organization (IMO), London, January 27–31, 1992

Representative

Kevin J. Eldridge, Commander, Chief, Hazardous Materials Branch, Marine Technical and Hazardous Materials Division, Office of Marine Safety, Security and Environmental Protection, United States Coast Guard, Department of Transportation

Alternate Representative

P.C. Olenik, Lieutenant Commander, Packaged Cargo Section, Marine Technical and Hazardous Materials Division, Office of Marine Safety, Security and Environmental Protection, United States Coast Guard, Department of Transportation

Advisers

E.P. Pfersich, Chief, Packaged Cargo Section, Marine Technical and Hazardous Materials Division, Office of Marine Safety, Security and Environmental Protection, United States Coast Guard, Department of Transportation
F. Wybenga, International Standards Coordinator, Office of Hazardous Materials Safety, Research and Special Programs Administration, Department of Transportation,
S.C. Hunt, Lieutenant, Packaged Cargo Section, Marine Technical and Hazardous Materials Division, Office of Marine Safety, Security and Environmental Protection, United States Coast Guard, Department of Transportation

Private Sector Adviser

R.F. Bohn, Hazardous Materials Coordinator, National Cargo Bureau, Inc., New York, NY

United States Delegation to the Forty-Eighth Session of the Human Rights Commission, United Nations Economic and Social Council (ECOSOC), Geneva, January 27–March 6, 1992

Representative

The Honorable J. Kenneth Blackwell, Ambassador, United States Representative to the United Nations Human Rights Commission

Alternate Representatives

The Honorable Morris B. Abram, Ambassador, Permanent Representative to the European Office of the United Nations, Geneva
The Honorable John R. Bolton, Assistant Secretary, Bureau of International Organization Affairs, Department of State
The Honorable Otto J. Reich, Washington, DC
The Honorable Richard Schifter, Assistant Secretary, Bureau of Human Rights and Humanitarian Affairs, Department of State

Senior Advisers

Nancy Ely-Raphel, Deputy Assistant Secretary, Bureau of Human Rights and Humanitarian Affairs, Department of State
The Honorable Juliette Clagett McLennan, Ambassador, United States Representative to the United Nations Commission on the Status of Women, Washington, DC
H. Clarke Rodgers, Deputy Chief of Mission, United States Mission, Geneva
The Honorable Shirin R. Tahir-Kheli, United States Alternate Representative for Special Political Affairs, New York
Jackie Wolcott, Deputy Assistant Secretary, Bureau of International Organization Affairs, Department of State

Advisers

John G. Cook, United States Mission, Geneva
John R. Crook, United States Mission, Geneva
Ramona Dunn, United States Mission, Geneva

[Public Notice No. 1802]

United States Organization for the International Telegraph & Telephone Consultative Committee Study Group D; Meetings

The U.S. Department of State announces that the US Organization for the International Telegraph Telephone Consultative Committee Study Group D will meet on June 7, and on August 16, 1993, at 9:30 a.m., in room 1205 at the Department of State, 2201 C Street NW., Washington, DC 20520.

The agenda of the June 7 meeting will include the review of U.S. contributions for the meetings of Study Group 7 and 14, and discussion of the results of the April meeting of Study Group 8, and to consider any other business within the scope of Study Group D. The meeting of August 16 will consider contributions to the September meeting of Study Group 14.

In the case of each meeting, other matters within the jurisdiction of Study Group D, including reviews and discussions of the results of past meetings, may be considered.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chair. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Persons who plan to attend should so advise the Office of Gary Fereno, Department of State, (202) 647–0201, FAX (202) 647–7407. The above includes government and non-government attendees. Public visitors will be asked to provide their date of birth and Social Security number at the time they register their intention to attend and must carry a photo ID with them to the meeting in order to be admitted. All attendees must use the C Street entrance.

Dated: April 20, 1993.

Earl S. Barbely,

Director, Telecommunications and Information Standards, Chairman U.S. CCITT National Committee.

Secretary of State's Panel on El Salvador; Closed Meeting

The Department of State announces a meeting of the Secretary of State's Panel on El Salvador on Tuesday, May 18, at 1:30 p.m. in room 1406, Department of State, Washington, DC. Pursuant to section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. 552b(c)(1), it has been determined the meeting will be closed to the public. The agenda calls for a review of the materials gathered from document searches and interviews and a discussion of those materials as they relate to the report to be prepared by the Panel. A substantial portion of this material consists of classified national security information.

Due to the exceptional circumstances created by the short duration of the Panel and the members' scheduling conflicts, the Panel's first meeting will occur before 15 days have elapsed from the date of this notice. For more information, contact Edward Pope, Secretary's Panel on El Salvador, Department of State, Washington, DC 20520, phone: 202/736–4517.

Dated: May 4, 1993.

B. Lynn Pascoe,

Executive Director, Secretary's Panel on El Salvador.

[Public Notice 1797]

Shipping Coordinating Committee, Subcommittee for the Prevention of Marine Pollution; Meeting

The Subcommittee for the Prevention of Marine Pollution (SPMP), a subcommittee of the Shipping Coordinating Committee, will conduct an open meeting on June 30, 1993, at 9:30 a.m. in room 2415 of U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of this meeting will be to review the agenda items to be considered at the thirty-fourth session of the Marine Environment Protection Committee (MEPC 34) of the International Maritime Organization (IMO). MEPC 34 will be held from July 5–9, 1993. Proposed U.S. positions on the agenda items for MEPC 34 will be discussed.

The major items for discussion will be the following:

1. Prevention of oil pollution. Work will continue on guidelines for implementation of Regulations 13F and 13G to Annex I of The International Convention for the Prevention of Pollution from Ships (MARPOL 73/78). This will include guidelines for structural and operational requirements for existing ships, equivalences for double-hulls for new ships, and guidelines for enhanced inspections.

2. Implementation of the International Convention on Oil Pollution Preparedness, Response and Cooperation, 1990 (OPRC). The working group will be addressing a variety of topics including practical application of OPRC to hazardous and noxious substances, development of model pollution response courses, promotion of research and development under OPRC, and industry cooperation in OPRC implementation.

3. Comprehensive Manual on Reception Facilities. The MEPC hopes to complete work on revision of the MARPOL 73/78 reception facility guidance that began at MEPC 32.

4. Revision of the Prevention section of the IMO Anti-Pollution Manual.

5. Follow-up action to the United States Conference on Environment and Development (UNCED) of June 1992. IMO is examining its role in implementation of Chapter 17 of Agenda 21 of UNCED.

6. Harmful marine organisms in ballast water. This subject covers control measures against the introduction of exotic species into coastal and internal waters through discharge of ballast water.

7. Enforcement of Pollution Conventions. This group will continue work on the new reporting format for MARPOL 73/78 enforcement actions.

8. The future work program of the MEPC.

Members of the public may attend these meetings up to the seating capacity of the room.

For further information or documentation pertaining to the SPMP meeting, contact Lieutenant Commander M. L. McEwen, U.S. Coast Guard Headquarters (G–MEP–3), 2100 Second Street, SW., Washington, DC 20593–0001, Telephone: (202) 267–0419.

Dated: April 16, 1993.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710–07–M

[Public Notice No. 1801]

Shipping Coordinating Committee Council and Associated Bodies; Meeting

The Shipping Coordinating Committee (SHC) will conduct an open meeting at 9:30 a.m. on Thursday, June 3, 1993, in room 2415, at US Coast Guard Headquarters, 2100 Second Street SW., Washington, DC to finalize preparations for the 70th Session of Council and 38th Session of the Technical Cooperation Committee of the International Maritime Organization (IMO) which are scheduled for June 14–18, 1993, at IMO Headquarters in London. The purpose of the meeting is to discuss the papers received and the draft US positions. Among other things, the items of particular interest are:

a. Reports of the IMO committees and training institutions

b. Review of the IMO technical cooperation activities

c. Report on the International Conference on the Revision of the 1969 Civil Liability Convention and the 1971 Fund Convention

d. Report on the International Conference on Safety of Fishing Vessels

e. Report on the UN/IMO Conference of Plenipotentiaries on a Convention on Maritime Liens and Mortgages

f. Report on the outcome of the Fifteenth Consultative Meeting of Contracting Parties to the 1972 London Dumping Convention

g. Relations with the United Nations and other organizations

h. Preparations for the 18th Assembly including the provisional agenda and report of the Council to the Assembly

i. Administrative and financial matters

Members of the public may attend these meetings up to the seating capacity of the room. Interested persons may seek information by writing: Gene F. Hammel, US Coast Guard (G-CI), room 2114, 2100 Second Street SW., Washington, DC 20593–0001 or by calling: (202) 267–2548/2280.

Dated: April 26, 1993.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committe.

BILLING CODE 4910–62–M

Federal Highway Administration

Environmental Impact Statement: Prince of Wales Island, AK

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be

VOL
58
ISS
86
MY
6
1993
UMI

prepared for a proposed highway construction project on the Prince of Wales Island in Alaska.

FOR FURTHER INFORMATION CONTACT: Allan Stockman, Environmental Engineer, or Jody Thomas, Staff Environmental Engineer, Federal Highway Administration/Western Federal Lands Division, 610 East Fifth Street, Vancouver, Washington 98661. Telephone: (206) 696–7751.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the U.S. Forest Service and the Alaska Department of Transportation and Public Facilities, will prepare an Environmental Impact Statement (EIS) on a proposal to construct the North Prince of Wales highway in the Tongass National Forest from the Coffman Cove junction to Twin Island junction near the town of Whale Pass. The proposed improvements would provide year-round state highway access to these remote communities on Prince of Wales Island. This could involve new road construction, as well as reconstruction of portions of existing Forest Development Roads (FDR) that run north and south on the east side of Prince of Wales Island. Total distance of construction is estimated to be 28.5 to 31.0 miles.

The highway improvement is considered necessary to provide the north island communities with year-round access with a state (public) highway. This would also permanently connect the communities to the other towns and activity centers on Prince of Wales Island. The existing roads on the north end of the island are currently under Forest Service (FS) jurisdiction, and were primarily built to serve timber haul. The roads are narrow and sometimes dangerous, and they are not always accessible or safe for public travel as a primary access route. Also, the FS does not have the money or authority to plow snow on their roads. Therefore snow plowing only occurs when some resource activity has need for access such as a timber sale. This can result in unreliable and inconsistent year-round access.

Alternatives under consideration are the following: (1) Taking no action in which island access and the existing roads remain status quo, (2) upgrading existing FDR 20 on the west side of Prince of Wales Island to a state highway, and (3) constructing/reconstructing a road on new alignment along the east side of the island utilizing portions of FDR 23 and 30. Under alternatives 2 and 3, ownership and maintenance of the road would be transferred to the Alaska Department of Transportation and Public Facilities who has the authority to snow plow roads for year-round public access. Incorporated and analyzed with the build alternatives will be design variations of grade and alignment.

Announcements describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies. These will also be sent to private organizations and citizens who have previously expressed or are known to have interest in this proposal. Public scoping meetings will be held during the week of May 24, 1993 in the communities of Coffman Cove and Craig on the Prince of Wales Island. A public meeting is also being planned in Ketchikan, Alaska. Public notices will be given of the times and places of all these meetings.

It is important that the full range of issues related to this proposed action be addressed and that all significant issues be identified. To ensure this, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address and phone number provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

Issued on: April 27, 1993.

James N. Hall,

Division Engineer, Vancouver, Washington.

[FR Doc. 93–10698 Filed 5–5–93, 8:45 am]

BILLING CODE 4910–22–M

DEPARTMENT OF THE TREASURY

Customs Service

Electronic Data Interchange for Global Trade

AGENCY: Customs Service, Department of the Treasury.

ACTION: Notice of conference.

SUMMARY: This document advises the public that the Customs Service is presenting a conference entitled "EDIFACT: Technology for Global Trade" to be held in Dallas, Texas. The primary focus of the conference will be on present and future electronic data interchange applications in the area of international trade. Attendance at the conference is open to the general public.

DATES: The conference will take place on June 2–3, 1993, in the Loews Anatole Hotel, Dallas Texas. Registration requests for the conference should be received before May 20, 1993.

FOR FURTHER INFORMATION CONTACT: The EDIFACT Conference Hotline (703–440–6587), for information regarding the conference and registration procedures; the Loews Anatole Hotel (214–748–1200), for hotel reservations.

SUPPLEMENTARY INFORMATION: The rapid expansion of international trade in recent decades, coupled with the concurrent growth in electronic data processing and transmission capabilities, has given rise to the development of electronic data interchange (EDI) as a means for cutting through the jungle of paperwork and thus facilitating the unhindered flow of information which is vital to international trade transactions. EDI, which is defined internationally as "the transfer of structured data by commonly agreed message standards, from computer to computer, by electronic means", enables parties in a national or international commercial transaction to transmit all their documents (for example, invoices, purchase orders, contractual information, and shipping and payment instructions) instantly and directly to the desired location, thereby removing barriers of time and distance and resulting in significant cost savings and increased efficiency. Thus, the ultimate goal of EDI is to facilitate trade by creation of a paperless environment.

In order to realize the long-term objectives of EDI, it has been recognized that common international EDI standards must be developed with regard to data elements, syntax rules and message content. To this end, government and commercial representatives, operating under the auspices of the United Nations, have studied different existing EDI standards with a view to converging them into a single international standard. As a result of these efforts, international agreement has been reached on a converged standard called EDI for Administration, Commerce and Transport (EDIFACT) which has been published by the International Standards Organization as ISO 9735.

The U.S. Customs Service has long been committed to the principle and practice of paperless commercial entry and for this reason has recognized the importance of EDIFACT to global trade in a paperless environment. In furtherance of its pioneering role in the use of EDIFACT, Customs is presenting a conference entitled "EDIFACT: Technology for Global Trade" to be held at the Loews Anatole Hotel in Dallas, Texas, on June 2–3, 1993. The conference is intended to foster an exchange of views and ideas on a variety of complex issues involving international trade, with an emphasis on communications and EDIFACT. Speakers and panelists from industry and various government agencies who are versed in the use of EDIFACT will be featured, as well as individuals who will provide useful information regarding the North American Free Trade Agreement and the Customs Modernization Act.

Attendance at the conference is open to members of the general public at a registration fee of $550 per person, and exhibitors desiring to demonstrate their products or services may do so at a cost of $700 per booth. Since space at the conference may be limited and only a limited number of hotels room at a reduced conference rate are available, persons wishing to attend the conference are encouraged to register and obtain their hotel reservations at an early date.

Dated: April 30, 1993.

Michael H. Lane,

Acting Commissioner of Customs.

Sunshine Act Meetings

Federal Register
Vol. 58, No. 86
Thursday, May 6, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF AGRICULTURE

Rural Telephone Bank

Correction

FR Doc. 93–10197 was published beginning on page 26181 in the issue of Friday, April 30, 1993. This document was a notice of Sunshine Act meetings to be held on May 6, and May 7, 1993. It was published in the Notices section of the **Federal Register**. It should have appeared in the Sunshine Act Meetings section.

BILLING CODE 1505–01–D

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, May 11, 1993, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Matters relating to the Corporation's contracting activities.

Memorandum and resolution re: Study of savings bank life insurance which makes a finding whether savings bank life insurance activities of insured banks pose or may pose any significant risk to the insurance fund of which such banks are members.

Discussion Agenda

Memorandum and resolution re: Proposed amendments to Part 325 of the Corporation's rules and regulations, entitled "Capital Maintenance," which would implement the portions of Section 305 of the Federal Deposit Insurance Corporation Improvement Act of 1991 that require the Federal banking agencies to revise their risk-based capital standards for insured depository institutions to ensure that those standards take adequate account of concentration of credit risk and the risks of nontraditional activities.

Memorandum and resolution re: Final amendments to Part 330 of the Corporation's rules and regulations, entitled "Deposit Insurance Coverage," which amendments govern the extent of insurance coverage provided by the Corporation for deposits in Corporation-insured depository institutions.

Memorandum and resolution re: Final amendments to the Corporation's rules and regulations in the form of a new Part 363 regarding independent annual audits and reporting requirements.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

The FDIC will provide attendees with auxiliary aids (e.g., sign language interpretation) required for this meeting. Those attendees needing such assistance should call (202) 898–6745 (Voice); (202) 898–3509 (TTY), to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Deputy Executive Secretary of the Corporation, at (202) 898–6757.

Dated: May 4, 1993.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:30 a.m. on Tuesday, May 11, 1993, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of Title 5, United States Code, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Reports of the Office of Inspector General.

Matters relating to the Corporation's corporate and supervisory activities.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured depository institutions or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof.

Names of persons and names and locations of depository institutions authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note: Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Matters relating to the Corporation's delegations of authority.

Discussion Agenda

Matters relating to the possible closing of certain insured depository institutions:

Names and locations of depository institutions authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550-17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Deputy Executive Secretary of the Corporation, at (202) 898–6757.

Dated: May 4, 1993.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:43 a.m. on Tuesday, May 4, 1993, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Matters relating to the probable failure of a certain insured bank.

Recommendation concerning an administrative enforcement proceeding.

Matters relating to an assistance agreement with an insured bank.

In calling the meeting, the Board determined, on motion of Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), seconded by Director Eugene A. Ludwig (Comptroller of the Currency), concurred in by Acting Chairman Andrew C. Hove, Jr., that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: May 4, 1993.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[FR Doc. 93–10928 Filed 5–4–93; 4:00 pm]

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, May 11, 1993 at 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. § 437g.

Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.

Matters concerning participation in civil actions or proceedings or arbitration.

Internal personnel rules and procedures or matters affecting a particular employee.

DATE AND TIME: Thursday, May 13, 1993 at 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes.

Report from FEC Public Disclosure Division.

Administrative Matters.

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Press Officer, Telephone: (202) 219–4155.

Delores Hardy,

Administrative Assistant.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 58 FR 21331, April 20, 1993.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 9:00 a.m., Monday, April 26, 1993.

CHANGES IN THE MEETING: The following changes were made to the closed portion of the meeting. Items deleted from the Summary Agenda portion of the meeting and placed in the discussion portion.

1. FHLBank of Pittsburgh AHP
2. Dividend rate swap issue disclosed in the San Francisco examination, and approval of EROD/OL&EA analysis and approach to its resolution
3. Approval of the March Board Minutes

The following item was added to the closed portion of the meeting.

- Federal Home Loan Bank Presidents' 1992 Incentive Compensation Awards

The above matters are exempt under one or more of sections 552b(c), (6), (8), and (9) (A) and (B) of title 5 of the United States Code.

CONTACT PERSON FOR MORE INFORMATION: Elaine L. Baker, Executive Secretary to the Board, (202) 408–2837.

24 CFR Part 888

[Docket No. N-93-3616; FR-3510-N-01]

Section 8 Housing Assistance Payments Program—Fair Market Rent Schedules for Use in the Rental Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program and Rental Voucher Program

AGENCY: Office of the Secretary, HUD.

ACTION: Proposed Fair Market Rents.

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to publish Fair Market Rents (FMRs) periodically, but not less frequently than annually, to be effective October 1 of each year. The Department's regulations at 24 CFR part 888 provide a notice and comment process for developing FMRs. Today's document proposes the FMRs for Fiscal Year 1994 (FY 1994). The proposal would amend FMR schedules for the section 8 Rental Certificate program (part 882, subparts A and B), including space rentals by owners of manufactured homes under the section 8 Rental Certificate program (part 882, subpart F); the section 8 Moderate Rehabilitation program (part 882, subparts D and E); and housing assisted under the Loan Management and Property Disposition programs (part 886, subparts A and C). In addition, FMRs are used to determine payment standard schedules in the Rental Voucher program.

DATES: Comments are due July 6, 1993.

ADDRESSES: Interested persons are invited to submit comments regarding this rule to the Office of the General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Communications should refer to the above docket number and title. To expedite processing, each commenter is requested to simultaneously submit a copy of its comments to the Economic and Market Analysis Staff in the appropriate HUD Field Office. A copy of each communication submitted will be available for public inspection and copying during regular business hours (7:30 a.m.–5:30 p.m. Eastern Time) at the above address.

FOR FURTHER INFORMATION CONTACT: Gerald J. Benoit, Rental Assistance Division, Office of Public and Indian Housing (202) 708–0477 (TDD: (202) 708–0850), for questions relating to the Section 8 Voucher, Certificate, and Moderate Rehabilitation programs; James Tahash, Program Planning Division, Office of Multifamily Housing Management (202) 708–3944 (TDD: (202) 708–4594), for questions relating to all other Section 8 programs; for technical information regarding the development of the schedules for specific areas or the method used for calculating the FMRs, Michael R. Allard, Economic and Market Analysis Division, Office of Policy Development and Research (202) 708–0577 (TDD: (202) 708–0770). Mailing address for above persons: Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. (Telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION:

I. Background

Section 8 of the U.S. Housing Act of 1937 (the Act) (42 U.S.C. 1437f) authorizes a housing assistance program to aid low-income families in renting decent, safe, and sanitary housing. Assistance payments are limited by Fair Market Rents (FMRs) (or payment standards, established by local housing authorities, based on FMRs in the Rental Voucher program) established by HUD for different areas. In general, the FMR for an area is the amount that would be needed to pay the gross rent (shelter rent plus utilities) of privately owned, decent, safe, and sanitary rental housing of a modest (non-luxury) nature with suitable amenities.

The FMRs proposed in this Notice govern the following Section 8 Housing Assistance Payments programs: the Section 8 Rental Certificate program under part 882 (subparts A and B), including space rentals by owners of manufactured homes (subpart F), the Moderate Rehabilitation program under part 882 (subparts D and E), housing assistance for projects with HUD-insured or HUD-held mortgages under part 886 (subpart A), as well as the Property Disposition program under part 886 (subpart C). In addition, FMRs are used to establish payment standards for the Rental Voucher program (part 887).

II. Procedures for the Development of FMRs

Section 8(c) of the Act requires the Secretary of HUD to publish FMRs periodically, but not less frequently than annually. The Department's regulations provide that HUD will develop FMRs by publishing proposed FMRs for public comment, analyzing the public comment, and publishing final FMRs. (See 24 CFR 888.115.) Final FY–1994 FMRs will be published on or before October 1, 1993, as required by section 8(c)(1) of the Act.

III. Fair Market Rent Schedules

This notice proposes revised FMRs for FY 1994. For the first time, 1990 Census data on rental housing were used to revise the FMRs. This revision process, which the Department refers to as "re-benchmarking," occurs once every ten years and involves replacing the base-year rent FMR estimates with those developed from the new Census data and updating the new base-year estimates from the date of the Census to the mid-point of the program year the FMRs will be in effect. All FMR areas in the country have now been re-benchmarked, either with Census data or with American Housing Surveys or Random Digit Dialing surveys conducted after the date of the 1990 Census. Because of the re-benchmarking, many areas have proposed FMRs that differ from those that would have resulted from the normal updating of last year's FMRs.

Schedules at the end of this document list the FMR levels for rental housing (Schedule B) and for manufactured home spaces in the Section 8 Certificate program (Schedule D). FMRs for the Moderate Rehabilitation program are 120 percent of the Schedule B Fair Market Rents (see 24 CFR 882.408(a) and 888.113(e)(1)). The FMR for a Single Room Occupancy (SRO) unit in the Rental Certificate program is 75 percent of the efficiency (EFF) unit FMR listed in Schedule B. The FMR for an SRO unit in the Moderate Rehabilitation program is 75 percent of the Moderate Rehabilitation FMR for the EFF unit. The payment standard amount for an SRO Unit in the Rental Voucher program is 75 percent of the EFF FMR listed in Schedule B.

IV. Metropolitan Area Definitions

With several exceptions discussed in the following paragraphs, the proposed FMRs incorporate the recent changes in the definitions of metropolitan areas made by the Office of Management and Budget contained in the OMB Bulletin No. 93–05, released on December 28, 1992. HUD uses the OMB Metropolitan Statistical Area (MSA) and Primary Metropolitan Statistical Area (PMSA) definitions because of the close correspondence that typically exists between these definitions and housing market area definitions. FMRs are intended to be housing market-wide rent estimates that provide housing opportunities throughout the geographic

area in which rental housing units are in direct competition.

The exceptions have been made for a number of large metropolitan areas whose revised OMB definitions encompass areas that have been determined to be larger than HUD's definitions of the housing market areas. For the Boston and New York-Northern New Jersey metropolitan areas, the proposed FMRs continue to use the OMB definitions of the MSA/PMSAs that were in effect prior to the December 28, 1992, OMB Bulletin. The affected areas are as follows:

For the Boston area—the Boston, MA; Lawrence-Haverhill, MA–NH; Lowell, MA–NH; and Salem-Gloucester, MA PMSAs and the Fitchburg-Leominster, MA; Manchester, NH; New Bedford, MA; Portsmouth-Dover-Rochester, NH–ME; and Worcester, MA MSAs.

For the New York-Northern New Jersey area—the New York, NY; Nassau-Suffolk, NY; Bergen-Passaic, NJ; Jersey City, NJ; Middlesex-Somerset-Hunterdon, NJ; Monmouth-Ocean, NJ; and Newark, NJ PMSAs.

The metropolitan area definitions for both the Boston and New York areas are still under review by OMB. HUD will evaluate changes that result from this review and may change the FMR areas shown in this publication as a result of OMB's final decision expected in June of this year. If HUD changes the FMR area definitions after the proposed publication of this year's FMRs, there will be an additional comment period for the affected areas.

In addition, the FMR area definitions for the following areas have been modified by deleting counties that were added to the revised OMB definitions. The decision to delete these counties was based on an evaluation conducted by HUD headquarters and field staff which determined that the revised metropolitan area definitions are larger than the current housing market areas. The counties deleted from the FMR areas are those that are the most remote from the central cities/counties of the metropolitan area and have the lowest rents, in most cases significantly below the FMR area rent averages. The proposed FMRs for the counties deleted from the OMB definitions have been calculated separately based on the Census data for each individual county. They are shown in Schedule B within their respective States under the "Metropolitan FMR Areas" listing.

FMR area	Changes in previous FMR area
Atlanta, GA.	Deleted Carroll, Pickens, Spalding, and Walton Counties.
Chicago, IL.	Deleted DeKalb, Grundy and Kendall Counties.
Cincinnati-Hamilton, OH-KY-IN.	Deleted Brown County, Ohio; Gallatin, Grant and Pendleton Counties in Kentucky; and Ohio County, Indiana.
Dallas, TX	Deleted Henderson County.
Lafayette, LA.	Deleted St. Landry and Arcadia Parishes.
New Orleans, LA.	Deleted St. James Parish.
Washington, DC.	Deleted Berkeley and Jefferson Counties in West Virginia; and Clarke, Culpeper, King George and Warren Counties in Virginia.

The FMRs for the following FMR areas in Virginia were calculated by combining the 1990 Census data for the counties with the independent cities located within the borders of the counties. Because of space limitations, the FMR listing in Schedule B includes only the name of the nonmetropolitan County. The full definitions of these FMR areas including the independent cities are as follows:

FMR area (county)	Independent cities included
Allegheny	Clifton Forge and Covington.
Augusta	Staunton and Waynesboro.
Carroll	Galax.
Frederick	Winchester.
Greensville	Emporia.
Halifax	South Boston.
Henry	Martinsville.
Montgomery	Radford.
Rockbridge	Buena Vista and Lexington.
Rockingham	Harrisonburg.
Wise	Norton.

V. Method Used to Develop FMRs

FMR Standard: FMRs are gross rent estimates; they include shelter rent and the cost of utilities, except telephone. HUD sets FMRs to assure that a sufficient supply of rental housing is available to program participants. To accomplish this objective, FMRs must be both high enough to permit a selection of units and neighborhoods and low enough to serve as many families as possible. The level at which FMRs are set is expressed as a percentile point within the rent distribution of standard quality rental housing units. The current definition used is the 45th percentile rent, the dollar amount below which 45 percent of the standard quality rental housing units rent. The 45th percentile rent is drawn from the distribution of rents of units which are occupied by recent movers (renter households who moved into their unit within the past 15 months). Public housing units and newly built units less than two years old are excluded.

Data Sources: HUD uses the most accurate and current data available to develop the FMR estimates. Three sources of survey data have been used as the basis for making base-year estimates of the FMRs. They are: (1) The 1990 Census; (2) the Random Digit Dialing (RDD) telephone surveys conducted since the Census; and (3) the post-1990 Census American Housing Surveys available up to the time the FMR estimates were prepared. The base-year FMRs have been updated using Consumer Price Index (CPI) data for rents and utilities or the HUD Regional rent change factors developed from RDD surveys. Annual average CPI data are available individually for 95 metropolitan FMR areas. RDD Regional rent change factors are developed annually for the metropolitan and nonmetropolitan parts of each of the 10 HUD Regions (a total of 20 separate factors). The RDD factors are used to update the base year estimates for all FMR areas that do not have their own local CPI survey.

The decennial Census provides statistically reliable rent data for use in establishing base-year FMRs. AHS's are conducted by the Bureau of the Census for HUD and have comparable accuracy to the decennial Census. These surveys enable HUD to develop between-census revisions for 44 of the largest metropolitan areas on revolving schedule of 11 areas annually. The RDD telephone survey technique is based on a sampling procedure that uses computers to select statistically random samples of rental housing, dial and keep track of the telephone numbers and tabulate the responses. HUD uses a contractor to conduct RDD surveys. RDD surveys are conducted for two purposes: (1) For developing the FMR estimates for selected individual FMR areas; and (2) for developing the HUD Regional gross rent change factors. The HUD Regional surveys are conducted annually. Approximately 60 individual FMR areas are revised each year on the basis of RDD surveys.

Areas With FMRs Based on 1990 Census Data

1. For FMR areas where the base-year estimates were developed from the 1990 Census, the 45th percentile gross rent of standard quality units occupied by recent movers was calculated separately for each bedroom size. HUD's use of the full Census for the first time resulted in improved accuracy over FMR estimates previously developed using the 1980 Census Public Use Sample. Census data on rent levels are now available for all

VOL 58 ISS 86 MY 6 1993 UMI

counties and for minor civil divisions, which are the component parts of metropolitan areas in the New England states. This level of geographic detail enabled direct calculation of FMR estimates for all MSA/PMSA, metropolitan county and nonmetropolitan county FMR areas. The 1980 Public Use Sample was not large enough to permit calculation of the local bedroom-size rent differentials, and it was aggregated into county groupings for counties with less than 100,000 population.

For lightly populated nonmetropolitan counties, exceptions were made to the above procedure to protect against unrealistically low FMRs being set as the result of insufficient sample sizes. The first type of exception involved areas with less than 100 two-bedroom cases that had a 45th percentile rent below the state-wide minimum comparable rent of areas with 100 or more cases. The base-year FMR estimates for these areas were set at the lower of the state-wide minimum or the upper end of the confidence interval of the census-based rent for the area. The second exception was for areas with local bedroom-size intervals below the normal range. For these areas, the bedroom intervals selected were the minimums determined after excluding outlyers from the bedroom ratio distributions of all metropolitan areas. The selected minimums were: efficiency units can be no lower than 55 percent of the two-bedroom FMR; one-bedroom units no lower than 75 percent; three-bedroom units no lower than 125 percent; and four-bedroom units no lower than 140 percent. The ratios for the large-size units (those with three or more bedrooms) continue to reflect HUD's policy to use higher ratios than would be the result of using normal market relationships. The large-size unit adjustment, which adds about eight percent to the FMRs for large size units, is made to increase the likelihood that the largest, most difficult to place families will be successful in finding program-eligible units.

2. The base-year rent estimates were next increased by an adjustment factor which was developed from national AHS data to account for the additional housing quality measures available in the AHS and for the public housing units that are included in the Census counts. The housing quality adjustment factor is calculated separately for each FMR area. While it varies from area to area, the FMRs, on average, have been increased by about two percent as a result. This adjustment applies only to FMR areas without a local AHS. The rental housing samples for AHS areas are adjusted individually to delete both substandard and public housing units.

3. The final step was to update the base-year rent estimates to April 1, 1994, the mid-point of FY 1994 when the FMRs will be in effect.

For areas with local CPI surveys, the CPI data on rents and utilities was used to update the Census rent estimates from April 1990 through 1992, the most recent data available when the estimates were prepared. An annual rent increase of 3.0 percent was used as a projection factor for the 15-month period from January 1993 to April 1994. In previous years, an annual rent increase factor of 4.8 percent was used.

For areas without local CPI surveys, a 3.0 percent factor based on the national CPI was used to update from April 1990 through December 1990. RDD rent survey data became available in 1991, and these data for the respective HUD Region metropolitan or nonmetropolitan area in which the FMR area is located were used to update the estimates for 1991 and 1992. The 3.0 percent annual projection factor used for CPI areas was also used for non-CPI areas for the 15 months from January 1993 to April 1994.

4. The use of the full Census and other changes in the calculation procedures have resulted in significant revisions for a large number of FMR areas this year. For example, where all nonmetropolitan counties in a county group previously had the same FMRs, each county now has a separate FMR. At least half, and often more, of these counties have proposed decreases in their FMRs. The availability of data samples that are large enough to calculate the bedroom-size rent differentials on the basis of local rather than national data also has had a major impact on the one-bedroom FMRs. Because a majority of FMR areas have one-bedroom to two-bedroom ratios that are less than the national average of 85 percent, many have proposed reductions in their one-bedroom FMRs. Finally, the rent inflation factors developed from recent years' CPI and RDD surveys are much lower than those for previous years. This has resulted in smaller rent increases since the 1990 Census and led to the decision to use the 3.0 percent annual rent change projection factor in place of the 4.8 percent factor previously used.

Areas With FMRs Based on Local RDD Survey Data

1. HUD uses the RDD surveys to obtain statistically reliable FMR estimates for selected areas. The RDD technique involves drawing large, random samples of one- and two-bedroom renter units occupied by recent movers. Both one- and two-bedroom units are used because there are consistent relationships between the 45th percentile one- and two-bedroom rents in local housing markets and a more accurate two-bedroom FMR estimate can be obtained by expanding the sample base to include information on one-bedroom rents. The one-bedroom rents are adjusted by the average two-bedroom to one-bedroom ratio for the area being surveyed in order to convert the one-bedroom survey rents into two-bedroom equivalent rents.

2. RDD surveys exclude public housing units, newly built units and non-cash rental units. They do not exclude substandard units because there is no practical way to determine housing quality from telephone interviews. A HUD analysis conducted specifically to address this issue, however, has shown that the slightly downward RDD survey bias caused by including some rental units that are in substandard condition is almost exactly offset by the slightly upward bias that results from surveying only units with telephones. The small net bias results in FMRs which are slightly higher than they should be.

3. On average, about 8,000 telephone numbers need to be contacted to achieve the target survey sample level of at least 400 eligible responses. The RDD surveys have a high degree of statistical accuracy. There is a 95 percent likelihood that the 45th percentile recent mover rent estimates developed using this approach are within 3 to 4 percent of the actual 45th percentile rent value. Virtually all of the estimates will be within five percent of the actual 45th percentile value.

4. The RDD base-year 45th percentile rent estimates obtained from the surveys conducted in preparation for the FY 1994 proposed FMRs were trended to the mid-point of FY 1994 using essentially the same procedure as described in step 3 of the preceding section on Census-based FMR calculations. Either CPI or RDD data are used (depending on whether a local CPI survey is available) to update the estimates through 1992. The 15-month rent change projection factor is added to being the FMR estimates to April 1994.

5. The proposed FMRs include RDD surveys completed this year for nine FMR areas.

Three areas—the Dubuque, IA and Manchester, NH MSAs and Marshall County, a nonmetropolitan FMR area in Iowa—have proposed decreases in their FMRs for all unit sizes.

The Orlando, FL MSA has a larger than normal increase proposed for all unit sizes.

Five areas have a mixture of proposed increases and decreases for the various bedroom-size categories. The Denver, CO PMSA has decreases in the efficiency and one-bedroom unit sizes and increases in the remaining unit sizes. The Richland-Kennewick-Pasco, WA MSA and the San Antonio, TX MSA have increases for all unit sizes except for the one-bedroom units. The Yuma, AZ MSA has decreases for all unit sizes except for the three bedroom size. Cherokee County, NC has proposed decreases in the one-, two- and three-bedroom categories and increases in the efficiency end four-bedroom units.

Areas With FMRs Based on Metropolitan Area AHS Data

1. American Housing Surveys cover 44 of the largest metropolitan areas, which contain half of the nation's rental housing stock. The surveys are conducted on a four-year cycle, 11 areas each year. HUD used the AHS data to calculate the 45th percentile rent from the distribution of two-bedroom units occupied by recent movers. The bedroom size differentials for other size units were based on the decennial Census intervals for the area. Public housing units, newly constructed units and units that fail a housing quality test were excluded from the distribution before the calculation. The resulting estimate became the base-year rent for the area. The FY 1994 FMRs incorporated the results of the 1991 AHSs. The 1990 AHSs were included in last year's FMRs. All of the pre-1990 Census AHSs were revised with the Census.

2. The areas with base-year rent estimates based on AHS data were trended to the mid-point of Fiscal Year 1994 using either CPI or RDD survey data on rent changes through 1992 and the 15-month rent change projection factor to bring them to April 1994.

3. The proposed FMRs include AHSs for 10 FMR areas.

Atlanta, GA and the Houston, TX PMSA have increases proposed for all unit sizes.

The St. Louis, MO–IL MSA and the Chicago, IL PMSA have decreases proposed for all unit sizes.

Seven areas have a mixture of proposed increases and decreases for the various bedroom size categories. The Baltimore, MD, Columbus, OH, Seattle, WA and Tacoma, WA FMR areas have decreases in the efficiency and one-bedroom categories and increases in the two-, three- and four-bedroom categories. The San Diego, CA MSA has decreases in the efficiency, one- and two-bedroom categories and increases in the three- and four-bedroom unit categories. The Brazoria, TX PMSA has a decrease in the one-bedroom unit size, but increases in all other bedroom sizes.

The following is a list of the HUD regions showing the states included in each:

RDD rent change factors			
HUD region	Metro part (percent)	Nonmetro part (percent)	States included
I	1.0	1.0	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.
II	2.1	1.6	New Jersey, New York
III	.5	.6	Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia.
IV	2.1	2.1	Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, Virgin islands.
V	2.3	.9	Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin.
VI	2.1	1.9	Arkansas, Louisiana, Oklahoma, New Mexico, Texas.
VII	1.4	2.3	Iowa, Kansas, Missouri, Nebraska.
VIII	4.0	2.9	Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming.
IX	1.1	1.5	Arizona, California, Hawaii, Nevada, Pacific Islands.
X	2.7	.3	Alaska, Idaho, Oregon, Washington.

The proposed FMRs for the Pacific Islands and the Virgin Islands have been adjusted using the respective nonmetropolitan RDD rent change factors indicated in the table above. For FMR purposes, the Pacific Islands include Guam, the Mariana Islands, and the Trust Territories. Based on a prior consultation with the Caribbean office of HUD, the FMRs in Puerto Rico will remain at the current levels.

Manufactured Home Space Rents

The proposed FMRs for Manufactured Home Spaces have been updated for one more year to April 1, 1994, using the respective HUD Regional RDD adjustment factors, which were adjusted to exclude the major part of the cost of utilities contained in these estimates. The FMRs have not been re-benchmarked because no data are available in the 1990 Census on manufactured home space rentals, and no other source of reliable data has been found that can be used for this purpose.

The Manufactured Home Owners Assistance program was established in 1978 to provide assistance to families who owned a manufactured home but were unable to meet the rising costs of space rentals. Originally, the Manufactured Home Space FMRs were established based on AHS data for the nonmetropolitan parts of states and HUD field office surveys of the metropolitan areas. Over the years, the FMRs for many of these areas were revised and those for additional individual areas were established on the basis of local surveys submitted as public comments. Because the very small amount of program activity does not justify the expected costs to obtain survey data, HUD is considering alternatives to establishing FMRs for this program. One alternative being considered is to replace the FMRs with a rent reasonableness test that assures that the Manufactured Home Space rental does not exceed that required to rent a space in a modest, nonluxury park. Modest rent would be defined within the context of the local FMR area in which the park is located. Implementation of this proposal would require a legislative change, since the current law requires that FMRs, including those for Manufactured Home Spaces, be established and published in the Federal Register. HUD invites comments on this proposal and other suggestions on whether Manufactured Home Space FMRs are needed and how they might be established.

V. Request for Comments

The Department seeks public comment on FMR levels for specific areas. Comments on FMR levels must include sufficient information (including local data and a full description of the methodology used) to

VOL 58 ISS 86 MY 6 1993 UMI

justify any proposed changes. Changes may be proposed in all or any of the bedroom-size categories on the schedule. Recommendations and supporting data must reflect the rent levels that exist within the entire FMR area.

PHAs that plan to use the RDD survey technique may obtain a copy of the "PHA Guide to Conducting a Fair Market Rent (FMR) Telephone Survey" by calling HUD USER on 1–800–245–2691. This package contains information on: (1) How to decide whether to conduct a rent survey; (2) selecting a contractor; and (3) monitoring the contract. In addition, there are example copies of a request for bids letter and a contract package, the survey questionnaire and interviewer training manual, and a detailed explanation of the methodology. After a contract is awarded, these surveys can normally be completed within two to three months. The hardware and the timing of staff utilization require that these surveys be conducted by contractors staffed with professional statisticians experienced in this field.

Well-constructed RDD surveys are the preferred method; however, they are not mandated where not cost effective or where alternative surveys with comparable reliability are available and have been determined to be representative of prevailing rent levels in the FMR area. The survey samples must be representative of rental housing stock of the entire FMR area. Preferably, samples should be randomly drawn. If this is not a feasible alternative, care should be taken to ensure that the selected sample is not biased toward units of a particular type, age or geographic location. The decennial Census should be used as a starting point guide and as a means of verification for determining whether non-randomly drawn samples are representative of the FMR area rental housing stock.

Local rental housing surveys must show the 45th percentile gross rent (rent including the cost of utilities) and the actual distribution (or distributions if more than one bedroom size is surveyed) of the surveyed units rank ordered by gross rent. An explanation of how contract rents were converted to gross rents needs to be included. The surveys must exclude units built within two years prior to the survey date and samples must not be drawn solely from vacant units. Since the FMR standard data base uses only standard quality units and units occupied by recent movers, both of which are difficult to identify and survey, the Department will accept surveys of all units and apply an appropriate adjustment.

Commenters must specify the date the rent data were collected so that the Department can apply a trending factor to update the estimate to April 1, 1994. Survey data that are trended to the April 1, 1994 "as of date" of the FMRs must include information on the date the survey was conducted, the amount of the trending factor and the source of the trending data. The Department will evaluate all information provided with the comments before making a final decision on the trending adjustment.

Rent surveys that cover only two-bedroom units are acceptable if rent proposals for other size units are consistent with the HUD differentials established on the basis of the 1990 Census data for the area. When three- and four-bedroom units are surveyed, the following procedure must be used to determine appropriate FMR proposals:

(1) Determine the 45th percentile rents for the three- and four-bedroom units surveyed, (2) multiply the 45th percentile three-bedroom rent by 1.087 to determine the three-bedroom FMR, and (3) multiply the four-bedroom rent by 1.077 to determine the four-bedroom FMR. The use of these factors will produce the same upward adjustments in the rent differentials by bedroom size as those applied to the rent differentials for three- and four-bedroom units in the HUD methodology.

VI. Other Matters

A Finding of No Significant Impact with respect to the environment required by the National Environmental Policy Act (42 U.S.C. 4321–4374) is unnecessary, since the statutorily required establishment and review of fair market rents is categorically excluded from the Department's regulations implementing the National Environment Policy Act at 24 CFR 50.20(l).

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this document before publication and by approving it certifies that the Notice does not have a significant economic impact on a substantial number of small entities, because FMRs reflect the rents for similar quality units in the area. Therefore, FMRs do not change the rent from that which would be charged if the unit were not in the Section 8 program.

The General Counsel, as the Designated Official under Executive Order No. 12606, The Family, has determined that this proposal would not have a significant impact on family formation, maintenance, or well-being. The proposal would amend Fair Market Rent schedules for various Section 8 assisted housing programs, and does not affect the amount of rent a family receiving rental assistance pays, which is based on a percentage of the family's income.

The General Counsel, as the Designated Official under section 6(a) of Executive Order No. 12611, Federalism, has determined that this proposal would not involve the preemption of State law by Federal Statue or regulation and would not have Federalism implications. The Fair Market Rent schedules do not have any substantial direct impact on States, on the relationship between the Federal government and the States, or on the distribution of power and responsibility among the various levels of government.

The Catalog of Federal Domestic Assistance program number is 14.156, Lower-Income Housing Assistance Program (section 8).

Accordingly, the Fair Market Rent Schedules, which will not be codified in the Code of Federal Regulations, are proposed to be amended as follows:

Dated: April 28, 1993.

Henry G. Cisneros,

Secretary.

Section 8 Fair Market Rent Schedules, for Use in the Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program, and Housing Voucher Program Schedules B and D—General Explanatory Notes

1. Geographic Coverage

a. FMRs for the Section 8 Certificate program (Schedule B) are established, for Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), other HUD-designated metropolitan FMR areas, for nonmetropolitan counties and county equivalents in the United States, Puerto Rico, the Virgin Islands and the Pacific Islands. FMRs also are established for nonmetropolitan parts of counties in the New England states.

b. FMRs for the areas in Virginia shown in the table below are established by combining the 1990 Census data for the nonmetropolitan counties with the data for the independent cities that are located within the county borders. Because of space limitations, the FMR listing in Schedule B includes only the name of the nonmetropolitan County. The full definitions of these areas including the independent cities are as follows:

Virginia nonmetropolitan county FMR area	Virginia independent cities included with county
Allegheny	Clifton Forge and Covington.
Augusta	Staunton and Waynesboro.
Carroll	Galax.
Frederick	Winchester.
Greensville	Emporia.
Halifax	South Boston.
Henry	Martinsville.
Montgomery	Radford.
Rockbridge	Buena Vista and Lexington.
Rockingham	Harrisonburg.
Wise	Norton.

d. FMRs for Manufactured Home spaces in the Section 8 Certificate program (Schedule D) are established for MSAs, PMSAs, HUD-designated metropolitan counties, and for selected nonmetropolitan counties and the residual nonmetropolitan part of each State.

2. Arrangement of FMR Areas and Identification of Constituent Parts

a. The FMR areas in Schedules B and D are listed alphabetically by metropolitan FMR area and by nonmetropolitan county within each State.

b. The constituent counties (and New England towns and cities) included in each metropolitan FMR area are listed immediately following the listings of the FMR dollar amounts. All constituent parts of a metropolitan FMR area that are in more than one State can be identified by consulting the listings for each applicable State.

c. Two nonmetropolitan counties are listed alphabetically on each line of the nonmetropolitan county listings.

d. The New England towns and cities included in a nonmetropolitan part of a county are listed immediately following the county name.

e. The FMRs are listed by dollar amount on the first line beginning with the FMR area name.

DEPARTMENT OF EDUCATION

34 CFR Part 612

RIN: 1840–AB11

Drug Prevention Programs in Higher Education

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing the Drug Prevention Programs in Higher Education. These final regulations permit an eligible applicant to receive more than one current grant for an Analysis project. This is accomplished by removing a reporting requirement as an element of eligibility. The Secretary makes this change to increase the number of applications for Analysis projects.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Donald Fischer, Drug Prevention Programs in Higher Education, Fund for the Improvement of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (ROB–3, room 3100), Washington, DC. 20202–5175. Telephone: (202) 708–5771. Individuals who are hearing impaired may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Drug Prevention Programs in Higher Education provide assistance to institutions of higher education (IHEs) and consortia of IHEs for projects designed to develop, implement, operate, and improve educational programs in drug abuse prevention (including rehabilitation referral) for students enrolled in IHEs. The programs support National Education Goal 6 that specifically calls for every school in America to be free of drugs and violence and to offer a disciplined environment conducive to learning.

Under Analysis and Dissemination competitions, the Secretary funds projects to analyze and disseminate successful project designs, policies, and results of projects funded under Institution-Wide Program competitions and Special Focus Program competitions. More specifically, Analysis projects have been funded to analyze overall results of Institution-Wide projects and cross-cutting features of Institution-Wide projects. Institution-Wide projects are comprehensive in scope. They are designed to prevent or eliminate the use of illegal drugs and alcohol by students in institutions of higher education. To that end, they provide training in drug abuse education and prevention to students, faculty, and staff. Special Focus projects address one or more specific approaches or problem areas related to drug abuse education and prevention for students enrolled in institutions of higher education.

The Secretary makes revisions to existing regulations because of the low number of applications received under three previous competitions for Analysis awards, and the desirability of increasing the number of applications submitted by knowledgeable applicants with previous experience in conducting Institution-Wide or Special Focus projects.

Under the previous § 612.2(c), an applicant that had received an award in a competition for Analysis projects was not eligible to receive a subsequent award in that competition until the applicant had submitted every report required under the prior project. These final regulations remove the reporting requirement as an element of eligibility for subsequent Analysis projects.

Note, however, that under 34 CFR 75.217(d)(3) the Secretary determines the order in which applications are selected for grants by considering, among other factors, information concerning the applicant's use of funds under a previous award under this program. In applying this provision, the Secretary intends to ensure that an applicant that has an award for an existing Analysis project does not receive a new award for an identical Analysis project. However, in the case of an applicant conducting an Analysis project in which, for example, the final reports of a cohort of Institution-Wide projects are being analyzed, the Secretary's application of this provision will not prohibit the applicant from receiving a new award to analyze the final reports of a different cohort of Institution-Wide projects. The difference in cohorts will render these projects separate and distinct and, therefore, allowable.

On September 25, 1992, the Secretary published a notice of proposed rulemaking for this program in the Federal Register (57 FR 44350).

There are no differences between the NPRM and these final regulations.

Public Comment

In the NPRM the Secretary invited comments on the proposed regulations; however, no comments were received. The Secretary has made no changes in these regulations since publication of the NPRM.

Executive Order 12291

These final regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 612

Colleges and universities, Drug abuse, Grant programs—education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number: Drug Prevention Programs in Higher Education, 84.183)

Dated: April 29, 1993.

Richard W. Riley,

Secretary of Education.

The Secretary amends part 612 of chapter VI of title 34 of the Code of Federal Regulations as follows:

PART 612—DRUG PREVENTION PROGRAMS IN HIGHER EDUCATION

1. The authority citation for part 612 continues to read as follows:

Authority: 20 U.S.C. 3211, unless otherwise noted.

2. Section 612.2 is amended by revising paragraph (c) to read as follows:

§ 612.2 Who is eligible to receive an award?

* * * * *

(c) If an applicant has received an award in a competition, the applicant may not receive a new award in that competition in a subsequent year until—

(1) The Secretary determines that the applicant will satisfactorily complete the project previously supported; and

(2) Except for Analysis projects as described in § 612.21(d), the applicant has submitted every report that it must submit in connection with the prior project.

DEPARTMENT OF EDUCATION

34 CFR Part 630

RIN: 1840–AB75

Fund for the Improvement of Postsecondary Education

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing the Fund for the Improvement of Postsecondary Education. These amendments are needed to implement provisions of the Higher Education Amendments of 1992. These amendments conform the existing regulations to the new statutory requirements and make minor technical changes.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: John E. Donahue, U.S. Department of Education, 400 Maryland Avenue, SW., room 3100, ROB–3, Washington, DC 20202–5175. Telephone: (202) 708–5750. Deaf and hearing impaired individuals may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: These regulations implement the Higher Education Amendments of 1992 (Pub. L. 102–325), enacted July 23, 1992. The amendments revise the Innovative Projects for Community Service Program by removing the focus on student financial assistance and emphasizing creative ways to involve college students in community service. The authorization for the program was moved from title X to title XI, part B, subpart 1. The amendments also authorize planning grants to develop and test innovative techniques in postsecondary education as well as a program of special projects in areas of national need, including international exchanges, campus climate and culture, and evaluation and dissemination. In describing eligible parties, the amendments change the term "institutions of postsecondary education" to "institutions of higher education."

Planning grants are available only to institutions of higher education. Eligible parties for the other programs include institutions of higher education, combinations of those institutions, and other public and private nonprofit institutions and agencies.

Two of the three exceptions to the Education Department General Administrative Regulations (EDGAR) listed in § 630.4 have been deleted because they are no longer applicable.

This program supports the National Education Goals through awards for teacher education, curriculum reform, lifelong learning, and student volunteerism. It particularly addresses Goal 2 (High School Completion), Goal 3 (Student Achievement and Citizenship), Goal 4 (Science and Mathematics), and Goal 5 (Adult Literacy and Lifelong Learning).

Waiver of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)), and the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. These amendments, however, merely incorporate required statutory changes into the existing regulations and make minor technical changes. They do not establish substantive policy. Therefore, the Secretary has determined, pursuant to 5 U.S.C. 553(b)(B), that public comment on the regulations is unnecessary and contrary to the public interest.

Executive Order 12291

These final regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act

The Secretary certifies that these regulations would not have significant economic impact on a substantial number of small entities. The small entities that would be affected by these regulations are small nonprofit institutions of higher education and other small public and private nonprofit institutions and agencies. The regulations will impose only the minimal requirements necessary to ensure the proper expenditure of program funds. The regulations will not impose excessive regulatory burden and will not have a significant economic impact on the small entities affected.

Paperwork Reduction Act of 1980

These regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

Based on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 630

Colleges and universities, Education, Grant programs—education.

(Catalog of Federal Domestic Assistance Number 84.116 Fund for the Improvement of Postsecondary Education)

Dated: April 29, 1993.

Richard W. Riley,

Secretary of Education.

The Secretary amends part 630 of title 34 of the Code of Federal Regulations as follows:

PART 630—FUND FOR THE IMPROVEMENT OF POSTSECONDARY EDUCATION

1. The authority citation for part 630 is revised to read as follows:

Authority: 20 U.S.C. 1135–1135a–2, 1135a–11, 1137–1137a, unless otherwise noted.

2. Section 630.2 is revised to read as follows:

§ 630.2 Eligible parties.

Institutions of higher education, combinations of institutions of higher education, and other public and private nonprofit institutions and agencies are eligible to receive an award, except planning grants. Only institutions of higher education may receive a planning grant award.

(Authority: 20 U.S.C. 1135–1135a–2, 1135a–11, 1137–1137a)

3. Section 630.4 is revised to read as follows:

§ 630.4 Regulations that apply to this program.

The following regulations apply to this program:

(a) The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations).

(2) 34 CFR part 75 (Direct Grant Programs), except for § 75.201(a) (Unweighted Selection Criteria).

(3) 34 CFR part 77 (Definitions that Apply to Department Regulations).

(4) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(5) 34 CFR part 82 (New Restrictions on Lobbying).

(6) 34 CFR part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

(7) 34 CFR part 86 (Drug-Free Schools and Campuses).

(b) The regulations in this part 630.

(Authority: 20 U.S.C. 1135–1135a–2, 1135a–11, 1137–1137a, 3474; 41 U.S.C. 505)

4. Section 630.5 is amended by revising the definitions of "Combination of institutions of postsecondary education" and "Community service" in paragraph (b) and the authority citation to read as follows:

§ 630.5 Definitions that apply to this program.

* * * * *

(b) * * *

Combination of institutions of higher education means a group of institutions of higher education that have entered into a joint agreement for the purpose of carrying out a common objective, or a public or nonprofit private agency, organization, or institution designated or created by a group of institutions of higher education for the purpose of carrying out a common objective on their behalf.

Community service means planned, supervised services designed to improve the quality of life for community residents, particularly community residents with low income, or to assist in the solutions of particular problems related to the needs of those residents. This term does not include partisan or non-partisan political activity, lobbying, direct solicitation of donations, religious proselytizing, conduct of religious services or instruction, pro-union or anti-union activity, or activities that result in the displacement of employed workers or impair existing contracts for service.

* * * * *

(Authority: 20 U.S.C. 1135–1135a–2, 1135a–11, 1137–1137a, 1141)

5. Section 630.11 is amended by revising paragraph (c), adding new paragraphs (d) and (e), and revising the authority citation to read as follows:

§ 630.11 Types of competitions.

* * * * *

(c) *Innovative Projects for Community Service competition.* In this competition the Secretary supports innovative projects to encourage student participation in community service projects, including literacy projects.

(d) *Planning Grants competition.* In this competition the Secretary supports projects to develop and test innovative techniques in postsecondary education. No grant may exceed $20,000.

(e) *Special Projects competition.* In this competition the Director of the Fund supports innovative projects concerning one or more areas of particular national need identified by the Director.

(Authority: 20 U.S.C. 1135–1135a–2, 1135a–11, 1137–1137a)

UNITED STATES SENTENCING COMMISSION

Amendments to the Sentencing Guidelines for United States Courts

AGENCY: United States Sentencing Commission.

ACTION: Notice of submission to Congress of amendments to the sentencing guidelines.

SUMMARY: Pursuant to its authority under section 994(p) of title 28, United States Code, the Commission on April 29, 1993, submitted to the Congress for review a report containing amendments to the sentencing guidelines, policy statements, and official commentary together with reasons for the amendments.

DATES: Pursuant to 28 U.S.C. 994(p), as amended by section 7109 of the Anti-Drug Abuse Act of 1988 (Pub. L. 100–690, Nov. 18, 1988), the Commission has specified an effective date of November 1, 1993, for these amendments. Comments regarding amendments that the Commission should specify for retroactive application to previously sentenced defendants should be received no later than July 31, 1993.

ADDRESSES: Comments should be sent to: United States Sentencing Commission, One Columbus Circle NE., suite 2–500, South Lobby, Washington, DC 20002–8002, Attn: Public Information.

FOR FURTHER INFORMATION CONTACT: Mike Courlander, Public Information Specialist, telephone: (202) 273–4590.

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission, an independent agency in the judicial branch of the U.S. Government, is empowered by 28 U.S.C. 994(a) to promulgate sentencing guidelines and policy statements for federal sentencing courts. The statute further directs the Commission to review periodically and revise guidelines previously promulgated and authorizes it to submit guideline amendments to the Congress no later than the first day of May each year. See 28 U.S.C. 994(o), (p). Absent action of Congress to the contrary, the amendments become effective on the date specified by the Commission (i.e., November 1, 1993) by operation of law.

Notice of the amendments submitted to the Congress on April 29, 1993, was published in the **Federal Register** of December 31, 1992 (57 FR 62832). A public hearing on the proposed amendments was held in Washington, DC, on March 22, 1993. After review of the hearing testimony and additional public comment, the Commission promulgated the amendments, each having been approved by at least four voting Commissioners.

In connection with its ongoing process of guideline review, the Commission welcomes comment on any aspect of the sentencing guidelines, policy statements, and official commentary. Specifically, the Commission solicits comment on which, if any, of the amendments submitted to the Congress that may result in a lower guideline range should be made retroactive to previously sentenced defendants under Policy Statement 1B1.10.

Authority: 28 U.S.C. 994 (a), (o), (p); sec. 7109 of the Anti-Drug Abuse Act of 1988 (Pub. L. 100–690).

William W. Wilkins, Jr.,

Chairman.

Amendments to the Sentencing Guidelines

Pursuant to section 994(p) of title 28, United States Code, as amended by section 7109 of the Anti-Drug Abuse Act of 1988 [Pub. L. 100–690, Nov. 18, 1988], the United States Sentencing Commission reports to the Congress the following amendments to the sentencing guidelines, and the reasons therefor. As authorized by this section, the Commission specifies an effective date of November 1, 1993, for these amendments.

Amendments to the Sentencing Guidelines, Policy Statements, and Official Commentary

1. Amendment: Section 1B1.11(b) is amended by inserting the following additional subdivision:

"(3) If the defendant is convicted of two offenses, the first committed before, and the second after, a revised edition of the Guidelines Manual became effective, the revised edition of the Guidelines Manual is to be applied to both offenses.".

The Commentary to section 1B1.11 captioned "Application Note" is amended by inserting the following additional note:

"2. Under subsection (b)(1), the last date of the offense of conviction is the controlling date for ex post facto purposes. For example, if the offense of conviction (i.e., the conduct charged in the count of the indictment or information of which the defendant was convicted) was determined by the court to have been committed between October 15, 1991 and October 28, 1991, the date of October 28, 1991 is the controlling date for ex post facto purposes. This is true even if the defendant's conduct relevant to the determination of the guideline range under § 1B1.3 (Relevant Conduct) included an act that occurred on November 2, 1991 (after a revised Guideline Manual took effect).";

and in the caption by deleting "Note" and inserting in lieu thereof "Notes".

The Commentary to § 1B1.11 captioned "Background" is amended by inserting the following additional sentence as the first sentence of the first paragraph:

"Subsections (a) and (b)(1) provide that the court should apply the Guidelines Manual in effect on the date the defendant is sentenced unless the court determines that doing so would violate the ex post facto clause in Article I, section 9 of the United States Constitution.";

and by inserting the following additional paragraphs at the end:

"Subsection (b)(2) provides that the Guidelines Manual in effect on a particular date shall be applied in its entirety.

Subsection (b)(3) provides that where the defendant is convicted of two offenses, the first committed before, and the second after, a revised edition of the Guidelines Manual became effective, the revised edition of the Guidelines Manual is to be applied to both offenses, even if the revised edition results in an increased penalty for the first offense. Because the defendant completed the second offense after the amendment to the guidelines took effect, the ex post facto clause does not prevent determining the sentence for that count based on the amended guidelines. For example, if a defendant pleads guilty to a single count of embezzlement that occurred after the most recent edition of the Guidelines Manual became effective, the guideline range applicable in sentencing will encompass any relevant conduct (e.g., related embezzlement offenses that may have occurred prior to the effective date of the guideline amendments) for the offense of conviction. The same would be true for a defendant convicted of two counts of embezzlement, one committed before the amendments were enacted, and the second after. In this example, the ex post facto clause would not bar application of the amended guideline to the first conviction; a contrary conclusion would mean that such defendant was subject to a lower guideline range than if convicted only of the second offense. Decisions from several appellate courts addressing the analogous situation of the constitutionality of counting pre-guidelines criminal activity as relevant conduct for a guidelines sentence support this approach. See United States v. Ykema, 887 F.2d 697 (6th Cir. 1989) (upholding inclusion of pre-November 1, 1987, drug quantities as relevant conduct for the count of conviction, noting that habitual offender statutes routinely augment punishment for an offense of conviction based on acts committed before a law is passed), cert. denied, 493 U.S 1062 (1990); United States v. Allen, 886 F.2d 143 (8th Cir. 1989) (similar); see also United States v. Cusack, 901 F.2d 29 (4th Cir. 1990) (similar).

Moreover, the approach set forth in subsection (b)(3) should be followed regardless of whether the offenses of conviction are the type in which the conduct is grouped under § 3D1.2(d). The ex post facto clause does not distinguish between groupable and nongroupable offenses, and unless that clause would be violated, Congress' directive to apply the sentencing guidelines in effect at the time of sentencing must be followed. Under the guideline sentencing system, a single sentencing range is determined based on the defendant's overall conduct, even if there are multiple counts of conviction (see §§ 3D1.1–3D1.5, 5G1.2). Thus, if a defendant is sentenced in January 1992 for a bank robbery committed in October 1988 and one committed in November 1991, the November 1991 Guidelines Manual should be used to determine a combined guideline range for both counts. See generally United States v. Stephenson, 921 F.2d 438 (2d Cir. 1990) (holding that the Sentencing Commission and Congress intended that the applicable version of the guidelines be applied as a "cohesive and integrated whole" rather than in a piecemeal fashion).

Consequently, even in a complex case involving multiple counts that occurred under several different versions of the Guidelines Manual, it will not be necessary to compare more than two manuals to determine the applicable guideline range—the manual in effect at the time the last offense of conviction was completed and the one in effect at the time of sentencing.".

Reason for Amendment: This amendment expands policy statement § 1B1.11 (Use of Guidelines Manual in Effect on Date of Sentencing) to address what has become a frequently asked hotline question and troublesome application issue—the application of amended guidelines to multiple count cases in which the effective date of guideline revision(s) occur between offenses of conviction. The issue has also produced litigation before several appellate courts. See *United States* v. *Castro*, 972 F.2d 1107 (9th Cir. 1992), cert. denied, 113 S. Ct. 1350 (1993); *United States* v. *Seligsohn*, 981 F.2d 1418 (3d Cir. 1992), reh'g denied (1993); *United States* v. *Hartzog*, 983 F.2d 604 (4th Cir. 1993). This amendment extends the Commission's "one book" rule to multiple count cases and provides a basic rationale for the policy.

2. Amendment: Chapter One, part B, is amended by inserting at the end:

"§ 1B1.12. Persons Sentenced Under the Federal Juvenile Delinquency Act (Policy Statement)

The sentencing guidelines do not apply to a defendant sentenced under the Federal Juvenile Delinquency Act (18 U.S.C. 5031–5042). However, the sentence imposed upon a juvenile delinquent may not exceed the maximum of the guideline range applicable to an otherwise similarly situated adult defendant unless the court finds an aggravating factor sufficient to warrant an upward departure from that guideline range. *United States* v. *R.L.C.*, 112 S. Ct. 1329 (1992). Therefore, a necessary step in ascertaining the maximum sentence that may be imposed upon a juvenile delinquent is the determination of the guideline range that would be applicable to a similarly situated adult defendant.".

Section 5H1.1 is amended by deleting the last paragraph as follows:

"The guidelines are not applicable to a person sentenced as a juvenile delinquent under the provisions of 18 U.S.C. 5037.".

Reason for Amendment: This amendment adds a policy statement to Chapter One, Part B (Application Instructions) addressing the determination of the maximum imposable sentence in the case of a juvenile delinquent. The United States Supreme Court's decision in *United States* v. *R.L.C.*, 112 S. Ct. 1329 (1992), requires calculation of the guideline range in order to determine the maximum sentence imposable on a juvenile delinquent.

3. Amendment: The Commentary to § 2A1.1 captioned Background is deleted as follows:

"Background: The maximum penalty authorized by 18 U.S.C. 1111 for first degree murder is death or life imprisonment. Whether a mandatory minimum term of life imprisonment is applicable to every defendant convicted of first degree murder under 18 U.S.C. 1111 is a matter of statutory interpretation for the courts. The discussion in application Note 1, supra, regarding circumstances in which a downward departure may be warranted is relevant in the event the penalty provisions of 18 U.S.C. 1111 are construed to permit a sentence less than life imprisonment, or in the event the defendant is convicted under a statute that expressly authorizes a sentence of less than life imprisonment (e.g., 18 U.S.C. 2113(e), 2118(c)(2), 21 U.S.C. 848(e)).

The maximum penalty authorized under 21 U.S.C. 848(e) is death or life imprisonment. If a term of imprisonment is imposed, the statutorily required minimum term is twenty years.".

Reason for Amendment: This amendment deletes commentary that highlighted the question of whether 18 U.S.C. 1111 provides a mandatory minimum term of life imprisonment. Since this commentary was written, appellate courts uniformly have held that 18 U.S.C. 1111 does provide a mandatory minimum term of life imprisonment. See *United States* v. *Sands*, 968 F.2d 1058 (10th Cir. 1992), cert. denied, 113 S. Ct. 987 (1993); *United States* v. *LaFleur*, 952 F.2d 1537 (9th Cir. 1991); *United States* v. *Gonzalez*, 922 F.2d 1044 (2d Cir.), cert. denied, 112 S. Ct. 860 (1991); *United States* v. *Donley*, 878 F.2d 735 (3d Cir. 1989), cert. denied, 494 U.S. 1058 (1990). In addition, this amendment deletes, as unnecessary, several sentences of commentary that merely recite statutory penalties.

4. Amendment: Section 2A3.1 is amended by redesignating subsection (c) as subsection (d); and by inserting the following additional subsection:

"(c) Cross Reference

(1) If a victim was killed under circumstances that would constitute murder under 18 U.S.C. 1111 had such killing taken place within the territorial or maritime jurisdiction of the United States, apply section 2A1.1 (First Degree Murder).".

Section 2A3.1(b)(2) is amended by deleting "otherwise, (B) if the victim was under the age of sixteen" and inserting in lieu thereof "or (B) if the victim had attained the age of twelve years but had not attained the age of sixteen years".

Section 2A4.2 is amended by inserting the following additional subsection:

"(b) Cross Reference

(1) If the defendant was a participant in the kidnapping offense, apply § 2A4.1 (Kidnapping; Abduction; Unlawful Restraint).".

The Commentary to § 2A4.2 is amended by inserting the following immediately before "Background".

"Application Note:

1. A 'participant' is a person who is criminally responsible for the commission of the offense, but need not have been convicted.".

Section 2B3.1 is amended by inserting the following additional subsection:

"(c) Cross Reference

(1) If a victim was killed under circumstances that would constitute murder under 18 U.S.C. 1111 had such killing taken place within the territorial or maritime jurisdiction of the United States, apply section 2A1.1 (First Degree Murder).".

The Commentary to section 2B3.1 captioned "Application Notes" is amended by deleting Note 8 as follows:

"6. If the defendant was convicted under 18 U.S.C. 2113(e) and in committing the offense or attempting to flee or escape, a participant killed any person, apply section 2A1.1 (First Degree Murder). Otherwise, if death results, see Chapter Five, Part K (Departures).";

and by renumbering the remaining notes accordingly.

Section 2B3.2(c) is amended by deleting "Reference" and inserting in lieu thereof "References"; by renumbering subdivision (1) as subdivision (2); and by inserting the following additional subdivision:

"(1) If a victim was killed under circumstances that would constitute murder under 18 U.S.C. 1111 had such killing taken place within the territorial or maritime jurisdiction of the United States, apply section 2A1.1 (First Degree Murder).".

VOL 58 ISS 86 MY 6 1993 UMI

Section 2B3.3 is amended by inserting the following additional subsection:

"(c) Cross References

(1) If the offense involved extortion under color of official right, apply section 2C1.1 (Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right).

(2) If the offense involved extortion by force or threat of injury or serious damage, apply section 2B3.2 (Extortion by Force or Threat of Injury or Serious Damage).".

Section 2D1.1 is amended by inserting the following additional subsection:

"(c) Cross Reference

(1) If a victim was killed under circumstances that would constitute murder under 18 U.S.C. 1111 had such killing taken place within the territorial or maritime jurisdiction of the United States, apply section 2A1.1 (First Degree Murder).".

Section 2E2.1 is amended by inserting the following additional subsection:

"(c) Cross Reference

(1) If a victim was killed under circumstances that would constitute murder under 18 U.S.C. 1111 had such killing taken place within the territorial or maritime jurisdiction of the United States, apply section 2A1.1 (First Degree Murder).".

Reason for Amendment: This amendment adds cross references to sections 2A3.1, 2B3.1, 2B3.2, 2D1.1, and 2E2.1 to address the circumstance in which a victim is murdered during the offense. In addition, an editorial change in section 2A3.1(b)(2) is made to conform the phraseology used in this subsection to that used elsewhere in the guidelines. Furthermore, a cross reference is added to section 2A4.2 to address the circumstance in which the defendant was a participant in the underlying kidnapping offense. Finally, cross references are added to section 2B3.3 to ensure the selection of the appropriate guideline for the offenses covered by the statutes referenced to this section.

5. Amendment: The Commentary to section 2A3.1 captioned "Application Notes" is amended by inserting the following additional note:

"5. If the defendant was convicted (A) of more than one act of criminal sexual abuse and the counts are grouped under section 3D1.2 (Groups of Closely-Related Counts), or (B) of only one such act but the court determines that the offense involved multiple acts of criminal sexual abuse of the same victim or different victims, an upward departure would be warranted.".

Reason for Amendment: This amendment authorizes an upward departure where the offense involved multiple acts of criminal sexual abuse that do not result in an increase in offense level under the multiple count rules in Chapter Three, Part D (Multiple Counts).

6. Amendment: The Commentary to section 2A4.1 captioned "Background" is amended in the third paragraph by deleting:

"or to facilitate the commission of another offense. Should the application of this guideline result in a penalty less than the result achieved by applying the guideline for the underlying offense, apply the guideline for the underlying offense (e.g., § 2A3.1, Criminal Sexual Abuse).",

and inserting in lieu thereof:

"(subsection (b)(1)) or involves another federal, state, or local offense that results in a greater offense level (subsections (b)(7) and (c)(1)).".

The Commentary to Section 2K1.3 captioned "Application Notes" is amended in Note 4 by inserting "(federal, state, or local)" immediately following "offense".

The Commentary to Section 2K1.3 captioned "Application Notes" is amended in Note 8 by inserting "(which may be a federal, state, or local offense)" immediately before "is".

The Commentary to Section 2K2.1 captioned "Application Notes" is amended in Note 7 by inserting "(federal, state, or local)" immediately following "offense".

The Commentary to Section 2K2.1 captioned "Application Notes" is amended in Note 14 by inserting "(which may be a federal, state, or local offense)" immediately before "is".

The Commentary to Section 2K2.1 captioned "Application Notes" is amended by inserting the following additional note:

"19. The enhancement under subsection (b)(4) for a stolen firearm or a firearm with an altered or obliterated serial number applies whether or not the defendant knew or had reason to believe that the firearm was stolen or had an altered or obliterated serial number.".

Reason for Amendment: This amendment clarifies that the references to "other offense" and "another offense" in Section 2A4.1 (b)(7), and to "felony offense," "another offense," and "other offense" in Sections 2K1.3 and 2K2.1, refer to federal, state, or local offenses. In addition, this amendment clarifies that the enhancement in Section 2K2.1 (b)(4) applies whether or not the defendant knew or had reason to believe the firearm was stolen or had an altered or obliterated serial number.

7. Amendment: Section 2A5.2(a)(1) is amended by deleting "defendant intentionally endangered" and inserting in lieu thereof "offense involved intentionally endangering".

Section 2A5.2(a)(2) is amended by deleting "defendant recklessly endangered" and inserting in lieu thereof "offense involved recklessly endangering".

Section 2A6.1(b)(1) is amended by deleting "defendant engaged in" and inserting in lieu thereof "offense involved".

Section 2A6.1(b)(2) is amended by deleting "defendant's conduct" and inserting in lieu thereof "offense".

Reason for Amendment: This amendment deletes language that could be construed as a limitation on the scope of conduct for which a defendant is accountable under Section1B1.3 (Relevant Conduct) and replaces it with terminology consistent with that used in other offense guidelines.

8. Amendment: Section 2B1.1 is amended in the title by inserting "; Receiving, Transporting, Transferring, Transmitting, or Possessing Stolen Property" at the end thereof.

Section 2B1.1(b)(2) is amended by inserting "(A)" immediately following "If"; and by inserting "or the taking of such item was an object of the offense; or (B) the stolen property received, transported, transferred, transmitted, or possessed was a firearm, destructive device, or controlled substance," immediately following "taken,".

Section 2B1.1(b)(4) is amended by inserting "(A)" immediately following "If"; and by inserting "or the taking of such item was an object of the offense; or (B) the stolen property received, transported, transferred, transmitted, or possessed was undelivered United States mail," immediately following "taken,".

Section 2B1.1(b)(5) is amended by inserting "(A)" immediately before "If"; and by inserting "; or (B) If the offense involved receiving stolen property, and the defendant was a person in the business of receiving and selling stolen property, increase by 4 levels;" immediately following "levels".

The Commentary to Section 2B1.1 captioned "Statutory Provisions" is amended by inserting "553(a)(1)," immediately following "225,"; by inserting "662, 664," immediately before "1702"; and by deleting ", 2317" and inserting in lieu thereof "–2317; 29 U.S.C. 501(c)".

The Commentary to Section 2B1.1 captioned "Application Notes" is amended by inserting the following additional note:

"14. If the offense involved theft or embezzlement from an employee pension or welfare benefit plan (a violation of 18 U.S.C. 664) and the defendant was a fiduciary of the benefit plan, an adjustment under Section 3B1.3 (Abuse of Position of Trust or Use of Special Skill) will apply. "Fiduciary of the benefit plan" is defined in 29 U.S.C. 1002(21)(A) to mean a person who exercises any discretionary authority or control in respect to the management of such plan or exercises authority or control in respect to management or disposition of its assets, or who renders investment advice for a fee or other direct or indirect compensation with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or who has any discretionary authority or responsibili*v in the administration of such plan.

If the offense involved theft or embezzlement from a labor union (a violation of 29 U.S.C. 501(c)) and the defendant was a union officer or occupied a position of trust in the union as set forth in 29 U.S.C. 501(a), an adjustment under 3B1.3 (Abuse of Position of Trust or Use of Special Skill) will apply.".

Section 2B2.1 is amended in the title by inserting "or a Structure Other than a Residence" at the end thereof.

Section 2B2.1(a) is amended by deleting "17" and inserting in lieu thereof "(1) 17, if a residence; or (2) 12, if a structure other than a residence.".

The Commentary to Section 2B2.1 captioned "Statutory Provision" is amended by deleting "Provision: 18 U.S.C. 1153" and inserting in lieu thereof "Provisions: 18 U.S.C. 1153, 2113(a), 2115, 2117, 2118(b). For additional statutory provision(s), see appendix A (Statutory Index)".

Section 2B5.3 is amended in the title by inserting "or Trademark" at the end thereof.

The Commentary to Section 2B5.3 captioned "Statutory Provisions" is amended by deleting "2319" and inserting in lieu thereof "2318–2320".

The Commentary to Section 2B5.3 captioned "Background" is amended by inserting "and trademark" immediately following "copyright".

Section 2D3.2 is amended in the title by deleting "Manufacture of Controlled Substances in Excess of or Unauthorized by Registration Quota; Attempt or Conspiracy" and inserting in lieu thereof "Regulatory Offenses Involving Controlled Substances; Attempt or Conspiracy".

The Commentary to Section 2D3.2 captioned "Statutory Provisions" is amended by deleting "842(b), 843(a)(3)" and inserting in lieu thereof "842(a)(2), (a)(9), (a)(10), (b), 843(a)(3), 954, 961".

The Commentary to Section 2D3.2 captioned "Background" is amended by deleting "This offense is a misdemeanor" and inserting in lieu thereof "These offenses are misdemeanors".

Section 2E3.1 is amended in the title by deleting "Engaging in a Gambling Business" and inserting in lieu thereof "Gambling Offenses".

Section 2E3.1(a) is amended by deleting "12" and inserting in lieu thereof:

"(1) 12, if the offense was (A) engaging in a gambling business; (B) transmission of wagering information; or (C) committed as part of, or to facilitate, a commercial gambling operation; or

(2) 6, otherwise.".

The Commentary to section 2E3.1 captioned "Statutory Provision" is amended by deleting "Provision: 18 U.S.C. 1955" and inserting in lieu thereof "Provisions: 15 U.S.C. 1172–1175; 18 U.S.C. 1082, 1301–1304, 1306, 1511, 1953, 1955. For additional statutory provision(s), see appendix A (Statutory Index)".

Section 2E5.1 is amended in the title by inserting "; Prohibited Payments or Lending of Money by Employer or Agent to Employees, Representatives, or Labor Organizations" at the end thereof.

Section 2E5.1(b)(1) is amended by inserting "or labor organization" immediately following "plan".

The Commentary to section 2E5.1 captioned "Statutory Provision" is amended by deleting "Provision: 18 U.S.C. 1954" and inserting in lieu thereof "Provisions: 18 U.S.C. 1954; 29 U.S.C. 186".

The Commentary to section 2E5.1 captioned "Background" is amended by inserting ", or labor organizations" immediately following "plans"; and by deleting the last sentence as follows:

"A more severe penalty is warranted in a bribery where the payment is the primary motivation for an action to be taken, as opposed to graft, where the prohibited payment is given because of a person's actions, duties, or decisions without a prior understanding that the recipient's performance will be directly influenced by the gift.".

Section 2E5.3 is amended in the title by inserting "; Failure to Maintain and Falsification of Records Required by the Labor Management Reporting and Disclosure Act" at the end thereof.

Section 2E5.3(a)(2) is amended by deleting "relating to the operation of an employee benefit plan, apply section 2E5.2" and inserting in lieu thereof "apply 2B1.1".

The Commentary to section 2E5.3 captioned "Statutory Provision" is amended by deleting "Provision: 18 U.S.C. 1027" and inserting in lieu thereof "Provisions: 18 U.S.C. 1027; 29 U.S.C. 439, 461, 1131. For additional statutory provision(s), see appendix A (Statutory Index).".

The Commentary to section 2E5.3 captioned "Background" is amended by inserting the following additional sentence as the second sentence:

"It also covers failure to maintain proper documents required by the LMRDA or falsification of such documents.".

Section 2F1.1 is amended in the title by inserting "; Forgery; Offenses Involving Altered or Counterfeit Instruments Other than Counterfeit Bearer Obligations of the United States" at the end thereof.

The Commentary to section 2F1.1 captioned "Statutory Provisions" is amended by inserting "471–473, 500, 510," immediately following "289,"; and by inserting ", 2314, 2315" immediately following "1344".

Section 2J1.3 is amended in the title by inserting "; Bribery of Witness" at the end thereof.

Section 2J1.3(b)(2) is amended by deleting "perjury or subornation of perjury" and inserting in lieu thereof "perjury, subornation of perjury, or witness bribery".

Section 2J1.3(c)(1) is amended by deleting "perjury or subornation of perjury" and inserting in lieu thereof "perjury, subornation of perjury, or witness bribery".

The Commentary to section 2J1.3 captioned "Statutory Provisions" is amended by inserting "201 (b)(3), (4)," immediately before "1621".

The Commentary to section 2J1.3 captioned "Application Notes" is amended in Note 3 by inserting ", subornation of perjury, or witness bribery" immediately following "perjury".

The Commentary to section 2J1.3 captioned "Background" is amended by deleting "perjury and subornation of perjury" and inserting in lieu thereof "perjury, subornation of perjury, and witness bribery".

Section 2K1.1 is amended in the title by inserting "; Improper Storage of Explosive Materials" at the end thereof.

The Commentary to section 2K1.1 captioned "Statutory Provisions" is amended by deleting "842(k), 844(b)" and inserting in lieu thereof "842(j), (k), 844(b). For additional statutory provision(s), see appendix A (Statutory Index)".

Section 2K2.4 is amended in the title by deleting "Firearms or" and inserting "Firearm," in lieu thereof; and by inserting ", or Explosive" immediately following "Ammunition".

Section 2K2.4(a) is amended by inserting "section 844(h)," immediately before "section 924(c)"; and by inserting a comma immediately following "section 924(c)".

The Commentary to section 2K2.4 captioned "Statutory Provisions" is

VOL
58

6
19 93
UMI

amended by inserting "844(h)," immediately before "924(c)".

The Commentary to section 2K2.4 captioned "Application Notes" is amended in Note 2 in the first paragraph by deleting "a firearm" and inserting in lieu thereof "an explosive or firearm".

The Commentary to section 2K2.4 captioned "Application Notes" is amended in Note 4 by deleting "section 924(c)" wherever it occurs and inserting in lieu thereof in each instance "section 844(h), section 924(c),".

The Commentary to section 2K2.4 captioned "Background" is amended by deleting "924(c)" and inserting in lieu thereof "844(h), 924(c),"; and by inserting "explosive or" immediately before "firearm".

Section 2L2.1 is amended in the title by deleting "Documents" and inserting in lieu thereof "a Document"; and by inserting ", or a United States Passport" immediately following "Status".

Section 2L2.1(b)(2) is amended by inserting "or passports" immediately following "documents" and by inserting "/Passports" immediately following "Documents".

The Commentary to section 2L2.1 captioned "Statutory Provisions" is amended by inserting "1542, 1544," immediately following "1427,".

The Commentary to section 2L2.1 captioned "Application Notes" is amended by deleting "set as one document" and inserting in lieu thereof "documents as one set".

Section 2L2.2 is amended in the title by inserting "; Fraudulently Acquiring or Improperly Using a United States Passport" at the end thereof.

The Commentary to section 2L2.2 captioned "Statutory Provisions" is amended by deleting "1546" and inserting in lieu thereof "1543, 1544, 1546. For additional statutory provision(s), see appendix A (Statutory Index)".

Section 2M2.1 is amended in the title by inserting "or Production" immediately following "Destruction".

The Commentary to section 2M2.1 captioned "Statutory Provisions" is amended by inserting ", 2154" immediately following "2153".

Section 2M2.3 is amended in the title by inserting "or Production" immediately following "Destruction".

The Commentary to section 2M2.3 captioned "Statutory Provisions" is amended by inserting ", 2156" immediately following "2155".

Section 2M3.3 is amended in the title by inserting "; Disclosure of Classified Cryptographic Information; Unauthorized Disclosure to a Foreign Government or a Communist Organization of Classified Information by Government Employee; Unauthorized Receipt of Classified Information" at the end thereof.

The Commentary to section 2M3.3 captioned "Statutory Provisions" is amended by inserting "783(b), (c)," immediately before 793(d)"; and by inserting ", 798" immediately following "(g)".

The Commentary to section 2M3.3 captioned "Background" is amended by inserting the following additional paragraph at the end:

"This section also covers statutes that proscribe the disclosure of classified information concerning cryptographic or communication intelligence to the detriment of the United States or for the benefit of a foreign government, the unauthorized disclosure to a foreign government or a communist organization of classified information by a government employee, and the unauthorized receipt of classified information.".

Section 2Q1.2 is amended in the title by inserting "; Unlawfully Transporting Hazardous Materials in Commerce" at the end thereof.

The Commentary to section 2Q1.2 captioned "Statutory Provisions" is amended by inserting "; 49 U.S.C. 1809(b)" immediately following "1822(b)".

The Commentary to section 2X1.1 captioned "Application Notes" is amended in Note 1 in the second paragraph by deleting "(Manufacture of Controlled Substance in Excess of or Unauthorized by Registration Quota; Attempt or Conspiracy); § 2D3.3 (Illegal Use of Registration Number to Distribute or Dispense a Controlled Substance to Another Registrant or Authorized Person; Attempt or Conspiracy); section 2D3.4 (Illegal Transfer or Transshipment of a Controlled Substance; Attempt or Conspiracy); and section 2D3.5 (Violation of Recordkeeping or Reporting Requirements for Listed Chemicals and Certain Machines; Attempt or Conspiracy)" and inserting in lieu thereof "(Regulatory Offenses Involving Controlled Substances; Attempt or Conspiracy)".

The Commentary to section 2X1.1 captioned "Application Notes" is amended in Note 1 in the third paragraph by deleting "(Manufacture of Controlled Substance in Excess of or Unauthorized by Registration Quota; Attempt or Conspiracy); section 2D3.3 (Illegal Use of Registration Number to Distribute or Dispense a Controlled Substance to Another Registrant or Authorized Person; Attempt or Conspiracy); section 2D3.4 (Illegal Transfer or Transshipment of a Controlled Substance; Attempt or Conspiracy); and section 2D3.5 (Violation of Recordkeeping or Reporting Requirements for Listed Chemicals and Certain Machines; Attempt or Conspiracy)" and inserting in lieu thereof "(Regulatory Offenses Involving Controlled Substances; Attempt or Conspiracy)".

Section 3D1.2 is amended in the second paragraph by deleting "2B1.2,", "2B5.2,", "2B5.4,", "2E5.2, 2E5.4, 2E5.6", and ", 2L2.3"; and in the third paragraph by deleting "2B2.2,", "2E1.5,", "2L2.4,", and "2M3.6, 2M3.7, 2M3.8,".

Appendix A (Statutory Index) is amended in the lines referenced to 15 U.S.C. 1172, 1173, 1174, 1175, and 1176 by deleting "2E3.3" and inserting in lieu thereof "2E3.1";
in the lines referenced to 18 U.S.C. 201(b)(3) and 201(b)(4) by deleting "2J1.8" and inserting in lieu thereof "2J1.3";
in the lines referenced to 18 U.S.C. 471, 472, 473, 474, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 488, 493, 494, 497, 498, 499, 500, 502, 503, 505, 506, 507, 508, 509, 510, and 513 by deleting "2B5.2" and inserting in lieu thereof "2F1.1";
in the lines referenced to 18 U.S.C. 18 U.S.C. 553(a)(1) and 553(a)(2) by deleting "2B1.2" and inserting in lieu thereof "2B1.1";
in the line referenced to 18 U.S.C. 641 by deleting ", 2B1.2";
in the line referenced to 18 U.S.C. 642 by deleting "2B5.2" and inserting in lieu thereof "2F1.1";
in the line referenced to 18 U.S.C. 659 by deleting ", 2B1.2";
in the line referenced to 18 U.S.C. 662 by deleting "2B1.2" and inserting in lieu thereof "2B1.1";
in the line referenced to 18 U.S.C. 664 by deleting "2E5.2" and inserting in lieu thereof "2B1.1";

and by deleting:

"50 U.S.C. 783(b)	2M3.7
"50 U.S.C. 783(c)	2M3.8",

and inserting in lieu thereof:

"50 U.S.C. 783(b), (c)	2M3.3".

Sections 2B1.2, 2B2.2, 2B5.2, 2B5.4, 2D3.3, 2D3.4, 2D3.5, 2E1.5, 2E3.2, 2E3.3, 2E5.2, 2E5.4, 2E5.5, 2E5.6, 2J1.8, 2K1.2, 2K1.7, 2K3.1, 2L2.3, 2L2.4, 2M2.2, 2M2.4, 2M3.6, 2M3.7, and 2M3.8, including accompanying commentary, are deleted in their entirety.

Reason for Amendment: This amendment deletes 25 offense guidelines by consolidating them with other offense guidelines that cover similar offense conduct and have either identical or very similar characteristics. Consolidation of offense guidelines in this manner has a number of practical advantages: it shortens and simplifies the Guidelines Manual; it reduces the likelihood of inconsistency in phraseology and definitions from section to section; it reduces possible confusion and litigation as to which guideline applies to particular conduct; it reduces the number of conforming amendments required whenever similar sections are amended; and it will aid the development of case law because cases involving similar or identical concepts and definitions can be referenced under one guideline rather than different guidelines.

9. Amendment: The Commentary to Section 2B1.1 captioned "Application Notes" is amended in Note 2 by inserting the following additional sentence as the fourth sentence of the first paragraph:

"Loss does not include the interest that could have been earned had the funds not been stolen.";

and by inserting the following additional paragraphs as the second and third paragraphs:

"Where the offense involved making a fraudulent loan or credit card application, or other unlawful conduct involving a loan or credit card, the loss is to be determined under the principles set forth in the Commentary to Section 2F1.1 (Fraud and Deceit).

In certain cases, an offense may involve a series of transactions without a corresponding increase in loss. For example, a defendant may embezzle $5,000 from a bank and conceal this embezzlement by shifting this amount from one account to another in a series of nine transactions over a six-month period. In this example, the loss is $5,000 (the amount taken), not $45,000 (the sum of the nine transactions), because the additional transactions did not increase the actual or potential loss.".

The Commentary to Section 2B1.1 captioned "Application Notes" is amended by deleting Note 3 as follows:

"3. The loss need not be determined with precision, and may be inferred from any reasonably reliable information available, including the scope of the operation.",

and inserting in lieu thereof:

"3. For the purposes of subsection (b)(1), the loss need not be determined with precision. The court need only make a reasonable estimate of the loss, given the available information. This estimate, for example, may be based upon the approximate number of victims and the average loss to each victim, or on more general factors such as the scope and duration of the offense.".

The Commentary to Section 2B5.3 is amended by inserting the following immediately before "Background":

"Application Note:

1. 'Infringing items' means the items that violate the copyright or trademark laws (not the legitimate items that are infringed upon).".

The Commentary to § 2B6.1 captioned "Application Note" is amended in the caption by deleting "Note" and inserting in lieu thereof "Notes"; and by inserting the following additional Note:

"2. The 'corresponding number of levels from the table in § 2F1.1 (Fraud and Deceit),' as used in subsection (b)(1), refers to the number of levels corresponding to the retail value of the motor vehicles or parts involved.".

Section 2F1.1(b)(3) is amended by inserting "not addressed elsewhere in

VOL 58 ISS 86 MY 6 1993 UMI

the guidelines" immediately following "process".

The Commentary to Section 2F1.1 captioned "Application Notes" is amended in Note 5 by inserting the following additional sentence at the end:

"This subsection does not apply to conduct addressed elsewhere in the guidelines; e.g., a violation of a condition of release (addressed in Section 2J1.7 (Offense Committed While on Release)) or a violation of probation (addressed in § 4A1.1 (Criminal History Category)).".

The Commentary to Section 2F1.1 captioned "Application Notes" is amended in Note 7(b) in the second paragraph by inserting the following additional sentence at the end:

"Where the loss determined above significantly understates or overstates the seriousness of the defendant's conduct, an upward or downward departure may be warranted.".

The Commentary to Section 2F1.1 captioned "Application Notes" is amended in Note 10 by deleting "the" immediately before "primary" and inserting in lieu thereof "a"; by inserting "; or the fraud caused or risked reasonably foreseeable, substantial non-monetary harm" immediately following "non-monetary"; by deleting "physical or psychological harm" and inserting in lieu thereof "reasonably foreseeable, physical or psychological harm or severe emotional trauma"; by deleting the period immediately following "institution" and inserting in lieu thereof a semicolon; by inserting a new subdivision, immediately following subdivision (e), as follows:

"(f) the offense involved the knowing endangerment of the solvency of one or more victims.";

and by inserting the following at the end of the last paragraph:

"In such cases, a downward departure may be warranted.".

The Commentary to section 2F1.1 captioned "Application Notes" is amended in Note 11 by deleting the last two sentences as follows:

"The statutes provide for increased maximum terms of imprisonment for the use or possession of device-making equipment and the production or transfer of more than five identification documents or fifteen access devices. The court may find it appropriate to enhance the sentence for violations of these statutes in a manner similar to the treatment of analogous counterfeiting offenses under Part B of this Chapter.",

and inserting in lieu thereof:

"Where the primary purpose of the offense involved the unlawful production, transfer, possession, or use of identification documents for the purpose of violating, or assisting another to violate, the laws relating to naturalization, citizenship, or legal resident status, apply section 2L2.1 or section 2L2.2, as appropriate, rather than section 2F1.1. In the case of an offense involving false identification documents or access devices, an upward departure may be warranted where the actual loss does not adequately reflect the seriousness of the conduct.".

Reason for Amendment: This amendment makes the definition of loss in sections 2B1.1 (Larceny, Embezzlement, and Other Forms of Theft) and 2F1.1 (Fraud and Deceit) more consistent. Although the term "reasonably reliable information" is deleted from section 2B1.1 (there is no corresponding term in section 2F1.1), no substantive change results because the reliability of the information considered in respect to all cases is already addressed in section 6A1.3 (Resolution of Disputed Factors).

In addition, this amendment provides additional guidance for the determination of loss for cases that are referenced to section 2B1.1 but have loss characteristics closely resembling offenses referenced to section 2F1.1 and for cases in which simply adding the amounts from a series of transactions does not reflect the amount taken or put at risk.

This amendment also clarifies the meaning of the term "infringing items" in section 2B5.3; and expressly provides that the reference in section 2B6.1 to the table in section 2F1.1 is to be applied using the retail value of the stolen parts.

In addition, this amendment clarifies the operation of section 2F1.1(b)(3), which currently can be read to authorize counting conduct that is also addressed by other guideline sections. This amendment addresses this issue in a manner consistent with the Commission's general principle on double counting.

Finally, this amendment revises the Commentary to section 2F1.1 by expanding Application Note 10 to provide guidance in cases in which the monetary loss does not adequately reflect the seriousness of the offense; and by clarifying Application Note 11 and conforming the phraseology of this note to that used elsewhere in the guidelines.

10. Amendment: Section 2B3.1(b)(1) is amended by inserting "(A)" immediately following "If"; and by inserting "or (B) the offense involved carjacking," immediately before "increase".

The Commentary to section 2B3.1 captioned "Statutory Provisions" is amended by inserting ", 2119" immediately following "2118(a)".

The Commentary to § 2B3.1 captioned "Application Notes" is amended in Note 1 by inserting the following additional paragraph at the end:

" 'Carjacking' means the taking or attempted taking of a motor vehicle from the person or presence of another by force and violence or by intimidation.".

Appendix A (Statutory Index) is amended by inserting, at the appropriate place, the following:

"18 U.S.C. 2119 2B3.1".

Reason for Amendment: This amendment references offenses prosecuted under 18 U.S.C. 2119 (carjacking) to the robbery guideline at section 2B3.1 and provides a specific offense characteristic for carjacking. It is to be noted that any defendant convicted under 18 U.S.C. 2119 will receive a minimum additional 5-level increase for possession of a firearm. Such defendants also are subject to prosecution under 18 U.S.C. 924(c) for possession of a firearm during and in relation to a crime of violence, an offense that carries a mandatory consecutive sentence of at least five years' imprisonment.

11. Amendment: The Commentary to section 2D1.1 captioned "Application Notes" is amended by inserting the following additional note:

"16. Where (A) the amount of the controlled substance for which the defendant is accountable under 1B1.3 (Relevant Conduct) results in a base offense level greater than 36, (B) the court finds that this offense level overrepresents the defendant's culpability in the criminal activity, and (C) the defendant qualifies for a mitigating role adjustment under 3B1.2 (Mitigating Role), a downward departure may be warranted. The court may depart to a sentence no lower than the guideline range that would have resulted if the defendant's Chapter Two offense level had been offense level 36. Provided, that a defendant is not eligible for a downward departure under this provision if the defendant:

(a) Has one or more prior felony convictions for a crime of violence or a controlled substance offense as defined in section 4B1.2;

(b) Qualifies for an adjustment under § 3B1.3 (Abuse of Position of Trust or Use of Special Skill);

(c) Possessed or induced another participant to use or possess a firearm in the offense;

(d) Had decision-making authority;

(e) Owned the drugs or financed any part of the offense; or

(f) Sold the controlled substance or played a substantial part in negotiating the terms of the sale.".

Reason for Amendment: In a case in which a defendant's base offense level is greater than level 36 and the defendant had a minimal or minor role in the offense (and meets certain other qualifications), the quantity of the controlled substance for which the defendant is held accountable under § 1B1.3 (Relevant Conduct) may overrepresent the defendant's culpability in the criminal activity. To address this issue, this amendment adds an application note that authorizes a downward departure in the specific circumstances described and sets forth the authorized extent of any departure on this basis.

12. Amendment: The Commentary to Section 2D1.1 captioned "Application Notes" is amended in Note 1 by deleting the period at the end of the first sentence and inserting in lieu thereof:

", except as expressly provided. Mixture or substance does not include materials that must be separated from the controlled substance before the controlled substance can be used. Examples of such materials include the fiberglass in a cocaine/fiberglass bonded suitcase, beeswax in a cocaine/beeswax statue, and waste water from an illicit laboratory used to manufacture a controlled substance. If such material cannot readily be separated from the mixture or substance that appropriately is counted in the Drug Quantity Table, the court may use any reasonable method to approximate the weight of the mixture or substance to be counted.

An upward departure nonetheless may be warranted when the mixture or substance counted in the Drug Quantity Table is combined with other, non-countable material in an unusually sophisticated manner in order to avoid detection.".

Reason for Amendment: This amendment is designed to resolve an inter-circuit conflict regarding the meaning of the term "mixture or substance," as used in Section 2D1.1 (Unlawful Manufacturing, Importing, Exporting, or Trafficking; Attempt or Conspiracy) by expressly providing that this term does not include portions of a drug mixture that have to be separated from the controlled substance before the controlled substance can be used. This issue has arisen, subsequent to the United States Supreme Court decision in *Chapman* v. *United States*, 111 S. Ct. 1919 (1991), in two types of cases. The first type of case involves a controlled substance bonded to, or suspended in, another substance (e.g., cocaine mixed with beeswax); however, the controlled substance is not usable until it is separated from the other substance. See, e.g., *United States* v. *Mahecha-Onofre*, 936 F.2d 823 (1st Cir.), cert. denied, 112 S. Ct. 648 (1991); *United States* v. *Restrepo-Contreras*, 942 F.2d 96 (1st Cir. 1991), cert. denied, 112 S. Ct. 955 (1992). The second type of case involves the waste produced from an illicit laboratory used to manufacture a controlled substance, or chemicals confiscated before the chemical processing of the controlled substance is completed. The waste product is typically water or chemicals used to either remove impurities or form a precipitate (the precipitate, in some cases, being the controlled substance). Typically, a small amount of controlled substance remains in the waste weter; often this amount is too small to quantify and is listed as a trace amount (no weight given) in DEA reports. In these types of cases, the waste product is not consumable. The chemicals seized before the end of processing are also not usable in that form because further processing must take place before they can be used. See, e.g., *United States* v. *Sherrod*, 964 F.2d 1501 (5th Cir.), cert. denied sub nom. *Cooper* v. *United States*, 113 S. Ct. 832 (1992) (White and Blackmun, JJ., dissenting from denial of cert.), and cert. denied sub nom. *United States* v. *Sewell*, 113 S. Ct. 1367 (1993) (White and Blackmun, JJ., opinion dissenting from denial of cert.).

13. Amendment: The Commentary to Section 2D1.1 captioned "Application Notes" is amended by inserting the following additional note:

"17. If, in a reverse sting (an operation in which a government agent sells or negotiates to sell a controlled substance to a defendant), the court finds that the government agent set a price for the controlled substance that was substantially below the market value of the controlled substance, thereby leading to the defendant's purchase of a significantly greater quantity of the controlled substance than his available resources would have allowed him to purchase except for the artificially low price set by the government agent, a downward departure may be warranted.".

Reason for Amendment: This amendment adds an application note to the commentary of this section authorizing a downward departure if, in a reverse sting operation, the court finds that the government agent set a price for the controlled substance that was substantially below market value and thereby significantly inflated the quantity of controlled substance purchased by the defendant beyond the amount the defendant otherwise could have afforded.

14. Section 2D1.1(c) is amended in the notes following the Drug Quantity Table by inserting the following additional paragraph at the end:

"In the case of LSD on a carrier medium (e.g., a sheet of blotter paper), do not use the weight of the LSD/carrier medium. Instead, treat each dose of LSD on the carrier medium as equal to 0.4 mg of LSD for the purposes of the Drug Quantity Table.".

The Commentary to Section 2D1.1 captioned "Application Notes" is amended by inserting the following additional note:

"18. LSD on a blotter paper carrier medium typically is marked so that the number of doses ("hits") per sheet readily can be determined. When this is not the case, it is to be presumed that each 1/4 inch by 1/4 inch section of the blotter paper is equal to one dose.

In the case of liquid LSD (LSD that has not been placed onto a carrier medium), using the weight of the LSD alone to calculate the offense level may not adequately reflect the seriousness of the offense. In such a case, an upward departure may be warranted.".

The Commentary to section 2D1.1 captioned "Background" is amended by inserting the following paragraphs at the end:

"Because the weights of LSD carrier media vary widely and typically far exceed the weight of the controlled substance itself, the Commission has determined that basing offense levels on the entire weight of the LSD and carrier medium would produce unwarranted disparity among offenses involving the same quantity of actual LSD (but different carrier weights), as well as sentences disproportionate to those for other, more dangerous controlled substances, such as PCP. Consequently, in cases involving LSD contained in a carrier medium, the Commission has established a weight per dose of 0.4 milligram for purposes of determining the base offense level.

The dosage weight of LSD selected exceeds the Drug Enforcement Administration's standard dosage unit for LSD of 0.05 milligram (i.e., the quantity of actual LSD per dose) in order to assign some weight to the carrier medium. Because LSD typically is marketed and consumed orally on a carrier medium, the inclusion of some weight attributable to the carrier medium recognizes (A) that offense levels for most other controlled substances are based upon the weight of the mixture containing the controlled substance without regard to purity, and (B) the decision in *Chapman* v. *United States*, 111 S. Ct. 1919 (1991) (holding that the term "mixture or substance" in 21 U.S.C. 841(b)(1) includes the carrier medium in which LSD is absorbed). At the same time, the weight per dose selected is less than the weight per dose that would equate the offense level for LSD on a carrier medium with that for the same number of doses of PCP, a controlled substance that comparative assessments indicate is more likely to induce violent acts and ancillary crime than is LSD.

VOL 58 ISS 86 MY 6 1993 UMI

(Treating LSD on a carrier medium as weighing 0.5 milligram per dose would produce offense levels equivalent to those for PCP.) Thus, the approach decided upon by the Commission will harmonize offense levels for LSD offenses with those for other controlled substances and avoid an undue influence of varied carrier weight on the applicable offense level. Nonetheless, this approach does not override the applicability of "mixture or substance" for the purpose of applying any mandatory minimum sentence (see Chapman; section 5G1.1(b)).".

Reason for Amendment: The Commission has found that the weights of LSD carrier media vary widely and typically far exceed the weight of the controlled substance itself (e.g., LSD is typically placed on blotter paper which generally weighs from 5 to 10 milligrams per dose; the weight of the LSD itself per dose is generally from 0.02 to 0.08 milligram; the Drug Enforcement Administration describes a standard dose of LSD as containing 0.05 milligram of LSD). As a result, basing the offense level on the entire weight of the LSD and carrier medium produces unwarranted disparity among offenses involving the same quantity of actual LSD but different carrier weights, as well as sentences that are disproportionate to those for other, more dangerous controlled substances, such as PCP, heroin, and cocaine. Under the guidelines prior to the amendment, for example, 100 grams of heroin or 500 grams of cocaine (weights that correspond to several thousand doses, the number depending upon the purity) result in the same offense level as 125 doses of LSD on blotter paper (which has an average weight of 8 milligrams per dose) or 1 dose of LSD on a sugar cube (2000 milligrams per dose).

Consequently, in cases involving LSD contained in a carrier medium, this amendment establishes a weight per dose of 0.4 milligram to be used for purposes of determining the base offense level. The dosage weight of LSD selected by the Commission exceeds the Drug Enforcement Administration's standard dosage unit for LSD of 0.05 milligram (i.e., the quantity of actual LSD per dose) in order to assign some weight to the carrier medium. Because LSD typically is marketed and consumed orally on a carrier medium, the inclusion of some weight attributable to the carrier medium recognizes (A) that offense levels for most other controlled substances are based upon the weight of the mixture containing the controlled substance without regard to purity, and (B) the decision in *Chapman* v. *United States*, 111 S. Ct. 1919 (1991) (holding that the term "mixture or substance" in 21 U.S.C. 841(b)(1) includes the carrier medium in which LSD is absorbed). At the same time, the weight per dose selected is less than the weight per dose that would equate the offense level for LSD on a carrier medium with that for the same number of doses of PCP, a controlled substance that comparative assessments indicate is more likely to induce violent acts and ancillary crime than is LSD. Treating LSD on a carrier medium as weighing 0.5 milligram per dose would produce offense levels equivalent to those for PCP (for example, 2000 doses of LSD at 0.5 milligram per dose equals 1 gram of LSD—corresponding to the lower limit of offense level 26; similarly, 2000 doses of PCP at 5 milligrams per dose, the standard amount of actual PCP in a dose, equals 10 grams of actual PCP—corresponding to the lower limit of offense level 26). Thus, the approach decided upon by the Commission will harmonize offense levels for LSD offenses with those for other controlled substances and avoid an undue influence of varied carrier weight on the applicable offense level. Nonetheless, this approach does not override the definition of mixture or substance for purposes of applying any mandatory minimum sentence (see Chapman; Section 5G1.1(b)).

15. Amendment: Section 2D1.1(c) is amended in the notes following the Drug Quantity Table by inserting the following additional paragraph at the end:

" 'Cocaine base,' for the purposes of this guideline, means 'crack.' 'Crack' is the street name for a form of cocaine base, usually prepared by processing cocaine hydrochloride and sodium bicarbonate, and usually appearing in a lumpy, rocklike form.".

Reason for Amendment: This amendment provides that, for purposes of the guidelines, 'cocaine base' means 'crack.' The amendment addresses an inter-circuit conflict. Compare, e.g., *United States* v. *Shaw*, 936 F. 2d 412 (9th Cir. 1991) (cocaine base means crack) with *United States* v. *Jackson*, 936 F.2d 158 (2d Cir), cert. denied, 113 S. Ct. 664 (1992) (cocaine base has a scientific, chemical definition that is more inclusive than crack). Under this amendment, forms of cocaine base other than crack (e.g., coca paste, an intermediate step in the processing of coca leaves into cocaine hydrochloride scientifically is a base form of cocaine, but it is not crack) will be treated as cocaine.

16. Amendment: The Commentary to section 2K2.4 captioned "Application Notes" is amended in Note 2 by deleting:

"Provided, that where the maximum of the guideline range from Chapter Five, Part A (Sentencing Table) determined by an offense level adjusted under the procedure described in the preceding paragraph, plus the term of imprisonment required under 18 U.S.C. 924(c) or 929(a), is less than the maximum of the guideline range that would apply to the underlying offense absent such adjustment, the procedure described in the preceding paragraph does not apply. Instead, the guideline range applicable to the underlying offense absent such adjustment is to be used after subtracting the term of imprisonment imposed under 18 U.S.C. 924(c) or 929(a) from both the minimum and maximum of such range.

Example: A defendant, is to be sentenced under the robbery guideline; his unadjusted offense level from section 2B3.1 is 30, including a 7-level enhancement for discharging a firearm; no Chapter Three adjustments are applicable; and his criminal history category is Category IV. His unadjusted guideline range from Chapter Five, Part A (Sentencing Table) is 135–168 months. This defendant has also been convicted under 18 U.S.C. 924(c) arising from the possession of a weapon during the robbery, and therefore must be sentenced to an additional consecutive five-year term of imprisonment. The defendant's adjusted guideline range, which takes into account the conviction under 18 U.S.C. 924(c) by eliminating the 7-level weapon enhancement, is 70–87 months. Because the maximum of the defendant's adjusted guideline range plus the five year consecutive sentence (87 months+60 months=147 months) is less than the maximum of the defendant's unadjusted guideline range (168 months), the defendant is to be sentenced using the unadjusted guideline range after subtracting the 60 month sentence to be imposed under 18 U.S.C. 924(c) from both the minimum and maximum of the unadjusted range (e.g., 135 months – 60 months=75 months; 168 months – 60 months=108 months). A sentence imposed for the underlying offense using the guideline range determined in this manner (75–108 months) when combined with the consecutive sentence imposed under 18 U.S.C. 924(c) or 929(a), will produce the appropriate total term of imprisonment.",

and inserting in lieu thereof:

"In a few cases, the offense level for the underlying offense determined under the preceding paragraph may result in a guideline range that, when combined with the mandatory consecutive sentence under 18 U.S.C. 844(h), 924(c), or 929(a), produces a total maximum penalty that is less than the maximum of the guideline range that would have resulted had there not been a count of conviction under 18 U.S.C. 844(h), 924(c), or 929(a) (i.e., the guideline range that would have resulted if the enhancements for possession, use, or discharge of a firearm had been applied). In such a case, an upward departure may be warranted so that the conviction under 18 U.S.C. 844(h), 924(c), or 929(a) does not result in a decrease in the total punishment. An upward departure under this paragraph shall not exceed the maximum of the guideline range that would have resulted had there not been a count of conviction under 18 U.S.C. 844(h), 924(c), or 929(a).".

Reason for Amendment: This amendment simplifies the operation of this section in order to reduce erroneous application by deleting the proviso in Application Note 2 and, in lieu thereof, authorizing an upward departure in the unusual case in which the combined sentence for an underlying offense and a firearms or explosives offense (under 18 U.S.C. 844(h), 924(c), or 929(a)) is less than the maximum of the guideline range that would have resulted if there had been no additional conviction for the firearms or explosives offense.

17. Amendment: Sections 2S1.3 and 2S1.4, and accompanying commentary, are deleted in their entirety and the following new section is inserted in lieu thereof:

"Section 2S1.3. Structuring Transactions to Evade Reporting Requirements; Failure to Report Cash or Monetary Transactions; Failure to File Currency and Monetary Instrument Report; Knowingly Filing False Reports

(a) Base Offense Level:

6 plus the number of offense levels from the table in section 2F1.1 (Fraud or Deceit) corresponding to the value of the funds.

(b) Specific Offense Characteristics:

(1) If the defendant knew or believed that the funds were proceeds of unlawful activity, or were intended to promote unlawful activity, increase by 2 levels.

(2) If (A) subsection (b)(1) does not apply; (B) the defendant did not act with reckless disregard of the source of the funds; (C) the funds were the proceeds of lawful activity; and (D) the funds were to be used for a lawful purpose, decrease the offense level to level 6.

(c) Cross Reference

(1) If the offense was committed for the purposes of violating the Internal Revenue laws, apply the most appropriate guideline from Chapter Two, Part T (Offenses Involving Taxation) if the resulting offense level is greater than that determined above.

Commentary

Statutory Provisions: 26 U.S.C. 7203 (if a violation based upon 26 U.S.C. 6050I), 7206 (if a violation based upon 26 U.S.C. 6050I); 31 U.S.C. § 5313, 5314, 5316, 5324. For additional statutory provision(s), see Appendix A (Statutory Index).

Application Note:

1. For purposes of this guideline, "value of the funds" means the amount of the funds involved in the structuring or reporting conduct. The relevant statutes require monetary reporting without regard to whether the funds were lawfully or unlawfully obtained.

Background: The offenses covered by this guideline relate to records and reports of certain transactions involving currency and monetary instruments. These reports include Currency Transaction Reports, Currency and Monetary Instrument Reports, Reports of Foreign Bank and Financial Accounts, and Reports of Cash Payments Over $10,000 Received in a Trade or Business.".

Appendix A (Statutory Index) is amended in the line beginning "31 U.S.C. 5316" by deleting "2S1.4" and inserting in lieu thereof "2S1.3", and in the line beginning "31 U.S.C. § 5322" by deleting ", 2S1.4.

Reason for Amendment: This amendment consolidates existing sections 2S1.3 and 2S1.4 and modifies these guidelines to assure greater consistency of punishment for similar offenses and greater sensitivity to indicia of offense seriousness. The amendment links base offense levels for the reporting violations covered by these guidelines to the defendant's state of mind with respect to the source of the funds, and, in instances where the defendant knew, believed or acted with reckless disregard of the fact that the funds were the proceeds of unlawful activity, to the value of the funds involved.

18. Amendment: Chapter Two, Part T, Subpart 1 is amended in the title by inserting ", Employment Taxes, Estate Taxes, Gift Taxes, and Excise Taxes (Other Than Alcohol, Tobacco, and Customs Taxes)" at the end thereof.

Section 2T1.1 is amended in the title by inserting "; Willful Failure to File Return, Supply Information, or Pay Tax; Fraudulent or False Returns, Statements, or Other Documents" at the end thereof.

Section 2T1.1(a) is amended by deleting:

"Base Offense Level: Level from Section 2T4.1 (Tax Table) corresponding to the tax loss.

For purposes of this guideline, the "tax loss" is the greater of: (A) The total amount of tax that the taxpayer evaded or attempted to evade; and (B) the "tax loss" defined in section 2T1.3.",

and inserting in lieu thereof:

"(a) Base Offense Level:

(1) Level from § 2T4.1 (Tax Table) corresponding to the tax loss; or

(2) 6, if there is no tax loss.".

Section 2T1.1(b)(2) is amended by deleting "nature" and inserting in lieu there of "existence".

Section 2T1.1 is amended by inserting the following additional subsection:

(c) Special Instructions

For the purposes of this guideline—

(1) If the offense involved tax evasion or a fraudulent or false return, statement, or other document, the tax loss is the total amount of loss that was the object of the offense (i.e., the loss that would have resulted had the offense been successfully completed).

Notes

(A) If the offense involved filing a tax return in which gross income was underreported, the tax loss shall be treated as equal to 28% of the unreported gross income (34% if the taxpayer is a corporation) plus 100% of any false credits claimed against tax, unless a more accurate determination of the tax loss can be made.

(B) If the offense involved improperly claiming a deduction or an exemption, the tax loss shall be treated as equal to 28% of the amount of the improperly claimed deduction or exemption (34% if the taxpayer is a corporation) plus 100% of any false credits claimed against tax, unless a more accurate determination of the tax loss can be made.

(C) If the offense involved improperly claiming a deduction to provide a basis for tax evasion in the future, the tax loss shall be treated as equal to 28% of the amount of the improperly claimed deduction (34% if the taxpayer is a corporation) plus 100% of any false credits claimed against tax, unless a more accurate determination of the tax loss can be made.

(2) If the offense involved failure to file a tax return, the tax loss is the amount of tax that the taxpayer owed and did not pay.

Note: If the offense involved failure to file a tax return, the tax loss shall be treated as equal to 20% of the gross income (25% if the taxpayer is a corporation) less any tax withheld or otherwise paid, unless a more accurate determination of the tax loss can be made.

(3) If the offense involved willful failure to pay tax, the tax loss is the amount of tax that the taxpayer owed and did not pay.

(4) If the offense involved improperly claiming a refund to which the claimant was not entitled, the tax loss is the amount of the claimed refund to which the claimant was not entitled.

(5) The tax loss is not reduced by any payment of the tax subsequent to the commission of the offense. '.

VOL 58 ISS 86 MY 6 1993 UMI

The Commentary to section 2T1.1 captioned "Statutory Provision" is amended by deleting "Provision: 26 U.S.C. 7201" and inserting in lieu thereof "Provisions: 26 U.S.C. 7201, 7203 (other than a violation based upon 26 U.S.C. 6050I), 7206 (other than a violation based upon 26 U.S.C. 6050I or 7206(2)), and 7207".

The Commentary to section 2T1.1 captioned "Application Notes" is amended by deleting Notes 1 and 4; and by renumbering the remaining notes accordingly.

The Commentary to section 2T1.1 captioned "Application Notes" is amended in Note 1 (formerly Note 2) by deleting "For purposes of the guideline, the tax loss is the amount of tax that the taxpayer evaded or attempted to evade" and inserting in lieu thereof "'Tax loss' is defined in subsection (c)"; by deleting "deficiency" and inserting in lieu thereof "figures"; and by inserting the following additional paragraphs at the end:

"Notes under subsections (c)(1) and (c)(2) address certain situations in income tax cases in which the tax loss may not be reasonably ascertainable. In these situations, the "presumptions" set forth are to be used unless the government or defense provides sufficient information for a more accurate assessment of the tax loss (as defined in subsection (c)). In cases involving other types of taxes, the presumptions in the notes under subsections (c)(1) and (c)(2) do not apply.

Example 1: A defendant files a tax return reporting income of $40,000 when his income was actually $90,000. Under Note (A) to subsection (c)(1), the tax loss is treated as $14,000 ($90,000 of actual gross income minus $40,000 of reported gross income = $50,000×28%) unless sufficient information is available to make a more accurate assessment of the tax loss (as defined in subsection (c)).

Example 2: A defendant files a tax return reporting income of $60,000 when his income was actually $130,000. In addition, the defendant claims $10,000 in false tax credits. Under Note (A) to subsection (c)(1), the tax loss is treated as $29,600 ($130,000 of actual gross income minus $60,000 of reported gross income = $70,000×28% = $19,600, plus $10,000 of false tax credits) unless sufficient information is available to make a more accurate assessment of the tax loss (as defined in subsection (c)).

Example 3: A defendant fails to file a tax return for a year in which his salary was $24,000, and $2,600 in income tax was withheld by his employer. Under the note to subsection (c)(2), the tax loss is treated as $2,200 ($24,000 of gross income × 20%=$4,800, minus $2,600 of tax withheld) unless sufficient information is available to make a more accurate assessment of the tax loss (as defined in subsection (c)).

In determining the tax loss attributable to the offense, the court should use as many methods set forth in subsection (c) and this commentary as are necessary given the circumstances of the particular case. If none of the methods of determining the tax loss set forth fit the circumstances of the particular case, the court should use any method of determining the tax loss that appears appropriate to reasonably calculate the loss that would have resulted had the offense been successfully completed.".

The Commentary to section 2T1.1 captioned "Application Notes" is amended in Note 3 (formerly Note 5) by deleting "or local" and inserting in lieu thereof "local, or foreign".

The Commentary to section 2T1.1 captioned "Application Notes" is amended in Note 4 (formerly Note 6) by deleting "section 2T1.1" and inserting in lieu thereof "subsection"; by deleting "applied" and inserting in lieu thereof "applied,"; and by inserting "or fictitious entities" immediately following "shells".

The Commentary to section 2T1.1 captioned "Application Notes" is amended by inserting the following additional notes:

"5. A 'credit claimed against tax' is an item that reduces the amount of tax directly, in contrast to a 'deduction' that reduces the amount of taxable income.

6. 'Gross income,' for the purposes of this section, has the same meaning as it has in 26 U.S.C. 61 and 26 CFR 1.61.

7. If the offense involves both individual and corporate tax returns, the tax loss is the aggregate tax loss from the offenses taken together.".

The Commentary to section 2T1.1 captioned "Background" is amended in the first paragraph by deleting "tax evaded because the chief interest protected by the statute is the collection of taxes. A greater evasion" and by inserting in lieu thereof "loss that was the object of the offense. Tax offenses, in and of themselves, are serious offenses; however a greater tax loss"; and by deleting "tax evasion" and inserting in lieu thereof "the offense".

The Commentary to section 2T1.1 captioned "Background" is amended by deleting the second paragraph.

The Commentary to § 2T1.1 captioned "Background" is amended in the second (formerly third) paragraph by deleting "evasion" wherever it appears and inserting in lieu thereof in each instance "offenses".

The Commentary to section 2T1.1 captioned "Background" is amended in the third (formerly fourth) paragraph by deleting the first two sentences.

The Commentary to section 2T1.1 captioned "Background" is amended in the fourth (formerly fifth) paragraph by deleting the last sentence.

The Commentary to section 2T1.1 captioned "Background" is amended in the fifth (formerly sixth) paragraph by deleting "tax evasion" and inserting in lieu thereof "tax offenses"; by deleting "the evasion" and inserting in lieu thereof "the offense"; and by deleting the last sentence.

Sections 2T1.2, 2T1.3, and 2T1.5, including accompanying commentary, are deleted in their entirety.

Section 2T1.4(a)(1) is amended by deleting "resulting tax loss, if any" and inserting in lieu thereof "tax loss".

Section 2T1.4(a)(2) is amended by deleting "otherwise" and inserting in lieu thereof "if there is no tax loss".

Section 2T1.4(a) is amended by deleting "section 2T1.3" and inserting in lieu thereof "section 2T1.1".

Section 2T1.4(b)(1) is amended by inserting "(A)" immediately following "If"; and by inserting "; or (B) the defendant was in the business of preparing or assisting in the preparation of tax returns" immediately before ", increase".

Section 2T1.4(b)(2) is amended by deleting "nature" and inserting in lieu thereof "existence".

Section 2T1.4(b) is amended by deleting:

"(3) If the defendant was in the business of preparing or assisting in the preparation of tax returns, increase by 2 levels.".

The Commentary to section 2T1.4 captioned "Statutory Provision" is amended by inserting "(other than a violation based upon 26 U.S.C. 6050I)" immediately following "7206(2)".

The Commentary to Section 2T1.4 captioned "Application Notes" is amended by deleting Notes 3 and 4; by renumbering Notes 1 and 2 as Notes 2 and 3, respectively; and by inserting the following as Note 1:

"1. For the general principles underlying the determination of tax loss, see Section 2T1.1(c) and Application Note 1 of the Commentary to Section 2T1.1 (Tax Evasion; Willful Failure to File Return, Supply Information, or Pay Tax; Fraudulent or False Returns, Statements, or Other Documents). In certain instances, such as promotion of a tax shelter scheme, the defendant may advise other persons to violate their tax obligations through

filing returns that find no support in the tax laws. If this type of conduct can be shown to have resulted in the filing of false returns (regardless of whether the principals were aware of their falsity), the misstatements in all such returns will contribute to one aggregate 'tax loss.'".

The Commentary to Section 2T1.4 captioned "Application Notes" is amended in Note 2 (formerly Note 1) by deleting:

"1. Subsection (b)(1) applies to persons who derive a substantial portion of their income through the promotion of tax fraud or tax evasion, e.g., through promoting fraudulent tax shelters.", and inserting in lieu thereof:

"2. Subsection (b)(1) has two prongs. The first prong applies to persons who derive a substantial portion of their income through the promotion of tax schemes, e.g., through promoting fraudulent tax shelters. The second prong applies to persons who regularly prepare or assist in the preparation of tax returns for profit. If an enhancement from this subsection applies, do not apply Section 3B1.3 (Abuse of Position of Trust or Use of Special Skill).".

The Commentary to Section 2T1.4 captioned "Application Notes" is amended in Note 3 (formerly Note 2) by inserting "or fictitious entities" immediately following "corporate shells".

The Commentary to Section 2T1.4 captioned "Background" is amended by deleting "tax preparers and advisers" and inserting in lieu thereof "those in the business of preparing or assisting in the preparation of tax returns and those who make a business of promoting tax fraud"; and by deleting "§ 2T1.3" and inserting in lieu thereof "2T1.1".

Section 2T1.9 is amended in the title by deleting "Impair, Impede" and inserting in lieu thereof "Impede, Impair, Obstruct,".

Section 2T1.9(a)(1) is amended by deleting "Section 2T1.3, as applicable" and inserting in lieu thereof "Section 2T1.4, as appropriate".

Section 2T1.9(b)(1) is amended by inserting "to impede, impair, obstruct, or defeat the ascertainment, computation, assessment, or collection of revenue" immediately following "violence".

Section 2T1.9(b)(2) is amended by deleting "impede or impair the Internal Revenue Service in the assessment and" and inserting in lieu thereof "impede, impair, obstruct, or defeat the ascertainment, computation, assessment, or"; and by inserting the following additional sentence at the end:

"Do not, however, apply this adjustment if an adjustment from Section 2T1.4(b)(1) is applied.".

The Commentary to Section 2T1.9 captioned "Application Notes" is amended in Note 2 by deleting "Section 2T1.3 (whichever is applicable to the underlying conduct)" and inserting in lieu thereof "Section 2T1.4 (whichever guideline most closely addresses the harm that would have resulted had the conspirators succeeded in impeding, impairing, obstructing or defeating the Internal Revenue Service)".

The Commentary to Section 2T1.9 captioned "Application Notes" is amended by inserting the following additional note:

"4. Subsection (b)(2) provides an enhancement where the conduct was intended to encourage persons, other than the participants directly involved in the offense, to violate the tax laws (e.g., an offense involving a "tax protest" group that encourages persons to violate the tax laws, or an offense involving the marketing of fraudulent tax shelters or schemes).".

Section 2T4.1 is amended by deleting:

"Tax loss (apply the greatest)	Offense level
(A) $2,000 or less	6
(B) More than $2,000	7
(C) More than $5,000	8
(D) More than $10,000	9
(E) More than $20,000	10
(F) More than $40,000	11
(G) More than $70,000	12
(H) More than $120,000	13
(I) More than $200,000	14
(J) More than $350,000	15
(K) More than $500,000	16
(L) More than $800,000	17
(M) More than $1,500,000	18
(N) More than $2,500,000	19
(O) More than $5,000,000	20
(P) More than $10,000,000	21
(Q) More than $20,000,000	22
(R) More than $40,000,000	23
(S) More than $80,000,000	24.".

and inserting in lieu thereof:

(A) $1,700 or less	6
(B) More than $1,700	7
(C) More than $3,000	8
(D) More than $5,000	9
(E) More than $8,000	10
(F) More than $13,500	11
(G) More than $23,500	12
(H) More than $40,000	13
(I) More than $70,000	14
(J) More than $120,000	15
(K) More than $200,000	16
(L) More than $325,000	17
(M) More than $550,000	18
(N) More than $950,000	19
(O) More than $1,500,000	20
(P) More than $2,500,000	21
(Q) More than $5,000,000	22
(R) More than $10,000,000	23
(S) More than $20,000,000	24
(T) More than $40,000,000	25
(U) More than $80,000,000	26.".

The Commentary to section 2X1.1 captioned "Application Notes" is amended in Note 1 in the third paragraph by deleting "Impair, Impede" and inserting in lieu thereof "Impede, Impair, Obstruct,".

Section 3D1.2(d) is amended in the second paragraph by deleting "2T1.2, 2T1.3," immediately following "sections 2T1.1,".

Appendix A (Statutory Index) is amended in the line beginning "26 U.S.C. 7203" by deleting "2T1.2" and inserting in lieu thereof "2T1.1"; in the line beginning "26 U.S.C. 7206(1), (3), (4), (5)" by deleting "2T1.3" and inserting in lieu thereof "2S1.3, 2T1.1"; in the line beginning "26 U.S.C. 7206(2)" by inserting "2S1.3," immediately before "2T1.4"; and in the line beginning "26 U.S.C. 7207" by deleting "2T1.5" and inserting in lieu thereof "2T1.1".

Appendix A (Statutory Index) is amended by inserting, at the appropriate place by title and section, the following:

"26 U.S.C. 7208	2F1.1";
"26 U.S.C. 7212(a) (omnibus clause)	2J1.2";
"26 U.S.C. 7232	2F1.1".

Reason for Amendment: This amendment consolidates sections 2T1.1, 2T1.2, 2T1.3, and 2T1.5, thereby eliminating the confusion that has arisen in some cases regarding which guideline applies. In addition, by adopting a uniform definition of tax loss, this amendment eliminates the anomaly of using actual tax loss in some cases and an amount that differs from actual tax loss in others. Furthermore, this amendment consolidates sections 2T1.4(b)(1) and (b)(3) to reflect the substantial overlap between these subsections. Finally, this amendment adopts a revised "tax loss" table to provide increased deterrence for tax offenses.

19. Amendment: The Commentary to sections 3B1.3 captioned "Application Notes" is amended by deleting Note 1 as follows:

, "1. The position of trust must have contributed in some substantial way to facilitating the crime and not merely have provided an opportunity that could as easily have been afforded to other persons. This adjustment, for example, would not apply to an embezzlement by an ordinary bank teller.",

and inserting in lieu thereof:

"1. 'Public or private trust' refers to a position of public or private trust characterized by professional or managerial discretion (i.e., substantial discretionary judgment that is ordinarily given considerable deference). Persons holding such positions ordinarily are subject to significantly less supervision than employees

VOL
58
ISS
86
MY
6
19 93
UMI

whose responsibilities are primarily non-discretionary in nature. For this enhancement to apply, the position of trust must have contributed in some significant way to facilitating the commission or concealment of the offense (e.g., by making the detection of the offense or the defendant's responsibility for the offense more difficult). This adjustment, for example, would apply in the case of an embezzlement of a client's funds by an attorney serving as a guardian, a bank executive's fraudulent loan scheme, or the criminal sexual abuse of a patient by a physician under the guise of an examination. This adjustment would not apply in the case of an embezzlement or theft by an ordinary bank teller or hotel clerk because such positions are not characterized by the above-described factors.

Notwithstanding the preceding paragraph, because of the special nature of the United States mail an adjustment for an abuse of a position of trust will apply to any employee of the U.S. Postal Service who engages in the theft or destruction of undelivered United States mail.".

Reason for Amendment: This amendment reformulates the definition of an abuse of position of trust to better distinguish cases warranting this enhancement.

20. Amendment: The Commentary to section 4A1.2 captioned "Application Notes" is amended in Note 1 by inserting the following additional sentence at the end:

"Conduct that is part of the instant offense means conduct that is relevant to the instant offense under the provisions of section 1B1.3 (Relevant Conduct).".

The Commentary to section 4A1.2 captioned "Application Notes" is amended in Note 6 in the first sentence of the first paragraph by inserting "(A)" immediately before "have been reversed"; by deleting the comma following "law"; and by inserting "or (B) have been ruled constitutionally invalid in a prior case" immediately before "are not to be counted";

The Commentary to section 4A1.2 captioned "Application Notes" is amended in Note 6 by deleting the second sentence of the first paragraph as follows:

"Also, sentences resulting from convictions that a defendant shows to have been previously ruled constitutionally invalid are not to be counted.";

and by inserting the following additional paragraph as the second paragraph:

"With respect to the current sentencing proceeding, this guideline or commentary does not confer upon the defendant any right to attack collaterally a prior conviction or sentence beyond any such rights otherwise recognized in law (e.g., 21 U.S.C. 851 expressly provides that a defendant may collaterally attack certain prior convictions).".

The Commentary to section 4A1.2 captioned "Background" is amended by deleting the second paragraph as follows:

"The Commission leaves for court determination the issue of whether a defendant may collaterally attack at sentencing a prior conviction.".

Reason for Amendment: This amendment expressly provides that the term "part of the instant offense" in subsection (a)(1) of section 4A1.2 means "relevant conduct" as defined in section 1B1.3 (Relevant Conduct) to avoid double counting and ensure consistency with other guideline provisions.

This amendment also clarifies the Commission's intent with respect to whether section 4A1.2 (Definitions and Instructions for Computing Criminal History) confers on defendants a right to attack prior convictions collaterally at sentencing, an issue on which the appellate courts have differed. Compare, e.g., *United States* v. *Canales*, 960 F.2d 1311, 1316 (5th Cir. 1992) (Section 4A1.2 commentary indicates Commission intended to grant sentencing courts discretion to entertain initial defendant challenges to prior convictions); *United States* v. *Jacobetz*, 955 F.2d 786, 805 (2d Cir.) (similar), cert. denied, 113 S. Ct. 104 (1992); *United States* v. *Cornog*, 945 F.2d 1504, 1511 (11th Cir. 1991) (similar) with *United States* v. *Hewitt*, 942 F.2d 1270, 1278 (8th Cir. 1991) (commentary indicates defendants may only challenge use of prior convictions at sentencing by showing such conviction previously ruled invalid). This amendment addresses this inter-circuit conflict in interpreting the commentary by stating more clearly that the Commission does not intend to enlarge a defendant's right to attack collaterally a prior conviction at the current sentencing proceeding beyond any right otherwise recognized in law.

21. Amendment: The Commentary to section 5G1.3 captioned "Application Notes" is amended by inserting the following additional note:

"4. If the defendant was on federal or state probation, parole, or supervised release at the time of the instant offense, and has had such probation, parole, or supervised release revoked, the sentence for the instant offense should be imposed to be served consecutively to the term imposed for the violation of probation, parole, or supervised release in order to provide an incremental penalty for the violation of probation, parole, or supervised release (in accord with the policy expressed in sections 7B1.3 and 7B1.4).".

Reason for Amendment: This amendment adds an application note to the commentary of this section to provide guidance in the case of a defendant who was on federal or state probation, parole, or supervised release at the time of the instant federal offense and has had such term of supervision revoked prior to sentencing on the instant federal offense.

22. Amendment: The Commentary to section 6B1.2 is amended by inserting the following additional paragraph at the end:

"The Commission encourages the prosecuting attorney prior to the entry of a guilty plea or nolo contendere plea under Rule 11 of the Federal Rules of Criminal Procedure to disclose to the defendant the facts and circumstances of the offense and offender characteristics, then known to the prosecuting attorney, that are relevant to the application of the sentencing guidelines. This recommendation, however, shall not be construed to confer upon the defendant any right not otherwise recognized in law.".

Reason for Amendment: This amendment adds commentary to this policy statement recommending that the prosecuting attorney disclose to the defendant the facts and circumstances of the offense and offender characteristics then known to the prosecuting attorney that are relevant to the application of the guidelines in order to encourage plea negotiations that realistically reflect probable outcomes.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Proposed Finding for Federal Acknowledgment of the Snoqualmie Indian Tribe

April 26, 1993.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of proposed finding.

SUMMARY: Pursuant to 25 CFR 83.9(f), notice is hereby given that the Assistant Secretary proposes to acknowledge that the Snoqualmie Indian Tribe, c/o Mr. Ronald Lauzon, 18525 Novelty Hill Road, Redmond, Washington 98052, exists as an Indian tribe within the meaning of Federal law. This notice is based on a determination that the tribe meets the seven mandatory criteria set forth in 25 CFR 83.7. Therefore, the Snoqualmie Indian Tribe meets the requirements necessary for a government-to-government relationship with the United States.

DATES: As provided by 25 CFR 83.9(g), any individual or organization wishing to challenge the proposed finding may submit factual or legal arguments and evidence to rebut the evidence relied upon. This material must be submitted within 120 calendar days from the date of publication of this notice.

FOR FURTHER INFORMATION CONTACT: Holly Reckord, (202) 208–3592.

SUPPLEMENTARY INFORMATION: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

The Snoqualmie Indian Tribe is based in King County, Washington, on or near land that was traditionally and aboriginally Snoqualmie. The tribe's first sustained contact with Euro-Americans began in 1833. Extensive settlement by non-Indians in the Puget Sound area began in the late 1840's, leading to the 1855 Treaty of Point Elliott between the Snoqualmie and other neighboring tribes and the United States. From that time until the present, the petitioner has been identified repeatedly as being American Indian by Federal authorities, State and local governments, civil, religious, and recreational organizations, scholars and other writers, newspapers and books, federally recognized Indian tribes, and national and regional Indian organizations. The petitioner has also been viewed historically as being distinct from other Indian tribes in western Washington, as well as from other populations in that area.

The Snoqualmie are classified culturally and linguistically as Southern Coast Salish, a subdivision of the Coast Salish of the Puget Sound region. At the time of the treaty, and for several decades before, the Snoqualmie consisted of at least 18 winter villages located along the Snoqualmie River. These villages were centered on one or several multi-family longhouses.

The Snoqualmie tribe was a single, distinct social unit, united by kinship and other ties. The tribe shared a common name and territory and was somewhat distinct from neighboring Coast Salish tribes in culture and language. Until the mid-1840's the Snoqualmie may not have been a single political unit in the sense of having an overall leader. Within the tribe, a distinction was made between the Upper Snoqualmie in the villages on the prairie above Snoqualmie Falls, and the Lower Snoqualmie in the villages below the Falls.

Marriage outside the village and tribe was the norm for the Snoqualmie and other Coast Salish. Puget Sound tribes traditionally were cohesive groupings within a broader network of kinship, social, and economic relationships.The social organization of these tribes has retained much of this character up to the present. The acknowledgment criteria regarding community and political influence have in this case been evaluated in terms of this particular Coast Salish social organization and culture.

After traditional settlements were disrupted by white settlers in the 1860's, the Snoqualmie reestablished three distinct settlement areas: on the Upper Snoqualmie prairie, including a settlement called Meadowbrook; in the Lower Snoqualmie area near the aboriginal villages at Tolt and Fall City; and at Lake Sammamish, outside but adjacent to traditional Snoqualmie territory. Community longhouses were maintained in each of these areas and much of the traditional culture was retained, including language, religion, and social organization and marriage patterns. There were few marriages with non-Indians.

Some Snoqualmie moved to the Tulalip Reservation after 1860, but most did not because of its limited land and the fact that it was outside of Snoqualmie territory. Those tribal members who moved to the reservation maintained social and political ties with those in the off-reservation settlements and the Snoqualmie remained a distinct social community.

By 1914, when the tribe began a political reorganization under Jerry Kanim, the distinct tribal settlement areas had largely dispersed and more tribal members and moved to reservations. After the turn of the century the geographically distinct Snoqualmie settlements began to break up. Dispersion of the Snoqualmie continued over the next 50 years (1914–1956), although most members remained within or adjacent to traditional Snoqualmie territory. The membership narrowed in the 1940's and 1950's as many reservation residents affiliated with the Snoqualmie shifted allegiance to the reservations, which were becoming distinct social and political units. There continued to be an off-reservation centered social and political body of Snoqualmie.

Although they no longer had separate settlements, there is strong evidence that the tribe maintained a distinct social community during this period. This evidence includes continued intermarriage with Snoqualmie or other Puget Sound Indians, closeness of kinship ties linking major family groupings, maintenance of a distinct culture, including language and religion, and the existence of strong internal political processes under the leadership of Jerry Kanim. Additional evidence of long-term social relationships and interaction is the regular tribal social gatherings held at certain holidays. Supporting evidence is the observations of knowledgeable contemporary observers, such as Charles Roblin and other Indian agents, that the Snoqualmie were a distinct social community.

There is less detailed and extensive evidence for social community for the period between 1956 and 1981 than there is for the time periods before and after. However, the available evidence is sufficient to demonstrate that a significant level of social community was maintained. The Snoqualmie did not become more widely dispersed geographically during this period, remaining within an area close enough to allow maintenance of community social relations.

There continued to be a considerable degree of close kinship ties within the tribe and kin and social linkages with other Puget Sound Indians, since marriage within the Snoqualmie was common until the 1920's and within Puget Sound Indian society until the 1950's. However, the degree of social interaction and social ties was somewhat diminished from previous eras. A significant, though diminishing amount of distinct culture was also maintained. The clearest evidence of this was Snoqualmie participation in the Indian Shaker Church, the Indian Smokehouse religion, and some

continued traditional religious beliefs among the older generation. Membership in the tribe required demonstration of ⅛ or more Snoqualmie blood degree, and the average blood degree in practice was higher. This demonstrates that the Snoqualmie were more than merely a group of distantly related descendants of Indians.

There was more evidence for continuing political processes for the period between 1956 and 1981 than there was concerning social community. This evidence establishes that significant, noncoercive political processes continued. These provide evidence for community because they required and were based on the existence of social ties and communication in order to operate. The evidence for community from political processes was less strong between 1956 and 1970, in part because this was a low point in political activity following the death of Chief Jerry Kanim in 1956.

Considerably more detailed evidence was found for the modern Snoqualmie community, defined for the purpose of this evaluation as being from approximately 1981 to the present. There is strong evidence that significant social relationships have been maintained in the modern community. The geographical distribution of the tribe has not changed substantially from that of previous decades. About 70 percent of the membership lives within a 50-mile radius, which is close enough to allow significant social interaction. The continued existence of cultural differences among a substantial minority of the membership provides evidence that there is more than a minimal distinction between the Snoqualmie and non-Indians. The tribe has maintained a clear membership boundary, socially distinguishing it from non-members, reinforcing evidence from other sources that this is more than a formal organization of Snoqualmie descendants. There is limited direct evidence that informal, though not necessarily intense, social contact is maintained broadly among the membership. Snoqualmie kinship relationships are still close enough to provide supporting evidence that significant social relations exist. Family line groupings are socially defined and there is a significant degree of social knowledge and involvement among Snoqualmie members. This is partly expressed in their awareness of the history, character, and actions of the major family lines, which is evidence of continuing social ties as well as social contact. The available data regarding family groups and their social significance is particularly strong concerning how they manifest themselves in political contexts. Conflicts between family groups are considered a prominent political element.

The evidence of Snoqualmie political processes in the modern community, which is more clearly and extensively documented than is direct evidence of social community, demonstrates that significant social relationships and a significant degree of social contact exist.

At the time of first sustained contact with Euro-Americans in the 1830's, leadership and other political processes within the Snoqualmie were exercised at the village level and/or within nonlocalized kinship groups. The Snoqualmie tribe probably did not constitute a single political unit in the sense of having an overall leader until the early or mid-1940's, when Pat Kanim became chief of the entire tribe. Kanim's authority was recognized by non-Indian governmental authorities and by the Snoqualmie themselves. Kanim was second signer of the 1855 Treaty of Point Elliott, a reflection of his importance.

After Pat Kanim's death in 1858 until 1914, the Snoqualmie were led by a variety of local leaders. Most prominent of these was Sanawa, chief of the Upper Snoqualmie under Pat Kanim. Sanawa's authority was recognized by the Federal government. He lived until 1875 and was succeeded by his son John Sanaa. Political influence was also exercised through informal leaders, community meetings and the cooperative effort necessary to construct and maintain community longhouses and communal religious ceremonies. The existence and maintenance of culturally and territorially distinct communities throughout this period is further evidence that political influence through either formal or informal leaders and group decision-making processes was maintained throughout the latter part of the 19th century and the first decade of the 20th century.

Between 1914 and 1916, a political reorganization of the political system of the Snoqualmie took place. A strong chief of the entire tribe, named Jerry Kanim, was put into office and under his leadership a council and general council of the entire membership were instituted to help govern the Snoqualmie. The process by which the political reorganization took place is itself strong evidence of the exercise of political influence because it resulted from the mobilization of community opinion, involving influentiel informal leaders, over an extended period of time, and reflected shared community values concerning leadership.

Kanim was a strongly influential figure within the Snoqualmie throughout his tenure from 1914 until his death in 1956. He was a strong speaker, enjoyed high prestige throughout the group, and was known for his ability to influence community opinion on political and social issues.

Two critical issues that Kanim addressed throughout his tenure were seeking land for the Snoqualmie to settle upon and maintenance of fishing and hunting rights under the treaties. Land was of critical importance for the Snoqualmie because they had lost their lands during the first decade of the 20th century, and there was insufficient reservation land to allot to them. Hunting and fishing rights were of great importance because the Snoqualmie hunted and fished extensively for subsistence purposes but access to traditional hunting and fishing grounds was becoming limited because of competition with non-Indians and increasingly restrictive game and fish laws. Kanim pursued these issues with Federal, state, and local authorities throughout his tenure. Political influence is thus demonstrated because he and the Snoqualmie councils dealt with issues which were clearly of significance and concern to the Snoqualmie as a whole.

Additional strong evidence of political influence among the Snoqualmie between 1914 and 1956 is that knowledgeable governmental authorities external to the group consistently recognized Jerry Kanim's political influence and dealt with him as a leader who represented the interests and concern of the Snoqualmie.

The level of exercise of political influence during Jerry Kanim's tenure very substantially exceeds the minimal requirements of the Acknowledgment regulations.

Although Jerry Kanim was not replaced as chief in the decades after his death in 1956, there continued to be leaders among the Snoqualmie who had been active during Kanim's tenure. The tribal chairman, an existing position, became the main leader of the Snoqualmie, and the tribal council and general council took a more important role. Although a Snoqualmie chief was appointed in 1986, it was not demonstrated that this individual has a significant political role.

There is clear evidence that community opinion on a variety of matters has existed and been expressed through various political processes throughout the period from 1956 up until and including the present. There is

UMI

good evidence, consistent over a long period of time (1960's to the present), that opinion and concern over the actions of the Snoqualmie leadership and the form of that leadership have existed at large among the membership. This has been evidenced from time to time by generational differences concerning the Snoqualmie leadership and the form of government. Major family lines function within the political system to a limited degree, playing a role in formation of opinion and being one dimension along which conflicts take place. A strong example of internal political influence occurred in 1980 when community opinion was mobilized to oust the tribal chairman, whose behavior in this role violated community norms. These processes illustrate the existence of the flow of political opinion within the Snoqualmie and between leaders and members, and thus a bilateral political relationship, a requirement of criterion (c).

Political influence and a bilateral political relationship is also demonstrated by the major role played by the general council, a meeting of the general membership which is the final arbiter of political issues and conflicts within the Snoqualmie. The general council is a decisionmaking body which connects the tribal council and chairman to the Snoqualmie members, by electing these officers and by reviewing actions and issues which are considered critical or controversial.

Hunting and fishing rights have continued to be a concern addressed by the Snoqualmie council and leadership, throughout the period from 1956 to the present. It is likely that fishing remained an important part of Snoqualmie subsistence until World War II, and for some time later for some Snoqualmie. There is good evidence that fishing rights is a political issue of substantial significance and concern among a wide portion of the Snoqualmie because the effective loss of access to these rights is recent and there is continued widespread interest among the members.

There exists substantial evidence between 1956 and 1968 and strong evidence from 1968 through the present that political influence has been exercised within the Snoqualmie, that the leaders and council have a significant political connection with the membership, i.e., a bilateral political relationship, and that political issues of significance to a broad portion of the membership have been addressed.

The petitioner's governing document describes how membership is determined and how the tribe governs its affairs and its members. Present members of this organization are predominantly lineal descendants of the Snoqualmie Indians whose ancestors have inhabited Western Washington since first sustained contact with Euro-Americans. Ninety-six percent of the petitioner's 313 members have established or can be expected to establish descent from an ancestor identified as Snoqualmie in historical records. The remaining 4 percent of the membership consists of 11 members who have not satisfactorily established Snoqualmie descent, and 3 members who are non-Indians adopted by the tribe. Eighty-two percent of the members possess the one-eighth or more Snoqualmie blood required by the petitioner's membership criteria. Members who possess less than one-eighth Indian blood have been adopted by the petitioner.

Twenty percent of the membership (63 members) is currently enrolled in a federally recognized tribe, leaving a substantial majority (80 percent) of the membership who are not enrolled in a federally recognized tribe. Because concurrent membership in more than one tribe or group is prohibited by the petitioner's governing documents, these members technically do not meet the criteria for membership in the Snoqualmie Indian Tribe. The membership of the 20 percent who are enrolled in a federally recognized tribe is dispersed among seven tribes serviced by the BIA's Puget Sound Agency, and the majority are based primarily on the member's descent in another line from a non-Snoqualmie Indian ancestor who was affiliated with the tribe. There is no evidence that suggests that these 63 individuals represent a faction or factions who are attempting to break away from their tribes in order to establish another tribe.

No evidence was found to show that the Snoqualmie Indian Tribe has been the subject Federal legislation which has expressly terminated or forbidden a Federal relationship with the United States Government.

Based on this preliminary factual determination, we conclude that the Snoqualmie Indian Tribe meets all the criteria in 25 CFR 83.7. We therefore conclude that the tribe should be granted Federal acknowledgment under 25 CFR part 83.

As provided by 25 CFR 83.9(f), a report summarizing the evidence for the proposed decision will be provided to the petitioner and other interested parties, and is available to other parties upon written request. Comments on the proposed finding and/or requests for a copy of the report of evidence should be addressed to the Office of the Assistant Secretary—Indian Affairs, Bureau of Indian Affairs, 1849 C Street, NW., Washington, DC 20240, Attention: Branch of Acknowledgment and Research, Mail Stop 2611–MIB.

After consideration of the written arguments and evidence rebutting the proposed finding and within 60 days after the expiration of the 120-day response period described above, the Assistant Secretary—Indian Affairs will publish the final determination of the petitioner's status in the **Federal Register** as provided in 25 CFR 83.9(h).

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

Department of Justice

Office of Juvenile Justice and Delinquency Prevention

Notice of the FY 1993 Competitive Discretionary Assistance Program and the Availability of the FY 1993 Discretionary Program Announcement Application Kit

VOL 58 ISS 86 MY 6 1993 UMI

DEPARTMENT OF JUSTICE

Office of Juvenile Justice and Delinquency Prevention

Fiscal Year 1993 Competitive Discretionary Assistance Programs and the Availability of the Fiscal Year 1993 Discretionary Program Announcement Application Kit

AGENCY: Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention, Department of Justice.

ACTION: Public announcement of the Office of Juvenile Justice and Delinquency Prevention's Fiscal Year 1993 Competitive Discretionary Assistance Programs and the availability of the Fiscal Year 1993 Discretionary Program Announcement Application Kit (hereinafter OJJDP Application Kit) for Title II, Juvenile Justice and Delinquency Prevention, and Title IV, Missing Children's Assistance Act, of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) publishes this Notice of Competitive Discretionary Assistance Programs and announces the availability of the Juvenile Justice and Delinquency Prevention and Missing Children's Assistance Act Discretionary Program Announcement Application Kit for Fiscal Year 1993 (a separate publication available from the OJJDP's Juvenile Justice Clearinghouse).

The OJJDP Application Kit contains the discretionary program announcements, general application and administrative requirements, an application form (Standard Form 424), the OJJDP Peer Review Guideline, OJJDP Competition and Peer Review Procedures, and other supplemental information relevant to the application process. To order an OJJDP Application Kit, please call the Juvenile Justice Clearinghouse, toll-free, 24 hours a day, (800) 638–8736.

DATES: Applicants are requested to submit the original, signed application (Standard Form 424) and four copies to OJJDP. Application forms and supplementary information will be provided upon request in the OJJDP Application Kit. Potential applicants should review the OJJDP Peer Review Guideline and the OJJDP Competition and Peer Review Procedures. These documents are provided in the OJJDP Application Kit. Applications must be received by mail or delivered to OJJDP by 5 p.m. e.d.t., on or before the date indicated in the program announcement. Those applications sent by mail should be addressed to the specific OJJDP grant manager for the program to which the applicant is applying. Applications may be hand delivered between the hours of 8 a.m. and 5 p.m., except Saturdays, Sundays, and Federal holidays. A receipt will be provided for hand-delivered applications.

ADDRESSES: Applications must be postmarked or hand delivered by 5 p.m. prior to or on the due date specified for the particular program. Applications may be mailed or hand delivered to: Office of Juvenile Justice and Delinquency Prevention, room 742, 633 Indiana Avenue, NW., Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Program inquiries are to be addressed to the attention of the OJJDP staff contact person identified in each specific program announcement. For general information, contact Marilyn Silver, Management Analyst, Information Dissemination Unit, (202) 307–0751. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: In accordance with section 204(b)(5)(A) of Title II of the Juvenile Justice and Delinquency Prevention Act of 1974 (JJDP Act), as amended, 42 U.S.C. 5614(b)(5)(A), OJJDP issued a Final Comprehensive Plan describing the Juvenile Justice and Delinquency Prevention Programs which OJJDP intends to fund during Fiscal Year 1993. Published January 22, 1993, at 58 FR 5860, the final plan includes activities authorized in parts C and D of title II of the JJDP Act (42 U.S.C. 5651–5665b).

The 1984 Amendments to the JJDP Act established Title IV, the Missing Children's Assistance Act. In accordance with Section 406(a) of Title IV of the JJDP Act, 42 U.S.C. 5776(a), OJJDP announced Final Program Priorities for grants and contracts under section 405, 42 U.S.C. 5775, of the Missing Children's Assistance Act on March 1, 1993, at 58 FR 11944. The competitive programs identified among the Fiscal Year 1993 Final Program Priorities for section 405 are included in this Notice and in the OJJDP Application Kit.

In order to increase competition and participation in section 405 programs, the National Center for Missing and Exploited Children (NCMEC) and other direct assistance recipients under section 404, 42 U.S.C. 5773, of the JJDP Act will not be eligible to compete for section 405 funds.

Application Requirements

All applications must be submitted in accordance with the requirements set forth in the OJJDP Application Kit. Two program announcements, Innovative Approaches in Law-Related Education and Missing Children Field-Initiated Program, require the submission of concept papers. See these Announcements for details.

Eligibility Requirements

Applications are invited from eligible public and private agencies, organizations, educational institutions, individuals, or combinations thereof. Eligibility differs from program to program. Please consult individual program announcements for specific eligibility requirements. Where eligible for an assistance award, private for-profit organizations must agree to waive any profit or fee. Joint applications by two or more eligible applicants are welcome, as long as one organization is designated as the primary applicant and the other(s) as co-applicant(s). Applicants must demonstrate that they have experience in the design and implementation of the type of program or program activity for which they are an applicant.

Selection Criteria

All applicants will be evaluated and rated by a peer review panel according to general selection criteria. Peer review will be conducted in accordance with the OJJDP Competition and Peer Review Policy, 28 CFR part 34, subpart B. Selection criteria for each competitive program will determine applicants' responsiveness to minimum program application requirements, organizational capability, and thoroughness and innovativeness in responding to strategic issues related to project implementation. Each competitive program announcement will indicate additional program-specific review criteria and/or changes in points assigned to criteria used in the peer review for that particular program.

Peer reviews will use the following criteria to rate applications unless the program announcement contains separate, program-specific selection criteria:

1. *Statement of the problem.* (20 points) The applicant includes a clear, concise statement of the problem addressed in this program.

2. *Definition of Objectives.* (20 points) The goals and objectives are clearly defined and the objectives are clear, measurable, and attainable.

3. *Project Design.* (20 points) The project design is sound and constitutes an effective approach to meet the goals and objectives of this program.

The design provides a detailed implementation plan with a timeline which indicates significant milestones in the project, due dates for products, and the nature of the products to be submitted. The design contains program elements directly linked to the achievement of the project.

4. *Management Structure.* (15 points) The project's management structure and staffing is adequate to successfully implement and complete the project. The management structure for the project is consistent with the project goals and tasks described in the application.

Applicant explains how the management structure and staffing assignments are consistent with the needs of the program.

5. *Organizational Capability.* (15 points) The applicant organization's potential to conduct the project successfully must be documented.

Applicant demonstrates knowledge of and experience in the juvenile justice field, particularly in the area of study the project addresses.

Applicant demonstrates that staff members have sufficient substantive expertise and technical experience. The applications will be judged on the appropriateness of the position descriptions, required qualifications, and staff selection criteria.

6. *Reasonableness of Costs.* (10 points) Budgeted costs are reasonable, allowable, and cost effective for the activities proposed, and are directly related to the achievement of the program objectives. All costs are justified in a budget narrative that explains how costs are determined.

OJJDP has made the following changes to the Final Comprehensive Program Plan and the Missing and Exploited Children's Program for Fiscal Year 1993.

Prevention of Delinquency Through Child-Centered Community-Based Policing

The OJJDP Final Comprehensive Plan for Fiscal Year 1993 indicated that OJJDP proposed to support a competitive program to prepare training and technical assistance materials to replicate the Yale/New Haven Child-Centered Community-Based Policing Program. Fiscal Year 1993 funding was projected at $50,000.

However, OJJDP has concluded that competition at this stage of the program's development is not practical. The Child-Centered Community-Based Policing model must be documented before possible replication. This initial documentation will be completed by the Yale Child Development Center and the New Haven Police Department on a noncompetitive basis because the staff of these two entities, as the creators and sole practitioners of this program, are uniquely qualified to perform this task at this funding level.

Please direct any questions regarding this program to Peter Freivalds, Training and Technical Assistance Division, (202) 307–5940.

Second National Incidence Studies of Missing, Abducted, Runaway and Thrownaway Children (NISMART II)

A competitive program announcement for the Second National Incidence Studies of Missing, Abducted, Runaway and Thrownaway Children (NISMART II) will be postponed until the latter part of Fiscal Year 1993. OJJDP is currently funding two other programs that are directly related to NISMART II.

A 16-month planning grant was awarded to the Research Triangle Institute in August 1992 for the purposes of conducting a thorough assessment of NISMART I, determining information needs and priorities for NISMART II, exploring additional data sources and methodologies that may improve NISMART I, and making recommendations for the design of NISMART II. Draft reports are due in August 1993 and a final report is due in November 1993.

A second program operating concurrently with the planning grant is entitled Additional Analysis and Dissemination of NISMART. Two cooperative agreements were awarded in July and September 1992 to the National Network of Runaway and Youth Services and the Family Research Laboratory of the University of New Hampshire, respectively, for the purpose of conducting additional analyses of NISMART I data files regarding runaways, thrownaways, abductions, and otherwise missing or displaced children. Draft reports are due in July and September 1993. A final report, inclusive of findings from both cooperative agreements, is due in November 1993.

The findings and recommendations from these two programs are essential to developing the detailed solicitation for NISMART II applications. A separate Competitive Program Announcement for NISMART II will be published in the **Federal Register** later in Fiscal Year 1993.

Multi-Jurisdictional, Interagency Model for Investigating and Prosecuting Cases of Child Sexual Exploitation

The Office for Victims of Crime (OVC) is implementing the Multi-Jurisdictional, Interagency Model for Investigating and Prosecuting Cases of Child Sexual Exploitation Program as stated in the Final Comprehensive Plan for Fiscal Year 1993. This is a joint program between OJJDP and OVC. The purpose of this project is to develop a multi-jurisdictional task force model to combat child pornography and juvenile prostitution. The task force will implement centrally coordinated and managed investigations involving Federal, State, and local investigative agencies. OVC is currently requiring applications to be received prior to their March 23, 1993, deadline.

Announcements for OJJDP's Title II and Title IV competitive assistance programs are provided below.

FISCAL YEAR 1993 COMPETITIVE PROGRAM LISTING

Title II Programs:	
Serious, Violent, and Chronic Offender Program Development	$300,000
Accountability-Based Community (ABC) Intervention Program	300,000
Law-Related Education in Juvenile Justice Settings	440,000
Innovative Approaches in Law-Related Education	200,000
Hate Crime Study	100,000
Prevention of Hate Crimes	50,000
Due Process Advocacy Program Development	100,000
Title IV Programs:	
Investigative Case Management for Missing Children Homicides	150,000
A Study of the Effectiveness of Private Investigators in Locating and Recovering Parentally Abducted Children	100,000
Issues in Resolving Cases of International Parental Abductions of Children	200,000
Criminal Justice Response to Parental Child Abduction Cases	450,000
Missing Children's Field-Initiated Program	300,000

Serious, Violent, and Chronic Offender Program Development

Purpose

To develop a comprehensive program model design that can be implemented in State and local jurisdictions to address the problem of Serious, Violent, and Chronic Juvenile Offenders (SVCJOs).

VOL 58 ISS 86 MY 6 1993 UMI

Background

The violent crime rate among juveniles has increased sharply in the past few years. Juveniles account for an increasing share of all violent crimes in the United States. A small portion of juvenile offenders account for the bulk of all serious and violent juvenile crime. At the same time, the number of juveniles taken into custody has increased, as has the number of juveniles waived or transferred to the criminal justice system. Admissions to juvenile facilities reached an all-time high in 1990 (Howell, 1992).

The juvenile justice system does not have adequate programmatic resources to identify SVCJOs and to intervene effectively with them. Targeting this group of juvenile offenders will require a comprehensively systematic approach that includes family strengthening and support, community involvement, and delinquency prevention focused on at-risk juveniles. Rehabilitative approaches for delinquent juveniles must use a system of graduated sanctions that combine accountability for delinquent behavior with intensive treatment services.

Research has documented primary causes of juvenile delinquency: (1) Individual characteristics, (2) family influences, (3) school experiences, (4) peer group influences, and (5) neighborhood and community characteristics (Weis and Hawkins, 1981). Effective delinquency prevention efforts must be comprehensive, cover all five factors, and correspond to the social development process (Hawkins and Catalano, 1992). Other research has shown that more structured treatments that use behavioral techniques and teaching skills result in the largest delinquency reductions (Lipsey, 1992). In addition, there is growing evidence that small, secure facilities are more effective than training schools, cost less, and are a more humane approach to controlling and rehabilitating the SVCJO (Krisberg, 1992).

OJJDP has made it a priority to identify and provide effective programmatic responses to juveniles at risk of delinquency. OJJDP has considered a variety of approaches to prevent the development of and intervene with SVCJOs. The OJJDP-funded study, "Program of Research on the Causes and Correlates of Delinquency," (Huizinga, Loeber, and Thornberry, 1992) has identified developmental pathways to delinquency. This information, coupled with risk and needs assessments, will provide the juvenile justice system with valuable, but currently missing data on juveniles who are moving toward serious, violent, or chronic offending.

OJJDP has also developed several effective approaches to this target group. In the early 1980's, OJJDP's Violent Juvenile Offender Program developed and tested a comprehensive approach to violent juvenile crime that emphasized treatment and reintegration of violent offenders (Fagan, 1990). The Intensive Supervision Program (ISP) is a program model that is being implemented in several sites as an alternative to incarceration for serious juvenile offenders (Krisberg, et al., 1989, 1990). OJJDP has also developed the Intensive Aftercare Program (IAP) for high-risk juvenile parolees (Altschuler and Armstrong, 1992).

These programs were instrumental in developing the framework for OJJDP's "Comprehensive System Approach to Serious, Violent and Chronic Offenders" (Wilson, 1992). While the framework has been established for a comprehensive program model design, many specific aspects need to be assessed and refined.

The project will research and examine other relevant data and studies, program development efforts, and existing effective programs. Two major components provide the framework for this project: (1) Family strengthening and support, community involvement, and delinquency prevention; and (2) graduated sanctions for delinquent offenders. The first component will be designed to address: (1) Individual characteristics; (2) family influences; (3) school experiences; (4) peer group influences; and (5) neighborhood and community characteristics.

The graduated sanctions component will integrate sanctions with treatment programs. Each major graduated sanction will consist of sub-levels, or gradations, that take the characteristics and influences of the first component into account, while providing a continuum of care through a network of community services. At each level in the continuum, the family will be involved in treatment and rehabilitation efforts. Programs will need to use risk and needs assessment instruments that incorporate such factors as age, severity of offense, and offender history. Aftercare will be included for all residential placements, and actively involve the family and the community in supporting the juvenile and reintegrating him/her into the family and community.

A system of graduated sanctions requires a broad continuum of options. The types of programs to be identified include: (1) Immediate interventions for first-time non-serious offenders and non-serious repeat offenders; (2) intermediate sanctions for first-time serious and violent offenders and reoffenders; and (3) secure confinement for those who are likely to be amenable to treatment, but require a secure setting, including juveniles who constitute an ongoing threat to community safety.

Goal

To develop a comprehensive program model design that addresses the problem of SVCJOs by supporting family-strengthening community involvement and prevention programs for juveniles identified at risk of becoming serious, violent, and chronic juvenile offenders and by offering the option of graduated sanctions for juveniles who have committed delinquent acts.

Objectives

- To provide a review of the literature for inclusion in the comprehensive program model design on effective, promising, and/or innovative prevention and intervention programs for SVCJOs and those at risk of becoming SVCJOs;
- To provide a compendium of programs based on the literature review;
- To review and modify risk and needs assessment instruments appropriate for each level of intervention; and
- To develop a comprehensive program model design for SVCJOs and those at risk of becoming SVCJOs based on what works and is consistent with underlying theoretical constructs.

Program Strategy

The grantee will thoroughly review the literature and synthesize from it the most effective, promising, and/or innovative prevention and intervention programs and strategies for SVCJOs and those juveniles at risk of becoming SVCJOs. The following programs will be included in the comprehensive program design: (1) Support and assistance to families and core community institutions; (2) delinquency prevention programs and services for at-risk juveniles; (3) immediate interventions; (4) intermediate sanctions; (5) community-based correctional facilities; (6) and training schools and other correctional institutions. The grantee will review ongoing OJJDP and other Federal agency projects related to these areas.

A compendium of programs will be developed from the literature review on prevention and intervention programs that have been demonstrably effective at each stage of prevention and intervention for SVCJOs and those at risk of becoming SVCJOs. Within the compendium, the program summaries will describe the programs' clientele, the program components the theoretical models on which they are based, and the type of evaluation done, etc. The grantee will further analyze these programs to determine the common components that are critical for success. In addition, this compendium will identify promising and/or innovative programs that need more research and evaluation to determine their effectiveness.

The grantee will review risk and needs assessment instruments for different intervention levels and assess their applicability to prevention programs. These instruments will need to be developmentally targeted and culturally sensitive.

From the above analysis of effective, promising, and/or innovative programs, the grantee will develop a comprehensive program design that covers all the prevention and intervention strategies and underlying theory of social development and that can be implemented in any local jurisdiction. For each of the prevention and intervention strategies, the design will include a target group, descriptive program elements, components that are key to effectiveness, and examples of existing programs on which the models were based. Also, the design should include strategies to obtain input from juveniles and families who have been or will be affected by these programs.

The grantee will establish and convene an advisory board for this project. This board should consist of juvenile court judges, juvenile justice practitioners, social service practitioners, researchers, officials from relevant State agencies, representing relevant foundations and other funding sources, and others who can contribute to the overall quality of the project. The board will (1) review the overall project design; (2) further define the types of prevention and intervention strategies to be studied; (3) help identify effective, promising, and/or innovative programs at each level of prevention and intervention; and (4) review drafts of the grantee's various products.

Products

- A comprehensive review of the literature that synthesizes the effective (evaluated), promising, and/or innovative programs for each stage of prevention and intervention for SVCJOs and those at risk of becoming SVCJOs.
- A compendium of programs, based on the above literature review, that documents programs demonstrated to be effective at each stage of prevention and intervention, including their clientele, the program's components, theoretical models on which they are based, and the type of evaluation done. In addition, this compendium will identify promising and innovative programs and strategies that need more research and evaluation to determine their effectiveness.
- The risk and needs assessment instruments for each juvenile justice system decision, e.g., court intake, adjudication, etc. Also, an accompanying narrative should discuss the most appropriate individual(s) to make the intervention assessment, e.g., parent, teacher, counselor, judge, parole officer, police, social worker, etc.
- A comprehensive program model design for each of the prevention and intervention strategies for SVCJOs and those at-risk of becoming SVCJOs that contains key components from effective, promising and/or innovative programs. The design should also include strategies to obtain input into the development of such programs from youths and families who will be affected by these programs.
- A comprehensive final report will include all of the above items. A separate executive summary should also be provided.

Eligibility Requirements

This work will build upon existing research, evaluation, and program development efforts in both prevention and intervention strategies with at-risk youths and SVCJOs. OJJDP invites applications from public or private nonprofit agencies or institutions that have had prior research and program development experience with these types of strategies for at-risk youths and serious, violent and chronic offenders. In addition, eligible applicants must meet the requirements stipulated in the **SUPPLEMENTARY INFORMATION** section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the **SUPPLEMENTARY INFORMATION** section of this Notice.

Award Period

The project period will be 12 months.

Award Amount

Up to $300,000 has been allocated for this project.

Due Date

Applications must be received by mail or delivered to OJJDP by June 21, 1993.

Contact

For further information contact Jonathan Budd, Research and Program Development Division, (202) 307–5929.

VOL 58 ISS 86 MY 6 1993 UMI

Accountability-Based Community (ABC) Intervention Program

Purpose

To develop a plan for a systemwide strategy of intervention, treatment, and rehabilitation for juvenile offenders that combines accountability and sanctions with increasingly intensive community-based intervention, treatment, and rehabilitation services as the juvenile's level of offending increases.

Background

This program implements section 261(a)(1) of the JJDP Act of 1974, as amended, 42 U.S.C. 5665(a)(1).

An effective juvenile justice system strategy for turning delinquent juveniles around combines accountability and sanctions with increasingly intensive intervention, treatment, and rehabilitation services. These sanctions, emphasizing discipline and responsibility, must include a spectrum of intervention from community-based day treatment to secure corrections components.

An effective system for supervising juvenile offenders incorporates the following:

- Community protection and public safety;
- Recognition of victims' rights;
- Accountability;
- Competency development;
- Individualized intervention, treatment, and rehabilitation plans;
- Integral involvement of the family in intervention, treatment, and rehabilitation efforts;
- Incorporation of private, nonprofit community-based organization resources, including the community's social institutions, as essential strategy elements;
- Use of risk and needs assessments that combine such factors as age, severity of offense, and offender history to determine the appropriate sanction for each offender, the potential risk for reoffending, and the requirements of a comprehensive intervention and treatment strategy; and
- A broad continuum of options, integrating community-based resources with sanctions.

A system of sanctions would require a design that incorporates the following:

- A day treatment or other correctional service program(s);
- A residential placement program(s);
- A residential assignment program(s) that provides a small, secure community-based treatment facility;
- An aftercare program(s); and
- An implementation plan that integrates public resources with a core of private, nonprofit community-based organizations into the entire spectrum of intervention, treatment, and rehabilitation services for juvenile offenders.

OJJDP proposes to provide funding for strategy planning to a maximum of three selected jurisdictions that are developing and/or strengthening a comprehensive, integrated juvenile justice system strategy that combines accountability and sanctions with a full spectrum of intensive community-based, public, and private services.

Goal

To plan an effective juvenile justice system strategy for intervention, treatment, and rehabilitation of delinquent juveniles that combines accountability and sanctions with increasingly intensive community-based, public and private intervention, treatment, and rehabilitation services.

Objectives

- To assess the existing continuum of intervention, treatment, and rehabilitation services in the applicant's jurisdiction;
- To define the juvenile offender population;
- To develop a program strategy and implementation plan;
- To develop an evaluation design and implementation plan;
- To integrate private nonprofit community-based organizations into the intervention, treatment, and rehabilitation services for juvenile offenders;
- To develop an aftercare program that is a formal component of all residential placements;
- To develop a resource plan to enlist the financial and/or technical support of other Federal, State, and local agencies, private foundations, or other funding sources; and
- To develop a victim assistance component and integrate it with local victim assistance organizations.

Program Strategy

This solicitation invites applications from jurisdictions that are developing and/or strengthening a comprehensive juvenile justice system strategy that combines accountability and sanctions with a wide spectrum of intensive community-based, public, and private services.

OJJDP recommends that the plan reflect a two-year time frame for implementing the strategy.

Applicants are asked to develop comprehensive strategies that feature public and private collaboration and reflect recent research on the effectiveness of juvenile corrections programs. Applicants must provide concrete evidence that they are developing and/or strengthening a juvenile justice system strategy that incorporates the strategies described in this solicitation.

Each successful applicant will be required to include the following tasks in their plan:

- Assessment of the applicant's existing continuum of intervention, treatment, and rehabilitation services. The applicant will be required to complete a draft and final assessment report that:

(1) Describes the juvenile offender population;

(2) Describes gaps, weaknesses, or needs in the existing jurisdiction's program;

(3) Recommends developing and implementing program components and services that will expand the capability of the existing program; and

(4) Recommends an evaluation design.

- Identification of the population of juvenile offenders who require intervention, treatment, and rehabilitation. The applicant will be required to:

(1) Present the risk and needs assessment tool(s) utilized; and

(2) Present a plan specifying how the assessments have been or will be conducted.

- Development of a program strategy. The applicant will be required to:

(1) Produce a report that identifies training and technical assistance needs for developing and implementing the program. The report must include an estimate of training costs.

(2) Produce a final program design that:

—Identifies the target population;
—Describes the process and risk assessment to be used to assign juvenile offenders to the appropriate service(s);
—Identifies and assesses existing services that enable the juvenile justice system to identify gaps in services and develop a process for incorporating services where needed;
—Describes the process for developing public and private partnerships that will garner resources from private nonprofit community-based organizations and integrate them into the process;
—Incorporates a plan for involving families in the continuum of services;
—Incorporates a plan for implementing an after-care program as a formal component of all residential placements;
—Incorporate a plan that ensures that victim impact statements are prepared and presented at each stage when sanctions are determined;
—Incorporates a plan for notifying victims of all important decisions or changes in the status of cases;
—Describes specific sanctions and services for enhancing offender accountability, such as restitution, education about the impact of crime; and
—Incorporates a plan for evaluating the program.

(3) Produce a draft and final program operation manual.

(4) Produce a draft and final plan for implementing the program and supporting the evaluation.

Applicants must be specific about the tasks they can accomplish within 12 months with a $100,000 budget. The applicant must list and explain activities and products completed in the first year and provide an overview of the tasks to be accomplished and the products to be developed for years two and three.

Eligibility Requirements

Applications are invited from public agencies (such as local courts, probation, parole, or corrections) currently involved in planning a community-based juvenile justice system strategy of intervention, treatment, and rehabilitation for juvenile offenders. Applicant organizations may submit joint proposals with another eligible organization as long as one organization is designated as the primary applicant.

The applicant must be involved in a juvenile justice system that is located in and serves: (1) A Metropolitan Statistical Area (MSA) of 350,000 to 500,000 population; (2) counties of 350,000 to 500,000; or (3) states certifying a county or MSA with a population of 350,000 to 500,000. The jurisdiction must have documented risk factors.

The applicant must have a data collection system capable of accommodating components of the initiative and document a functioning coordination infrastructure (such as a task force) that incorporates public and private sector involvement for the project. In addition, eligible applicants must meet the requirements stipulated in the **SUPPLEMENTARY INFORMATION** section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The budget period will be 12 months.

Award Amount

Up to $300,000 has been allocated for this program; a maximum of $100,000 each for up to three urban communities with subsequent funding to be determined by OJJDP based on the availability of funds and OJJDP's priorities.

Due Date

Applications must be received by mail or delivered to OJJDP by June 21, 1993.

Contact

For further information contact Douglas C. Dodge, Special Emphasis Division, (202) 307–5914.

Law-Related Education in Juvenile Justice Settings

Purpose

To promote the use of law-related education in juvenile justice settings.

Background

Law-related education (LRE), as a specific curricula for elementary and secondary schools, has been found in schools throughout the country since 1975. OJJDP funded LRE since 1984 in response to congressional "earmarks." LRE teaches students about the foundations of our democracy and their responsibilities and rights as citizens. Through LRE, students develop social responsibility, an understanding of the fundamental values of right and wrong, and a commitment to good citizenship. LRE has helped students develop the knowledge, skills, and attitudes necessary to function effectively in our pluralistic, democratic society based upon the rule of law.

LRE is particularly successful as a teaching tool when non-traditional, interactive approaches to learning are used. It encourages students to deal with issues for which there may be no right or wrong answers through discussion, exploration, reflection, role playing or participation in mock trials or courts. Additionally, resource persons from the community are invited into the classroom to share their experiences in the law and to demonstrate how issues can be resolved. These individuals serve as positive role models for students.

In 1990, OJJDP began experimenting with LRE for at-risk youths in a variety of juvenile justice settings through the consortium of grantees implementing the national LRE program in schools. LRE was used in diversion, detention, community-based correctional programs, training schools, and group homes. Interim assessments of this effort suggest positive effects on youths.

Timothy Buzzell, Ph.D., of the Center for Law-Related Education at Drake University, has reported on the findings of his 1991 study of LRE at the Iowa State Training School at El Dora, a secure facility for males between 12 and 18 years of age who have been adjudicated as delinquent. The study examined the effect LRE had on residents of the facility after a period of time. The residents showed an increased attachment to staff, improved attitudes toward pro-social behavior, improved self-concept, improved attitudes towards the law, and greater tolerance of others.

Similarly, a 1991 report conducted by James Giese, Ph.D., of the Social Science Education Consortium of Boulder, Colorado, also found overwhelming evidence of positive contributions of LRE on youths subject to the jurisdiction of the juvenile court. Some of the strong indicators included fewer discipline problems; greater understanding of the rationale for laws; greater empathy; improved attitudes about the legal system; and the ability to see police officers, judges, court workers, and attorneys as "real people." In general, juvenile court judges, administrators, and staff of facilities and programs using LRE with this target population have been extremely supportive of the effort.

Goals: To increase the capability of the juvenile justice system to implement LRE programs for their clientele.

Objectives

- To make the juvenile justice community aware of LRE;
- To develop, adapt, and disseminate LRE curricula and lesson plans specifically designed for youths under the supervision of the juvenile court or juvenile correctional authorities;
- To develop and address "crime victim rights and the impact of crime on individual crime victims and the community;
- To establish one or more demonstration sites using LRE with the target population and to conduct an assessment of its use;
- To provide training and technical assistance to teachers and others in the juvenile justice system on LRE techniques and curricula; and
- To develop an implementation model that can be adapted to the future evaluation of the effect of LRE on targeted youths that is transferable to States or local sites.

VOL 58 ISS 86 MY 6 1993 UMI

Program Strategy

OJJDP is soliciting innovative proposals for this competitive program. It is OJJDP's intention to fund up to two projects that complement one another and that together address the objectives noted above. A mandated program strategy is therefore not stated. However, certain elements of the proposal's project design are necessary to meet the objectives of this solicitation. These mandatory elements are listed below:

- The inclusion of one or more traditional juvenile justice agencies which can be used as a demonstration site or to field-test curricula;
- The inclusion of teaching methods and practices that research has shown to be necessary to a successful LRE program;
- The development and/or inclusion of written curricula that take into account the various reading levels of youths held in juvenile correctional facilities;
- A written statement to cooperatively work with other successful LRE grantees in this program including the OJJDP grantees that comprise the National Training and Dissemination Program; and
- An agreement to work with other successful grantees to design and conduct a conference for interested juvenile justice agencies on the results of this effort near the end of the first project period.

Products

Depending upon which objectives the grantee pursues, written products will include the following:

- LRE curricula developed for or adapted from other curricula and focused on clients of the juvenile justice system;
- Assessment reports of demonstration sites;
- Training, technical assistance, and marketing materials developed during the course of the project period and used for the LRE Conference;
- A detailed description of an implementation model of LRE for juvenile justice settings that can be adapted to formally evaluate LRE with these targeted youths; and
- Quarterly progress reports regarding project activities.

Reference

A manual, Law-Related Education for Juvenile Justice Settings, funded by OJJDP and developed under the National Training and Dissemination Program for Law-Related Education, is available to applicants upon request.

Eligibility Requirements

Applications are invited from public agencies and private organizations that can demonstrate experience in juvenile justice and law-related education and the capability to undertake activities related to at least three of the above objectives. Private-for-profit organizations must agree to waive any profit or fees to be eligible. Pursuant to section 299(e) of the Juvenile Justice and Delinquency Prevention Act Amendments of 1992, the five grantees currently awarded OJJDP funds for LRE are ineligible for these funds.

Selection Criteria

Applications will be rated by a peer review panel on the extent to which they meet the following criteria:

1. The Problem to Be Addressed. (15 Points)

The application clearly identifies the nature and scope of the intervention proposed in this announcement, including skill levels of the target population and the characteristics commonly associated with effective LRE programs.

2. Goals and Objectives. (15 Points)

The applicant provides succinct statements demonstrating an understanding of the objectives and tasks associated with the program. Applicants must address, in detail, a minimum of three of the objectives noted above.

3. Project Design. (25 Points)

The project design is sound and meets the goals and objectives of this program. The design includes a detailed workplan with timelines for each significant project goal.

4. Project Management. (10 Points)

The project's management structure and staffing is adequate to implement and complete the project successfully. The management plan describes a system to handle logistical activities efficiently and economically. Relationships with juvenile justice agencies are formally established in writing.

5. Organizational Capability. (20 Points)

The applicant organization's potential to conduct the project successfully is documented. Organization experience with youths in the juvenile justice system and LRE is highly recommended. Key project staff has significant experience in the subject areas addressed in this announcement.

6. Budget. (15 Points)

The proposed budget is reasonable, allowable, and cost-effective vis-à-vis the activities undertaken.

Award Period

The grantees selected for award will be funded for 12 months.

Award Amount

A total of $420,000 is available for an anticipated two projects to be selected from this solicitation. Individual applications should not exceed $210,000. Additional funding at the end of the award period is dependent upon performance of the grantee, availability of funds, and OJJDP priorities.

Due Date

Applications must be received by mail or delivered to OJJDP by July 8, 1993.

Contact

For further information contact Frank M. Porpotage II, Assistant Director, Training and Technical Assistance Division, (202) 307–5940.

Innovative Approaches in Law-Related Education

Purpose

To develop promising, innovative ideas for the delivery of law-related education.

Background

Law-related education (LRE) was originally designed as a specific curriculum for elementary and secondary schools and has been found throughout the country's schools in various forms since 1975. It has been funded by OJJDP since 1984 in response to congressional "earmarks." LRE teaches students about the foundations of our democracy and their responsibilities and rights as citizens. Through LRE, students develop insights which promote social responsibility, reaffirm the fundamental values of right and wrong, and inspire a commitment to good citizenship. LRE has helped students develop the knowledge, skills, understanding, and attitudes necessary to function effectively in our pluralistic, democratic society based upon the rule of law.

Although substantial federal assistance to LRE has been provided by OJJDP and the U.S. Department of Education, many imaginative and innovative approaches of researchers and practitioners are not always known to OJJDP. Through this program, OJJDP welcomes innovative proposals which address such approaches for efforts that specifically address delinquency prevention.

Goal

To support applications that will advance the practices of law-related education and which support the prevention of delinquency within or outside the classroom.

Objectives

- To promote and support innovative research, development, demonstration or training programs in the field of law-related education;
- To encourage new methods of directing LRE into delinquency prevention either within or outside the traditional classroom setting; and
- To develop knowledge that will lead to new techniques, approaches, or methods to deliver LRE for purposes of preventing delinquency.

Program Strategy

OJJDP is soliciting concept papers addressing the goals and objectives of this competitive program. OJJDP will select the most promising concept papers submitted and invite full applications of ideas relevant to the delivery of LRE in support of delinquency prevention practices. It is OJJDP's intention to fund one or two projects. A mandated program strategy is not stated. However, certain elements of the proposal's project design are necessary to meet the objectives of this solicitation. These mandatory elements are listed below:

- The inclusion of teaching methods and practices that research has shown are necessary to a successful LRE program:

(1) Extensive interaction among students;

(2) Realistic content that includes balanced treatment of case studies and issues;

(3) Use of outside resource persons;

(4) Strong support from educators;

(5) The inclusion or development of curricula that take into account the comprehension levels of the youths involved, including a range of innovative teaching aids; for example, the curriculum may be presented entirely in video format or may use computer technology; and

- A written statement that the grantee will work cooperatively with other LRE grantees in this program including the OJJDP grantees that comprise the National Training and Dissemination Program.

Products

Grantees will be required to submit written products of their activity to OJJDP. Depending upon the project activity, these products could include:

- LRE curricula developed under this project;
- Research findings or assessment reports of demonstrations;
- Training, technical assistance, and marketing materials developed during the course of the project; and
- Quarterly progress reports regarding project activities.

Concept Papers

Interested, eligible parties in this solicitation should submit a concept paper of no more than five double-spaced, type-written pages. The concept paper must address the goals and objectives of this program. OJJDP will select the most promising ideas submitted and invite full applications. Concept papers will be judged by the relevancy of the proposed approach to delinquency prevention practices; a determination of its uniqueness, i.e., an approach differing from those used by current or planned OJJDP projects; and the proposed project design. Those parties not selected will be notified in writing.

Eligibility Requirements

Concept papers are invited from public and private nonprofit agencies, organizations, institutions, and individuals that can demonstrate experience in LRE and the capability to undertake activities related to this solicitation. Private for-profit organizations must waive their profit or fees to be eligible. Pursuant to section 299(e) of the JJDP Act, the five grantees currently awarded OJJDP funds for LRE are ineligible for these funds.

Selection Criteria for Applications

As noted above, OJJDP will invite full applications from the most promising concept papers submitted. Full applications will be rated by a peer review panel on the extent to which they meet the following criteria:

1. Conceptualization of the problem. (15 Points)

The problem addressed by the project is clearly stated and is based upon issues that are relevant to current LRE practices and OJJDP priorities in delinquency prevention.

2. Goals and Objectives. (15 Points)

The applicant provides succinct statements that demonstrate an understanding of the objectives and tasks associated with the project. Objectives are clear and measurable.

3. Project Design. (25 Points)

The project design is sound and constitutes an effective approach to meet the goals and objectives of this program. The design includes a detailed workplan with timelines for each significant goal. The design contains program elements directly linked to the achievement of the project.

4. Project Management. (10 Points)

The project's management structure and staffing is adequate to successfully implement and complete the project. The management plan describes a system whereby logistical activities are handled efficiently and economically. Relationships with cooperating organizations are formally established in writing.

5. Organizational Capability. (20 Points)

The applicant organization's potential to conduct the project successfully is documented. Organizational experience with LRE is highly recommended. Key project staff has significant experience in the subject areas in their proposal.

6. Budget. (15 Points)

The proposed budget is reasonable, allowable, and cost-effective vis-a-vis the activities undertaken.

Award Period

The grantees selected for award will be funded for 12 months.

Award Amount

A total of $200,000 is available for an anticipated two projects selected from this solicitation. Individual applications should not exceed $100,000. Additional funding at the end of the award period is dependent upon performance of the grantee, availability of funds, and OJJDP priorities.

Due Date

Concept papers must be received by mail or delivered to OJJDP by June 7, 1993. OJJDP will review these concept papers and invite selected applicants to submit full applications for competition. OJJDP will notify applicants within fifteen (15) days after the concept paper submission closing date in the **Federal Register**. Full applications must be received by mail or delivered to OJJDP by July 20, 1993.

Contact

For further information contact Frank M. Porpotage II, Assistant Director, Training and Technical Assistance Division, (202) 307–5940.

Hate Crime Study

Purpose

To further knowledge of juvenile hate crimes, including the characteristics of juveniles who commit hate crimes, the characteristics of hate crimes committed by juveniles, and the characteristics of the victims of juvenile hate crimes.

Background

In the United States of America all people, regardless of their race, religion, gender, ethnicity or sexual preference, share equal rights and equal protection

VOL 58 ISS 86 MY 6 1993 UMI

of the law. The number of hate crimes—defined as offenses committed against a person or people because of their ethnicity, gender, race, religion, or sexual orientation with the intention of demeaning, degrading, terrorizing, hurting, or even killing the individual(s)—appear to have increased over the past several years.

The Civil Rights Act of 1964 created the Community Relations Service (CRS) agency within the Department of Justice. CRS provides "assistance to communities and persons therein resolving disputes, disagreements, or difficulties related to discriminatory practices based on race, color, or national origin." From 1989 to 1990, CRS reported that the number of interracial conflict alerts rose from 400 to 546, an increase of 37 percent, while community disorder alerts increased by 17 percent.

Other sources indicate an increase in hate crimes. The National Institute Against Prejudice and Violence in Baltimore, Maryland, reported that ethno-violence on college and university campuses increased each year from 1987 to 1989. In 1987, 42 campuses reported incidents of ethno-violence. That number went up dramatically in 1989 to 103, and to 113 in 1989. The National Gay and Lesbian Task Force Policy Institute has also reported an increase in anti-gay incidents between 1990 to 1992. In Chicago, reports were up six percent; in San Francisco, 11 percent; in New York, 17 percent; in Boston, 42 percent; and in Minneapolis-St. Paul, 202 percent.

In response to growing concern over hate crimes, Congress enacted the Hate Crime Statistics Act, Public Law 101–275, 104 Stat. 140 (28 U.S.C. 534), in 1990. Through this Act, the Department of Justice was directed to "establish guidelines for the collection of such data" relating to hate crimes. In 1991 the Federal Bureau of Investigation began collecting hate crime arrest data as part of the Uniform Crime Reports. This 1991 data reported a total of 4,558 hate crime incidents that involved 4,755 offenses. Of the incidents reported, intimidation accounted for one of three offenses reported. Twelve murders were attributed to hate motivation.

Congress required OJJDP in the 1992 Amendments to the JJDP Act, section 248(b)(7), to conduct a Hate Crime Study and submit a report of the results to the Chairman of the House Committee on Education and Labor and the Chairman of the Senate Committee on the Judiciary concerning the involvement of children and youths in hate crimes

Goal

The long-term goal of this project is to better understand hate crimes in order to develop education aimed at preventing or reducing these offenses. The immediate goals of this research are (1) to assess information currently available regarding juveniles who commit hate crimes, the nature of the crimes they commit, and the nature of their victims; and (2) to assist OJJDP in developing a research strategy to collect efficiently information required by the JJDP Act that is not currently available.

Objectives

Some of the information required by the 1992 Amendments to the JJDP Act is not currently available. From the information that is available, a detailed report will be prepared which will address the characteristics of juveniles who commit hate crimes, the characteristics of hate crimes committed by juveniles, and the characteristics of the victims of hate crimes committed by juveniles.

To produce the remainder of the required information, OJJDP has established the following objectives:

- To identify and analyze the existing Federal, State and independent data sets and research projects that provide information regarding juveniles involved in hate crimes.
- To develop a research design, including the design of a survey instrument(s), to collect the data respond required by Congress.
- To make recommendations to OJJDP on how best to implement the developed research design and data collection strategy.

Program Strategy

OJJDP will select an organization to conduct an assessment of the current knowledge of the criminal justice and juvenile justice fields concerning hate crimes involving juveniles. The grantee must accomplish four major tasks to complete this project:

- TASK I—Definition. Completion of this task will require the development of a working definition of hate crimes and related incidents. This definition should reflect the legislative definitions being developed as well as previous research definitions. These definitions will be known as "operational definitions" for this project. The definition should clarify differences between criminal acts motivated by hate and noncriminal incidents that are intimidating or threatening. The definitions developed should be suitable for designing the following data collection strategies. For other variables regarding perpetrators and victims, standard or common definitions can be used or modified.
- TASK II—Review of the Literature. This will include a review of the current literature available on hate crimes and related incidents. The project should also include a review of all pertinent data and statistics. Sources covered should, at a minimum, include all State and Federal data sources. In addition to these data sources, private organization's databases should be reviewed and critiqued. In analyzing the literature, data, and statistics gathered, the selected organization should answer as many of the following questions concerning juveniles' involvement with hate crimes as possible:

(1) What are the characteristics of juveniles who commit hate crimes? This should include a profile of such juveniles based on their motives for committing hate crimes.

(2) What is the age, sex, race, ethnicity, education level, locality, and family income of such juveniles?

(3) Are juveniles who commit hate crimes familiar with organized groups, or their publications, that encourage the commission of hate crimes, i.e., the Knights of the Klu Klux Klan, Skinheads, etc.?

(4) What are the characteristics of the hate crimes committed by juveniles? Responses to this question should include the following:

(a) The types of hate crimes committed. Are the crimes typically property crimes (vandalism, destruction of property, theft, arson), nonviolent crimes (harassment, telephone misuse, cross burnings), or violent crimes (robbery, assault, murder, or rape)?

(b) The frequency with which institutions and natural persons, separately determined, are the targets of hate crimes;

(c) The number of persons who participated with juveniles in committing such crimes, including both adults and other juveniles;

(d) The types of law enforcement investigations conducted with respect to hate crimes that were committed by or against juveniles;

(e) The law enforcement proceedings commenced against juveniles for committing hate crimes; and

(f) The penalties imposed on juveniles as a result of these proceedings;

(g) What are the characteristics of the victims of hate crimes committed by juveniles? This should include, but not be limited to, common characteristics such as age, sex, race, ethnicity, locality of the victims, and their familiarity with the offender.

(h) What, if any, was the underlying motivation behind the attack? Was the attack planned or spontaneous? Was it a spur-of-the-moment crime done for "thrills"? Gang-related activities should also be included.

(i) To what extent are hate crimes gang-related?

- TASK III—Research Design and Data Collection Strategy. After completing the review of the literature, the grantee should prepare a report on the state of hate crime research. The report should review the current state of data collection projects and the overall quality of the data collected through these efforts. Additionally, the current research should be assessed to determine its goals and objectives and whether it addresses the above questions. A thorough assessment should include a critique of existing or recently completed projects. The methodology and research design of the projects should be reviewed, identifying strengths and weaknesses.
- TASK IV—Research Design and Data Collection Strategy for other Issues. The grantee should make recommendations on how to best obtain the statutorily-required answers to the questions not addressed in current research or in the data and statistics previously gathered. These recommendations should include a research design and data collection strategy. The project's research design and strategy must be developed to address the remaining issues noted above. The design effort must develop an approach that efficiently utilizes existing data collection systems and the strengths and weaknesses of previous projects. Recommendations must address the potential use of the Federal Bureau of Investigation's Hate Crime Statistics and National Incidence Based Reporting System (NIBRS). These data collection systems presently exist without juvenile-specific data on hate crimes. The research design and strategy should use the operational definitions of hate crimes.

The grantee should assemble an advisory board with experts in survey methodology, juvenile justice information systems, hate crime data collection and statistics. These experts should have knowledge regarding database users and suppliers. The advisory board should be integrally involved in each of the project's tasks.

Products

The project will produce two reports:

- An interim report which includes preliminary findings and a literature review. This interim report will provide the findings of the database and data source assessments. The operational definitions developed for the project should be included here as well.
- A final report should be prepared after the completion of the project. This report will incorporate the first and provide the basis for OJJDP's required report to Congress. This report should address the goals and objectives of the project, and the Congressional issues presented in the background section of this solicitation. A detailed response should be given for each objective and question. Furthermore, the results of TASK III (The Research Design and Data Collection Strategy) should be provided in complete detail. The final report should be accompanied by a separate executive summary.

Eligibility Requirements

Applications are invited from public and private nonprofit agencies, organizations, educational institutions, or combinations thereof. In order to expand the pool of eligible candidates, applications will be accepted from for-profit organizations, provided they agree to waive any profit or fee and accept only allowable costs. Applicants must demonstrate knowledge of the civil, criminal, and juvenile justice issues relating to hate crimes and related incidents, as well as knowledge and experience in research methods, design, data collection, and implementation of this type of project. In addition, eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The budget period will be 12 months.

Award Amount

Up to $100,000 has been allocated for this award. One grant will be awarded competitively with a budget period of twelve (12) months for the completion of this project.

Due Date

Applications must be received by mail or delivered to OJJDP by June 21, 1993.

Hate Crime Prevention: A Juvenile Justice Approach

Purpose

To support programs and efforts to prevent and reduce the incidence of hate crimes by juveniles.

Background

According to a 1992 report by the National Institute Against Prejudice and Violence (NIAPV), attacks against people because of their religion, sexual orientation, race, or ethnicity leave deep fractures in the fragile surface of our social structure. Violence and intimidation debilitates the lives of its victims and disrupts the stability of communities. Physical assaults and murder are the most brutal of crimes which include vandalism, arson, verbal harassment, and other aggressive acts.

Alarmingly, studies find the spread of ethno-violence or hate crimes is epidemic. In 1992, it was estimated that over one million college students suffered hate crime attacks. NIAPV estimates that at least ten percent of the U.S. population, or more than 25 million people, are annually victimized by some form of ethno-violence.

A 1987 report by the National Criminal Justice Association also reported that the number of crimes committed each year is unknown because many incidents go unreported, and many others are misclassified. What is obvious, however, is that at least half the people arrested for hate crimes are juveniles or young adults between the ages of 16 and 25. For example, arrest records indicate that 70 percent of hate crimes in New York City during a seven-year period have been charged to youths under 20 years of age.

Verbal intimidation, assault, and vandalism are the most commonly reported forms of hate violence. The data indicate that victims of reported offenses most often are blacks, Hispanics, Southeast Asians, gays and lesbians, and Jews.

A study by NIAPV reported that youth problems are often magnified by the fact that we live in a violent society. Violence as a response to stress, fear, insult, or even the need for recreation seems to become more acceptable with each generation. Educators, social services, and correction workers agree that there is a need to provide education and basic conflict mediation skills for youths as a way of prevention and treatment for offenders. Surveys suggest that criminal justice agencies have not recognized the seriousness of hate crimes among juveniles. Some say that these incidents are seen as juvenile pranks, harmless vandalism, or private

VOL 58 ISS 86 MY 6 1993 UMI

matters between the involved parties. In some instances, criminal justice personnel ignore the hate component of an incident because they feel that a crime is a crime, regardless of motivation.

OJJDP recognizes the need to provide assistance in addressing the prevention and treatment of hate crimes committed by juveniles. This effort will seek to document current educational and treatment efforts and to make this information available to the field in the form of a curriculum that can be used by practitioners.

Goals

- To assist the field in the implementation of programs to prevent hate crimes; and
- To assist the field in the development of effective treatment sanctions as an alternative to incarceration for perpetrators of hate crimes.

Objectives

- To identify and assess existing training and educational curriculum materials;
- To develop a multipurpose curriculum that is appropriate for general educational, institutional, or other placement settings; and
- To develop sentencing options as alternatives to incarceration for perpetrators of juvenile hate crimes.

Program Strategy

OJJDP solicits proposals from applicants to assist in the development of an educational curriculum designed to prevent and offer guidance to youths who commit hate crimes. Applicants should be creative in their implementation approach. The project will cover a one-year budget period. However, the program could expand and develop into a demonstration initiative. OJJDP will base their decision to expand on the results of the "Hate Crime Study" funded under a separate OJJDP initiative. Up to $50,000 is available for this award.

Applicants are to develop their own strategy and budget for achieving the objectives identified in this initiative. The strategy and implementation plan must not exceed one year and must include at a minimum the following tasks:

- The successful applicant will perform a survey to identify and assess the educational programs and curriculum used in the field to educate youths about the events of bias related crimes;
- The successful applicant must prepare a detailed report on the survey and assessment with specific reference to program models which may offer dispositional alternatives for judges who adjudicate juveniles who commit hate crimes; and
- The successful applicant will produce a multipurpose curriculum that is appropriate for educational, institutional, or other placement settings.

OJJDP encourages applicants to identify any other tasks that they can perform which will improve the overall effort and that can be performed during the allowed timeframe with the available funds. The applicant must list and explain activities and the products that will be produced during this initiative.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Products

- The report on the survey and assessment; and
- The multipurpose curriculum.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The program period for this cooperative agreement is one year.

Award Amount

A grant of up to $50,000 will be allocated to the successful applicant.

Due Date

All applications must be received by mail or delivered to OJJDP by June 21, 1993.

Contact

For further information contact Ms. Travis Cain, Program Manager, Special Emphasis Division, (202) 307–5914.

Due Process Advocacy Program Development

Purpose

To develop approaches for improving due process and the quality of representation for juvenile delinquents in the juvenile justice system.

Background

Section 261(a)(3) of the JJDP Act, as amended, states that the Administrator shall make grants for "establishing or supporting advocacy programs and services that encourage the improvement of due process available to juveniles in the juvenile justice system and the quality of legal representation for such juveniles." For several years, OJJDP has supported a successful program to provide court-appointed special advocates for abused and neglected children. However, OJJDP has not funded a program designed to ensure due process and improve the quality of legal representation to alleged or adjudicated noncriminal or criminal-type offenders.

Although the Supreme Court's decisions of In Re Gault, 387 U.S. 1 (1967), and other cases, have established a series of due process rights guaranteed to juvenile offenders, including the right to counsel, these rights are not always made available. For example, studies show that in a majority of cases, juveniles are not represented by counsel at the adjudicatory hearing (Feld, 1988 and 1991). "Moreover, many juveniles who receive out-of-home placement and even secure confinement were adjudicated delinquent and sentenced without the assistance of counsel" (Feld, 1988). In sum, there are major problems with access to and availability of counsel, and even when juveniles are represented, substantial questions are raised about the quality of that representation.

While studies indicate that represented youths fare worse in the system when the ultimate outcome of a case is considered (Feld 1988), these studies do not examine in any detail the quality of the representation received or such factors as the qualifications of the lawyers or whether the lawyers are trained to represent these youths in the juvenile court.

OJJDP believes that strategies to increase access and availability of counsel, the development of effective training for juvenile advocacy, increased emphasis on juvenile law and advocacy courses in law schools, and other strategies will make a difference in the due process protections that juvenile offenders receive. These developments would positively affect the ultimate

dispositions for juvenile offenders that are involved in juvenile misbehavior or criminal activity.

This effort will establish a base for a multiyear program that will improve juvenile offenders' access to legal services and will improve the quality of those services at the preadjudication and adjudicatory points in juvenile justice system proceedings.

OJJDP, through this request for applications, seeks an organization or agency to cooperate with OJJDP to develop a strategy to meet the goals and objectives of this effort. OJJDP will make $100,000 available for the first year and at least that sum for each of two additional years. The task of the applicant(s) is to develop the most cost-effective and comprehensive plan to increase access to legal services and improve the quality of legal services for juvenile offenders. The applicant must detail how it would implement this program, what resources would be used, key staff responsible for the development, and the timeframes for accomplishing the key tasks.

Goals

- To increase juvenile offenders' access to legal services; and
- To improve the quality of preadjudicated, adjudicated, and dispositional advocacy for juvenile offenders.

Objectives

- To develop strategies for a program that can be made available to State and local bar associations and other relevant organizations so they can develop approaches to increase availability of defense counsel;
- To develop comprehensive training materials and a training program that can be delivered through State or local bar associations and other relevant organizations to train lawyers, judges, and others who may assist defense lawyers;
- To test this program in several States and make appropriate adjustments in the materials and training program;
- To develop a marketing or distribution process so that the program can be transferred to State and local bar associations and other relevant organizations; and
- To finalize the training materials and training program and distribute it to State and local bar associations and other relevant organizations.

Program Strategy

OJJDP expects that the program period will be up to three years with initial funding of $100,000 for the first year.

Applicants must provide a comprehensive discussion of the first year's activities that are designed to achieve the goals and objectives of this program and then outline a plan for the succeeding year(s).

Applicants should address how they will develop strategies for increasing availability of defense counsel. Applicants must also discuss how they will creatively address enhancing the quality of representation for juveniles in States and localities.

Applicants must be specific about the tasks they can accomplish in the first year with the available funds. The applicant must list and explain the activities to be accomplished and products to be produced in the first year and provide an overview of the tasks to be accomplished and the products developed for the subsequent year(s).

Applicants must establish an advisory committee which will provide comments and recommendations regarding the strategies, activities, and products for this program.

Products

Applicants should describe what they believe are the most appropriate products to be developed under this initiative to achieve the goals and objectives. Applicants should describe the nature of the products and how they will be used to transfer knowledge to State and local levels and other relevant organizations.

Eligibility Requirements

Applications are invited from public and private non-profit organizations that can demonstrate knowledge of and experience with survey research, training and technical assistance and legal services for juvenile offenders in this country. Joint proposals by two applicants are welcome, provided one organization is designated as the primary applicant and the other as co-applicant. The primary applicant must serve as the fiscal agent for the grant. In addition, eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The program period for the Due Process Advocacy Development program is three years. One cooperative agreement will be awarded with an initial 12-month budget period.

Award Amount

Up to $100,000 has been allocated for the initial award budget period. Support for the remaining two project budget periods will be determined by the performance of the grantee, the program development needs as determined be OJJDP, and the availability of funds.

Due Date

Applications must be received by mail or delivered to OJJDP by July 6, 1993.

Investigative Case Management for Missing Children Homicides

Purpose

The purpose of this project is to improve the investigative procedures in cases of homicides of abducted children.

Background

Approximately 150 murders of abducted, missing children are investigated in the U.S. each year. The investigative procedures for missing child homicides are unique because these children are special, vulnerable, and often targeted victims who have been abducted and killed by unusually dangerous and frequently repeated rapists or killers. The case of a missing child causes the community to put uncommon pressure on law enforcement for a quick, sure solution—especially if the missing incident has suspicious overtones, or the child's body is found. These circumstances, coupled with family and community pressure, can often lead to the use of hasty, unproductive investigative procedures that may hamper, delay, and possibly prevent a successful investigation to find the child or to apprehend the abductor or killer.

Over the past two years the National Center for Missing and Exploited Children (NCMEC), Case Management and Information Analysis Unit, has

VOL 58 ISS 86 MY 6 1993 UMI

received more than 200 child homicide case summaries from local law enforcement agencies on investigations in which missing children have been murdered and a subsequent arrest and conviction has resulted. These 200 cases span ten years, and in most of these cases, NCMEC assisted local authorities and parents to locate the missing child. Local law enforcement authorities have also offered NCMEC information on the investigative techniques of other cases that have not been analyzed. It is anticipated that these two groups of cases will be the ones that are initially analyzed in this effort. There is a recognized need in the field for a tested instructional guide for the investigation of missing children homicides.

The product of this investigative analysis of missing child homicides will be a useful additional tool to the NCMEC's "Investigator's Guide to Missing Child Cases."

Goal

To improve investigative procedures in the murders of abducted children to manage, conduct, and solve individual and serial child murder investigations more effectively and quickly and thereby increase the probability of apprehending the abductor and/or murderer.

Objectives

- To identify and assess the organization of investigative resources, the gathering and examination of evidence, and the use of helpful forensic techniques that will aid the productive investigative procedures of local law enforcement officials;
- To develop an investigative process to determine if two or more children were murdered by the same person(s) in order to enhance the coordination of murder investigations among law enforcement agencies;
- To create a resource management guide for missing child homicide investigations;
- To assist the OJJDP training activities through the National Law Enforcement Training Program (NCMEC) and the Missing and Exploited Children Comprehensive Action Program (M/CAP) to implement a training and technical assistance program for missing child homicide investigations for State and local law enforcement; and
- To develop a national volunteer technical assistance program for local investigations through the NCMEC's Project ALERT (America's Law Enforcement Retiree Team). This program will provide the on-site technical assistance of volunteer veterans to local jurisdictions in child murder investigations. Project ALERT is comprised of a retired veteran law enforcement investigators. NCMEC provides specialized training, travel, and subsistence allowances for these investigators, where their assistance has been requested, to furnish on-site investigative technical assistance in missing children cases, especially where foul play and a homicide may be involved.

Program Strategy

The applicant's initial work task priority over the three-year project period will be to seek out and work with law enforcement and criminal justice organizations throughout the United States to secure their cooperation and investigative case file information on successful abducted and missing child murder investigations.

(1) The first year's activity will be to gather the relevant cases; assemble the case file information into formats for survey and analysis; and, where possible, interview the investigators of the selected cases.

(2) The second major work task will be to analyze the collected information and investigator interviews of approximately 400 case files of successful murder investigations of missing children. The applicant will examine the characteristics of these single or serial child murder investigations that may have contributed to a notable conclusion to the investigative process and determine if two or more murders were committed by the same person(s). These data and their analyses will provide the first rigorous investigative field examination to determine the critical factors that help solve singular and/or serial child or mixed age murder cases and have led to the apprehension, prosecution, and conviction of missing child abductor murderers. The second task (during the second year of the project) will be to develop an investigative information base for subsequent modeling of the investigative techniques. This will be translated into a working draft of the investigative guide.

(3) The third and fourth tasks of the project will start and take place during the latter part of the second year of the project and continue into the third year of the project. These tasks are:

(a) To field test the draft investigative guide through monitoring of selected abduction homicide cases;

(b) With the assistance of OJJDP, through the National Law Enforcement Training Program, NCMEC, M/CAP, and Project ALERT personnel, to replicate the training and use of the investigative techniques developed by the project at a national level.

Products

1. A missing child homicide investigation guide that will include information on how an investigator organizes the vital first steps of an investigation, including the following:

a. An investigator ascertains what information sources should be employed, contacted, requested to assist, when, and in what order;

b. An investigator eliminates clues and evidence that have little chance of providing fruitful investigative results;

c. An investigator best uses and deploys resources assigned to the investigation; and

d. An investigator identifies the most relevant evidence that case experience has shown to be most useful in solving crime.

2. The applicant, after analyzing the cases involved in this investigative analysis project, will develop and provide documented instructional material that will be reviewed, edited, and published by OJJDP through NCMEC for national training and technical assistance purposes.

3. The investigative manual will enable trainers to train Federal, State, and local law enforcement on improved technique for the investigation of missing children homicides.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The program period for the cooperative agreement supporting the Investigative Case Management for Missing Children Homicides program is three (3) years. One cooperative agreement will be awarded with an initial budget period of 12 months.

Award Amount

Up to $150,000 has been allocated for the first budget period of twelve months. Commensurate financial support for the remaining two project budget periods will be determined by the performance of the grantee and program development needs as determined by the Administrator of OJJDP and/or the availability of funds.

Due Date

Applications must be received by mail or delivered to OJJDP by July 6, 1993.

A Study of the Effectiveness of Private Investigators in Locating and Recovering Parentally Abducted Children

Purpose

To study the factors related to employing a private investigator by the searching parent in cases of parentally abducted children.

Background

According to the recent study, "Obstacles to the Recovery and Return of Parentally Abducted Children," sponsored by the OJJDP, a private investigator was employed in less than 30 percent of parental abduction cases. In most cases, a combination of factors motivated the parent to hire a private investigator. First, the parent overwhelmingly desired to do everything possible to recover the missing child. Second, the parent felt dissatisfaction with the local law enforcement efforts. For the searching parent who used a private investigator, the level of satisfaction with this decision varied.

The majority of parents who hired private investigators reported little or no satisfaction with the efforts of the investigators. However, one-third of the parents reported being very satisfied with the investigator's efforts. The study did not reveal the factors that distinguished those satisfied from those not satisfied. Also, the factors that led parents to select one private investigator over another were unclear. Previous research did not report on particular case factors that would have influenced parental decisions to employ a private investigator.

Goals

To provide information on cases of parental abduction in which the searching parent seeks the assistance of a private investigator in locating the missing child.

Objectives

- To identify from a random sample of parental abductions those cases where parents had employed a private investigator to search for the missing child or children;
- To survey missing children clearinghouses, agencies, and related organizations to determine their policies, guidelines, and/or views on the use of private investigators;
- To list the factors parents use in selecting private investigators;
- To identify the characteristics of the parents who have employed private investigators and compare them to those searching parents who have not;
- To identify the circumstances around abduction cases in which a private investigator was employed and those in which one was not; and
- To describe the factors that led the parents to feel satisfaction or dissatisfaction with the performance of private investigators.

Program Strategy

- TASK I. The grantee should review pertinent literature concerning the issue of missing children who were parentally abducted. The grantee should identify missing children agencies or organizations, both private and public at State and Federal levels, that provide services or information in the search for missing children. The literature and advice they provide searching parents should be reviewed to identify recommendations, if any, concerning the use of private investigators. When no such statement exists regarding the use of private investigators, further inquiries should be made to the specific organization to ascertain why.
- TASK II. Task II will require the grantee to draw a sample of missing children cases that involved parental abductions. The sample should be large enough to allow for the study of cases that used private investigators. The demographic information should concentrate on the searching parents. Case information should detail particular events, evidence, and leads in the search for the missing child as well as pertinent characteristics of the abducting parent. Also, parents' data should be collected on the factors that lead to their satisfaction or dissatisfaction with their decision to employ a private investigator.

Products

- An interim report for OJJDP to determine the quality and volume of information available on this issue.
- A final report at the project's end detailing the findings of the project. The final report should include the following:

(1) The review of literature from Task I, including material concerning private investigators that the various missing children agencies distribute;

(2) The factors that influence the use of private investigators and satisfaction or dissatisfaction with them as required in Task II;

(3) The factors, presented in a hierarchy from least to most important with an accompanying narrative explanation, that affect parental satisfaction or dissatisfaction in the employment of private investigators;

(4) The conclusions and recommendations based on the data collected and ensuing analysis concerning the use of private investigators in cases of parentally abducted children;

(5) Other pertinent information not anticipated; and

(6) A separate executive summary.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The budget period will be 12 months.

Award Amount

Up to $100,000 will be awarded for the completion of the project in the 12-month budget period.

Due Date

Applications must be received by mail or delivered to OJJDP by June 21, 1993.

Issues in Resolving Cases of International Parental Abductions of Children

Purpose

To examine the issues and processes, institutional and cultural, encountered by searching parents in international parental child abductions.

Background

Our society has become more mobile and the number of Americans married to people born in other countries has increased in recent years. The problems

VOL 58 ISS 86 MY 6 1993 UMI

encountered by searching parents whose children have been abducted by the children's other parent are compounded by the difficulties of dealing with the multiple legal systems and cultural issues when the abduction is extended to a foreign country. As of this date, 28 countries have adopted the treaty, The Hague Convention on the Civil Aspects of International Child Abduction (Hague Convention), a treaty designed to deter these abductions by assisting with the return of the children and the securing of visitation rights. In 1992, the State Department's Child Custody Division, the United States' central authority under the Hague Convention, handled 664 cases of children taken from the United States to Hague Convention countries. Of these 664 cases, 40 percent resulted in a favorable resolution, i.e., either voluntary or court-ordered return or access; 34 percent remained in process; and 20 percent resulted in no action, either because the child could not be located, the application was withdrawn, or it was determined that the Convention did not apply. Only five percent of the cases resulted in a denial of the request for return or access. The Child Custody Division estimates that when abductions are to non-Convention countries, the success rate is from 20 to 25 percent.

Goal

To provide OJJDP and others with information on the problems encountered by parents residing in the U.S. who seek the recovery of children taken or retained by the other parent across an international border in breach of rights of custody or of access (visitation rights). This information will help OJJDP and others develop approaches and programs to overcome those problems.

Objectives

- To examine the issues and obstacles encountered in the recovery of children when the foreign country is party to the Hague Convention compared to those encountered when the country is not a party to the Convention;
- To assess the effectiveness of the Hague Convention in obtaining the return of parentally abducted children; and
- To assess the problems, the origins of which are not legal, that occur when children are parentally abducted across international borders.

Program Strategy

Through surveys and interviews with families who have had a child abducted to another country, the project will explore: (1) the nature of these cases, (2) the processes by which parents attempt to locate and recover their children, and (3) the difficulties of negotiating with the various systems in both the United States and the country to which the child has been taken. Although legal issues will be examined, the focus of this project will not be limited to legal issues. The study sample should involve a variety of cases, including cases resolved under the Hague Convention, and cases involving non-Hague Convention countries.

An advisory group should be established to provide expert advice on potentially productive lines of investigation and on methodological and practical problems which may be encountered in collecting and analyzing data. The advisory group should be kept small (approximately three) and should be composed of individuals who have demonstrated expertise in the area of international child abductions.

Products

This project will produce a final report which describes the research strategies and methods employed, presents issues and obstacles identified from the data collected, and makes recommendations to solve these problems. A separate executive summary should be included with the final report.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The budget period will be 12 months.

Award Amount

Up to $200,000 has been allocated for the copy of this project in the 12-month budget period.

Due Date

Applications must be received by mail or delivered to OJJDP by June 21, 1993.

Eric Peterson, Research and Program Development Division, (202) 307–5929.

Criminal Justice Response to Parental Abduction Cases

Purpose

This study will assess parental abduction case processing and decision making in the justice system.

Background

Section 404(b)(3) of the JJDP Act, as amended, 42 U.S.C. 5773(b)(3), requires OJJDP to conduct periodic national incidence studies to determine for a given year the actual number of children who are victims of parental kidnapping. In response, the National Incidence Studies of Missing, Abducted, Runaway & Thrownaway Children (NISMART I) estimated that there were 354,100 family abduction cases in 1988 (Finklehor, Hotaling & Sedlak, 1990). Of these cases, 46 percent were serious in that they involved: (1) An attempt to conceal the child or to prevent contact with the child, (2) transportation of the child out of State, or (3) an attempt to keep the child indefinitely or to permanently alter custodial privileges. In one out of ten cases the child was removed from the State. In about one-third of the cases, there was an attempt to conceal the child's whereabouts. The researchers also found that in one-half of family abductions, the caretakers did know where the children were most of the time. Returning the child to proper custody was a greater problem than not knowing the whereabouts of the child.

A recent OJJDP study discusses the significant trauma and long-term distress experienced by the families, left-behind siblings, and children of parental abductions (Center for the Study of Trauma, Families of Missing Children: Psychological Consequences, 1992). Over 57.6 percent of the recovered children experienced symptoms of anxiety, 51.5 percent changes in eating habits, and 42.7 percent experienced nightmares. Another OJJDP study interviewed parents and/or caretakers and found 58 children who were victims of parental abductions, many of which appeared to be serious cases. In 55 percent of the cases, the abducting parent concealed the child; in 42 percent, threatened or demanded something of the complainant parent; and in 21 percent, took the child out of State (Research Triangle Institute, 1992). Interviews with caretakers also revealed that officers took a report nine out of ten times. Seventy-one percent (71%) of the caretakers rated the length of time it took for an officer's initial response as very good or excellent. Fifty-eight percent (58%) of the caretakers rated police efforts to recover their child as very good or excellent.

Parental abductions frequently happen in the context of custody disputes or visitation proceedings and are generally handled by civil courts. However, every State and the District of Columbia has implemented some form of criminal custodial interference statute. Many States have re-classified parental abduction crimes as felonies, and Federal laws mandate a role for law enforcement in the reporting of missing children, including parentally abducted children. Complicating factors, however, may prevent the pursuit of criminal parental abduction charges.

Prior OJJDP funded research identifies several obstacles to the recovery and return of parentally abducted children (Girdner & Hoff, 1992). First, many law enforcement officers are hesitant to "pick up" the child or to accompany a parent to recover a child without clear statutory authority or an order from a court of their State. Second, State laws vary as to whether parental kidnapping is considered a felony or a misdemeanor. In many States, parental abduction becomes a felony only after the child is transported across State lines. Third, in several States, it appears that law enforcement officers allocate a low priority to parental abduction investigations. Finally, training and experience in the location and recovery of parentally abducted children is limited.

The researchers also identify several obstacles to the prosecution of such cases. For instance, the prosecution of parental abduction cases received a low priority within the criminal justice system, and the lack of knowledge of applicable laws and lack of experience on the part of many attorneys and judges emerged as major obstacles.

Current OJJDP efforts regarding parental abduction cases are aimed at developing publications; disseminating informational and training materials to the criminal justice field; providing training for investigators and prosecutors; providing ongoing technical assistance to investigators and prosecutors on specific cases; and developing model sentencing guidelines to inform judges of potentially harmful factors in abduction cases, such as the motivation for the abduction, changing a child's name, keeping a child out of school, and telling a child that the other parent does not want them or is dead.

Even with these cumulative studies and research efforts, there appears to be a lack of knowledge regarding actual case processing and court dispositions. Are parental abductors being arrested? Which parental abduction cases get referred to the district attorney's office? Which cases get prosecuted? And what are the court dispositions of these cases?

This project will track parental abduction cases from their official point of entry into the justice system to disposition and will examine the variations in dispositions of parental abduction cases. Case studies will track cases and perpetrators through initial investigation to case disposition.

Goals

- To provide an examination and description of the justice system processing of parental abduction cases; and
- To identify promising approaches in dealing with parental abduction cases in the justice system.

Objectives

- To provide a synthesis of the most recent research relevant to parental abduction case processing in the justice system;
- To develop a detailed design for conducting a multi-site study of justice system case processing;
- To develop a data collection plan and field-tested instrument;
- To conduct a multi-site study of parental abduction case decision making and processing in the justice system, using the data collection instrument and conducting other data collection activities; and
- To prepare a comprehensive report including results, implications, and descriptions of policies and organizational approaches to handling parental abduction cases.

Program Strategy

Applicants should familiarize themselves with recent OJJDP studies and programs. The applicant should provide the design for the study and detailed criteria for site selection. Applicants must ensure adequate representation of parental abduction cases in their proposed study. The project should be conducted in more than one site and the size of the jurisdictions should vary. The detailed design and site selection will be among the first tasks of the project.

Applicants should provide a discussion of research questions which will serve as a basis for the data collection instrument. Issues to consider include a comparison of cases in the criminal justice system with cases handled in the civil justice system; the proportion and characteristics of cases referred to the district attorney's office; the proportion and characteristics of cases receiving sentences; the proportion of cases mediated and/or diverted from the justice system; and the proportion of cases involving physical and/or sexual abuse.

Parental abduction cases will be tracked during the 30-month project to gain an understanding of the processes, decisions, dispositions of cases, and the factors in cases that affect these decisions, including the length of the abduction, primary motivation for the abduction, and allegations of child abuse, and organizational structure and resources for handling these cases. Interviews will be conducted with justice system professionals to understand and describe each site's policies and programs.

The project should investigate the various stages of the process, including initial contact, police screening, referrals for prosecution, diversion, court proceedings, court dismissals, pleas, trials, acquittals, sentencing and final disposition. The project should address issues such as the relationship between local and Federal law enforcement, the amount of information lost in case processing, and the degree of agreement on a case between police and prosecutor. The project should emphasize both felony and misdemeanor parental abduction cases, and should also identify promising approaches to handling parental abduction cases.

The project also calls for a project advisory board comprised of at least three outside experts in the field of parental abductions. Members of the advisory board will provide both substantive and technical advice in the areas of parental abductions and research methodology. The selection of advisory board members will be coordinated with and approved by OJJDP.

Products

- Summary of recent research and literature. The grantee will provide a synthesis of the most recent research and literature relevant to parental abduction case processing in the justice system.
- Revised workplan. Initially, a detailed workplan should be submitted in the application, describing the project's methodology, activities, timetable for completion of tasks and activities, milestones, and products. As a product of the grant award, the grantee must submit a revised workplan which addresses all program objectives and activities and which reflects the input of OJJDP and the advisory board members. Included in the revised workplan should be a publication and dissemination strategy, outlining the

VOL
58
ISS
86
MY
6
1993
UMI

products to be published and their respective audience.

• Data collection plan and instrument.

• Case studies. Case studies from each site will include an analysis of case processing and decision making, conclusions, and recommendations for processing parental abduction cases.

• Article for publication. The grantee will provide an article-length summary of the project's results, suitable for OJJDP publication, that informs policymakers, professionals, and researchers.

• Draft final report. The report will contain an the synthesis of literature, a detailed summary of the work undertaken during the course of the project, and a separate executive summary.

• Final report. In the final report, the grantee will incorporate modifications recommended by OJJDP and the project advisors, as appropriate.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the **SUPPLEMENTARY INFORMATION** section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the **SUPPLEMENTARY INFORMATION** section of this Notice.

Award Period

The project will be funded for a 24-month project period.

Award Amount

The award amount will not exceed $450,000 for the entire project period (24 months).

Due Date

Applications must be received by mail or delivered to OJJDP by June 21, 1993.

Pam Cammarata, Research and Program Development Division, (202) 307–5929.

Missing Children's Field-Initiated Program

Purpose

Through the Field-Initiated Program, OJJDP encourages eligible parties to develop promising, new ideas relevant to the mission of OJJDP's Missing and Exploited Children's Program. These ideas may include either a research, a demonstration, or training programs.

Background

Customarily, the Missing Children's Program has sponsored initiatives that were either mandated by Congress or by agency priorities. In both cases, applicants were limited to proposals which responded to specific requests by OJJDP. Thus, other imaginative and innovative approaches of researchers and practitioners were not presented to OJJDP. Through the Field-Initiated Program, OJJDP welcomes concept papers which address but are not limited to the Missing and Exploited Children's Program priority areas authorized in section 405(a) of the JJDP Act, as amended, 42 U.S.C. 5775(a). Eligible projects in these areas may include either a research, a demonstration, or a training program designed with the following goals:

• To determine what impact family violence has on custody decisions and noncustodial parental abductions;

• To address the needs of missing children taken into protective custody by social service agencies, including options for the successful resolution of these cases;

• To increase knowledge and develop effective intervention and investigation practices with respect to allegations of child abuse in parental abduction cases;

• To study the methodology and typology of parents who abduct their children as well as the family members and friends who assist them;

• To increase knowledge and develop public service announcements for media aimed at public education and awareness of the psychological and legal consequences of parental abduction;

• To support secondary analyses of existing missing children databases; and

• Any other issues within the scope of section 405(a) of the JJDP Act.

Goal

To seek innovative concept papers from researchers and practitioners relevant to, and not already required by, the current Missing and Exploited Children's Program plan.

Objectives

• To promote and support either a research, a demonstration, or a training program which address innovative approaches toward improving existing practices and policies related to activities identified in Section 405(a) of the Missing Children's Act;

• To encourage new methods for dealing with the current priority problems; and

• To develop knowledge that will lead to new techniques, approaches, and methods addressing the problems of missing and exploited children, and the prevention and deterrence of abduction and sexual exploitation.

Program Strategy

The Field-Initiated Program solicits innovative concept papers that define the needs and/or problems of missing children, and describe the objectives, strategy, and methodology to be employed. OJJDP will select the most promising concept papers submitted and invite full applications for competition.

Applicants should submit a concept paper of no more than ten (10) double-spaced, typed pages.

Products

The applicant must provide detailed information on the specific products which will result from the research, the demonstration, or the training program described in their concept paper.

Eligibility Requirements

Eligible applicants must meet the requirements stipulated in the Supplementary Information section of this Notice.

Selection Criteria

Applicants will be evaluated according to the selection criteria outlined in the Supplementary Information section of this Notice.

Award Period

The grant period will be up to 18 months.

Award Amount

The total amount available is $300,000. Application budgets should not exceed $100,000. Award amounts will be subject to negotiation.

Due Date

Concept papers must be received by mail or delivered to OJJDP by June 7, 1993. OJJDP will notify selected applicants within fifteen (15) days of the receipt of the concept paper. OJJDP will invite only these selected applicants to submit full applications for competition. The full application must be received by mail or delivered to OJJDP by July 20 1993.

Contact

DEPARTMENT OF COMMERCE

Economic Development Administration

[Docket No. 930495-3095]

Economic Adjustment Assistance as Described in Public Law 102-484, Section 4305 of Division D—National Defense Authorization Act for Fiscal Year 1993; Availability of Funds

AGENCY: Economic Development Administration (EDA), Department of Commerce (DOC).

ACTION: Supplementary notice.

SUMMARY: The Economic Development Administration (EDA) announces the policies and application procedures for funds available beginning in FY 1993 to support economic adjustment assistance programs and projects designed to assist substantially and seriously affected communities to facilitate their orderly transition from economic reliance on Department of Defense (DOD) spending to economic reliance on other sources of business, employment and revenue.

FOR FURTHER INFORMATION CONTACT: The appropriate EDA Regional Office or the Director, Economic Adjustment Division, Economic Adjustment Division, Economic Development Administration, room 7327, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 482-2659.

SUPPLEMENTARY INFORMATION:

Funding Availability

Funds in the amount of $80.0 million are available for this program and shall remain available until September 30, 1994.

Note: EDA announced in the **Federal Register** of March 10, 1992 (57 FR 8544), the availability of $50.0 million for defense adjustment, such funds to remain available until obligated and expended. The Application Procedures in this notice supersede the Special Application Procedures set forth in the Notice of March 10, 1992, and apply to the unobligated balance of those original funds as well as the additional $80.0 million covered herein.

Funding Instrument

Funds will be awarded through grants under the Sudden and Severe Economic Dislocation (SSED) program under title IX of the Public Works and Economic Development Act of 1965, as amended (Pub. L. 89-136). Application procedures, competitive selection criteria and post approval project implementation information for the SSED program are applicable to the awards of this supplemental defense adjustment assistance and are described in Part IV, of the **Federal Register** of January 11, 1993 (58 FR 3800), notice of Availability of Funds for FY 1993.

Eligible Applicants

Eligible applicants include a redevelopment area or economic development district established under title IV of the Public Works and Economic Development Act, 42 U.S.C. 3161; an Indian tribe, state, city or other political subdivision of a state or a consortium of such political subdivisions; a Community Development Corporation defined in the Community Economic Development Act, 42 U.S.C. 9801; a nonprofit organization determined by EDA to be the representative of a redevelopment area; the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, Guam, Puerto Rico, the Republic of the Marshall Islands, and the Virgin Islands.

All applications for the defense adjustment funds described in this Supplemental Notice must respond to a defense-related economic dislocation satisfying the criteria of A or B as follows:

A. DOD Criteria

(1) In the case of a proposed or actual establishment, realignment, or closure of a military installation, where the Secretary of Defense determines that such action is likely to have a direct and significantly adverse consequence on the affected community.

(2) In the case of a publicly announced planned reduction in DOD spending, the cancellation or termination of a DOD contract, or the failure to proceed with a previously approved major defense acquisition program, assistance may be provided only if the reduction, cancellation, termination, or failure will have a direct and significant adverse impact on a community and will result in the loss of the lesser of:

(A) 2,500 or more employee positions, in the case of a Metropolitan Statistical Area (MSA) or similar area (as defined by the Director of the Office of Management and Budget);

(B) 1,000 or more employee positions, in the case of a labor market area outside of an MSA; or

(C) One percent of the total number of civilian jobs in that area.

B. EDA Sudden and Severe Economic Dislocation Criteria

The dislocation must satisfy one of the following criteria provided that in exceptional circumstances, the criteria may be partially waived by the Assistant Secretary for Economic Development:

1. For areas not in MSAs:

(a) If the unemployment rate of the Labor Market Area exceeds the national average, the dislocation must amount to the lesser of two (2.0) percent of the employed population, or 500 direct jobs.

(b) If the unemployment rate of the Labor Market Area is equal to or less than the national average, the dislocation must amount to the lesser of four (4.0) percent of the employed population, or 1,000 direct jobs.

2. For areas within MSAs:

(a) If the unemployment rate of the MSA exceeds the national average, the dislocation must amount to the lesser of one-half (0.5) percent of the employed population, or 4,000 direct jobs.

(b) If the unemployment rate of the MSA is equal to or less than the national average, the dislocation must amount to the lesser of one (1.0) percent of the employed population, or 8,000 direct jobs.

In addition, fifty (50) percent of the job loss threshold must result from the action of a single employer, or eighty (80) percent of the job loss threshold must occur in a single standard industry classification (i.e., two digit SIC code). Actual dislocations must have occurred within one year and threatened dislocations must be anticipated to occur within two years of the date EDA is contacted.

Selection Criteria

See Part IV of the January 11, 1993 **Federal Register** Notice of Availability of Funds (58 FR 3800, 3808).

Application Procedures

Proposals for economic adjustment assistance authorized under section 4103(b) of Division D of Public Law 101-510 ($50 million), or section 4305 of Division D of Public Law 102-484 ($80 million), will be submitted to EDA. Interested parties should contact the Economic Development Representative for the area or the appropriate EDA regional office [see Section X of Part IV, of the January 11, 1993, **Federal Register** notice, 58 FR 3800] for a proposal package. Following a review of project proposals, EDA will invite those projects selected for funding consideration to submit applications. It should be noted that an invitation to apply does not assure funding. All awards are subject to the availability of funds. The application will include an ED-540, as approved by the Office of Management and Budget Control No. 0610-0058.

Dated: April 30, 1993.

Craig M. Smith,

Acting Assistant Secretary for Economic Development.

Office of Management and Budget

Budget Rescissions and Deferrals; Notice

VOL 58 ISS 86 MY 6 1993 UMI

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

To The Congress of The United States:

In accordance with the Congressional Budget and Impoundment Control Act of 1974, I herewith report one proposed rescission in budget authority, totaling $180.0 million, and one revised deferral of budget authority, totaling $7.3 million.

The proposed rescission affects the Board for International Broadcasting. The deferral affects the Department of Health and Human Services. The details of the proposed rescission and the revised deferral are contained in the attached reports.

William J. Clinton

The White House,
April 20, 1993.

BILLING CODE 3110-01-M

Rescission Proposal No. R93-1

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

AGENCY: Board for International Broadcasting	New budget authority..... $ _____
BUREAU:	Other budgetary resources.. $ 193,400,000
Appropriation title and symbol: Israel Relay Station 95X1146	Total budgetary resources... $ 193,400,000
	Amount proposed for rescission.....$ 180,000,000
OMB identification code: 95-1146-0-1-154	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other _____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multi-year: _____ (expiration date) ☒ No-Year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other _____

JUSTIFICATION: Funds in this account were provided for the construction of a new radio relay station in Israel. This proposal reflects the cancellation of the joint Board for International Broadcasting and Voice of America transmitter project in Israel. Funding in FY 1993 for a less costly, substitute project in Kuwait is requested in the FY 1994 Budget. The amount proposed for rescission is net of estimated termination costs.

ESTIMATED PROGRAM EFFECT: None

OUTLAY EFFECT: (in thousands of dollars):

Deferral No. D93-6A

Supplemental Report
Report Pursuant to Section 1014(c) of Public Law 93-344

This report updates Deferral No. D93-6, which was transmitted to Congress on October 1, 1992.

This revision increases by $49,543 the previous deferral of $7,267,051 in the Department of Health and Human Services, resulting in a total deferral of $7,316,594. The increase reflects recoveries of prior year obligations.

Reader Aids

VOL 58 ISS 86 MY 6 1993 UMI

Deferral No. 93–6A

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93–344

AGENCY: Department of Health and Human Services	New budget authority.....
BUREAU: Social Security Administration	Other budgetary resources..... *$ 16,265,761
Appropriation title and symbol: Limitation on administrative expenses 1/ 75X8704	Total budgetary resources..... *$ 16,265,761
	Amount to be deferred: Part of year.....
	Entire year..... *$ 7,316,594
OMB identification code: 20–8007–0–7–651	Legal authority (in addition to sec. 1013): [X] Antideficiency Act
Grant program: [ ] Yes [X] No	[ ] Other
Type of account or fund: [ ] Annual [ ] Multi–year: (expiration date) [X] No–Year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other

JUSTIFICATION: This account contains the no–year funds appropriated to the Social Security Administration (SSA) for construction and renovation of SSA facilities, and for Information Technology Systems (ITS). It has been determined that obligational authority for construction projects in the amount of this deferral is not currently needed. Should new requirements arise, subsequent apportionments will reduce this deferral. This action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: None

Outlay Effect: None

1/ This account was the subject of a similar deferral in FY 1992 (D92–5).

* Revised from the previous report.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

S. 326/P.L. 103–25

To revise the boundaries of the George Washington Birthplace National Monument, and for other purposes. (May 3, 1993; 107 Stat. 68; 2 pages)

S. 328/P.L. 103–26

To provide for the rehabilitation of historic structures within the Sandy Hook Unit of Gateway National Recreation Area in the State of New Jersey, and for other purposes. (May 3, 1993; 107 Stat. 70; 2 pages)

S.J. Res. 30/P.L. 103–27

To designate the weeks of April 25 through May 2, 1993, and April 10 through 17, 1994, as "Jewish Heritage Week". (May 3, 1993; 107 Stat. 72; 2 pages)

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 12 and June 15 at 9:00 am
WHERE: Office of the Federal Register, 7th Floor Conference Room, 800 North Capitol Street NW, Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

PHILADELPHIA, PA

WHEN: May 25, at 1:00 pm
WHERE: William J. Green, Jr. Federal Building, Conference Room 6306–10, 600 Arch St. Philadelphia, PA
RESERVATIONS: Federal Information Center 1–800–347–1997

Rules and Regulations

Federal Register
Vol. 58, No. 87
Friday, May 7, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 184

[Docket No. 89G–0384]

Direct Food Substances Affirmed as Generally Recognized as Safe; Chymosin Enzyme Preparation Derived From Aspergillus Niger Van Tieghem Variety Awamori (Nakazawa) Al-Musallam

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations to affirm that the use of chymosin preparation derived by fermentation from genetically modified *Aspergillus niger* van Tieghem variety *awamori* (Nakazawa) Al-Musallam (*A. niger* var. *awamori*) is generally recognized as safe (GRAS). This action is in response to a petition filed by Genencor, Inc., now Genencor International, Inc.

EFFECTIVE DATE: May 7, 1993.

FOR FURTHER INFORMATION CONTACT: Vincent E. Zenger, Center for Food Safety and Applied Nutrition (HFS–206), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–254–9523.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the procedures described in § 170.35 (21 CFR 170.35), Genencor International, Inc. (Genencor), previously known as Genencor, Inc., 180 Kimball Way, South San Francisco, CA 94080, submitted a petition (GRASP 9G0352) requesting that its chymosin preparation (referred to as "chymosin" in the notice of filing of the Genencor petition that FDA published in the **Federal Register** of October 4, 1989 (54 FR 40910)) be affirmed as GRAS as a direct human food ingredient. Genencor's chymosin preparation is derived from the fermentation of genetically modified *A. niger* var. *awamori*. Chymosin is the principal enzyme in rennet, a GRAS food ingredient that is used for its milk-clotting activity and that is primarily responsible for that activity. Chymosin preparation is intended for use as a substitute for rennet.

To avoid confusion between chymosin, the enzyme, and the chymosin-containing enzyme preparation (in which chymosin is the principal active component, but which may also contain impurities), this document will henceforth use the terms "chymosin" to refer to the enzyme and "chymosin preparation" to refer to the fermentation-derived chymosin enzyme preparation.

In the October 4, 1989, notice of filing, FDA gave interested parties an opportunity to submit comments concerning the subject chymosin preparation to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857. FDA received three comments in response to the notice of filing. One of the comments offered a general opinion on the regulation of biotechnology-derived food ingredients, and the second expressed support for approval of the petition. Neither of these comments contained information relevant to the safety, functionality, environmental impact, or GRAS status of the food use of the chymosin preparation. The third comment, however, raised two issues that concern the evaluation of the chymosin preparation: (1) Whether the petitioner has incorrectly identified the host organism *A. niger* var. *awamori*; and (2) whether, because 10 percent of Genencor's chymosin is glycosylated, the safety of the glycosylated material itself must be evaluated on its own merit. The agency's evaluation of these issues is discussed later in this document.

II. Standards For GRAS Affirmation

Pursuant to § 170.30 (21 CFR 170.30), general recognition of safety may be based only on the views of experts qualified by scientific training and experience to evaluate the safety of substances. The basis of such views may be either: (1) Scientific procedures; or (2) in the case of a substance used in food prior to January 1, 1958, experience based on common use in food. General recognition of safety based upon scientific procedures requires the same quantity and quality of scientific evidence as is required to obtain approval of a food additive regulation and ordinarily is to be based upon published studies, which may be corroborated by unpublished studies and other data and information (§ 170.30(b)). As shown below, FDA has evaluated Genencor's petition on the basis of scientific procedures to establish that the petitioned chymosin preparation is GRAS.

Rennet is an animal-derived enzyme preparation that is GRAS as specified in § 184.1685 (21 CFR 184.1685). Therefore, if published information shows that the principal active component of the chymosin preparation is the same as that of rennet, and that the other components (i.e., impurities) of the chymosin preparation, which may differ from the other components (i.e., impurities) of rennet, do not render the use of the substance unsafe, then the chymosin preparation derived from *A. niger* var. *awamori* would present no more safety concern than rennet. In such circumstances, FDA can affirm the chymosin preparation derived from *A. niger* var. *awamori* as GRAS for use as a replacement for rennet.

III. Safety

A. Introduction

Chymosin, also known as rennin, is the principal milk-clotting enzyme present in rennet (Ref. 1). Rennet is an enzyme preparation that will clot milk, forming it into curds and whey (Refs. 1 and 2). It is used to make cheese and other dairy products. Rennet has a long and extensive history of safe use in food and has been affirmed by FDA as GRAS in § 184.1685 (48 FR 51151, November 7, 1983).

Food-grade rennet is an enzyme preparation that is isolated from the fourth stomach of calves, kids, or lambs. Commercially, it is generally derived by aqueous extraction from the fourth stomach of unweaned calves. The aqueous extraction step is followed by purification steps and an acidification step to cleave prochymosin (the inactive

VOL 58 ISS 87 MY 7 1993 UMI

precursor of chymosin) in rennet into chymosin (Ref. 1).

There are two predominant forms of calf chymosin, chymosin A and chymosin B (Ref. 1). Foltmann et al. have shown that chymosin A and chymosin B differ by a single amino acid (Ref. 3). In this document, the term "chymosin" refers to either, or both, chymosin A and chymosin B.

Techniques developed in the early 1970's (frequently termed "recombinant DNA technology" or "cloning techniques") enable scientists to locate and to obtain a segment of deoxyribonucleic acid (DNA) containing a gene of interest. Scientists are also able to move that DNA segment into a vector (a DNA molecule that is easy to manipulate) and then introduce that segment into a new host organism where the segment can be correctly expressed (that is, produce the protein that it would have produced in the original organism). These techniques are well-known to molecular biologists (Refs. 4 and 5).

B. The Chymosin Component

Using cloning techniques, scientists in a number of different laboratories have identified the gene in the calf from which the chymosin in rennet is produced, i.e., the prochymosin gene (Refs. 6 through 8). Scientists have moved the calf prochymosin gene into *A. niger* var. *awamori* (Refs. 9 through 12) as well as into other microorganisms (Refs. 6 through 8 and 13 through 17).

These scientists have used a variety of techniques to demonstrate that they have cloned full-length copies of the correct gene. Such techniques include: (1) DNA sequencing, whereby the cloned putative prochymosin gene was shown to have the nucleotide sequence that encodes the amino acid sequence of prochymosin (Refs. 6 through 8); (2) nucleic acid hybridization, whereby the cloned DNA fragments or the ribonucleic acid (RNA) molecules transcribed from the DNA fragments were shown to hybridize (i.e., specifically bind) with complementary DNA in the prochymosin gene (Refs. 7, 8, and 13 through 16); and (3) physical mapping, whereby the cloned DNA segments were shown to be large enough to contain the prochymosin gene and, when digested with appropriate DNA-cutting enzymes and the resulting DNA fragments separated by size, were shown to yield the pattern of DNA fragments expected for the prochymosin gene (Refs. 7, 8, and 13 through 17).

The published evidence establishes that the new host organisms are able to use the prochymosin gene to produce prochymosin that has the same molecular weight as prochymosin found in calf rennet (Refs. 11 through 15 and 17 through 19). This evidence also establishes that the prochymosin that is produced (cloned prochymosin) can be cleaved into chymosin (cloned chymosin) that has the same molecular weight and the same functional activity as chymosin found in calf rennet (Refs. 11, 13, 14, and 16 through 19).

A number of techniques have been used to demonstrate that the chymosin produced by *A. niger* var. *awamori* is equivalent to calf chymosin, including: (1) Reaction with antibodies to calf chymosin, (2) amino acid composition analysis, (3) amino acid sequencing, and (4) specific activity determination (Refs. 9 through 12). The molecular weight of chymosin was determined, using sodium dodecyl sulfate polyacrylamide gel electrophoresis and tricine-sodium dodecyl sulfate polyacrylamide gel electrophoresis, techniques that enable one to determine the comparative molecular weight of proteins, based on their rate of migration through the gels. Cloned chymosin was found to migrate through these gels at the same rate as the chymosin found in rennet (Refs. 9 and 11), except for a minor band representing 10 percent of the molecules that are glycosylated (see discussion below) and that have a slightly higher molecular weight.

The functional activity of chymosin that was measured was milk-clotting activity. Cloned chymosin was found to clot milk at the same rate as the chymosin in rennet under various temperatures, salt concentrations, and pH conditions (Refs. 11 and 13 through 21).

One of the comments FDA received in response to the **Federal Register** notice announcing the filing of the GRAS petition (54 FR 40910) questioned whether the fact that about 10 percent of chymosin produced by *A. niger* var. *awamori* is glycosylated presents any threat to human safety. The comment urged FDA to give careful consideration to the glycosylation issue. However, the comment did not present any information on the nature of any adverse effect that might result from the ingestion of a small amount of this glycosylated enzyme. In fact, a variety of proteins, including many glycosylated protein enzymes, are present in foods that have been safely consumed for many years (Ref. 22 through 24). For example, chymosin derived from lamb, which has been affirmed as GRAS (§ 184.1685), is a glycosylated enzyme (Ref. 25), as are other milk-clotting enzymes listed in FDA regulations (§ 173.150). Therefore, the agency finds that glycosylation of a small proportion of an enzyme does not per se raise any safety concerns. Such a conclusion is consistent with current scientific thinking that enzymes that are substantially similar to proteins known to be safely consumed (including minor variations in structure such as glycosylation) do not raise new safety concerns (see, for example, Ref. 26).

Based on the fact that published information demonstrates that chymosin produced from the cloned chymosin gene has the same molecular weight and the same functional activity as the chymosin derived from calves, FDA concludes that the chymosin enzyme in the chymosin preparation is equivalent to the chymosin enzyme in calf rennet. Therefore, FDA concludes that the chymosin enzyme in the chymosin preparation is as safe as the chymosin enzyme in rennet.

Moreover, corroborative evidence of the safety of the petitioned chymosin enzyme preparation, including glycosylated chymosin, is provided by the results of a feeding study conducted by the petitioner. In that study, described later in this document, no adverse effects attributable to consumption of the enzyme preparation were noted.

C. Sources of Impurities

Enzyme preparations used in food processing are usually not chemically pure, but contain extraneous source (cellular) and processing material. The nature and amounts of these materials in the finished enzyme preparation depend on the organism from which the enzyme is produced (i.e., the source or production organism), the fermentation materials and methods used to grow the production organism, and the materials and methods used to generate the finished enzyme preparation.

Both the source material and the manufacturing methods for producing the chymosin preparation differ from those used to produce animal rennet. Therefore, the impurities in the chymosin preparation will differ from those in rennet. The question thus is whether the source material or manufacturing methods for the chymosin preparation will introduce impurities that would raise concerns about the safety of the preparation.

1. Processing steps

Researchers in several laboratories have published papers containing descriptions of methods that they used for producing chymosin preparations from microorganisms containing the calf prochymosin gene (Refs. 13 through 19 and 27 through 30). The enzyme that is the subject of this petition is secreted

from the production organism during fermentation and, therefore, is an extracellular enzyme product. Thus, it is not necessary to disrupt the cells to recover the enzyme. Extracellular enzymes account for approximately three-fourths of the market for fermentation-derived enzymes, and the techniques for their production and processing are well-known (Refs. 31 and 32). The processing methods developed by Genencor and described in this petition and in the published literature (Refs. 29 and 30) do not differ in any significant way from the published methods generally used to produce extracellular enzymes. The key steps described by Genencor are summarized below.

A. niger.var. *awamori* is grown in liquid nutrient medium until the desired activity of chymosin is reached. The broth is then treated with acid to interrupt the fermentation and kill the cells of the production organism. The acid treatment step also degrades any DNA which may be present in the broth. The broth is filtered, which removes the cell material from the chymosin-containing filtrate. Chymosin is then recovered from the filtrate, using one of two methods. In one method, the filtrate is passed through a chromatography column. Chymosin binds to the chromatographic resin while impurities pass through the column. Chymosin is then eluted from the column with an appropriate solution. In another method, chymosin is extracted from the filtrate and purified by ion exchange chromatography. Chymosin recovered by either method is formulated to the desired strength and sterilized by filtration.

FDA finds that the manufacturing method described does not require the use of any processing materials that are not GRAS or are not approved food additives. Accordingly, the agency is specifying in the amended regulation that the substance being affirmed as GRAS is one that is produced using only processing materials that are GRAS substances or food additives approved for use in this type of process.

Therefore, the agency concludes that the manufacturing steps will not introduce impurities into the enzyme preparation that will adversely affect the safety of the preparation.

2. Production organism

The petitioner presented information that the source for the chymosin enzyme preparation that is the subject of this petition is the production organism "*Aspergillus niger* var. *awamori*." The full proper name of this organism is *Aspergillus niger* van Tieghem variety *awamori* (Nakazawa) Al-Musallam. To identify clearly the source organism that has been evaluated in this review, the agency will use the full proper name in the regulation set forth below. However, for simplicity, the organism is referred to as *A. niger* var. *awamori* in the preamble of this document. The agency notes that the organism is also referred to as *Aspergillus awamori* Nakazawa (*Aspergillus awamori*).

One of the comments received in response to the filing notice stated that the name *A. niger* var. *awamori* incorrectly identifies the production organism. The comment contended that characterizing the production organism as a variety of *A. niger* implies that the production organism has a history of safe use in producing enzymes for use in food, when in fact it should be characterized as a distinct species, *A. awamori*, which species has no such history.

FDA notes that it is relying on scientific procedures, and not on history of safe use, as a basis for affirming the general recognition of safety of Genencor's chymosin preparation. In reviewing the petition, FDA evaluated whether the production organism is adequately identified and whether the scientific information that supports safety pertains to the production organism. In its evaluation, FDA relied on information that refers to the production organism and did not rely on information regarding other members of the genus *Aspergillus*.

The taxonomic placement and name of an organism mey change as a result of scientific advances. This is especially true for organisms such as *A. niger* var. *awamori* whose taxonomic placement is based on highly variable characteristics such as colony color (Refs. 33 and 34). If internationally accepted rules of nomenclature are followed, changes in the taxonomic placement of an organism should not affect the ability to identify scientific references to the organism of interest, including scientific references to its toxigenicity, pathogenicity, or use in the production of food or enzymes.

The production organism for this enzyme preparation is a fungus. FDA notes that the proper naming of fungi should follow the internationally accepted rules of nomenclature used for plants (Ref. 36). Proper scientific reference to a fungal species is done with its Latin binomial, representing the genus in which the species has been placed and the specific epithet; the name the Latin binomial of the author who introduced the specific epithet should follow. If a species has been moved in its taxonomic placement, the Latin binomial may be followed by the name of the author who made the original type description in parenthesis, followed by the name of the author of the current combination of generic and specific epithet. Proper use of nomenclature allows references to a particular organism to be followed historically in the scientific literature.

The organism referred to by the petitioner as *A. niger* var. *awamori* was first described in 1907 and was named *Aspergillus awamori* Nakazawa. Since the original description, authoritative texts have continued to refer to *A. awamori* as a distinct species (Refs. 36 through 38). However, this organism, along with many others in the genus *Aspergillus*, has been reclassified. A monograph on the taxonomy of the black *Aspergilli* was published in 1980. In that monograph, based on an analysis of 28 taxonomic characteristics, Al-Musallam (Ref. 33) reclassified the production organism as *Aspergillus niger* van Tieghem variety *awamori* (Nakazawa) Al-Musallam. More recent molecular analytical approaches to taxonomy, including DNA restriction fragment length polymorphism analysis, have confirmed this taxonomic placement (Refs. 34 and 39). Genencor also submitted evidence that this taxonomic placement is recognized by experts in the field (Ref. 40).

In evaluating published information, FDA recognized that prior to 1980, the production organism was referred to as *A. awamori* and occasionally as *A. niger* type *awamori*, and that literature published prior to 1980 uses these names when referring to the production organism. Literature published after 1980 may refer to the production organism as *A. niger* var. *awamori* or one of its synonyms, for example, *A. awamori* Nakazawa. Based on an analysis of the data submitted, FDA finds sufficient evidence to support the identification of the petitioner's production organism as *Aspergillus niger* van Tieghem variety *awamori* (Nakazawa) Al-Musallam (synonym *Aspergillus awamori* Nakazawa), and further concludes that the references relied on by the agency pertain to the production organism.

The petitioner provided published information documenting that the production organism has been safely used in a variety of food and food enzyme applications. These data provide a context for FDA's safety evaluation, and are useful in determining what quantity of data are necessary to establish the safety of the organism. *A. niger* var. *awamori* (referred to in these references as *A. awamori*) has been identified and isolated from the starter cultures used to

VOL 58 ISS 87 MY 7 1993 UMI

produce several types of fermented rice alcoholic products (Refs. 38 and 41 through 47) and has also been used in making other fermented food products. Reed (Ref. 48) reports its use in sorghum fermentations and in brewing. It is cited in patents for making Worcester sauce (Ref. 43) and making "mirin," which can be used as a seasoning or dark liquor (Ref. 44). It has also been referenced as the production organism for citric acid produced by fermentation (Refs. 49 and 50).

There are numerous references in the literature to the use of *A. niger* var. *awamori* as the source organism for production of a variety of enzymes, including glucoamylase (Ref. 51) and α-amylase (Ref. 48). For example, Raper and Fennell (Ref. 36) cite two uses of *A. niger* var. *awamori* for enzyme production; one of these was reported by Komaki in 1956 to 1957 as a source of amylase used for the production of glucose from starch, under the synonym *A. usamii*, and the other was reported by Feniksova and Shilova in 1960 as a source of enzymes for production of glucose syrup from starch. Hiram Walker's patent for production of distiller's yeast (Ref. 52) cites the use of glucoamylase from *A. niger* var. *awamori* in treating grain mash. Hiram Walker deposited this strain with the Agricultural Research Station Culture Collection, Northern Regional Research Laboratory (NRRL) where it was listed as *Aspergillus awamori* strain NRRL 3112. This strain is the source organism for a commercial glucoamylase sold since 1963 (Ref. 53). This same strain, NRRL 3112, is also the strain Genencor genetically manipulated to create the final production organism.

The petitioner provided several published animal studies supporting the organism's safety. Semeniuk et al., (Ref. 54) studied the toxigenicity of 392 strains of *Aspergillus* obtained from the Agricultural Research Station Culture Collection of NRRL. The strains studied included three different strains of *A. niger* var. *awamori*. The investigators fed each strain to chicks and mice for 4 weeks. While some of the 392 *Aspergillus* strains they tested were found to be toxic, all three of the *A. niger* var. *awamori* strains were found to be nontoxic. In addition, Bogoroditskaya and Dyubyuk (Ref. 55) reported that amyloprotease prepared from *A. niger* var. *awamori* was nontoxic when administered orally in acute doses of up to 5 grams per kilogram to mice and guinea pigs.

Species of the *A. niger* group are not considered to be of primary significance in the cause of disease (Refs. 56 through 59). During the period 1946 to 1965, however, reports appeared in which organisms identified as *A. niger* var. *awamori* were isolated from several infected postoperative wounds and ear lesions (Ref. 56). There is general agreement that reduced host resistance is required in order for the fungal infection to become established (Refs. 56 through 58), and in many cases there is doubt as to whether *A. niger* var. *awamori* was the causative agent of the infection (Ref. 58). None of the cases of infection was the result of ingestion of *A. niger* var. *awamori*. Moreover, the processing steps described above, including acid treatment and filtration, remove any viable cells of the production organism from the final product, which eliminates the possibility that ingestion of *A. niger* var. *awamori* would result in a fungal infection.

As corroborative evidence of the safety of chymosin preparation and of the host organism, Genencor submitted the results of several unpublished studies. These included several in vivo studies and one in vitro study on its chymosin enzyme preparation. An unpublished acute oral pathogenicity study conducted in mice using both the host organism and the actual production strain of the host organism demonstrated both were nonpathogenic. An in vitro study was done using several lots of the chymosin enzyme preparation to assess its potential to be clastogenic (i.e., cause chromosomal aberrations) in Chinese hamster ovary cells. The chymosin enzyme preparation was negative for in vitro clastogenicity in this study. In a 13-week in vivo feeding study, no significant adverse effects were observed in the rats fed the chymosin enzyme preparation.

The petitioner also provided two studies that were conducted to test the chymosin enzyme preparation as an irritant. An eye irritation study in rabbits was conducted with the chymosin enzyme preparation. The preparation was an apparent mild irritant; however, all ocular irritation of the treated eyes subsided by 24 hours after treatment. Such a result is not unexpected or relevant to ingestion of the chymosin enzyme preparation. A primary dermal irritation study conducted in rabbits demonstrated that the enzyme preparation was not an irritant. Except for being found to be a minimal irritant in the eye irritation study, the results of the two tests were negative.

In another study, the potential of the enzyme preparation to cause delayed contact hypersensitivity was tested in guinea pigs. In this 3-week study, the response of the test animals to the enzyme preparation was no greater than the response to the control material. The authors concluded that the chymosin enzyme preparation did not induce sensitization in guinea pigs under the conditions of the study.

One potential safety concern raised by cloning is whether extraneous DNA (particularly DNA flanking the gene of interest that could encode proteins of unknown safety) may be cloned along with the gene of interest (i.e., that producing prochymosin) and contaminate the enzyme preparation. As a matter of current good manufacturing practice, manufacturers using recombinant DNA technology should ensure that they have not inadvertently cloned extraneous protein-encoding DNA along with the prochymosin gene. Such assurance can come from reviewing the details of the cloning steps, such as the origin and sequence of the DNA fragments used in the cloning, and from full characterization of the final genetic constructs via techniques such as DNA sequencing. Genencor's petition contains information demonstrating that the company conducted these steps.

For example, the *A. niger* var. *awamori* strains that are used by Genencor (Refs. 9 through 11) to produce the chymosin preparation contain marker genes that encode resistance to a clinically useful antibiotic. The agency evaluated whether these genes could be transferred to other microorganisms with which the production strain or its DNA comes into contact, causing proliferation of antibiotic resistance. As previously described, the isolation of the enzyme includes an acid treatment step that results in the destruction of residual cells and the degradation of residual DNA, including marker genes (Ref. 60).

As corroborative evidence that the enzyme preparation does not contain gene-sized DNA fragments or transformable DNA (that is, DNA that a microorganism can take up from its surroundings and functionally incorporate into its own DNA), Genencor submitted data from several unpublished experiments, including a DNA extraction/Southern blot assay and a transformation assay. The results of the DNA extraction/Southern blot assay showed that no plasmid sequences, including the antibiotic resistance marker, were present in the product. In the transformation assay, bacterial cells were mixed with the enzyme preparation under optimized conditions and assayed to see if they had picked up DNA encoding antibiotic resistance. The cells did not become resistant to the antibiotic. Based on the facts discussed above, FDA concludes that chymosin preparation manufactured in conformity with § 184.1685(a)(3) will not contain DNA encoding resistance to antibiotics at levels that would produce any safety concern.

Moreover, the regulation stipulates that the substance being affirmed as GRAS is one that is produced using a production strain that is nontoxigenic (see § 184.1685(a)(4)). If the cloned DNA were to encode a harmful substance that could render the enzyme preparation unsafe, the production strain would be toxigenic; in such circumstances, the chymosin preparation would not be GRAS under § 184.1685(a)(4). Therefore, the agency finds that there is no basis for concern that the safety of the chymosin preparation will be compromised by contaminating proteins encoded by extraneous uncharacterized DNA cloned along with the prochymosin gene.

Having considered the evidence concerning the production organism and the processing steps to derive the chymosin preparation, FDA concludes that *A. niger* var. *awamori* is safe for use as a source of food-grade chymosin preparations, and that impurities resulting from its use in the production of chymosin preparation will not affect the safety of the chymosin preparation.

IV. Specifications

The agency finds that, because the principal active ingredient of the chymosin preparation and rennet are the same, and because the potential impurities in the chymosin preparation that may originate from the source organism or manufacturing process do not provide any basis for concern about the safe use of the preparation, the current requirements given for chymosin preparations in § 184.1685(b) are adequate for defining the minimum criteria for a food-grade chymosin preparation derived from *A. niger* var. *awamori*.

V. Conclusion

The agency has evaluated all available information and finds, based upon the published and corroborative evidence discussed above, that the principal active ingredient in the chymosin preparation is the same as that in rennet, and that when the preparation is manufactured in accordance with § 184.1685(a)(4), the source organism and manufacturing process will not introduce impurities into the preparation that may render the use of the preparation unsafe. Therefore, the agency concludes, based upon scientific procedures, that the chymosin preparation derived by fermentation from *A. niger* var. *awamori* and described in the regulation set out below is GRAS for use as a replacement for rennet.

VI. Environmental Impact

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

VII. Economic Effects

FDA has examined the economic implications of the final rule affirming the GRAS status of chymosin enzyme preparation derived from *A. niger* var. *awamori* as a direct human ingredient, as required by Executive Order 12291 and 12612 and the Regulatory Flexibility Act (Pub. L. 96–54). Executive Order 12291 compels agencies to use cost-benefit analysis when making decisions and Executive Order 12612 requires Federal agencies to ensure that Federal solutions, rather than State or local solutions, are necessary. Pub. L. 96–54 requires regulatory relief for small businesses where feasible. The agency finds that this final rule is not a major rule as defined by Executive Order 12291. In accordance with Pub. L. 96–54, FDA has also determined that this final rule will not have a significant adverse impact on a substantial number of small business. Finally, because this regulation applies to food for interstate trade and individual State regulations would hinder interstate trade, FDA finds that there is no substantial federalism issue which would require an analysis under Executive Order 12612.

Because no current activity is prohibited by this final rule, it will not result in any compliance cost to firms. Also, because no increase in the health risks faced by consumers will result from this final rule, no compliance costs will result. Potential benefits include the wider use of this enzyme because of reduced uncertainty concerning its GRAS status and any resources saved by eliminating the need to prepare further petitions to affirm the GRAS status of this enzyme from this source organism.

List of Subjects in 21 CFR Part 184

Food ingredients.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 184 is amended as follows:

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

1. The authority citation for 21 CFR part 184 continues to read as follows:

Authority: Secs. 201, 402, 409, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 371).

2. Section 184.1685 is amended by adding new paragraph (a)(4) to read as follows:

§ 184.1685 Rennet (animal-derived) and chymosin preparation (fermentation-derived).

(a) * * *

(4) Chymosin preparation is a clear solution containing the active enzyme chymosin (E.C. 3.4.23.4). It is derived, via fermentation, from a nonpathogenic and nontoxigenic strain of *Aspergillus niger* van Tieghem variety *awamori* (Nakazawa) Al-Musallam (synonym *A. awamori* Nakazawa) containing the prochymosin gene. Chymosin is recovered from the fermentation broth after acid treatment. All materials used in the processing and formulating of chymosin preparation must be either generally recognized as safe (GRAS) or be food additives that have been approved by the Food and Drug Administration for this use.

BILLING CODE 4160–01–F

DEPARTMENT OF THE INTERIOR

Geological Survey

30 CFR Part 401

RIN 1028–AA03

State Water Research Institute Program

AGENCY: U.S. Geological Survey, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Geological Survey (USGS) is amending the procedures used to evaluate the State Water Research Institutes to implement the changes to the Water Resources Research Act of 1984. This action is intended to reduce costs associated with the evaluation process for both the USGS and the institutes. The USGS is also removing references to obsolete documents, revising and clarifying the requirements for new institutes, revising the requirements for expenditure of unobligated funds, and making other minor changes to bring the regulation in compliance with the amended Act.

EFFECTIVE DATE: June 7, 1993.

FOR FURTHER INFORMATION CONTACT: Allen Ford, Office of External Research, U.S. Geological Survey, Water Resources Division, 424 National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092, (703) 648–6806.

SUPPLEMENTARY INFORMATION:

Background

The State Water Research Institutes authorized by the Water Resources Research Act of 1984 (Pub. L. 98–242, 98 Stat. 97) and reauthorized by Water Research Institutes Authorization Through Fiscal Year 1994 (Pub. L. 101–397, 104 Stat. 852) support research, education, and information transfer activities. The 54 institutes in the program are administered and periodically evaluated under the provisions of 30 CFR part 401, adopted in May 1985. The reauthorization amended several provisions of the Water Resources Research Act of 1984, and the USGS is accordingly making minor revisions to the rule guiding the administration and evaluation of the institutes.

The former rule guiding the evaluation of the institutes required that five person teams visit each of the 54 institutes at least once every 5 years. The USGS has made minor revisions to the rule pertaining to institute evaluations by amending subpart E of 30 CFR 401.26 which describes the procedures used to evaluate the State Water Research Institutes. The reauthorization amends section 104(e) of the Water Resources Research Act of 1984 to give the Secretary of the Interior more discretion in the evaluation process. This action revises the rule pertaining to institute evaluations such that: The size of the evaluation team is decreased and its composition changed; the evaluation team will visit only those institutes it considers, on the basis of submitted documentation, to be potential candidates for probation; the composition of the evaluation team is changed; the evaluation team will consider only those institute activities funded under section 104 of the Water Resources Research Act of 1984; evaluation criteria not directly related to performance of the institutes is eliminated; the evaluation team is allowed more time to submit a written report of its findings. The changes will: lower the cost of the evaluation process to both the granting agency and the institutes by minimizing the number of institute site visits; permit greater consistency in the evaluation process by using, to the extent possible, only one evaluation team for all institutes; and base the evaluation only on demonstrated performance in the use of section 104 grants.

Section 401.11(a) of the rule requires that, if the full amount of the available grant funds for any fiscal year has not been requested as of the closing date for receipt of applications, any remaining funds shall be made available to the institutes for amended applications. The USGS is revising this section to state that any such remaining funds be made available to support competitively selected research projects under the terms of section 104(g) of the Act, as required by the reauthorization.

The USGS is amending section 401.11(g) to state that Federal funds received by the institutes shall be matched on a basis of no less than two non-Federal dollars for each Federal dollar, as required by the reauthorization, unless the grant is exempt under the provisions of 48 U.S.C. 1469a(d) as amended.

The USGS is amending section 401.12(c) to remove references to obsolete documents and add references to new documents guiding the institutes' administration of the grants received under section 104 of the Act.

Response to Public Comment

Two comments were received in response to the proposed rule as published in the **Federal Register** (57 FR 59941) on December 17, 1992. A discussion of the comments follows:

Comment: The existing rule (30 CFR 401.3) defines "State" to include the Trust Territory of the Pacific Islands. Pub. L. 101–397 amended the Water Resources Research Act of 1984 by changing "Trust Territory of the Pacific Islands" to "Federated States of Micronesia," and the language of the rule should be changed accordingly.

Response: The language of section 401.3 has been modified to adopt the suggested change.

Comment: The proposed revision to section 401.11(g) states that the Federal funds are to be matched on a basis of no less than two non-Federal dollars for each Federal dollar. Guam, the Federated States of Micronesia, and the Virgin Islands are not required to match the Federal funds received under this grant.

Response: The language of section 401.11(g) has been modified to recognize that, under the provisions of 48 U.S.C. 1469a(d) as amended, the matching requirement may be waived for applicants from specified Insular Areas.

Required Analyses

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and certifies this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This action will promote efficiency and economy by reducing costs for both the Government and the institutes. Therefore, it will not adversely affect the economy of the Nation or any small entity.

Environmental Effects

This action will have no potential for significant environmental impact and is categorically excluded from the requirements for compliance with the

UMI

National Environmental Policy Act of 1969, as amended (Pub. L. 91–190, 83 Stat. 852).

Paperwork Reduction Act

The information collection requirements in section 401.11 and 401.19 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1028–0044.

Executive Order No. 12778

The Department has certified to the Office of Management and Budget that this regulation meets the standards provided in sections 2(a) and 2(b) of Executive Order No. 12778.

Author

The principal author of this rule is Allen Ford, Water Resources Division, U.S. Geological Survey.

The Catalog of Federal Domestic Assistance program affected is No. 15.805, Assistance to State Water Research Institutes.

List of Subjects in 30 CFR Part 401

Colleges and universities, Grants programs-natural resources, Research, Water resources.

For the reasons set out in the preamble, 30 CFR chapter IV, part 401, is amended as follows:

PART 401—STATE WATER RESEARCH INSTITUTE PROGRAM

1. The authority citation for 30 CFR part 401 is revised to read as follows:

Authority: 42 U.S.C. 10303.

Subpart A—General

2. Section 401.3 is amended by revising the definition, "State" to read as follows:

§ 401.3 Definitions.

* * * * *

State means each of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands, the District of Columbia, Guam, American Samoa, the Commonwealth of the Mariana Islands, and the Federated States of Micronesia.

3. Section 401.4 is revised to read as follows:

§ 401.4 Information collection.

(a) The information collection requirements contained in sections 401.11 and 401.19 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 et seq. and assigned clearance number 1028–0044. The information will be used to support water related research and provide performance reports on accomplishments achieved under Pub. L. 98–242, 98 Stat. 97 (42 U.S.C. 10303). This information allows the agency to determine compliance with the objectives and criteria of the grant programs. Response is mandatory in accordance with 30 CFR 401.11 and 401.19.

(b) Public reporting burden for the collection of information is estimated to average 84 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other suggestions for reducing the burden, to Paperwork Management Officer, U.S. Geological Survey, Paperwork Management Section MS 208, Reston, Virginia 22092 and the Office of Management and Budget, Paperwork Reduction Project (1028–0044), Washington, DC 20503.

Subpart B—Designation of Institutes; Institute Programs

4. Section 401.6 is amended by revising paragraph (c)(2) to read as follows:

§ 401.6 Designation of institutes.

* * * * *

(c) * * *

(2) A management plan for meeting the requirements of the evaluation mandated by § 401.26.

Subpart C—Application and Management Procedures

5. Section 401.11 is amended by revising paragraphs (a) and (g) to read as follows:

§ 401.11 Application for grants.

(a) Subject to the availability of appropriated funds, but not to exceed a total of $10 million, an equal amount of dollars will be available to each qualified institute in each fiscal year to assist it in carrying out the purposes of the Act. If the full amount of the appropriated funds is not obligated by the close of the fiscal year for which they were appropriated, the remaining funds shall be made available in the succeeding fiscal year to support competitively selected research projects under the terms of section 104(g) of the Act. Selection and approval of such projects shall be based on criteria to be determined by the Director. Announcement of such criteria shall be made by notice in the **Federal Register**. The granting agency may retain an amount up to 15 percent of the total appropriation for administrative costs.

* * * * *

(g) The application shall provide assurance that non-Federal dollars will be available to share the costs of the proposed program. The Federal funds are to be matched on a basis of no less than two non-Federal dollars for each Federal dollar, unless this matching requirement has been waived.

* * * * *

6. Section 401.12 is amended by revising paragraph (c) to read as follows:

§ 401.12 Program management.

* * * * *

(c)(1) Acceptance of the award document certifies the grantee's assurance that the grant will be administered in compliance with OMB regulations, policies, guidelines, and requirements as described in:

(i) Circular No. A–21, revised, Cost Principles of Educational Institutions;

(ii) Memorandum No. M–92–01, Coordination of Water Resources Information;

(iii) Circular No. A–88, revised, Indirect Cost Rates, Audit and Audit Follow-up at Educational Institutions;

(iv) Circular No. A–110, Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals and other Nonprofit Organizations; and

(v) Circular No. A–124, Patents—Small Business Firms and Nonprofit Organizations.

(2) Copies of the documents listed in paragraph (c)(1) of this section shall be available from the granting agency.

Subpart E—Evaluation

7. Section 401.26 is revised to read as follows:

§ 401.26 Evaluation of institutes.

(a) Within 2 years of the date of its certification according to the provisions of § 401.6, each institute will be evaluated for the purpose of determining whether the national interest warrants its continued support under the provisions of the Act. That determination shall be based on:

(1) The quality and relevance of its water resources research as funded under the Act;

(2) Its effectiveness as an institution for planning, conducting, or arranging for research;

(3) Its demonstrated performance in making research results available to users in the State and elsewhere; and

(4) Its demonstrated record in providing for the training of scientists through student involvement in its research program.

(b) An evaluation team, selected by the granting agency on the basis of the members' knowledge of water research and administration, shall evaluate each institute, and may with the concurrence of the granting agency, visit such institutes as it considers necessary. The team is to include at least one individual from each of the following categories:

(1) Employees of the Department of the Interior;

(2) University faculty or other professionals with relevant experience in the conduct of water resources research;

(3) Former directors of water research institutes; and

(4) University faculty or other professionals with relevant experience in information transfer.

(c) The granting agency may request recommendations for team selections from the National Research Council/National Academy of Sciences and from other organizations whose members include the types of individuals cited in paragraph (b) of this section.

(d) The granting agency shall, as an administrative cost, provide the funds for travel and per diem expense of the team members, within the maximum limits allowable under Federal travel regulations (41 CFR subtitle F).

(e) The granting agency has the right to select dates for evaluation visits, and notice of the team's visit shall be provided to the institute being evaluated at least 60 days in advance.

(f) It shall be the responsibility of each institute to provide such documentation of its activities and accomplishments as the granting agency and evaluation team may reasonably request. The request for this documentation shall be made at least 60 days prior to the due date of its receipt.

(g) The team shall, within 90 days after completion of its evaluation, submit a written report of its findings to the granting agency for transmittal to the institute. If an institute is found to have deficiencies in meeting the objectives of the Act, it shall be allowed 1 year to correct them and to report such action to the granting agency. The decision as to the institute's eligibility to receive further funding will rest with the granting agency.

(h) After the initial evaluation, each institute shall be reevaluated at least every 5 years.

Dated: April 2, 1993.

Donald R. Glaser,

Acting Assistant Secretary—Water and Science.

BILLING CODE 4310–31–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Parts 50, 77, 80, 138, 177, 237, 244, 364, and 371

Removal of Parts

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: The Department of Defense hereby removes obsolete parts concerning Fulfilling the Military Service Obligation (DoD Directive 1304.25); Mortgage Insurance for Service Members to Aid in Construction or Purchase of Homes (DoD Directive 1338.4); Child Development Programs (CDPs)(DoD Instruction 6060.2); Birth registration overseas (DoD Instruction 6040.34); Emergency Requirements, Allocations, Priorities, and Permits for DoD Use of Domestic Civil Transportation (DoD Directive 3005.7); Community Relations (DoD Directive 5410.18); Honorary Awards to Private Citizens and Organizations (DoD Directive 1432.2); Assistant to Secretary of Defense (Atomic Energy) (DoD Directive 5148.2); and Organization of the Joint Chiefs of Staff and Relationships with the OSD (DoD Instruction 5158.1) from title 32 of the Code of Federal Regulations. These parts have served the purpose for which they were intended and are no longer valid.

EFFECTIVE DATE: May 7, 1993.

FOR FURTHER INFORMATION CONTACT: L.M. Bynum, Correspondence and Directives Directorate, 1155 Defense Pentagon, Washington, DC 20301–1155.

SUPPLEMENTARY INFORMATION: The parts listed above are removed from the Code of Federal Regulations, however, the DoD Directives and Instructions are still valid. The removal of the parts are only to ensure that obsolete information is not retained in the Code of Federal Regulations. An updated version of DoD Directive 1304.25 (previously part 50); DoD Directive 1338.4 (previously part 77); DoD Instruction 6060.2 (previously part 80); DoD Instruction 6040.34 (previously part 138); DoD Directive 3005.7 (previously part 177); DoD Directive 5410.18 (previously part 237); DoD Directive 1432.2 (previously part 244); DoD Directive 5148.2 (previously part 364); and DoD Instruction 5158.1 (previously part 371) is available from the National Technical Information, 5285 Port Royal Road, Springfield, VA 22161.

List of Subjects

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPPTS–50580D; FRL–4171–5]

Coconut Oil; Reaction Products with Tetrahydroxy Branched Alkane Esters of Trisubstituted Benzenepropanoic Acid; Revocation of a Significant New Use Rule

AGENCY: Environmental Protection Agency (EPA).

VOL
58
ISS
87
MY
7
19 93
UMI

ACTION: Final rule.

SUMMARY: EPA is revoking a significant new use rule (SNUR) promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for coconut oil; reaction products with tetrahydroxy branched alkane esters of trisubstituted benzenepropanoic acid based on receipt of new data. The data indicate that the substance will not present an unreasonable risk of injury to human health and further regulation under section 5 of TSCA is not warranted at this time.

EFFECTIVE DATE: The effective date of this rule is June 7, 1993.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–543A, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 26, 1990 (55 FR 26092), EPA issued a SNUR establishing significant new uses for coconut oil reaction products with tetrahydroxy branched alkane esters of trisubstituted benzenepropanoic acid. Because of additional data EPA has received for this substance, EPA proposed to revoke this SNUR in the **Federal Register** of August 4, 1992 (57 FR 34282).

I. Rulemaking Record

The record for the rule which EPA is revoking was established at OPPTS–50580 (P–89–770). This record includes information considered by the Agency in developing this rule.

II. Background

The Agency proposed the revocation of the SNUR for this substance in the **Federal Register** of August 4, 1992 (57 FR 34282). The background and reasons for the revocation of the SNUR are set forth in the preamble to the proposed revocation. The Agency received no public comment concerning the proposed revocation. As a result EPA is revoking this SNUR.

III. Objectives and Rationale for Revocation of the Rule

During review of the PMN submitted for the chemical substance that is the subject of this revocation, EPA concluded that regulation was warranted under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the health effects of the substance, and EPA identified the tests considered necessary to evaluate the risks of the substance. The basis for such findings is referenced in Unit II. of this preamble. Based on these findings, a section 5(e) consent order was negotiated with the PMN submitter and a SNUR was promulgated.

EPA reviewed testing conducted by the PMN submitter for the substance and determined that the information available was sufficient to make a reasoned evaluation of the health effects of the substance. EPA concluded that, for the purposes of TSCA section 5, the substance will not present an unreasonable risk and subsequently revoked the section 5(e) consent order. The revocation of SNUR provisions for this substance designated herein is consistent with the revocation of the section 5(e) order.

In light of the above EPA is revoking the SNUR provisions for this chemical substance. When this revocation becomes final EPA will no longer require notice of any company's intent to manufacture, import, or process this substance.

IV. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), EPA has determined that this rule would not have a significant impact on a substantial number of small businesses. EPA has not determined whether parties affected by this rule would likely be small businesses. However, once the SNUR is revoked EPA will receive no SNUR notices for the substance. Therefore, EPA believes that the number of small businesses affected by this rule will not be substantial.

List of Subjects in 40 CFR Part 721

Chemicals, Environmental protection, Hazardous materials, Recordkeeping and reporting requirements, Significant new uses.

Dated: April 30, 1993

Victor J. Kimm,

Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§ 721.770 [Removed]

2. By removing § 721.770.

40 CFR Part 721

[OPPTS–50592C; FRL–4171–8]

Heterocyclic Aldehyde Imine; Revocation of a Significant New Use Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is revoking a significant new use rule (SNUR) promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for heterocyclic aldehyde imine based on receipt of new data. The data indicate that the substance will not present an unreasonable risk of injury to human health or the environment and further regulation under section 5 of TSCA is not warranted at this time.

EFFECTIVE DATE: The effective date of this rule is June 7, 1993.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–543A, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 13, 1991 (56 FR 40204), EPA issued a SNUR establishing significant new uses for heterocyclic aldehyde imine. Because of additional data EPA has received for this substance, EPA proposed to revoke this SNUR in the **Federal Register** of August 4, 1992 (57 FR 34281).

I. Rulemaking Record

The record for the rule which EPA is revoking was established at OPPTS–50592 (P–90–1624). This record includes information considered by the Agency in developing this rule.

II. Background

The Agency proposed the revocation of the SNUR for this substance in the **Federal Register** of August 4, 1992 (57 FR 34281). The background and reasons for the revocation of the SNUR are set forth in the preamble to the proposed revocation. The Agency received no public comment concerning the proposed revocation. As a result EPA is revoking this SNUR.

III. Objectives and Rationale for Revocation of the Rule

During review of the PMN submitted for the chemical substance that is the subject of this revocation, EPA concluded that regulation was warranted under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the health and environmental effects of the substance, and EPA identified the tests considered necessary to evaluate the risks of the substance. The basis for such findings is referenced in Unit II. of this preamble. Based on these findings, a section 5(e) consent order was negotiated with the PMN submitter and a SNUR was promulgated.

EPA reviewed testing conducted by the PMN submitter for the substance and determined that the information available was sufficient to make a reasoned evaluation of the health and environmental effects of the substance. EPA concluded that, for the purposes of TSCA section 5, the substance will not present an unreasonable risk and subsequently revoked the section 5(e) consent order. The revocation of SNUR provisions for this substance designated herein is consistent with the revocation of the section 5(e) order.

In light of the above EPA is revoking the SNUR provisions for this chemical substance. When this revocation becomes final EPA will no longer require notice of any company's intent to manufacture, import, or process this substance.

IV. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), EPA has determined that this rule would not have a significant impact on a substantial number of small businesses. EPA has not determined whether parties affected by this rule would likely be small businesses. However, once the SNUR is revoked EPA will receive no SNUR notices for the substance. Therefore, EPA believes that the number of small businesses affected by this rule will not be substantial.

Phenol, 4,4'-(9*H*-Fluoren-9-ylidene)bis-; Revocation of a Significant New Use Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is revoking a significant new use rule (SNUR) promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for phenol, 4,4'-(9*H*-fluoren-9-ylidene)bis- based on receipt of new data. The data indicate that the substance will not present an unreasonable risk of injury to human health and further regulation under section 5 of TSCA is not warranted at this time.

EFFECTIVE DATE: The effective date of this rule is June 7, 1993.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–543A, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 9, 1990 (55 FR 32406), EPA issued a SNUR establishing significant new uses for phenol, 4,4'-(9*H*-fluoren-9-ylidene)bis-. Because of additional data EPA has received for this substance, EPA proposed to revoke this SNUR in the **Federal Register** of August 4, 1992 (57 FR 34283).

I. Rulemaking Record

The record for the rule which EPA is revoking was established at OPPTS–50583 (P–88–831). This record includes information considered by the Agency in developing this rule.

II. Background

The Agency proposed the revocation of the SNUR for this substance in the **Federal Register** of August 4, 1992 (57 FR 34283). The background and reasons for the revocation of the SNUR are set forth in the preamble to the proposed revocation. The Agency received no public comment concerning the proposed revocation. As a result EPA is revoking this SNUR.

III. Objectives and Rationale for Revocation of the Rule

During review of the PMN submitted for the chemical substance that is the subject of this revocation, EPA concluded that regulation was warranted under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the health effects of the substance, and EPA identified the tests considered necessary to evaluate the risks of the substance. The basis for such findings is referenced in Unit II. of this preamble. Based on these findings, a section 5(e) consent order was negotiated with the PMN submitter and a SNUR was promulgated.

EPA reviewed testing conducted by the PMN submitter for the substance and determined that the information available was sufficient to make a reasoned evaluation of the health effects of the substance. EPA concluded that, for the purposes of TSCA section 5, the substance will not present an unreasonable risk and subsequently revoked the section 5(e) consent order. The revocation of SNUR provisions for this substance designated herein is consistent with the revocation of the section 5(e) order.

In light of the above EPA is revoking the SNUR provisions for this chemical substance. When this revocation becomes final EPA will no longer require notice of any company's intent to manufacture, import, or process this substance.

IV. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), EPA has determined that this rule would not have a significant impact on a substantial number of small businesses. EPA has not determined whether parties affected by this rule would likely be small businesses. However, once the SNUR is revoked EPA will receive no SNUR notices for the substance. Therefore, EPA believes that the number of small businesses affected by this rule will not be substantial.

FEDERAL MARITIME COMMISSION

46 CFR Parts 502, 505, 510 and 540

[Docket No. 93-02]

Miscellaneous Amendments to Rules of Practice and Procedure

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission ("Commission" or "FMC") is amending its rules of practice and procedure in numerous respects. Experience under these rules indicates that these several changes are desirable to remove ambiguities, to delete outdated or extraneous provisions, and to improve the efficient administration of proceedings.

EFFECTIVE DATE: May 7, 1993.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Secretary, Federal Maritime Commission, 202-523-5725.

SUPPLEMENTARY INFORMATION: The FMC's Rules of Practice and Procedure ("Rules"), 46 CFR part 502, govern procedures in proceedings before it. Experience under the Rules suggested that certain provisions are either outdated, unclear, conflicting or inadequate to achieve their desired purpose. Additionally, it appeared that certain provisions in parts 505 and 540 dealing with assessment and compromise of civil penalties would more appropriately be included in part 502. To remedy these deficiencies the Commission, by notice published on February 5, 1993 (58 FR 7199), proposed several amendments to its Rules.

Three comments were filed in response to the notice of proposed rulemaking. With one exception, each of these comments addressed only the proposal dealing with the requirements for filing of complaints alleging violations of section 10(a)(1) of the Shipping Act of 1984, 46 U.S.C. app. 1709(a)(1). The exception is a comment regarding the proposed amendment for submission of sworn documents, 46 CFR 502.112, which was supportive of that change. In order to expedite the implementation of the portions of the proposal that received no objection, the Commission is proceeding to final rule and adopting the proposed changes on those matters while deferring decision on the section 10(a)(1) issue.

One additional amendment has been incorporated into this final rule. The copy requirement for filing of public versions of confidential filings, pursuant to 46 CFR 502.119, is clarified to reflect a reduction to an original and one copy. Because this represents a reduction in burden relating to a procedural requirement, opportunity for public comment on this amendment is not necessary.

A section by section explanation of the rule changes follows.

Federal Rules of Civil Procedure

The Commission has consistently endorsed the policy of following the Federal Rules of Civil Procedure ("FRCP") in situations not covered by a specific Commission rule and where there is no conflict with administrative law or another FMC rule. This policy is well established, see, e.g., *Brazilian National Steel Co.* v. *Lloyd Brasileiro*, 21 SRR 1505, 1507-1508 (ALJ 1983). A new § 502.12 is added which codifies this policy in the Rules.

Firms and Corporations

Section 502.28 currently bars "firms or corporations" from practicing before the Commission on behalf of others. This rule is confusing in its application and is frequently not followed. For example, tariff publishing firms or filing agent firms often represent carriers in special docket proceedings and rate auditors often represent shippers in overcharge claim proceedings. It is unclear whether the existing rule is intended to bar practice by such firms or corporations when their representative is one who is admitted to practice before the Commission. This prohibition appears to serve no purpose and it is, therefore, removed. Firms and corporations thereby are permitted to represent others, subject of course to the requirement in 46 CFR 502.27 that their representative is admitted to practice before the agency.

Counter-Complaints

The Commission currently has no rule permitting or governing the filing of counter-complaints in complaint proceedings, even though in practice they have been allowed. See *A/S Ivoran* v. *Lloyd Brasileiro*, 24 SRR 1029, 1032, n.7 (FMC 1988). The frequency with which such filings have been made has been increasing and often they fail to include a verification, which is required by statute for complaints before the Commission, 46 U.S.C. app. 1710. Section 502.64, therefore, is amended to provide for the filing of properly verified counter-complaints and providing for their service directly by the parties if authorized by the presiding officer.

Amendments to Pleadings

Section 502.113 provides that complaints and amendments to complaints will be served by the Secretary of the Commission. Section 502.70(b) states that amendments to pleadings allowed prior to hearing will be served in the same manner as the original pleading. These rules would seem to mandate that amended complaints be served only by the Secretary. In practice, when amended complaints are filed, the complainant simultaneously serves a copy on respondents. In such situations, there appears to be no need to have the complaint re-served by the Secretary, and the presiding administrative law judge ("ALJ") has sometimes, with agreement of the parties, waived application of the requirement. Sections 502.70(b) and 502.113 are amended, therefore, to authorize the presiding officer to allow service of amended complaints merely by having the filing party serve respondent or its counsel of record.

Bill of Particulars

Section 502.71 contains provisions for a bill of particulars. Under the FRCP, the bill of particulars has been replaced by motions for more definite statement, FRCP 12(e). To avoid confusion and to bring the Rules more in line with modern federal practice, § 502.71 is revised to include provisions modeled on present Rule 12(e) of the FRCP.

Satisfaction of Complaint

Section 502.93 contains provisions relating to satisfaction of complaints. This rule is outdated, applies to shipper complaints against carriers only, and refers to a non-existent form ("exhibit No. 1 to subpart D"). The rule would appear to be unnecessary, in any event, because any proceeding may be dismissed by the presiding officer upon a proper showing, and the requirement for seeking dismissal would be no different where the complaint has been satisfied than where any other settlement has been reached. The rule therefore, is being removed.

Subscription and Verification of Documents

Section 502.112(a) currently provides that the signature of the attorney or practitioner on a filing constitutes a certificate that the filer has read the filing and "that to the best of his or her knowledge, information, and belief there is good ground to support it." This rule is the counterpart to FRCP 11, which now imposes a requirement that a filer's signature on a pleading represents that the filer has made reasonable inquiry that the pleading is well grounded in fact and is warranted in existing law. The FRCP provision imposes a stricter standard on the filer and is designed to avoid the bringing of frivolous actions or the submission of frivolous pleadings. Section 502.112 is amended, therefore, to conform to FRCP 11. This change and the current provision in the Rules which subjects violators to disciplinary action, should serve to minimize the filing of inappropriate pleadings in Commission proceedings.

Section 502.112(b) currently requires that when filings are made by an officer or agent of a party not represented by someone admitted or qualified to practice before the Commission, the filing either must (in the case of a corporate party) be attested under seal of the corporation, or (in the case of a non-corporate party) be accompanied with a power of attorney. These requirements have not been uniformly applied and do not appear to be necessary inasmuch as such filings are otherwise required to be sworn, verified, or submitted under penalty of perjury. This requirement, therefore, is removed.

Modern practice in civil courts and in some administrative agencies permits the filing of unsworn declarations under penalty of perjury in lieu of requiring the submission of sworn or verified filings. This is embodied in the provisions of 28 U.S.C. 1746 which applies to any rule, regulation, order or requirement made pursuant to United States law. It is especially appropriate to permit such unsworn declarations where the filing is executed outside of the United States and filers are unfamiliar with United States verification requirements. A new paragraph, therefore, is added to § 502.112 which permits the use of unsworn declarations whenever the Rules otherwise require a sworn or verified filing.

Documents Containing Confidential Materials

Section 502.119 concerns the filing of documents containing confidential materials, and requires the filing of public and confidential copies. There is no reference to the number of copies required and therefore the provisions of § 502.118 require that parties file both an original and 15 confidential copies, and an original and 15 public copies. Only an original and one copy is needed for public versions of confidential filings. The rule is changed, therefore, to reflect this requirement.

Depositions Upon Oral Examination

Section 502.203 contains procedures for the taking of depositions upon oral examination. When this rule was reissued in 1984, a portion of the rule which required a notice of oral deposition to provide the name and address of each person to be examined or, if unknown, a general description sufficiently complete to identify the person, was inadvertently omitted. The omitted language is reinserted.

Exceptions/Appeals

Section 502.227 includes procedures for filing of exceptions to an ALJ's initial decisions and appeals of an ALJ's order of dismissal, and allows 22 days for their filing. The rule allows 22 days for filing of replies to exceptions, but allows only 15 days for filing of replies to appeals. In the interest of consistency and fairness, the rule is amended to allow 22 days for filing of replies to appeals.

Attorney's Fees

Section 502.254 governs proceedings to determine whether an award of attorney's fees is appropriate in particular reparation proceedings. Paragraph (f) of this section governs appeals to the Commission of a presiding officer's award of attorney's fees. The procedures for such appeals are significantly different than those contained in § 502.227 for exceptions and appeals of other presiding officer decisions. Additionally, no provision is included for review of such awards by the Commission on its own motion in the absence of appeal. The rule, therefore, is amended to include the same appeal and review procedures that apply under current Rule 227.

Petitions for Reconsideration and Replies

Section 502.261 governs the filing of petitions for reconsideration and stay. Under this rule, such petitions are limited to specific and narrow grounds. The rule provides that "[p]etitions which merely elaborate upon or repeat arguments made prior to the decision or order will not be received * * *." Despite these restrictions, unnecessarily lengthy petitions are often filed. The Federal Rules of Appellate Procedure limit petitions for rehearing of a circuit court decision to 15 pages. A page limitation similarly is being imposed on such petitions at the Commission. Since decisions and petitions for reconsideration of such decisions may involve questions of evidence, however, and such questions may require more space to discuss than would pure issues of law, the page limit is set at 25 pages.

Section 502.262 currently permits "any party" to file a reply to a petition for reconsideration. This rule is amended to clarify that only replies in opposition to petitions for reconsideration may be filed. The filing of replies in support of petitions usually evokes a request for the filing of a further reply to the reply. Additionally, it is reasonable to require parties who feel aggrieved by a Commission decision to timely file their own petitions for reconsideration rather than tagging onto someone else's petition. This rule is further amended to impose the same 25 page limitation on replies to petitions for reconsideration.

Civil Penalty Procedures

The rules on compromise and settlement of civil penalties currently are contained in part 505 of title 46 CFR Because these rules are essentially procedural in nature and in part pertain to proceedings conducted under part 502 of 46 CFR, they will be relocated and incorporated as a new subpart in part 502. Additionally, appendix A (model compromise agreement) is revised to better reflect current practice and appendix B (Example of Promissory Note) is deleted because installment payments are seldom permitted, and the presence of this appendix may leave the mistaken impression that the Commission welcomes them. References to the civil penalty provisions of section 19 of the Merchant Marine Act, 1920, 46 U.S.C. app. 875, also are added.

Subpart C of 46 CFR part 540, the passenger vessel certification rules, also contains provisions governing civil penalties, *viz.*, for violations of Public Law 89-777. Confusion has resulted, however, from those provisions being separated from, and sometimes conflicting with, part 505. Accordingly, subpart C of part 540 is removed and the new subpart of part 502 is amended to reflect that its procedures also govern civil penalties for violations of Public Law 89-777.

Although the Commission, as an independent regulatory agency, is not subject to Executive Order 12291, dated February 17, 1981, it nonetheless has reviewed the rule in terms of this Order and has determined that this rule is not a "major rule" as defined in Executive Order 12291 because it will not result in:

VOL
58
ISS
87
MY
7
19 93
UMI

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Commission certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(n), that because this rule deals only with agency practice and procedure, it will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units and small government jurisdictions.

List of Subjects

46 CFR Part 502

Administrative practice and procedure, Claims, Equal access to justice, Investigations, Lawyers, Penalties, Reporting and recordkeeping requirements.

46 CFR Part 505

Administrative practice and procedure, Maritime carriers, Penalties.

46 CFR Part 510

Freight forwarders; Maritime carriers; Reporting and recordkeeping requirements; Surety bonds.

46 CFR Part 540

Insurance, Maritime carriers, Reporting and recordkeeping requirements, Surety bonds.

Therefore, 46 CFR parts 502, 505, 510 and 540 are amended as follows:

PART 502—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 502 is revised to read as follows:

Authority: 5 U.S.C. 504, 551, 552, 553, 559; 12 U.S.C. 1141(a); 18 U.S.C. 207; 26 U.S.C. 501(c)(3); 28 U.S.C. 2112(a); 46 U.S.C. app. 817, 820, 821, 826, 841a, 1114(b), 1705, 1707–1711, 1713–1716; E.O. 11222 of May 8, 1965 (30 FR 6499); 21 U.S.C. 853a; and Pub. L. 89–777 (46 U.S.C. app. 817d, 817e).

2. A new § 502.12 is added to subpart A reading as follows:

§ 502.12 Applicability of Federal Rules of Civil Procedure.

In proceedings under this part, for situations which are not covered by a specific Commission rule, the Federal Rules of Civil Procedure will be followed to the extent that they are consistent with sound administrative practice.

§ 502.28 [Removed]

3. Section 502.28 is removed.

4. Section 502.64 is amended to revise the section title and to add a new paragraph (d) reading as follows:

§ 502.64 Answer to complaint; counter-complaint.

* * * * *

(d) In addition to filing an answer to a complaint, respondent may file a counter-complaint alleging violations of the Shipping Acts within the jurisdiction of the Commission. The filing of counter-complaints and answers to counter-complaints is governed by the rules and requirements of § 502.62 (excluding fees) and of this section for the filing of complaints and answers. Counter-complaints may be served directly by the parties if authorized by the presiding officer.

5. Section 502.70 is amended by revising the last sentence of paragraph (b) to read as follows:

§ 502.70 Amendments or supplements to pleadings.

(a) * * *

(b) * * * Amendments or supplements allowed prior to hearing will be served in the same manner as the original pleading, except that the presiding officer may authorize the service of amended complaints directly by the parties rather than by the Secretary of the Commission.

* * * * *

6. Section 502.71 is revised to read as follows:

§ 502.71 Motions for more definite statement.

If a pleading (including a complaint or counter-complaint filed pursuant to §§ 502.62 or 502.64) to which a responsive pleading is permitted is so vague or ambiguous that a party cannot reasonably be required to frame a responsive pleading, the party may move for a more definite statement before interposing a responsive pleading. The motion shall be filed within 15 days of the pleading and shall point out the defects complained of and the details desired. If the motion is granted and the order of the presiding officer is not obeyed within 10 days after service of the order or within such time as the presiding officer may fix, the presiding officer may strike the pleading to which the motion was directed or make such order as is deemed just. If the motion is disallowed, the time for responding to the pleading shall be extended to a date 10 days after service of the notice of disallowance.

§ 502.93 [Removed]

7. Section 502.93 is removed.

8. Section 502.112 is amended by revising the third sentence of paragraph (a) and by adding a new paragraph (c) to read as set forth below; and is further amended by removing the last sentence of paragraph (b).

§ 502.112 Subscription and verification of documents.

(a) * * * The signature of a person admitted or qualified to practice before the Commission constitutes a certificate by the signer that the signer has read the pleading, document or paper; that the signer is authorized to file it; that to the best of the signer's knowledge, information, and belief formed after reasonable inquiry the filing is well grounded in fact and is warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law; and that it is not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation. * * *

* * * * *

(c) Wherever, under any rules of this part, any matter is required or permitted to be supported, evidenced, established, or proved by the sworn declaration, verification, certificate, statement, oath, or affidavit, in writing of the person making the same (other than a deposition under §§ 502.203 or 502.204), such matter may, with like force and effect, be supported, evidenced, established, or proved by the unsworn declaration, certificate, verification, or statement, in writing of such person which is subscribed by such person, as true under penalty of perjury, in substantially the following form.

(1) If executed without the United States: "I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct."

(2) If executed within the United States, its territories, possessions, or commonwealths: "I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct."

9. The first sentence of § 502.113 is revised to read as follows:

§ 502.113 Service by the Commission.

Complaints filed pursuant to § 502.62, amendments to complaints (unless otherwise authorized by the presiding officer pursuant to § 502.70(b)), and complainant's memoranda filed in shortened procedure cases will be

served by the Secretary of the Commission. * * *

10. The second sentence of § 502.119(b) is revised to read as follows:

§ 502.119 Documents containing confidential materials.

* * * * *

(a) * * *

(b) * * * The public copies shall exclude confidential materials, shall indicate on the cover page and on each affected page "confidential materials excluded," and shall be filed in an original and one copy. * * *

* * * * *

11. Section 502.203 is amended by revising the second sentence of paragraph (a)(1) to read as follows:

* * * * *

§ 502.203 Depositions upon oral examination.

(a) *Notice of examination.* (1) * * * The notice shall state the time and place for taking the deposition and the name and address of each person to be examined, if known, and; if the name is not known, a general description sufficient to identify the person or the particular class or group to which the person belongs. * * *

* * * * *

12. Section 502.227 is amended by revising paragraph (b)(2) to read as follows:

§ 502.227 Exceptions to decisions or orders of dismissal of administrative law judges; replies thereto; and review of decisions or orders of dismissal by Commission.

* * * * *

(b)(1) * * *

(2) Any adverse party may file and serve a reply to an appeal under this paragraph within twenty-two (22) days after the appeal is served.

* * * * *

13. Section 502.254 is amended by revising paragraph (f) to read as follows:

§ 502.254 Attorney's fees in reparation proceedings.

* * * * *

(f) In cases where the presiding officer issues an award order, appeal of that order and Commission review of that order in the absence of appeal shall be governed by the procedures of § 502.227 of this part. [Rule 254.]

14. Section 502.261 is amended by revising the second sentence of paragraph (a) to read as follows:

§ 502.261 Petitions for reconsideration and stay.

(a) * * * Such petition shall be limited to 25 pages in length and shall be served in conformity with the requirements of subpart H of this part. * * *

* * * * *

15. Section 502.262 is revised to read as follows:

§ 502.262 Reply to petition for reconsideration or stay.

Any party may file a reply in opposition to a petition for reconsideration or stay within fifteen (15) days after the date of service of the petition in accordance with § 502.74. The reply shall be limited to 25 pages in length and shall be served in conformity with subpart H of this part. [Rule 262.]

16. Subpart W—Paperwork Reduction Act is redesignated as subpart X.

PART 505—COMPROMISE, ASSESSMENT, SETTLEMENT AND COLLECTION OF CIVIL PENALTIES

16a. The authority citation for Part 505 continues to read as follows:

Authority: 5 U.S.C. 552, 553, secs. 32 and 43 of the Shipping Act, 1916 (46 U.S.C. app. 831 and 841a); secs. 10, 11, 13, and 17 of the Shipping Act of 1984 (46 U.S.C. app. 1709, 1710, 1712, and 1716).

17. Part 505 of chapter IV, title 46 CFR, is redesignated as subpart W of Part 502, and is revised to read as follows:

Subpart W—Compromise, Assessment, Mitigation, Settlement, and Collection of Civil Penalties

Sec.

502.601 Purpose and scope.
502.602 Definitions.

Appendix A—Example of Compromise Agreement To Be Used Under 46 CFR 502.604

Subpart W—Compromise, Assessment, Mitigation, Settlement, and Collection of Civil Penalties

§ 502.601 Purpose and scope.

The purpose of this subpart is to implement the statutory provisions of section 32 of the Shipping Act, 1916, section 19 of the Merchant Marine Act, 1920, section 13 of the Shipping Act of 1984, and sections 2(c) and 3(c) of Public Law 89–777 by establishing rules and regulations governing the compromise, assessment, settlement and collection of civil penalties arising under certain designated provisions of the Shipping Act, 1916, the Merchant Marine Act, 1920, the Intercoastal Shipping Act, 1933, the Shipping Act of 1984, Public Law 89–777, and/or any order, rule or regulation (except for procedural rules and regulations contained in this part) issued or made by the Commission in the exercise of its powers, duties and functions under those statutes.

§ 502.602 Definitions.

For the purposes of this subpart:

(a) *Assessment* means the imposition of a civil penalty by order of the Commission after a formal docketed proceeding.

(b) *Commission* means the Federal Maritime Commission.

(c) *Compromise* means the process whereby a civil penalty for a violation is agreed upon by the respondent and the Commission outside of a formal, docketed proceeding.

(d) *Mitigation* means the reduction, in whole or in part, of the amount of a civil penalty.

(e) *Person* includes individuals, corporations, partnerships, and associations existing under or authorized by the laws of the United States or of a foreign country.

(f) *Respondent* means any person charged with a violation.

(g) *Settlement* means the process whereby a civil penalty or other disposition of the case for a violation is agreed to in a formal, docketed proceeding instituted by order of the Commission.

(h) *Violation* includes any violation of sections 14 through 21 (except section 16 First and Third) of the Shipping Act, 1916; sections 19(6)(d), 19(7)(d) and 19(11) of the Merchant Marine Act, 1920; section 2 of the Intercoastal Shipping Act, 1933; any provision of the Shipping Act of 1984; sections 2 and 3 of Public Law 89–777; and/or any order, rule or regulation (except for procedural rules and regulations contained in this part) issued or made by the Commission in the exercise of its powers, duties and functions under the Shipping Act, 1916, the Merchant Marine Act, 1920, the Intercoastal Shipping Act, 1933, the Shipping Act of 1984, or Public Law 89–777.

(i) Words in the plural form shall include the singular and vice versa; and words importing the masculine gender shall include the feminine and vice versa. The terms "includes" and "including" do not exclude matters not listed but which are in the same general class. The word "and" includes "or", except where specifically stated or where the context requires otherwise.

VOL 58 ISS 87 MY 7 1993 UMI

§ 502.603 Assessment of civil penalties: procedure; criteria for determining amount; limitations; relation to compromise.

(a) *Procedure for assessment of penalty.* The Commission may assess a civil penalty only after notice and opportunity for hearing. Civil penalty assessment proceedings, including settlement negotiations, shall be governed by the Commission's Rules of Practice and Procedure in this part. All settlements must be approved by the Presiding Officer. The full text of any settlement must be included in the final order of the Commission.

(b) *Criteria for determining amount of penalty.* In determining the amount of any penalties assessed, the Commission shall take into account the nature, circumstances, extent and gravity of the violation committed and the policies for deterrence and future compliance with the Commission's rules and regulations and the applicable statutes. The Commission shall also consider the respondent's degree of culpability, history of prior offenses, ability to pay and such other matters as justice requires.

(c) *Limitations; relation to compromise.* When the Commission, in its discretion, determines that policy, justice or other circumstances warrant, a civil penalty assessment proceeding may be instituted at any time for any violation which occurred within five years prior to the issuance of the order of investigation. Such proceeding may also be instituted at any time after the initiation of informal compromise procedures, except where a compromise agreement for the same violations under the compromise procedures has become effective under § 502.604(e).

§ 502.604 Compromise of penalties: relation to assessment proceedings.

(a) *Scope.* Except in pending civil penalty assessment proceedings provided for in § 502.603, the Commission, when it has reason to believe a violation has occurred, may invoke the informal compromise procedures of this section.

(b) *Notice.* When the Commission considers it appropriate to afford an opportunity for the compromise of a civil penalty, it will, except when otherwise authorized by the Commission, or where circumstances render it unnecessary, send a registered or certified Notice and Demand Letter ("NDL") to the respondent. The NDL will describe specific violation(s) on which the claim is based, including the particular facts, dates and other elements necessary for the respondent to identify the specific conduct constituting the alleged violation; the amount of the penalty demanded; and the names of Commission personnel with whom the demand may be discussed, if the person desires to compromise the penalty. The NDL also will state the deadlines for the institution and completion of compromise negotiations and the consequences of failure to compromise.

(c) *Request for compromise.* Any person receiving a NDL provided for in paragraph (b) of this section may, within the time specified, deny the violation, or submit matters explaining, mitigating or showing extenuating circumstances, as well as make voluntary disclosures of information and documents.

(d) *Criteria for compromise.* In addition to the factors set forth in § 502.603(b), in compromising a penalty claim, the Commission may consider litigative probabilities, the cost of collecting the claim and enforcement policy.

(e) *Disposition of claims in compromise procedures.* (1) When a penalty is compromised and the respondent agrees to settle for that amount, a compromise agreement shall be executed. (One example of such compromise agreement is set forth as appendix A to this subpart.) This agreement, after reciting the nature of the claim, will include a statement evidencing the respondent's agreement to the compromise of the Commission's penalty claim for the amount set forth in the agreement and will also embody an approval and acceptance provision which is to be signed by the appropriate Commission official. Upon compromise of the penalty in the agreed amount, a duplicate original of the executed agreement shall be furnished to the respondent.

(2) Upon completion of the compromise, the Commission may issue a public notice thereof, the terms and language of which are not subject to negotiation.

(f) *Relation to assessment proceedings.* Except by order of the Commission, no compromise procedure shall be initiated or continued after institution of a Commission assessment proceeding directed to the same violations. Any offer of compromise submitted by the respondent pursuant to this section shall be deemed to have been furnished by the respondent without prejudice and shall not be used against the respondent in any proceeding.

(g) *Delegation of compromise authority.* The compromise authority set forth in this subpart is delegated to the Director, Bureau of Hearing Counsel.

§ 502.605 Payment of penalty: method; default.

(a) *Method.* Payment of penalties by the respondent is to be made as follows:

(1) By bank cashier's check or other instrument acceptable to the Commission;

(2) Upon execution of a promissory note containing a confess-judgment agreement, by periodic regular installments, with interest where appropriate, by bank cashier's check or other instrument acceptable to the Commission; or

(3) By combination of the alternatives in paragraphs (a) (1) and (2) of this section.

(b) All checks or other instruments submitted in payment of claims shall be made payable to the Federal Maritime Commission.

(c) *Default in payment.* Where a respondent fails or refuses to pay a penalty properly assessed under § 502.603, or compromised and agreed to under § 502.604, appropriate collection efforts will be made by the Commission, including, but not limited to referral to the Department of Justice for collection. Where such defaulting respondent is a licensed freight forwarder, such default also may be grounds for revocation or suspension of the respondent's license, after notice and opportunity for hearing, unless such notice and hearing have been waived by the respondent in writing.

Appendix A to Subpart W—Example of Compromise Agreement

Compromise Agreement

FMC File No. _____

This Agreement is entered into between:

(1) the Federal Maritime Commission, hereinafter referred to as Commission, and

(2) _____, hereinafter referred to as Respondent.

Whereas, the Commission is considering the institution of an assessment proceeding against Respondent for the recovery of civil penalties provided under the [appropriate statute], for alleged violations of section _____;

Whereas, this course of action is the result of practices believed by the Commission to have been engaged in by Respondent, to wit:

[General description of practices and dates or time period involved]

Whereas, the Commission has authority under the Shipping Act of 1984 and the Shipping Act, 1916, to compromise and collect civil penalties; and,

Whereas, Respondent has terminated the practices which are the basis for the allegations of violation set forth herein, and has instituted and indicated its willingness to maintain measures designed to eliminate these practices by Respondent, its officers, directors or employees.

Now Therefore, in consideration of the premises herein, and in compromise of all civil penalties arising from the alleged violations, Respondent and the Commission hereby agree upon the following terms and conditions of compromise and settlement:

1. Respondent shall make a monetary payment to the Commission herewith, by bank cashier's check, in the total amount of $_____.

2. Upon acceptance in writing of this Agreement by the Director of the Bureau of Hearing Counsel of the Commission, this instrument shall forever bar the commencement or institution of any assessment proceeding or other claim for recovery of civil penalties from the Respondent arising from the alleged violations set forth above.

3. It is expressly understood and agreed that this Agreement is not, and is not to be construed as, an admission by Respondent to the alleged violations set forth above.

(Respondent's Name)
By: _____
Title: _____
Date: _____

Approval and Acceptance

The above terms, conditions and consideration are hereby approved and accepted:

By the Federal Maritime Commission:

Director, Bureau of Hearing Counsel
Date: _____

By the Commission.

Joseph C. Polking,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 90–6, FCC 92–472]

Cellular Radio Service

AGENCY: Federal Communications Commission.

ACTION: Correction to Summary of Report and Order.

SUMMARY: This document provides the Final Regulatory Analysis which was previously omitted from the Summary of the Third Report and Order and Memorandum Opinion and Order on Reconsideration in CC Docket No. 90–6 (FCC 92–472) (Third Report), which was published on Tuesday, November 10, 1992 (57 FR 53446). The Third Report improved licensing procedures for cellular radio in general and also clarified and modified rules concerning the filing and processing of applications for unserved areas in the cellular service.

EFFECTIVE DATE: January 11, 1993.

FOR FURTHER INFORMATION CONTACT: R. Barthen Gorman or B.C. Jackson, Jr., Mobile Services Division, Common Carrier Bureau (202) 632–6400.

SUPPLEMENTARY INFORMATION:

Background

The Third Report which is the subject of this correction concluded a rulemaking proceeding which adopted new rules governing the licensing of cellular radio in general and revised existing rules concerning the filing and processing of cellular applications for unserved areas.

Need for Correction

The summary of the Third Report did not contain a reference to the Commission's compliance with the Regulatory Flexibility Act, as required by Section 604(b) of the Regulatory Flexibility Act, 5 U.S.C. section 604(b). Appendix C of the Third Report contains the Commission's Final Regulatory Analysis.

Correction of Publication

Accordingly, the publication on November 10, 1992, of the Third Report and the final rules [FCC 92–472], which were the subject of FR Doc. 92–27202, is corrected as follows:

Add new subheading and new paragraph 3 at the end of the summary of the Third Report in column 3 on page 53446:

Final Regulatory Analysis

3. Pursuant to the Regulatory Flexibility Act of 1980, the Commission's Final Analysis is as follows:

I. Need and Purpose of This Action

In this document, the Federal Communications Commission adopts separate methods for calculating service in the Gulf of Mexico Metropolitan Statistical Area and over water in other markets. Further, the Commission limits the consideration that an applicant or a party filing a pleading may receive for agreeing to withdraw a mutually exclusive cellular radio application or a pleading, or for refraining from filing a pleading, against a cellular radio application. The Commission also adopts prohibitions against alienating ownership interests in applications for unserved areas. In addition, this document disposes of ten petitions for reconsideration of the Commission's First Report and Order and Memorandum Opinion and Order on Reconsideration, 6 FCC Rcd 6195 (1991), concerning the acceptance, processing, and selection of applications for unserved areas. This document also revises and clarifies rules previously adopted in this docket.

II. Summary of the Issues Raised by the Public Comments in Response to the Initial Regulatory Flexibility Analysis

The public comments in this proceeding did not address regulatory flexibility issues specifically.

III. Significant Alternatives Considered

The Commission considered variations of the method for determining the Cellular Geographic Service Area in the Gulf of Mexico and found the adopted method to be superior to the alternatives considered and appropriate for the purpose intended. Otherwise, the comments received in this proceeding generally support the actions taken herein. Modifications and clarifications of our proposed recently adopted rules which the commenters suggested were considered and some were adopted.

[MM Docket No. 92-293; RM-8128]

Radio Broadcasting Services; Stillwater, OK

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Kenneth R. Greenwood, allots Channel 251A to Stillwater, Oklahoma, as the community's third local commercial FM channel. See 57 FR 60782, December 22, 1992. Channel 251A can be allotted to Stillwater in compliance with the Commission's minimum distance separation requirements with a site restriction of 9 kilometers (6 miles) northwest to avoid a short-spacing to Station KMOD-FM, Channel 248C, and KVOO-FM, Channel 253C, Tulsa, Oklahoma, at coordinates North Latitude 36-09-27 and West Longitude 97-09-20. With this action, this proceeding is terminated.

DATES: Effective June 14, 1993. The window period for filing applications will open on June 15, 1993, and close on July 15, 1993.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order MM Docket No. 92-293, adopted April 22, 1993, and released May 3, 1993. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 625

[Docket No. 930497-3097]

Summer Flounder Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule.

SUMMARY: The Secretary of Commerce (Secretary) amends the regulations implementing the Fishery Management Plan for the Summer Flounder Fishery (FMP). This emergency interim rule revises the percentage of the commercial quota allocated to the states and makes additional quota available to commercial vessels landing summer flounder in the State of Connecticut.

DATES: This emergency interim rule is effective from May 4, 1993, through August 5, 1993.

ADDRESSES: Copies of documents supporting this action may be obtained from: Richard B. Roe, Regional Director, National Marine Fisheries Service, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930-3799.

FOR FURTHER INFORMATION CONTACT: Kathi L. Rodrigues, Resource Policy Analyst, 508-281-9324.

SUPPLEMENTARY INFORMATION: The summer flounder fishery is managed under the FMP, which was developed jointly by the Atlantic States Marine Fisheries Commission (ASMFC) and the Mid-Atlantic Fishery Management Council (Council) in consultation with the New England and South Atlantic Fishery Management Councils. The management unit for the FMP is summer flounder (*Paralichthys dentatus*) in U.S. waters of the Atlantic Ocean from the southern border of North Carolina northward to the Canadian border. Implementing regulations are authorized under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act) and are found at 50 CFR part 625. The regulations were amended on December 4, 1992 (57 FR 57358), by the final rule to implement Amendment 2 to the FMP. These regulations imposed several management measures, including an annual commercial quota allocated to the states on a percentage basis.

Description of This Emergency Action

The Council and ASMFC have requested revision of the state shares of commercial quota specified in Amendment 2 to the FMP. The allocation of the state quota shares was based on historical landings data. This action is requested because, subsequent to approval and implementation of Amendment 2, ASMFC members states recognized that Connecticut's commercial landings were underreported from the early to mid-1980s. In response, they recommended that a proxy for underreported landings in the State of Connecticut should be used to revise the percentage of the 1993 commercial quota allocated to the states and make additional quota available to commercial vessels landing in the State. Specifically, the revision increases Connecticut's quota share by 1.30388 percent or 161,029 pounds (73,042 kg) in 1993. The remaining states share a corresponding decrease, with the decreases ranging from 0.00004 percent of the total or 5 lbs (2.3 kg) to 0.36967 percent of the total or 45,649 lbs (20,706 kg). The total quota for the management unit does not change, but is slightly redistributed. Any quota overages resulting from this redistribution will be deducted in 1994 as specified in § 625.20(d)(2). A separate notice of availability of commercial quota in Connecticut will be published concurrently with this emergency rule. A permanent revision of the state shares will be submitted shortly as Amendment 4 to the FMP.

TABLE 1.—REVISED STATE QUOTA SHARES

State	Percentage	Pounds	Kilograms
Maine	0.04756	5,874	2,664
New Hampshire	0.00046	57	26
Massachusetts	6.82046	842,327	382,077
Rhode Island	15.68298	1,936,851	878,550

TABLE 1.—REVISED STATE QUOTA SHARES—Continued

State	Percentage	Pounds	Kilograms
Connecticut	2.25708	278,749	126,440
New York	7.64699	944,405	428,379
New Jersey	16.72499	2,065,539	936,922
Delaware	0.01779	2,197	996
Maryland	2.03910	251,829	114,229
Virginia	21.31676	2,632,623	1,194,150
North Carolina	27.44584	3,389,565	1,537,497
Total	100.00000	12,350,018	5,601,930

Classification

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has determined that this rule is necessary to respond to an emergency situation and is consistent with the Magnuson Act and other applicable law.

The Assistant Administrator finds for good cause that the reasons justifying promulgation of this rule on an emergency basis also make it impracticable and contrary to the public interest to provide notice and opportunity for comment, or to delay for 30 days the effective date of these emergency regulations under the provisions of sections 553 (b) and (d) of the Administrative Procedure Act. Failure to implement emergency measures would prolong the fishery closures to vessels landing in the State of Connecticut and needlessly harm the fishing industry in that State.

This emergency rule is exempt from the normal review procedures of E.O. 12291 as provided in section 8(a)(1) of that order. The rule is being reported to the Director of the Office of Management and Budget (OMB), with an explanation of why it is not practicable to follow the regular procedures of that order.

This rule is exempt from the procedures of the Regulatory Flexibility Act because the rule is issued without opportunity for prior public comment.

This rule does not involve a collection-of-information requirement subject to the Paperwork Reduction Act.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

NMFS prepared an environmental assessment (EA) for this action and concluded that there will be no significant impact on the human environment. A copy of the EA is available (see **ADDRESSES**).

This rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal management programs of the affected Atlantic coastal states. This determination has been submitted for review by the appropriate State agencies of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, Virginia, Pennsylvania, and North Carolina under section 307 of the Coastal Zone Management Act.

BILLING CODE 3510-22-M

50 CFR Part 625

[Docket No. 920543-2293]

Summer Flounder Fishery

AGENCY: National Marine Fisheries Service, (NMFS), NOAA, Commerce.

ACTION: Notification of commercial quota availability.

SUMMARY: NMFS issues this notification to announce that additional commercial quota for the summer flounder fishery has been made available to the State of Connecticut. Vessels issued a Federal fisheries permit for the summer flounder fishery may land summer flounder in the State of Connecticut until further notification. Regulations governing the summer flounder fishery require publication of this notification to advise the State of Connecticut, and vessel and dealer permit holders, that a commercial quota is available for landing summer flounder in the State.

EFFECTIVE DATE: May 4, 1993.

FOR FURTHER INFORMATION CONTACT: Kathi Rodrigues, 508-281-9324.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found at 50 CFR part 625, as amended on December 4, 1992 (57 FR 57358). The regulations require annual specification of a commercial quota that is apportioned among the states from North Carolina through Maine. The process to set the annual commercial quota and the percent allocated to each state are described in § 625.20. The commercial quota for summer flounder for the 1993 calendar year is set equal to 12.35 million pounds (5.6 million kg) (January 22, 1993, 58 FR 5658). At the time the commercial quota was set, the percent allocated to vessels landing summer flounder in Connecticut was 0.9532 percent or 117,720 pounds (53,397 kg). NMFS issued a notification, February

VOL
58
ISS
87
MY
7
19 93
UMI

18, 1993 (58 FR 8557), announcing that the available commercial quota was harvested for vessels landing in the State of Connecticut.

The percent allocated to vessels landing summer flounder in Connecticut has since been readjusted by an emergency interim rule published in this issue of the **Federal Register** (May , 1993, 58 FR) to 2.25708 percent or 278,749 pounds (126,440 kg). Therefore, the February 16, 1993, notification (58 FR 8557) is rescinded and vessels may again land summer flounder in Connecticut until the available quota is harvested and NMFS issues a notification announcing that no commercial quota is available for landing summer flounder in that State.

Classification

This action is required by 50 CFR part 625 and complies with E.O. 12291.

Authority: 16 U.S.C. 1801 *et seq.*

BILLING CODE 3510-22-M

50 CFR Part 675

[Docket No. 921186-3021]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing the directed fishery for aggregate rockfish species of the genera *Sebastes* and *Sebastolobus* by vessels using trawl gear in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary because the 1993 second seasonal Pacific halibut bycatch mortality allowance for the trawl rockfish fishery category in the BSAI has been reached.

EFFECTIVE DATES: Effective 12 noon, Alaska local time (A.l.t.), May 4, 1993, through 12 noon, A.l.t., July 4, 1993.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, Fisheries Management Division, NMFS, 907-586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by the Secretary of Commerce according to the Fishery Management Plan for the Groundfish Fishery of the BSAI (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

The 1993 Pacific halibut bycatch mortality allowance for the trawl rockfish fishery category, which is defined at § 675.21(b)(1)(iii)(D), is 201 metric tons (mt); the second seasonal apportionment of that allowance is 81 mt for the period April 4, 1993, through July 3, 1993 (58 FR 14524, March 18, 1993).

The Director of the Alaska Region, NMFS, has determined, in accordance with § 675.21(c)(1)(iv), that the second seasonal Pacific halibut bycatch mortality allowance for the trawl rockfish category has been reached. Therefore, NMFS is prohibiting directed fishing for aggregate rockfish species of the genera *Sebastes* and *Sebastolobus* by vessels using trawl gear in the BSAI, from 12 noon, A.l.t., May 4, 1993, through 12 noon, A.l.t., July 4, 1993.

Directed fishing standards for applicable gear types may be found in the regulations at § 675.20(h).

Classification

This action is taken under § 675.21 and complies with E.O. 12291.

Proposed Rules

Federal Register
Vol. 58, No. 87
Friday, May 7, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-NM-65-AD]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking; reopening of comment period.

SUMMARY: This document revises an earlier proposed airworthiness directive (AD), applicable to all Boeing Model 727 series airplanes, that would have required inspections of certain fuselage frames for cracks, and repair, if necessary; and a one-time visual inspection at certain body stations to detect open pilot holes, and repair, if necessary. That proposal was prompted by reports of open pilot holes found in the inboard flange and strap of certain frames. This action revises the proposed rule by removing the requirement to plug any open pilot hole that is found. This action would also add a requirement to inspect open pilot holes to detect cracks; and would add an alternative perform those inspections repetitively, provided no cracks are found. If cracks are found, installation of a preventive modification would be required. The actions specified by this proposed AD are intended to prevent frame failures and consequent rapid decompression of the cabin.

DATES: Comments must be received by June 14, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 91-NM-65-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Phil Forde, Aerospace Engineer, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2771; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 91-NM-65-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 91-NM-65-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations to add an airworthiness directive (AD), applicable to all Boeing Model 727 series airplanes, was published as a supplemental notice of proposed rulemaking (NPRM) in the **Federal Register** on August 27, 1992 (57 FR 38785). That supplemental NPRM would have required inspections of certain fuselage frames for cracks, and repair, if necessary, and a one-time visual inspection at certain body stations to detect open pilot holes, and repair, if necessary. That supplemental NPRM was prompted by reports of open pilot holes found in the inboard flange and strap of certain frames. That condition, if not corrected, could result in frame failures and consequent rapid decompression of the cabin.

Two commenters request that the FAA revise the proposal to required that, if any open pilot hole is found, the pilot hole must be plugged (as specified in the existing supplemental NPRM) and a preventive modification must be installed. One of these commenters states that installing a preventive modification should be required because the location of the pilot holes cannot be controlled and the potential for "figure 8" holes exists, which would reduce the fatigue life of the frame.

The FAA concurs partially. The FAA has re-evaluated its proposed requirement that open pilot holes must be plugged with rivets, and finds that some pilot holes may be too close to an edge or upturned surface, in which case sufficient edge margin or head clearance for a rivet would not be provided. The FAA concludes that this proposed requirement must be removed from the proposal, since plugging the pilot holes may not be possible in all cases and would not provide an additional level of safety. Consequently, the FAA has removed this requirement from this proposal.

The FAA agrees with the commenter's remark that the location of open pilot holes cannot be controlled. The FAA has determined that the possibility exists for open pilot holes to be found in several layers of the built-up structure of the frame/fail-safe strap. The FAA also notes that since open pilot holes located in the underlying structure may not fully align, "figure 8"

UMI

holes may be present in the built-up structure following oversizing the holes in order to plug the holes with rivets. In light of these considerations, the FAA concludes that installation of the preventive modification specified in Boeing Service Bulletin 727–53–0197, Revision 1, dated April 9, 1992, would increase the fatigue life of the frame by adding to its structure. (The preventive modification was described in detail in the existing supplemental NPRM.) Therefore, the FAA has added a requirement to paragraphs (d)(1)(ii) and (d)(1)(iii) of this proposal for installation of the applicable preventive modification specified in the service bulletin (if any open pilot hole is found inside the shaded area specified in the service bulletin) or installation of a preventive modification in accordance with a method approved by the FAA (if any open pilot hole is found outside that shaded area).

Three commenters request that paragraphs (a)(4)(i) and (a)(4)(ii) of the existing supplemental NPRM be revised to remove the requirement to plug open pilot holes if those holes are not cracked. The commenters state that there have been no reports of cracks in open pilot holes on airplanes with over ten years of service and that such service experience should be considered in determining whether the unplugged holes have a propensity for cracking. One commenter does not believe that open pilot holes would pose a threat to safety.

The FAA concurs partially. For reasons explained previously, the FAA agrees with the commenter's request to remove the requirement to plug open pilot holes, regardless of cracking. However, the FAA does not agree with the commenters' assertion that open pilot holes do not pose a threat to safety. Consequently, as discussed previously, the FAA has included in this supplemental NPRM a requirement for installation of the preventive modification in order to increase the load-carrying capability and to decrease the stress on the frame.

Two commenters request that operators be allowed to inspect repetitively if open pilot holes are found, but no crack exists. The commenters state that if this option were included in the AD, operators would be provided more time to schedule the repair while repetitive inspections would ensure the integrity of the fuselage frame in the interim. The FAA concurs. The FAA finds that an option to inspect repetitively to detect cracks in the open pilot holes could be included in this AD without compromising the structural integrity of the fuselage frame and without adversely affecting safety, provided that those inspections are accomplished at intervals not to exceed 6,000 flight cycles and no crack exists in any open pilot hole that is found. Paragraph (d)(1)(i) of this supplemental NPRM includes this alternative. Additionally, the FAA finds that installation of a preventive modification, as described previously, would constitute terminating action for those repetitive inspections.

Since these changes expand the scope of the existing supplemental NPRM, the FAA has determined that it is necessary to reopen the comment period to provide additional opportunity for public comment.

The format of this supplemental NPRM has been restructured for clarification purposes.

There are approximately 1,695 Model 727 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 1,172 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 53 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $3,416,380, or $2,915 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 91–NM–65–AD.

Applicability: All Model 727 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of fuselage frames and depressurization of the airplane, accomplish the following:

(a) For airplanes identified as Group 1 or 2 in Boeing Service Bulletin 727–53–0197, Revision 1, dated April 9, 1992: Prior to the accumulation of 12,000 flight cycles since manufacture, or within 3,000 flight cycles after the effective date of this AD, whichever occurs later, perform an eddy current inspection of the fastener holes and a close visual inspection of the frame flange and web to detect cracks at body stations (BS) 760.95, 783.95, 825.95, and 848.95 in accordance with Part I of the Accomplishment Instructions of the service bulletin.

(1) If any crack is found, prior to further flight, install the applicable preventive modification in accordance with Part III of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the modified frame flange and web are required by this AD.

(2) If no crack is found, prior to further flight, accomplish one of the procedures identified in paragraphs (a)(2)(i), (a)(2)(ii), and (a)(2)(iii) of this AD, in accordance with Part I, paragraph E., of the Accomplishment Instructions of the service bulletin.

(i) Oversize the hole by 1/32 inch and install an oversized fastener. Prior to the accumulation of 12,000 flight cycles after oversizing the hole, and thereafter at intervals not to exceed 6,000 flight cycles, continue to accomplish the inspections required by paragraph (a) of this AD. If any crack is found, prior to further flight, install the applicable preventive modification in accordance with Part III of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(ii) Install the same size fastener that was removed. Thereafter at intervals not to exceed 6,000 flight cycles, continue to accomplish the inspections required by paragraph (a) of this AD. If cracks are found, prior to further flight, install the applicable preventive modification in accordance with Part III of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(iii) Install the applicable preventive modification in accordance with Part III of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(b) For airplanes identified as Group 3, 4, or 5 in Boeing Service Bulletin 727–53–0197, Revision 1, dated April 9, 1992: Prior to the accumulation of 12,000 flight cycles since manufacture, or within 3,000 flight cycles after the effective date of this AD, whichever occurs later, perform an eddy current inspection of the fastener holes and a close visual inspection of the frame flange and web to detect cracks at body stations (BS) 760.95 and 783.95 in accordance with Part II of the Accomplishment Instructions of the service bulletin.

(1) If any crack is found, prior to further flight, install the applicable preventive modification in accordance with Part IV of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(2) If no crack is found, prior to further flight, accomplish one of the procedures identified in paragraphs (b)(2)(i), (b)(2)(ii), and (b)(2)(iii) of this AD, in accordance with Part II, paragraph E. of the Accomplishment Instructions of the service bulletin:

(i) Oversize the hole by 1/32 inch and install an oversized fastener. Prior to the accumulation of 12,000 flight cycles after oversizing the hole, and thereafter at intervals not to exceed 6,000 flight cycles, continue to accomplish the inspections required by paragraph (b) of this AD. If cracks are found, prior to further flight, install the applicable preventive modification in accordance with Part IV of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(ii) Install the same size fastener that was removed. Thereafter at intervals not to exceed 6,000 flight cycles, continue to accomplish the inspections required by paragraph (b) of this AD. If cracks are found, prior to further flight, install the applicable preventive modification in accordance with Part IV of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(iii) Install the applicable preventive modification in accordance with Part IV of the Accomplishment Instructions of the service bulletin. Once this modification is installed, no further eddy current inspections of the fastener holes or close visual inspections of the frame flange and web are required by this AD.

(c) For airplanes identified as Group 1, 2, 3, or 4 in Boeing Service Bulletin 727–53–0197, Revision 1, dated April 9, 1992: Prior to the accumulation of 12,000 flight cycles since manufacture, or within 3,000 flight cycles after the effective date of this AD, whichever occurs later, perform a close visual inspection to detect cracks in the frame gussets at BS 825.95 in accordance with Part V (for Groups 1 and 2 airplanes) or Part VI (for Groups 3 and 4 airplanes) of the Accomplishment Instructions of the service bulletin. Repeat these inspections thereafter at intervals not to exceed 6,000 flight cycles.

(1) If any crack is found, prior to further flight, replace the gusset in accordance with Figure 10 (for Groups 1 and 2 airplanes) or Figure 11 (for Groups 3 and 4 airplanes) of the service bulletin.

(2) Replacement of the gusset in accordance with paragraph (c)(1) of this AD constitutes terminating action for the repetitive inspections required by paragraph (c) of this AD.

(d) For airplanes identified as Group 1, 2, 3, 4, or 5 in Boeing Service Bulletin 727–53–0197, Revision 1, dated April 9, 1992: Prior to the accumulation of 12,000 flight cycles since manufacture, or within 3,000 flight cycles after the effective date of this AD, whichever occurs later, perform a close visual inspection of the inner flange of the frames and the strap on the inner flange at BS 760.95 and 783.95 to detect open pilot holes in accordance with Part VII of the Accomplishment Instructions of Boeing Service Bulletin 727–53–0197, Revision 1, dated April 9, 1992.

(1) If no open pilot hole is found, no further action is required by this AD.

(2) If any open pilot hole is found, perform a close visual inspection to detect cracks in that open pilot hole in accordance with the inspection procedures described in Part VI of the Accomplishment Instructions of the service bulletin.

(i) If no crack is found in any open pilot hole, repeat the inspection required by paragraph (d)(1)(i) of this AD thereafter at intervals not to exceed 6,000 flight cycles until a preventive modification specified in paragraph (d)(1)(ii) or (d)(1)(iii) of this AD, as applicable, is installed.

(ii) If any crack is found in an open pilot hole that is located inside any of the shaded areas shown in Figures 3, 4, and 5 of the service bulletin, prior to further flight, repair the crack and install a preventive modification in accordance with Part III or IV of the Accomplishment Instructions of the service bulletin. Installation of a preventive modification constitutes terminating action for the repetitive inspections of the open pilot holes specified in paragraph (d)(1)(i) of this AD.

(iii) If any crack is found in an open pilot hole that is located outside any of the shaded areas shown in Figures 3, 4, and 5 of the service bulletin, prior to further flight, repair the crack in accordance with Part III or IV of the Accomplishment Instructions of the service bulletin, and install a preventive modification in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Installation of a preventive modification constitutes terminating action for the repetitive inspections of the open pilot holes specified in paragraph (d)(1)(i) of this AD.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on May 3, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

26 CFR Part 1

[EE–14–81]

RIN 1545–AD81

Deductions and Reductions in Earnings and Profits (or Accumulated Profits) With Respect to Certain Foreign Deferred Compensation Plans Maintained by Certain Foreign Corporations or by Foreign Branches of Domestic Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Withdrawal of previous proposed rules and notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the limitations on deductions and

VOL 58 ISS 87 MY 7 1993 UMI

adjustments to earnings and profits (or accumulated profits) with respect to certain foreign deferred compensation plans. These new proposed regulations reflect changes to the applicable law made by the Act of December 28, 1980, as amended by the Technical Corrections Act of 1982, by the Tax Reform Act of 1986, and by the Technical and Miscellaneous Revenue Act of 1988. The new proposed regulations will affect employers (and shareholders of employers) that provide deferred compensation directly or indirectly to foreign employees and will provide the public and Internal Revenue Service personnel with the guidance needed to comply with section 404A of the Internal Revenue Code of 1986. These new proposed regulations supersede the prior proposed regulations published in the **Federal Register** on April 8, 1985 (50 FR 13821).

DATES: Written comments must be received by July 6, 1993. Requests to speak (with outlines of oral comments) at a public hearing scheduled for October 5, 1993, at 10:00 a.m., must be received by September 14, 1993. See notice of hearing published elsewhere in this issue of the **Federal Register**.

ADDRESSES: Send comments, requests to appear at the public hearing, and outlines of comments to be presented to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (EE–14–81), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Elizabeth A. Purcell, Office of the Associate Chief Counsel (Employee Benefits and Exempt Organizations) at (202) 622–6080 (not a toll-free number). Concerning the hearing, Carol Savage, Regulations Unit, at (202) 622–8452 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Statutory Authority

This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) under sections 404A and 7805(a) of the Internal Revenue Code (Code).

Paperwork Reduction Act

The collection of information requirement contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attention: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collection of information requirement in these regulations is in §§ 1.404A–5, 1.404A–6 and 1.404A–7. This information is required by the Internal Revenue Service to determine accurately the correct deductions and reductions in earnings and profits for foreign deferred compensation. The likely respondents are businesses or other for-profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances. The estimated total annual reporting burden is 633,200 hours. The estimated annual reporting burden per respondent varies from 5 hours to 1,000 hours, depending on individual circumstances, with an estimated average of 506 hours. The estimated number of respondents is 1,250. The estimated annual frequency: once.

Background

On April 8, 1985, the Internal Revenue Service published in the **Federal Register** proposed amendments to the Income Tax Regulations under section 404A of the Internal Revenue Code of 1954 (now 1986) (50 FR 13821). Comments were requested and received, and a public hearing was held on September 20, 1985. After consideration of the comments received, the Service has determined that, rather than promulgate final regulations, it is more appropriate to withdraw the original proposed regulations and propose new regulations. This determination is based on a number of factors, including the number of significant substantive changes made to the prior proposed rules, changes to the underlying statute and other relevant Code provisions, and a need to reorganize the regulations. For a general discussion of section 404A and description of the prior proposed regulations, see the preamble to the prior proposed regulations published in the **Federal Register** on April 8, 1985.

The significant differences (or, where appropriate, the significant similarities) between these new proposed regulations and the prior proposed regulations are discussed, section by section, in the remainder of this preamble. Prior proposed § 1.404A–1 remains new proposed § 1.404A–1. However, the rules found in § 1.404A–2 of the prior proposed regulations are now incorporated in new proposed §§ 1.404A–6 and 1.404A–7. Prior proposed §§ 1.404A–3, 1.404A–4, 1.404A–5 and 1.404A–6 are redesignated §§ 1.404A–2, 1.404A–3, 1.404A–4 and 1.404A–5, respectively.

Section 1.404A–1 General Rules Concerning Deductions and Adjustments to Earnings and Profits for Foreign Deferred Compensation Plans

90-Percent Test

As a condition to electing treatment as a qualified foreign plan, section 404A(e)(2) requires that 90 percent or more of the amounts taken into account for a taxable year under the plan be attributable to services performed by nonresident aliens, the compensation for which is not subject to United States federal income tax. Prior proposed § 1.404A–1(c) provided that, in determining whether the 90-percent test is satisfied, accrued benefits may be calculated under any reasonable method. It also provided that the rules for calculating the present value of accrued benefits at normal retirement age (except for the actuarial assumption safe harbor) under § 1.416–1 (concerning the determination whether a retirement plan is top-heavy) are presumed to be reasonable for this purpose.

Many commentators suggested that these rules for calculating accrued benefits for purposes of the 90-percent test are extremely burdensome and disproportionately expensive. They also suggested that the calculations require a degree of precision and accuracy that in many cases is unwarranted by the circumstances (i.e., where very few plan participants are United States citizens or residents and little compensation of the plan participants is subject to United States federal income tax). To give taxpayers in those cases a less burdensome and less expensive means of demonstrating compliance with the 90-percent requirement, a safe harbor provision has been provided in paragraph (c)(2) of new proposed § 1.404A–1. It provides that the 90-percent requirement of § 1.404A–1(a)(3) will be deemed satisfied with respect to a plan if the participants' benefits under the plan increase generally in proportion to their compensation taken into account under the plan, and the sum of (1) the compensation of United States citizens and residents taken into account under the plan, and (2) any other compensation subject to United States federal income tax taken into account under the plan, does not exceed

five percent of all compensation taken into account under the plan for the plan year. This safe harbor provision does not apply, however, if the Commissioner determines that a significant purpose of the plan is to provide benefits not otherwise eligible for tax benefits under the Internal Revenue Code for participants who are United States citizens or residents. An example is provided in new proposed § 1.404A–1(c)(4), to illustrate the application of this safe harbor provision.

Termination Indemnity Plans

Many commentators suggested that the regulations be revised to provide specifically that certain termination indemnity plans are considered deferred compensation plans for purposes of section 404A. The laws of many countries require employers to maintain termination indemnity plans to pay termination benefits. Some of these termination indemnities are payable solely upon involuntary discharge (other than by reason of mandatory retirement) and thus may be viewed as dismissal wage plans under United States tax principles. However, other termination indemnity plans are akin to deferred compensation plans. For example, one commentator noted that, in one European country, employers are required by law to provide severance benefits equal to one month's pay (final pay) for each year of service. These benefits are fully vested and payable upon all events of termination, including retirement.

Because the provisions of termination indemnity plans may vary widely, paragraph (iii) of the definition of deferred compensation in paragraph (e) of new proposed § 1.404A–1 provides guidelines for determining whether such a plan provides deferred compensation. A termination indemnity plan is considered to provide deferred compensation if: (1) a major purpose of the plan is to provide for the payment of retirement benefits, (2) it has a benefit formula providing for payment based at least in part upon length of service, (3) it provides for the payment of benefits to employees (or their beneficiaries) after the employee's retirement, death or other termination of employment, and (4) it meets such other requirements as may be prescribed by the Commissioner with respect to termination indemnity plans. An example is provided under the definition of deferred compensation in paragraph (e) of new proposed § 1.404A–1 to illustrate this provision. Any plan that meets these requirements is treated as providing deferred compensation, whether or not it is called a termination indemnity plan.

Equivalent of a Trust

Section 404A(b)(5)(A) provides that, in order for a contribution to be taken into account in the case of a qualified funded plan, it must be paid to a trust or the "equivalent of a trust". The reference to the equivalent of a trust recognizes that, in some foreign countries, the common law concept of a trust does not exist. Thus, in those countries, the arrangement used to fund deferred compensation benefits for purposes of section 404A(b)(5)(A) must be functionally equivalent to a trust. The essential function of a trust in the context of a United States deferred compensation plan is to provide an entity separate from an employer through which deferred compensation benefits may be secured and liabilities funded. The four elements necessary to accomplish this function are provided in the definition of "equivalent of a trust" in paragraph (e) of new proposed § 1.404A–1. These elements have been revised to allow an employer some latitude to insulate corpus and income from the claims of an employer's creditors, and to remove the concept of legal and beneficial ownership. Finally, the concept of fiduciary duty has been replaced with legally enforceable duty.

Some commentators urged the Service to endorse as the equivalent of a trust the so-called "Security Contract" or "Security Concept" developed in Germany. As explained by those commentators, the Security Contract combines a book reserve commitment by an employer with a pledge and guaranty. First, an employer establishes a book reserve for its pension liabilities for which it receives a tax deduction under German law. It then establishes a wholly-owned subsidiary to which it transfers assets to fund its pension liabilities. As such, the corpus and income of the subsidiary are separately identifiable from an employer's general assets. This arrangement, without more, would not satisfy the requirements of the equivalent of a trust because the assets held by the subsidiary are not protected from the claims of an employer's creditors in the event of bankruptcy or receivership. Under the Security Contract concept, however, the subsidiary also pledges its assets irrevocably to a custodian who then gives a guaranty to the employees to pay the benefits up to the assets pledged to the custodian in the event an employer declares bankruptcy or goes into receivership. The custodian's guaranty is intended to place a prior lien on the assets pledged and protect them from the claims of an employer's creditors in the event of bankruptcy or receivership.

As one commentator asserted, however, it is unclear under German law that the arrangement provides such protection. According to that commentator, in the event of bankruptcy or receivership, the German Pension Guaranty Corporation is required by law to settle an employer's book reserve commitment. The Pension Guaranty Corporation then becomes a non-privileged creditor in the bankruptcy process and exercises any rights the employees have under the plan. As a non-privileged creditor, the Pension Guaranty Corporation is not entitled to all the assets pledged to the custodian, but is limited to a percentage of employer assets that is consistent with its general bankruptcy quota. Thus, it appears that the subsidiary's assets may be subject to the claims of an employer's creditors before all claims of the Pension Guaranty Corporation, exercising the rights of the employees under the plan, are settled.

Until the Service is satisfied that the corpus and income of the subsidiary are to be used to satisfy the claims of the employees and their beneficiaries (or those exercising their rights under the plan) before those of an employer's creditors, the Service cannot endorse this arrangement as the equivalent of a trust.

Exclusive Means for Deduction or Reduction in Earnings and Profits

For foreign plans that fail to satisfy the requirements of section 404A, section 404 governs deductions for deferred compensation expense. For plans that are not qualified under section 401, section 404(a)(5) generally provides that the employer's deduction for contributions is delayed until amounts attributable to the employer's contribution are includible in the plan participant's gross income. In addition, under section 404 (a) (5), deductions are denied altogether unless separate accounts are maintained for each participant. The Service took this position with respect to a foreign plan in Private Letter Ruling 7904042 (Oct. 25, 1978), available in the Freedom of Information Reading Room, room 1569, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224. This position is reflected, in part, in paragraph (a) of new proposed § 1.404A–1.

Prior proposed § 1.404A–1(e) provided that earnings and profits (or accumulated profits) may be reduced with respect to payments by an employer to a funded foreign deferred compensation plan that are not deductible under section 404(a) even where an election under section 404A

VOL

UMI

has not been made. Upon reexamination of the Congressional intent underlying the enactment of section 404A, however, the Service now believes that the position reflected in the prior proposed regulations is inconsistent with the purposes of section 404A (and the limitations thereunder). Thus, in accordance with the Secretary's section 404A(h) authority to prescribe regulations necessary to carry out the purposes of section 404A, paragraph (a) of new proposed § 1.404A–1 provides that section 404A provides the exclusive means by which an employer may reduce earnings and profits for deferred compensation in situations other than those in which a reduction of earnings and profits is permitted under section 404. See also the discussion below of the relevance of sections 61, 671 through 679, and 1001 in this context.

Request for Comments Concerning Foreign Corporations That Are Not Controlled

The Service is considering whether simplified or alternative methods of determining allowable earnings and profits reductions under section 404A might be appropriate for foreign corporations that are not controlled. Suggestions are invited on this matter.

Section 1.404A–2 Rules for Qualified Funded Plans

Substantiality of Payments to Trust

A commentator suggested that the focus of the flush language of paragraph (b) of prior proposed § 1.404A–3 (requiring a trust to have "substantiality") should be on the substantiality of payments to a trust (or the equivalent of a trust) rather than on the substantiality of a trust (or the equivalent of a trust), because the determination with respect to the latter can be made under the standards set forth in prior proposed § 1.404A–1(g)(9). Accordingly, new proposed § 1.404A–2(b)(2)(i) provides that employer contributions must have substance. For example, contributions may not be made in the form of a promissory note. This also means that the contributions must be accumulated in the trust (or the equivalent of a trust) in order to be distributed as benefits under a deferred compensation plan. Whether contributions are being accumulated in the trust (or the equivalent of a trust) to be distributed as benefits will depend on the facts and circumstances. The example in paragraph (b)(5) of new proposed § 1.404A–2 reflects this change.

Exclusive Benefit Rule

Section 404A(b)(5)(A) provides that, in the case of a qualified funded plan, a contribution is taken into account only if it is paid to a trust (or the equivalent of a trust) that meets the requirements of section 401(a)(2). Section 401(a)(2) provides generally that it must be impossible, at any time prior to the satisfaction of all liabilities with respect to employees and their beneficiaries under the trust, for any part of the corpus or income to be used for, or diverted to, purposes other than the exclusive benefit of the employees or their beneficiaries. Thus, in effect, section 404A(b)(5)(A) reemphasizes, with regard to qualified funded plans, the general rule found in section 404A(e) that any "qualified foreign plan" must be for the exclusive benefit of an employer's employees or their beneficiaries. (As stated in the Senate Finance Committee Report, "[f]irst, the plan must be for the exclusive benefit of an employer's employees or their beneficiaries." S. Rep. No. 1039, 96th Cong., 2d Sess. 13 (1980).)

To reflect this emphasis, new proposed § 1.404A–2(b)(2) provides that one important factor that is taken into account in determining whether a trust has or has not been operated in a manner consistent with the exclusive benefit rule is whether it has not or has been involved in a transaction that would be described in section 4975(c)(1) if the plan were the type of plan subject to those rules. For example, a loan from the trust to an employer, on any terms, ordinarily would be a circumstance that strongly suggests noncompliance with section 404A(b)(5)(A). Similarly, a sale, exchange, or lease of any property between the trust and an employer would generally violate this provision. These rules, as set forth in new proposed § 1.404A–2(b)(2), apply prospectively.

Contributions Deemed Made Before Payment

Paragraph (c) of new proposed § 1.404A–2 clarifies the circumstances under which a payment made after the last day of an employer's taxable year is deemed to have been made on that last day.

Frequency of Actuarial Valuations

The new proposed regulations generally continue the requirement in the prior proposed regulations that an actuarial valuation be made no less frequently than once every three years for a qualified funded plan. However, for interim years, they require a reasonable actuarial determination to be made of whether the full funding limit in § 1.404A–5(c)(2) applies to the plan, and provide that the Commissioner may require an actuarial valuation in interim years under appropriate circumstances. It is anticipated that the Commissioner will not exercise this authority except in situations similar to those described in § 1.412(c)(9)–1(d) of the proposed regulations.

Shareholder-Level Consequences

A sentence in paragraph (d)(1) of prior proposed § 1.404A–3 provided that, where a foreign corporation maintained a qualified funded plan, the deductible amount was taken into account for the shareholder's taxable year in which or with which an employer's taxable year ended. This sentence has been deleted because section 404A does not govern the time at which adjustments to earnings and profits of a foreign employer corporation for a particular year are taken into account at the shareholder level.

Section 1.404A–3 Rules for Qualified Reserve Plans

The new proposed regulations have modified in several ways the guidance on the calculation of the amount that may be taken into account under a qualified reserve plan. First, the presentation has been changed in order to parallel the components of net periodic pension cost used in Statement of Financial Accounting Standards No. 87 "Employer's Accounting for Pensions" (1985), available from the Financial Accounting Standards Board, 401 Merritt 7, Norwalk, CT 06856. Thus, the amount taken into account for a year is based on the sum of a type of "service cost", "interest cost" and the amortization of the increase or decrease in the reserve from other sources. As part of this change, the steps for determining the actuarial gain or loss have been made explicit. In addition, as discussed below, certain increases or decreases in the reserve that were subject to amortization under the old proposed regulations are now included in the reasonable addition to the reserve.

Ten-Year Amortization

Section 404A (c)(4) provides for the spreading over ten years of certain increases and decreases in reserves on account of various events including a catch-all category of "such other factors as may be prescribed by regulations". The Senate Finance Committee Report includes two suggestions of possible items that could be included in this category: "adjustments in the reserve resulting from changes in levels of

compensation on which benefits depend or the vesting in one year of a benefit which was accrued in a prior year." S. Rep. No. 1039, 96th Cong. 2d. Sess. 14 (1980).

Some commentators criticized the rule in paragraph (d) of prior proposed § 1.404A–4 providing for the amortization of changes in the reserve arising from these two sources. They suggested that the ten-year amortization requirement for increases or decreases to the reserve on account of changes in the level of compensation upon which plan benefits depend, and for vesting of benefits accrued in prior years, was unnecessary because those items are ongoing costs of the plan that are specifically contemplated by the plan and will arise periodically as each participant's circumstances dictate. Thus, those increases or decreases can be expected to occur regularly in the aggregate and will not create the "bunching" that section 404A (c)(4) was designed to avoid.

The new proposed regulations respond to commentators' concerns by incorporating certain increases in the reserve (as described below) into the definition of the reasonable addition to a reserve, subject to an anti-abuse rule. The effect of this change is to allow immediate recognition, rather than ten-year amortization, of these changes. Under normal circumstances this immediate recognition will not result in significant bunching of income or deductions. Further, to the extent bunching occurs, abuse potential is limited because the bunching is the result of a deferral of deductions rather than the recognition of these items. Finally, as discussed below, for taxable years beginning after December 31, 1986, the indirect foreign tax credit is determined using post-1986 earnings and profits (i.e., aggregated for all post-1986 years). Use of a multi-year earnings and profits pool diminishes the effect of bunching on the foreign tax credit.

The increases in reserve that are now included in the reasonable addition to the reserve are those increases that result from expected changes in compensation and from the increase in vesting for employees whose liabilities were included in the reserve as of the beginning of the year. Thus, for example, the reasonable addition to the reserve may reflect an expected increase in compensation of five percent and expected changes in the vesting percentage in the current year for all employees in the reserve as of the beginning of the year. By contrast, any increase in reserve that results from compensation changes that are greater than expected or from the inclusion of newly-vested employees who were not included in the prior year's reserve are categorized as actuarial losses subject to ten-year amortization.

Section 1.404A–4 United States and Foreign Law Limitations on Amounts Taken Into Account for Qualified Foreign Plans

Section 404A(d) Limitation—Pooling of Earnings and Profits

Section 404A(d)(3) provides that, in determining the earnings and profits (and accumulated profits) of any foreign corporation with respect to a qualified foreign plan, the amount determined under section 404A with respect to any plan for any taxable year must not exceed the amount allowed as a deduction under the appropriate foreign law for such taxable year. As the legislative history makes clear, this limitation was imposed in response to "the possibilities for distortion of a taxpayer's indirect foreign tax credit which are presented by the present annual system for determining the amount of the foreign taxes paid by a subsidiary which are attributable to dividends paid to U.S. shareholders." S. Rep. No. 1039, 96th Cong., 2d Sess. 15 (1980). The legislative history further makes clear that "[t]his potential for distortion might be eliminated if the indirect credit were computed with reference to the subsidiary's accumulated foreign taxes and undistributed accumulated profits for all years." *Id.*

Section 1202(a) of the Tax Reform Act of 1986 amended section 902 to provide for computation of the indirect foreign tax credit by pooling all post-1986 earnings and profits and all post-1986 creditable foreign taxes. These amendments to section 902 prevent the distortion at which section 404A(d)(3) was aimed. Section 1012(b)(4) of the Technical and Miscellaneous Revenue Act of 1988 added specific regulatory authority to section 404A(d)(3) (retroactive to enactment of the Tax Reform Act of 1986), to take this change in the law into account. Accordingly, pursuant to that grant of regulatory authority, new proposed § 1.404A–4 provides that, for taxable years beginning after December 31, 1986, the reduction of earnings and profits of a foreign corporation with respect to a qualified foreign plan is determined without regard to the tax deduction under foreign law for that year. This new rule allows any amount that is disallowed for a year (because the foreign tax deduction for that year is greater than the amount allowed under section 404A (b) or (c)) to be carried forward to a future year, in which it may increase the amount allowable under section 404A.

Section 404A(d) Limitation

Section 404A(d)(1) provides that the annual amount allowable under section 404A "shall equal" the lesser of the cumulative United States amount or the cumulative foreign amount, reduced by the aggregate amount. Prior proposed § 1.404A–5(a) provided that the annual amount allowable "shall not exceed" these cumulative amounts. The new proposed regulations adopt the language of the statute. See new proposed § 1.404A–4(b).

Foreign Currency Rules

One commentator requested guidance with respect to a number of foreign currency issues. Sections 985–989 were subsequently enacted by the Tax Reform Act of 1986. These sections, effective for taxable years beginning after December 31, 1986, address many of the problems identified by the commentator. Paragraph (d)(1) in new proposed § 1.404A–4 clarifies that, for taxable years beginning after December 31, 1986, income or loss of foreign branches and earnings and profits (or deficits in earnings and profits) of foreign corporations are determined in functional currency as defined in section 985. For taxable years beginning before January 1, 1987, paragraph (d)(2) in new proposed § 1.404A–4 provides that the rules in effect for those taxable years determine the amount of income or loss or earnings and profits (or deficit in earnings and profits) for the foreign branch or subsidiary. A new paragraph (d)(3) provides special rules for those circumstances where the net worth method of accounting is used.

Section 1.404A–5 Additional Limitations on Amounts Taken Into Account for Qualified Foreign Plans

New proposed § 1.404A–5 clarifies the evidentiary requirements and rules on actuarial assumptions. No significant changes are made to the rules in prior proposed § 1.404A–6, which are now contained in new proposed § 1.404A–5.

Section 1.404A–6 Elections Under Section 404A and Other Changes in Accounting Method

Time and Manner for Making Elections

Paragraph (b)(5) of prior proposed § 1.404A–2 provided that elections made under section 404A must be made no later than the time prescribed by law for filing the United States tax return for a United States taxpayer's taxable year. For a qualified foreign plan maintained by a foreign corporation, the regulations

VOL
58
ISS
87
MY
7
1993
UMI

have been modified to conform the filing requirements to the general rules applicable to tax accounting elections on behalf of foreign corporations under section 964. For example, under the new proposed regulations, a section 404A election need not be made before the United States shareholder's tax liability is affected by the earnings and profits of the foreign corporation. Such an effect on the United States shareholder's tax liability may occur as the result of any of the following: a dividend distribution, an income inclusion under section 951(a), a section 1248 transaction, a section 864(e) basis adjustment by earnings and profits, or an inclusion in income of the earnings of a qualified electing fund under section 1293(a)(1).

The prior proposed regulations provided that, in order for "protective" or "Method (2)" elections to be effective, taxpayers who made those elections had to file amended returns no later than 90 days after the date on which the final regulations were published in the **Federal Register**. See Ann. 81–114, Ann. 81–148 and Ann. 82–128, reproduced as an appendix to this preamble. Otherwise, the elections would have no effect. Numerous commentators suggested that the 90-day period is inadequate for taxpayers to evaluate the final regulations, collect the required data, make the appropriate actuarial calculations, decide whether the election is beneficial, and file the required returns. Thus, the deadlines for perfecting retroactive elections and making or perfecting certain other elections in new proposed § 1.404A–7 have generally been extended to 365 days after the publication of final regulations.

Single Plan

As originally proposed, § 1.404A–2(b)(6)(i) provided that an election may be made with respect to each plan that qualifies as a "single plan". The term "single plan" has for this purpose the same definition as it has in § 1.414(l)–1(b). Commentators asked for an illustration of the application of this single plan rule to an existing deferred compensation plan that is split into two single plans for purposes of section 404A. Thus, a new example has been added in paragraph (a)(2) of new proposed § 1.404A–6.

Section 481(a) Adjustment

New proposed § 1.404A–6(a) addresses the adoption of methods of accounting and changes in methods of accounting with respect to a foreign deferred compensation plan for which an election under section 404A has been made. It clarifies, for example, that an initial election with respect to a pre-existing plan, termination of an election, revocation of an election, and a change in actuarial funding method, constitute changes in methods of accounting under section 446(e) and section 481(a). To compute the section 481(a) adjustment upon a change in method of accounting under section 404A, § 1.404A–6(f)(6) of the prior proposed regulations required a historical computation. Taxpayers were to compute contributions, deductions or reductions in earnings and profits from the establishment of the plan to the first day of the first year in which a section 404A election was made. Commentators argued that this historical approach was unduly burdensome.

The new proposed regulations respond to commentators' concerns by generally replacing the historical computation requirement with a "snapshot" approach to determining the amount of the section 481(a) adjustment for purposes of section 404A. As illustrated below, the snapshot approach is adopted in the proposed regulations in an effort to reduce substantially taxpayers' recordkeeping and compliance burdens.

The snapshot approach is generally intended to compare (i) the extent to which an employer has accelerated deductions (or reductions in earnings and profits) under its old method of accounting for deferred compensation with (ii) the acceleration (if any) that would have been allowed under its new method of accounting. In the interest of avoiding historical calculations and other complexities, the snapshot approach generally attempts to compare the old and new methods of accounting based, to the extent possible, on actual reserve or fund balances existing at the time of the change. These balances generally have been reduced for amounts actually paid to plan participants and beneficiaries. However, amounts actually paid to participants and beneficiaries would be the same under both an employer's old method and its new method of accounting. Therefore, deductions attributable to such payments can be eliminated from consideration in determining both the old and the new method amounts that are compared.

In other words, in the case of both the old method and the new method of accounting, the extent of acceleration is measured by reference to a common baseline: the amount actually paid to plan participants and beneficiaries (i.e., a pay-as-you-go method). Thus, the snapshot approach generally measures the extent to which an employer, under its old method of accounting, has claimed deductions (or reductions in earnings and profits) that exceed the amount actually paid to plan participants and beneficiaries as of the change in accounting method. This amount (generally referred to as the "Old Method Closing Amount") is then compared to the deductions (or reductions in earnings and profits) in excess of the amount actually paid to plan participants and beneficiaries that the employer would have claimed for the same period under its new method of accounting (generally referred to as the "New Method Opening Amount"). The section 481(a) adjustment is equal to the difference between the Old Method Closing Amount and the New Method Opening Amount. The comparison is based on the status of the plan as the beginning of the year of a change in accounting method.

To illustrate, if the employer has used a funded method of accounting for deferred compensation, the Old Method Closing Amount equals the amount of the fund balance as of the beginning of the year that the accounting method is changed. In determining the amount of the section 481(a) adjustment for purposes of section 404A, this fund balance is compared with a New Method Opening Amount. The New Method Opening Amount will depend on which new method of accounting the employer elects. If the employer makes a qualified funded plan election, the New Method Opening Amount generally will equal the amount of the fund balance, adjusted as appropriate to reflect the limitations in section 404A (b) and (d) on prior contributions to the fund that could have been taken into account under section 404A. If, however, the employer makes a qualified reserve plan election, the New Method Opening Amount generally will be the amount of the reserve under section 404A(c). Alternatively, if the new method of accounting is a non-section 404A method (i.e., a pay-as-you-go method), the New Method Opening Amount generally will be zero.

As the foregoing discussion indicates, the new method will not necessarily be a section 404A method (a qualified funded plan method or qualified reserve plan method), and the old method will not necessarily be a non-section 404A method. The section 481(a) adjustment and the proposed snapshot approach to computing the adjustment apply whether the employer is changing to or from a section 404A method or from one section 404A method to another. For example, assume that a foreign branch has a qualified funded plan with a trust fund balance of 15 of functional currency (as defined in section 985(b)). Assume that this fund balance resulted from FC10 of deductible contributions to the fund under section 404A, plus FC5 of net investment income earned within the fund. Under the snapshot approach, the Old Method Closing Amount upon a change to qualified reserve plan treatment is FC15. Assuming that the reserve under the qualified reserve plan method is FC20 as of the date of the method change, the New Method Opening Amount is FC20, and the amount of the section 481(a) adjustment under section 404A is a negative FC5.

By using the amount of the fund balance in determining both the Old Method Closing Amount and the New Method Opening Amount, the proposed regulations require consideration of both the deductions previously taken by the employer and the accumulated net income (or inside build-up) of a fund in calculating the amount of the section 481(a) adjustment for purposes of section 404A. The Service believes that, in addition to permitting the adoption of a simplified method for determining the section 481(a) adjustment, consideration of a fund's accumulated net income under the snapshot approach avoids additional complexities that might result from the application of sections 61 and 1001 at the time of an election under section 404A. For example, consider an employer that makes a qualified funded plan election after having used a funded method of accounting for a foreign deferred compensation plan that is not a qualified funded plan. Ordinarily, the value of the fund (which is used to satisfy the employer's plan liabilities) will exceed the employer's contributions to the fund (net of the fund's previous payments to plan participants and beneficiaries). If the snapshot method were not applied, arguably sections 61 and 1001 would result in a recognition of income (or increase in earnings and profits) by the employer at the time of the election equal to the excess of the value of the fund over the employer's basis in the fund. This result is consistent with the treatment of a change in method of accounting that consists of a qualified funded plan election as involving a change in the status of the fund from a grantor trust (defined and treated in accordance with sections 671 through 679) to a non-grantor trust (treated in a manner analogous to the treatment of a trust under a section 401(a) tax-qualified plan). The Service solicits comments from interested parties on this analysis and on the utility of the snapshot approach in reducing taxpayer burden.

Effect of Section 404A(d)(1) Limits on Section 481(a) Adjustment Computation

Since the limitations of section 404A(d)(1) are part of the section 404A method of accounting under the new proposed regulations, the snapshot section 481(a) adjustment calculation must take into account the cumulative foreign amount limitation in section 404A(d) and new proposed § 1.404A–4. This is a departure from § 1.404A–6(f)(9) in the prior proposed regulations. The snapshot approach includes a simplified method to make this adjustment in computing the section 481(a) adjustment. More specifically, paragraph (g) of new proposed § 1.404A–6 allows taxpayers to use the snapshot approach to compute the initial cumulative United States and foreign law limitations under section 404A(d) as of the beginning of a year of change in method of accounting. The rules to initialize the cumulative United States amount, cumulative foreign amount and the aggregate amount rely on the constant relationship between these three amounts (i.e., the aggregate amount always equals the lesser of the two cumulative amounts).

Section 481(a) Adjustment Period

As required by section 404A(g)(5), the period for taking into account the section 481(a) adjustment arising from an election or a re-election under section 404A is 15 years. Additionally, new proposed § 1.404A–6(e)(2)(iii) provides for a six-year section 481(a) adjustment period for a change in method of accounting arising from the termination or revocation of an election under section 404A, and for any other change in accounting method under section 404A. This new paragraph also requires netting of any section 481(a) adjustment remaining from a previous change in method in determining the amount to be taken into account during the six-year section 481(a) adjustment period. The example in new proposed § 1.404A–6(e)(4) illustrates this netting rule.

Examples in the new proposed regulations illustrate the principle under section 446(e) and its underlying administrative procedures that the District Director may modify a taxpayer's calculated section 481(a) adjustment under section 404A if the District Director (1) determines that the taxpayer used an erroneous method of accounting in an open year prior to the year in which the taxpayer's qualified funded plan or qualified reserve plan election is effective, and (2) requires the taxpayer to change its erroneous method of accounting in that earlier open year. For example, if a taxpayer erroneously deducted FC100 for amounts accrued under a reserve plan in an open year prior to the effective date of a qualified reserve plan election under section 404A, the District Director could require the taxpayer to change its method of accounting in that earlier open year and to take a positive FC100 section 481(a) adjustment into account entirely in that earlier open year (rather than permitting the positive FC100 amount to be netted against any New Method Opening Amount under the snapshot approach and spread prospectively over a 15-year section 481(a) adjustment period). See section 2.02 of Rev. Proc. 92–20, 1992–1 C.B. 685.

Section 1.404A–7 Effective Date and Retroactive Application

Prior proposed § 1.404A–2(c), relating to retroactive elections, has been moved to § 1.404A–7. This change was made because the rules relating to retroactive elections are relatively discrete and thus logically should be set apart from the general election rules. Because the importance of these rules will greatly diminish within a few years, their placement at the end of the regulations will improve the clarity of the remainder of the regulations for the future. Other specific changes to the retroactive election rules are discussed below.

All-Or-Nothing Rule

Many commentators criticized the rule in paragraph (c)(2)(ii) of prior proposed § 1.404A–2 as an improper interpretation of section 2(e)(2) of the Act of December 28, 1980 (Pub. L. 96–603). Prior proposed § 1.404A–2(c)(2)(i) provided that a taxpayer could elect, during its "open period", for section 404A to apply to a qualified foreign plan maintained by a foreign subsidiary. However, prior proposed § 1.404A–2(c)(2)(i) conditioned that election for any plan on a taxpayer electing to apply section 404A with respect to all written plans of every foreign subsidiary (whether or not wholly owned) that defer the receipt of compensation and that satisfy the requirements of section 404A(e) (1) and (2). Commentators argued that the "all-or-nothing rule" of section 2(e)(2) of the Act of December 28, 1980, simply provides that a taxpayer may elect to have section 404A apply for certain prior years, and that such an election must be made for all of a taxpayer's foreign subsidiaries. It does not, however, require that a taxpayer make an election under section 404A for any of its foreign subsidiaries' plans.

VOL 58 ISS 87 MY 7 1993 UMI

According to this view, once the election is made to have section 404A apply to the foreign subsidiaries for prior years, the consequences of making or not making an election under section 404A will be determined as though section 404A had been in effect for those years.

After further consideration, the proposed regulations adopt the commentators' view of section 2(e)(2) of the Act of December 28, 1980. Thus, if a taxpayer makes an election to have section 404A apply retroactively to its foreign subsidiaries during its open period, the election to have section 404A apply must be made for all of a taxpayer's foreign subsidiaries (whether or not wholly owned) during a taxpayer's open period. Accordingly, if a taxpayer elects to have section 404A apply during a taxpayer's open period, it may not rely on any other law or rule of law to reduce earnings and profits (or accumulated profits) of any foreign subsidiary with respect to deferred compensation expenses, regardless of whether the taxpayer elects to apply section 404A to any specific deferred compensation plan. Paragraph (b) of new § 1.404A–7 reflects this view, and paragraph (c)(5) illustrates this rule with an example.

Making, Perfecting and Revoking Retroactive Elections

New proposed § 1.404A–7 provides rules for making, perfecting and revoking retroactive effective date elections as well as retroactive plan-by-plan elections for qualified foreign plans maintained by foreign subsidiaries and for qualified funded plans maintained by foreign branches. Taxpayers are afforded 365 days after publication of the final regulations to decide whether to perfect or revoke retroactive elections or to make, revoke or re-elect in intervals of six or more years, effective for taxable years in the open period (as defined in new proposed § 1.404A–7(g)(6)) and continuing after taxable years beginning after December 31, 1979. Taxpayers must file amended returns and attach statements in order to perfect a retroactive election and to conform all items to the treatment consistent with election or revocation. If the amended returns and statements are not timely filed, the retroactive elections will be deemed revoked.

Alternative to Contemporaneous Evidence Requirement

Many commentators criticized the rule in prior proposed § 1.404A–2(c)(4)(iii) prohibiting a retroactive election if a taxpayer was unable to calculate the requisite section 481(a) adjustment based upon actual data, because, in effect, it unduly restricted taxpayers' ability to make retroactive elections. The commentators were concerned that many taxpayers would lack "actual data", and thus be unable to make the election, and that, even if such data were technically available, its retrieval would be prohibitively burdensome. After further consideration, the Service has altered this requirement. Accordingly, new proposed § 1.404A–7(f) provides that the section 481(a) adjustment must be made based upon contemporaneous substantiation quality data. If contemporaneous substantiation quality data is not readily available, however, the adjustment may be based on data which are combinations of actual contemporaneous evidence and reasonable actuarial backward projections of substantiation quality data.

For the convenience of taxpayers, Ann. 81–114, 1981 I.R.B. 21, Ann. 81–148, 1981–39 I.R.B. 15, and Ann. 82–128, 1982–39 I.R.B. 103, concerning Method (1) and Method (2) elections, are reproduced below.

Appendix

Announcement 81–114, 1981–28 I.R.B. 21

This announcement provides guidance relating to section 404A of the Internal Revenue Code. Until proposed regulations are published, taxpayers may rely on the guidance provided below.

Section 404A, added by the Act of December 28, 1980 Pub. L. 96–603 (1981–5 I.R.B. 31), allows taxpayers to make certain elections concerning deductions for amounts paid or accrued by an employer under qualified foreign plans. The two types of qualified foreign plans are qualified funded plans and qualified reserve plans. A qualified foreign plan is any written plan which defers the receipt of compensation and which satisfies two requirements. First, the plan must be for the exclusive benefit of the employer's employees or their beneficiaries. Second, 90 percent or more of the amounts taken into account for the taxable year under the plan must be attributable to services performed by nonresident aliens, the compensation for which is not subject to federal income tax. In addition, the employer must properly elect to have section 404A apply to such plan. If an employer does not make such an election, deductions (or reductions in earnings and profits) are allowed only as provided under section 404 for plans and trusts meeting the requirements of that section.

The rules of section 404A are applicable for taxable years beginning after December 31, 1979, and for certain prior years to the extent the taxpayer elects to have the provisions of section 404A of the Code apply retroactively. Pending the issuance of regulations relating to such elections, the elections referred to in section 404A (e)(3) and (f)(2) of the Code may be made either by (1) claiming the permissible deduction or credit on the taxpayer's income tax return for the first taxable year ending on or after December 31, 1980, including extensions (or an amended return that is filed no later than the end of the extended time period prescribed in section 6081, whether or not such time is actually extended for filing the taxpayer's return), or (2) attaching a statement of election to the taxpayer's income tax return within the time period described in the first method. If the election is made by attaching a statement of election under method (2), the taxpayer's current return would not include deductions or in the case of foreign subsidiaries, take into account reductions in earnings and profits that relate to foreign deferred compensation plans. Deductions or credits consistent with the election would be included on an amended return, to be filed no later than the deadline (described below) for revoking the election. Under either method, the taxpayer must attach to the return a list of plans with respect to which the elections are made. Method (1) or method (2) may also be used for the elections described in section 2(e) of Pub. L. 96–603. When method (2) is used in connection with section 2(e) of Pub. L. 96–603, taxpayers need not amend past returns until regulations are issued.

A taxpayer must determine the amount deductible under section 404A (d) based, in part, on the cumulative foreign amount as defined in section 404A (d)(2)(B). No deduction is allowable under section 404A unless the cumulative foreign amount is established in one of the documents described in section 404A (g)(2)(A)(i), (ii) or (iii) of the Code. Section 404A (g)(2)(A)(iii) authorizes the Secretary to promulgate regulations that would accept certain unspecified statements or evidence as being sufficient to establish the amount of the deduction under foreign law. Until such time as regulations are promulgated under section 404A (g)(2)(A)(iii), the requirements of that section will be considered to be satisfied by a statement prepared at or before the time the return is filed, which lists separately for each plan the cumulative foreign amount and which states that such cumulative foreign amount has been determined pursuant to the requirements of the appropriate foreign tax law. The statement must be prepared by the U.S. taxpayer or a person authorized to practice before the Service. While a taxpayer need not attach any of these documents to its tax return, the taxpayer must furnish the documents for examination upon request of the Internal Revenue Service.

Taxpayers that have made the elections described in section 404A and/or section 2(e) of Pub. L. 96–603 under method (2) need not prepare the statement, described in the immediately preceding paragraph, until they amend their returns. In addition, taxpayers that have made the election described in section 404A for taxable years beginning after December 31, 1979, under Method (1), and have made the election described in section 2(e) of Pub. L. 96–603 under method (2) will satisfy section 404A (g)(2)(A)(iii) if the cumulative foreign amount in the statement reflects the aggregate foreign deductions allowed under foreign law for taxable years commencing after December 31, 1979.

Taxpayers that have already made an election, referred to in this announcement, that does not conform with the requirements stated herein may perfect that election on an amended return filed by the later of September 23, 1981 or by the due date of the taxpayer's income tax return for the first taxable year beginning after December 31, 1979, including extensions. These taxpayers may also satisfy section 404A (g)(2)(A)(iii), to the extent applicable as previously described in this announcement, by preparing the required statement within the same time limits for perfecting the elections under sections 404A (e)(3) and (f)(2).

The qualified reserve plan election, including any retroactive election described in section 2(e)(2) of Pub. L. 96–603, may be revoked on an amended return for the first taxable year ending on or after December 31, 1980, without the consent of the Commissioner until 90 days after the publication of final regulations regarding such elections. Similarly, the qualified foreign plan election and the retroactive election described in section 2(e)(3) may be revoked within the same period.

It is anticipated that the effective date of the final regulations generally will be for taxable years beginning after December 31, 1979, and such prior years as may be affected by an election under section 2 (e) of Pub. L. 96–603. Accordingly, taxpayers may be required to amend their tax returns to the extent that deductions or credits claimed are inconsistent with final regulations.

Announcement 81–148, 1981–39 I.R.B. 15

On June 24, 1981, the Internal Revenue Service issued Announcement 81–114, 1981–28 I.R.B. 21. The announcement was intended to provide pre-regulation guidance to taxpayers concerning recent legislation under section 404A. Taxpayers have expressed concern with respect to a statement in that announcement, with respect to reductions of earnings and profits if section 404A is not elected. Announcement 81–114 is clarified as follows:

The decision not to elect section 404A will not effect the computation of earnings and profits with respect to contributions to plans as allowed under prior law. In the case of an accrued liability to a reserve plan, however, such accrued liability reduces earnings and profits only as provided in section 404A with respect to the taxable years described in section 2(e) of Pub. L. 96–603, 1980–2 C.B. 684.

Announcement 82–128, 1982–39 I.R.B. 103

Taxpayers that are interested in making the elections referred to in section 404A (e)(3) and (f)(2) of the Internal Revenue Code may continue to use the "method (1)" or "method (2)" election described in Announcement 81–114, 1981–28 I.R.B. 21 for taxable years beginning after December 31, 1979, until further guidance is made available. Pending the issuance of regulations under section 404A, qualified foreign plans must comply with the reporting requirements and other rules contained in Announcement 81–114.

Effective Dates

The amendments are proposed generally to apply to taxable years beginning after December 31, 1979. The prohibited transaction rules in § 1.404A–2(a) are proposed to be effective May 7, 1993. If a taxpayer elected pursuant to section 2(e)(2) of the Act of December 28, 1980, the amendments are proposed to apply to certain prior taxable years beginning after December 31, 1970.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these proposed regulations and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests to Appear at the Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying in their entirety. Because the Treasury Department expects to issue final regulations on this matter as soon as possible, a public hearing will be held at 10 a.m. on October 5, 1993, in room 2615, Internal Revenue Building, 1111 Constitution Ave., NW., Washington, DC. Written comments must be received by July 6, 1993. Requests to speak (with outlines of oral comments) at the public hearing must be received by September 14, 1993. See notice of hearing published elsewhere in this issue of the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Elizabeth A. Purcell of the Office of the Associate Chief Counsel (Employee Benefits and Exempt Organizations), Internal Revenue Service. However, personnel from other offices of the Service and Treasury Department participated in their development.

List of Subjects in 26 CFR 1.401–0 Through 1.419A–2T

Bonds, Employee benefit plans, Income taxes, Pensions, Reporting and recordkeeping requirements, Securities, Trusts and trustees.

Withdrawal of Proposed Amendments

The proposed amendments to 26 CFR part 1, relating to §§ 1.404A–0, 1.404A–1, 1.404A–2, 1.404A–3, 1.404A–4, 1.404A–5 and 1.404A–6, published in the **Federal Register** for April 8, 1985 (50 FR 13821), are withdrawn.

Proposed Amendments to the Regulations

Accordingly, the proposed amendments to 26 CFR part 1 are added to read as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citations to read as follows:

Authority: 26 U.S.C. 7805 * * *

§§ 1.404A–1, 1.404A–2, 1.404A–3, 1.404A–4, 1.404A–5, 1.404A–6 and 1.404A–7 also issued under 26 U.S.C. 404A. * * *

Par. 2. Sections 1.404A–0 through 1.404A–7 are added as follows:

§ 1.404A–0 Table of Contents.

This section 1.404A–0 lists the major headings that appear in §§ 1.404A–1 through 1.404A–7.

§ 1.404A–1 General Rules Concerning Deductions and Adjustments to Earnings and Profits for Foreign Deferred Compensation Plans

(a) In general.
(b) 90-percent test.
(1) Reserve plans.
(2) Funded plans.
(c) Calculation of 90 percent amounts.

(2) Protective or Method (2) election.
(3) Open years of the taxpayer.
(4) Retroactive period.
(5) Transition period.
(6) Open period.

§ 1.404A–1 General rules concerning deductions and adjustments to earnings and profits for foreign deferred compensation plans.

(a) *In general.* Section 404A provides the exclusive means by which an employer may take a deduction or reduce earnings and profits for deferred compensation in situations other than those in which a deduction or reduction of earnings and profits is permitted under section 404. A deduction or reduction of earnings and profits is permitted under section 404A for amounts paid or accrued by an employer under a foreign deferred compensation plan, in the taxable year in which the amounts are properly taken into account under §§ 1.404A–1 through 1.404A–7, if each of the following requirements is satisfied:

(1) The plan is a written plan maintained by the employer that provides deferred compensation.

(2) The plan is maintained for the exclusive benefit of the employer's employees or their beneficiaries.

(3) 90 percent or more of the amounts taken into account under the plan are attributable to services performed by nonresident aliens, the compensation for which is not subject to United States federal income tax.

(4) An election under § 1.404A–6 or 1.404A–7 is made to treat the plan as either a qualified funded plan or a qualified reserve plan and to select a plan year.

(b) *90-percent test*—(1) *Reserve plans.* Paragraph (a)(3) of this section is not satisfied by a reserve plan unless 90 percent or more of the actuarial present value of the total vested benefits (i.e., benefits not subject to substantial risk of forfeiture) accrued under the plan is attributable to services performed by nonresident aliens, the compensation for which is not subject to United States federal income tax.

(2) *Funded plans*—(i) *Individual account plans.* Paragraph (a) (3) of this section is not satisfied by a funded plan with individual accounts unless 90 percent or more of the amounts allocated to individual accounts (as described in section 414 (i)) under the plan are allocated to the accounts of nonresident aliens and are attributable to services the compensation for which is not subject to United States federal income tax.

(ii) *Plans without individual accounts.* Paragraph (a) (3) of this section is not satisfied by a funded plan not described in paragraph (b) (2) (i) of this section unless 90 percent or more of the actuarial present value of the total benefits accrued under the plan is attributable to services performed by nonresident aliens the compensation for which is not subject to United States federal income tax.

(c) *Calculation of 90 percent amounts*—(1) *In general.* In determining whether the tests described in paragraphs (b) (1) and (b) (2) (ii) of this section are satisfied, accrued benefits and the actuarial present values of accrued benefits may be calculated under any reasonable method. See § 1.404A–5 (a) for rules describing the calculation of accrued benefits attributable to services for which the compensation is subject to United States federal income tax.

(2) *Safe harbor.* The requirement of paragraph (a)(3) of this section will be deemed satisfied with respect to a plan if—

(i) The participants' benefits under the plan increase generally in proportion to their compensation taken into account under the plan; and

(ii) The sum of the following amounts does not exceed five percent of all compensation taken into account under the plan for the plan year—

(A) The compensation of United States citizens and residents taken into account under the plan; and

(B) Any other compensation subject to United States federal income tax taken into account under the plan.

(3) *Anti-abuse rule.* Notwithstanding paragraph (c)(2) of this section, the requirement of paragraph (a)(3) of this section will not be deemed satisfied under paragraph (c)(2) of this section if the Commissioner determines that a significant purpose of the plan is to secure benefits not otherwise eligible for tax benefits under the Internal Revenue Code to participants who are United States citizens or residents.

(4) *Example.* The principles of paragraphs (c)(2) and (c)(3) of this section are illustrated by the following example:

Example. A foreign branch of a domestic corporation maintains a deferred compensation plan under which benefits are based upon a participant's average compensation for the last five consecutive years of employment. The significant purposes of the plan do not include the provision of benefits otherwise unavailable under the Code to participants who are United States citizens or residents. The foreign branch maintains its books and records in its functional currency (FC). The taxpayer's taxable year and the plan year are coterminous with the calendar year. During the plan year in question, the compensation taken into account under the plan for all plan participants totals FC200 million. Of the FC200 million, FC6 million of the compensation taken into account under the plan is compensation for United States citizens and residents or otherwise subject to United States federal income tax. Because the FC6 million is less than five percent of all compensation taken into account under the plan for the plan year, the 90-percent requirement of paragraph (a)(3) of this section is deemed satisfied for this taxable year.

(d) *Deductions and reductions of earnings and profits.* Deductions and reductions of earnings and profits for amounts paid by an employer to a plan that provides deferred compensation that does not meet the requirements of paragraph (a) of this section are governed exclusively by section 404, without regard to whether the plan benefits foreign employees.

(e) *Definitions.* The following definitions apply for purposes of section 404A and §§ 1.404A–1 through 1.404A–7:

Actuarial present value. "Actuarial present value" is defined in § 1.401(a)(4)–12.

Aggregate amount. "Aggregate amount" is defined in § 1.404A–4(g)(4).

Appropriate foreign tax law. "Appropriate foreign tax law" is defined in § 1.404A–4(g)(3).

Authorized officer. "Authorized officer" is defined in § 1.404A–5(b)(7).

Carryover contributions. "Carryover contributions" are defined in § 1.404A–2(d)(4).

Change in method of accounting. "Change in method of accounting" is defined in § 1.404A–6(a).

Closing year. "Closing year" is defined in § 1.404A–6(f)(4)(ii).

Contributions accumulated to pay deferred compensation. "Contributions accumulated to pay deferred compensation" are defined in § 1 404A–2(b)(2).

VOL 58 ISS 87 MY 7 1993 UMI

Contributions to a trust. "Contributions to a trust" are defined in § 1.404A–2(b)(1).

Controlled foreign corporation. "Controlled foreign corporation" means a controlled foreign corporation as defined in sections 953(c)(1)(B) and 957.

Cumulative foreign amount. "Cumulative foreign amount" is defined in § 1.404A–4(g)(2).

Cumulative limitation. "Cumulative limitation" is defined in § 1.404A–4(b).

Cumulative United States amount. "Cumulative United States amount" is defined in § 1.404A–4(g)(1).

Deductible limit. "Deductible limit" is defined in § 1.404A–2(d)(1)(i).

Deductions. "Deductions" are defined in § 1.404A–1(f)(1).

Deferred compensation—(i) *In general.* "Deferred compensation" means any item the deductibility of which is determined by reference to section 404, without regard to whether section 404 permits a deduction and without regard to whether elections are made under § 1.404A–6 or 1.404A–7. Deferred compensation, as described in the preceding sentence, does not include deferred benefits described in section 404(b)(2)(B).

(ii) *Social security.* A plan under which a foreign government (including a political subdivision, agency or instrumentality thereof) makes a contribution or a direct payment to a participant (or the participant's beneficiary) does not provide deferred compensation to the extent of such contributions or payments. Thus, for example, a foreign country's social security system generally will not be considered as providing deferred compensation. However, the fact that employers are required to maintain the plan by reason of foreign law, or the fact that the plan supplements social security benefits provided by a foreign country, or provides benefits in lieu of such social security benefits, does not prevent a plan from providing deferred compensation.

(iii) *Termination indemnity plans.* The determination of whether a plan (including a termination indemnity plan) provides deferred compensation must generally be made under paragraph (i) of this definition in light of all of the facts and circumstances. Benefits paid under a plan, including a plan denominated a termination indemnity plan will generally be treated as deferred compensation if—

(A) A major purpose of the plan is to provide for the payment of retirement benefits;

(B) The plan has a benefit formula providing for payment based at least in part upon length of service;

(C) The plan provides for the payment of benefits to employees (or their beneficiaries) after the employee's retirement, death or other termination of employment; and

(D) It meets such other requirements as may be prescribed by the Commissioner in guidance of general applicability with respect to termination indemnity plans.

(iv) *Example.* The definition of deferred compensation is illustrated by the following example:

Example. A domestic corporation maintains a branch operation in foreign country *F*. *F* requires that all employers doing business in its country provide benefits to employees under a termination indemnity plan insured by *F*'s government. The plan provides for payments to employees who terminate employment for any reason, including retirement, death, voluntary resignation and discharge for cause (other than for gross misconduct) and permits withdrawals for certain hardship conditions. Upon separation, the employee (or his or her beneficiary) receives an amount equal to the accumulation on the employer's books of one-thirteenth of his or her annual salary for each year of employment, with specified adjustments for interest and inflation. This termination indemnity plan provides deferred compensation as described in paragraph (e) of this section.

Earnings and profits. "Earnings and profits" means earnings and profits computed in accordance with sections 312 and 964(a) and, for taxable years beginning after December 31, 1986, section 986 and the regulations thereunder; and for purposes of section 902 in taxable years beginning before January 1, 1987, accumulated profits within the meaning of section 902(c) as in effect on the day before the enactment of the Tax Reform Act of 1986.

Employer. "Employer" means a person that maintains a plan for the payment of deferred compensation for services provided to it by its employees. "Employer" for purposes of the acceleration of the section 481(a) adjustment is defined in § 1.404A–6(e)(2)(iv).

Equivalent of a trust. "Equivalent of a trust" means a fund—

(i) The corpus and income of which is separately identifiable and segregated, through a separate legal entity, from the general assets of the employer;

(ii) The corpus and income of which is not subject, under the applicable foreign law, to the claims of the employer's creditors prior to the claims of employees and their beneficiaries under the plan;

(iii) The corpus and income of which, by law or by contract, cannot at any time prior to the satisfaction of all liabilities with respect to employees under the plan be used for, or diverted to, any purpose other than providing benefits under the plan; and

(iv) The corpus and income of which is held by a person who has a legally enforceable duty to operate the fund prudently.

Erroneous deduction. "Erroneous deduction" is defined in § 1.404A–7(d)(3)(ii).

Exclusive benefit. "Exclusive benefit" has the same meaning as in §§ 1.401–2 and 1.413–1(d).

Fixed or determinable benefits. "Fixed or determinable benefits" are defined in § 1.404A–2(d)(1)(i).

Full funding limitation. "Full funding limitation" is defined in § 1.404A–5(c)(2).

Functional currency. "Functional currency" (abbreviated as FC) means the functional currency of a taxpayer or a qualified business unit determined in accordance with section 985 (b) and the regulations thereunder, or, for taxable years beginning before January 1, 1987, the currency in which the employer's books and records were maintained for United States tax purposes.

Funded method. "Funded method" is defined in § 1.404A–6(f)(2)(iv).

Initial aggregate amount. "Initial aggregate amount" is defined in § 1.404A–6(g)(2)(iii).

Initial Cumulative foreign amount. "Initial Cumulative foreign amount" is defined in § 1.404A–6(g)(2)(ii).

Initial Cumulative United States amount. "Initial Cumulative United States amount" is defined in § 1.404A–6(g)(2)(i).

Initial section 404A(d) amounts. "Initial section 404A(d) amounts" are defined in § 1.404A–6(g).

Liability. "Liability" is defined in § 1.404A–1(f)(2).

Majority domestic corporate shareholders. "Majority domestic corporate shareholders" are defined in § 1.404A–6(c)(2)(ii)(C).

Method of accounting. "Method of accounting" is defined in § 1.404A–6(a)(1).

Method (1) election. "Method (1) election" is defined in § 1.404A–7(g)(1).

Method (2) election. "Method (2) election" is defined in § 1.404A–7(g)(2).

New Method Opening Amount. "New Method Opening Amount" is defined in § 1.404A–6(f)(3).

Noncontrolled foreign corporation. "Noncontrolled foreign corporation" means a foreign corporation other than a controlled foreign corporation.

Nonqualified individual. "Nonqualified individual" is defined in § 1.404A–5(a)(1).

Nonqualified plan. "Nonqualified plan" is defined in § 1.404A–6(f)(3)(iii).

Old Method Closing Amount. "Old Method Closing Amount" is defined in § 1.404A–6(f)(2).

Open period. "Open period" is defined in § 1.404A–7(g)(6).

Open years. "Open years" are defined in § 1.404A–7(g)(3).

Opening reserve. "Opening reserve" is defined in § 1.404A–6(f)(3)(i).

Opening year. "Opening year" is defined in § 1.404A–6(f)(4)(i).

Pay-as-you-go method. "Pay-as-you-go method" is defined in § 1.404A–6(f)(2)(iii).

Period of adjustment. "Period of adjustment" is defined in § 1.404A–6(e)(2).

Permitted plan year. "Permitted plan year" means the plan year of a plan providing deferred compensation ending with or within the employer's taxable year.

Plan year. "Plan year" means the annual accounting period of a plan providing deferred compensation.

Primary evidence. "Primary evidence" is defined in § 1.404A–5(b)(2).

Prior deduction. "Prior deduction" is defined in § 1.404A–7(d)(3)(i).

Protective election. "Protective election" is defined in § 1.404A–7(g)(2).

Qualified business unit. "Qualified business unit" is defined in section 989(a).

Qualified foreign plan. "Qualified foreign plan" means a plan that meets the requirements of paragraph (a) of this section.

Qualified funded plan. "Qualified funded plan" means a qualified foreign plan for which an election has been made under § 1.404A–6 or 1.404A–7 by the taxpayer to treat the plan as a qualified funded plan.

Qualified reserve plan. "Qualified reserve plan" means a qualified foreign plan for which an election has been made by the taxpayer under § 1.404A–6 or 1.404A–7 to treat the plan as a qualified reserve plan.

Reasonable actuarial assumptions. "Reasonable actuarial assumptions" are defined in § 1.404A–5(c).

Reductions in earnings and profits. "Reductions in earnings and profits" are defined in § 1.404A–1(f)(1).

Reserve method. "Reserve method" is defined in § 1.404A–6(f)(2)(ii).

Retirement annuity. "Retirement annuity" is defined in § 1.404A–2(b)(3).

Retroactive effective date election. "Retroactive effective date election" is defined in § 1.404A–7(b)(1).

Retroactive period. "Retroactive period" is defined in § 1.404A–7(g)(4).

Retroactive plan-by-plan election. "Retroactive plan-by-plan election" is defined in § 1.404A–7 (c)(1) and (d)(1).

Revocation of election. "Revocation of election" is defined in § 1.404A–6(d)(1).

Secondary evidence. "Secondary evidence" is defined in § 1.404A–5(b)(4).

Separate funding entity. "Separate funding entity" is defined in § 1.404A–6(f)(4)(iii).

Short taxable year. "Short taxable year" is defined in § 1.404A–7 (d)(2).

Single plan. "Single plan" is defined in § 1.404A–6(a)(2).

Substantial risk of forfeiture. "Substantial risk of forfeiture" is defined in § 1.404A–3(b)(2).

Substantiation quality data. "Substantiation quality data" means less than precise data that is nevertheless the best data available for the plan year at reasonable expense.

Taxable year of a controlled foreign corporation. "Taxable year of a controlled foreign corporation" means the taxable year as defined in sections 441(b) and 7701(a)(23), subject to section 898.

Taxable year of a noncontrolled foreign corporation. "Taxable year of a noncontrolled foreign corporation" means the taxable year as defined in sections 441(b) and 7701(a)(23).

Taxpayer. "Taxpayer" is defined in section 7701(a)(14).

Termination of election. "Termination of election" is defined in § 1.404A–6(c)(1).

Transition period. "Transition period" is defined in § 1.404A–7(g)(5).

Trust. "Trust" means a trust (as defined in § 301.7701–4(a) of this chapter) or the equivalent of a trust.

Unit credit method. "Unit credit method" is defined in § 1.404A–3(b)(2).

United States tax significance. "United States tax significance" is defined in § 1.404A–6(b)(2)(ii).

Written plan. "Written plan" means a plan that is defined by plan instruments or required under the law of a foreign country, or both. An insurance contract can constitute a written plan.

(f) *Application of other Code requirements*—(1) *Deductibility requirement*—(i) *In general.* In order to deduct amounts under section 404A, amounts contributed to a qualified funded plan or properly added to a reserve with respect to a qualified reserve plan must otherwise be deductible. The standards under section 404 are to be used in determining whether an amount would otherwise be deductible for this purpose. Thus, amounts may be taken into account under section 404A only to the extent that they are ordinary and necessary expenses during the taxable year in carrying on a trade or business and are compensation for personal services actually rendered before the end of the year. Similarly, in order to reduce earnings and profits under section 404A by amounts contributed to a qualified funded plan or properly added to a reserve with respect to a qualified reserve plan, earnings and profits must otherwise be able to be reduced by such amounts under the general principles of sections 312, 901, 902, 960, and 964.

(ii) *Capitalization requirements.* In determining if an amount would otherwise be deductible (or able to be used to reduce earnings and profits) for purposes of paragraph (g)(1)(i) of this section, the fact that the amount is required to be capitalized (e.g., under section 263A) is ignored. Additionally, while section 404A and §§ 1.404A–1 through 1.404A–7 refer generally to permissible deductions or reductions of earnings and profits for deferred compensation, those references are intended to refer both to situations under which amounts may be taken into account as deductions or reductions of earnings and profits and to situations under which amounts may be taken into account through inclusion in the basis of inventory or through capitalization.

(2) *Section 461 requirements.* In determining whether any amount of deferred compensation may be taken into account under section 404A by an accrual method taxpayer, the conditions for accrual under section 461 must be met with respect to the amount by the last day of the taxable year. For this purpose, an amount determined under §§ 1.404A–1 through 1.404A–7 establishes the fact of the liability and determines the amount of the liability with reasonable accuracy. See § 1.461–4(d)(2)(iii), which generally provides that the economic performance requirement of section 461(b) is satisfied to the extent that any amount is otherwise properly taken into account under §§ 1.404A–1 through 1.404A–7.

§ 1.404A–2 Rules for qualified funded plans.

(a) *In general.* Except as provided in this section and in §§ 1.404A–4 and 1.404A–5, the amount taken into account for a taxable year with respect to a qualified funded plan is the amount of the contributions paid by the employer to the trust in that year (regardless of whether the employer uses an accrual method of accounting). Accretions in a trust are not considered contributions to a plan.

(b) *Payment to a trust*—(1) *Contribution requirements.* Contributions paid under a qualified funded plan may not be taken into account unless they are—

VOL 58 ISS 87 MY 7 1993 UMI

(i) Paid to a trust which is operated in accordance with the requirements of section 401 (a)(2);

(ii) Paid for a retirement annuity under which retirement benefits are provided and which is for the exclusive benefit of the employer's employees or their beneficiaries; or

(iii) Paid directly to a participant or beneficiary (rather than a trust).

(2) *Trust requirements*—(i) *General rule.* A contribution does not satisfy paragraph (b)(1)(i) of this section unless it is accumulated in the trust for the purpose of being distributed as deferred compensation. Whether a contribution is being accumulated in the trust for the purpose of being distributed as deferred compensation depends on the facts and circumstances. For purposes of paragraph (b)(1)(i) of this section, the fact that a trust has been (or has not been) involved in transactions that would be described in section 4975(c)(1) (and not exempted under section 4975(c)(2) or 4975(d)), e.g., contributions made in the form of a promissory note, if the plan were subject to section 4975(c)(1), is an important factor in determining whether the trust is not (or is) considered to be operated in accordance with the requirements of section 401(a)(2). In addition, a contribution to a trust does not satisfy paragraph (b)(1)(i) of this section unless it has substance.

(ii) *Effective date.* The section 4975(c)(1) factor in determining compliance with section 401(a)(2) provided in this paragraph (b)(2) is taken into account for all transactions entered into after May 7, 1993.

(3) *Retirement annuity.* A retirement annuity means a retirement annuity (as defined in section 404(a)(2)) except that the retirement annuity need not be part of a plan that meets the requirements of section 401(a) or 401(d). Notwithstanding the preceding sentence, the retirement annuity described therein need not be issued by an insurance company qualified to do business in a State in the United States if the taxpayer(s) and/or sponsoring employer(s) of the plan have shifted the risk of making payments under the plan to an entity that is qualified to do business in the country (or countries) where the plan is maintained.

(4) *Effect of reversion of overfunded contributions.* If any portion of a contribution to a trust may revert to the benefit of the employer before the satisfaction of all liabilities to employees or their beneficiaries covered by the trust, no amount of the contribution may be taken into account under this section.

(5) *Example.* The principles of paragraph (b) of this section are illustrated by the following example:

Example. A foreign subsidiary of a domestic corporation maintains a deferred compensation plan for its employees. The foreign subsidiary makes annual contributions under the plan to a trust. Each year after the contribution is made to the trust, the trustee lends the contribution back to the foreign subsidiary maintaining the plan. The foreign subsidiary executes promissory notes obligating it to repay the borrowed funds (at a reasonable rate of interest) to the trust and to pay any benefits due under the plan. Notwithstanding that the taxpayer may have designated the plan as a qualified funded plan, amounts may not be taken into account under section 404A with respect to contributions to the trust because the loans cause the trust to fail the requirements of section 401(a)(2). Even if the loans do not cause the trust to violate section 401(a)(2), the portion of any contribution that is loaned to the foreign subsidiary could not be taken into account because, to the extent of the loan (or loans), the contribution lacks substance and is not accumulated in the trust.

(c) *Contribution deemed made before payment*—(1) *Time of poyment to trust.* Regardless of whether an employer uses the cash or an accrual method of accounting, for purposes of this section, a contribution to a trust that is paid after the close of an employer's taxable year is deemed to have been paid on the last day of that taxable year if—

(i) The payment is made on account of the taxable year and is made not later than the 15th day of the ninth month after the close of the taxable year;

(ii) The payment is treated by the plan in the same manner that the plan would treat a payment actually received on the last day of the taxable year; and

(iii) Either—

(A) The employer notifies the plan administrator or trustee in writing that the payment to the plan is designated on account of the taxable year;

(B) The taxpayer claims the payment as a deduction on its tax return for the taxable year; or

(C) The employer reduces earnings and profits with respect to the payment.

(2) *Time of designation.* Any designation of a payment pursuant to paragraph (c)(1)(iii)(A) of this section must occur not later than the time described in paragraph (c)(1)(i) of this section.

(3) *Irrevocable designation.* After a payment has been designated or claimed on a return in the manner provided in paragraph (c) (1) (iii) (A) of this section as being on account of a taxable year, the designation or claim may not be retracted or changed.

(d) *Limitation for qualified funded plans*—(1) *Plans with fixed or determinable benefits*—(i) *Limit on amount taken into account.* Contributions made to a qualified funded plan under which the benefits are fixed or determinable are not taken into account under this section to the extent they exceed the amount that would be taken into account under section 404(a)(1)(A) (ii) and (iii) (determined without regard to the last sentence of paragraph (A) of section 404 (a)(1) and without regard to whether the trust is exempt under section 501(a)). Benefits are considered fixed or determinable for this purpose if either benefits under or contributions to the plan are definitely determinable within the meaning of § 1.401–1(b)(1)(i). The limit described in the first sentence of this paragraph (d)(1)(i) is determined on the basis of the permitted plan year of the qualified foreign plan. Thus, the limit for the employer's taxable year is the limit for the plan year ending with or within the employer's taxable year.

(ii) *Actuarial valuation requirements.* In determining the amount to be taken into account under this section, an actuarial valuation must be made not less frequently than once every three years. However, an actuarial valuation must be made for the first plan year of the plan for which an election under § 1.404A–6 is in effect. For interim years, a reasonable actuarial determination of whether the full funding limit in § 1.404A–5(c)(2) applies to the qualified funded plan must be made. The Commissioner may require a full actuarial valuation in an interim year under appropriate circumstances. See § 1.404A–6 for rules on changes in methods of accounting.

(2) *Plans without fixed or determinable benefits.* Contributions made to a qualified funded plan under which the benefits are not fixed or determinable may not be taken into account under this section to the extent they exceed the limitations of section 404(a)(3) (determined without regard to whether the payment is made to a trust that is exempt under section 501(a)).

(3) *Limitations where more than one type of plan is maintained.* Where payments are made for a taxable year to more than one type of qualified funded plan, the amounts that may be taken into account for the taxable year with respect to the payments are subject to the limitations of section 404(a)(7). The amount that is taken into account under this paragraph (d)(3) is determined without regard to whether the payment satisfies the minimum funding standard described in section 412.

(4) *Carryover contributions.* In the event that the aggregate amount of contributions paid during an employer's taxable year in which an election under section 404A is in effect (reduced by an amount described in section 404A(g)(1)) exceeds the amount that may be taken into account under section 404A(a) and this section (computed without regard to section 404A(d) and § 1.404A–4), the excess contributions are treated as an amount paid in the succeeding taxable year with respect to that qualified foreign plan. A carryover contribution is also taken into account in determining whether a carryover contribution exists for a succeeding taxable year.

(5) *Additional rules.* The Commissioner may prescribe additional rules for determining the amount that may be taken into account under this paragraph (d) in guidance of general applicability.

(e) Examples. The principles of this section are illustrated by the following examples:

Example 1. A qualified funded plan under which benefits are not fixed or determinable is maintained by a foreign branch of a domestic corporation. The foreign branch computes its income in units of local currency, the FC. The taxpayer's taxable year and the plan year are coterminous with the calendar year. The plan was established in 1985, and the taxpayer made an election to apply section 404A, a qualified funded plan election as described in § 1.404A–6. For the 1985 taxable year, the employer made a FC25,000 contribution under the plan, and FC15,000 of that contribution could be taken into account under paragraph (d) (2) of this section. The cumulative foreign amount for the 1985 taxable year was FC20,000. The amount of the excess contribution carried forward was FC10,000 (FC25,000 - FC15,000), because the amount of the carryover contribution is determined without regard to section 404A (d) and § 1.404A–4.

Example 2. Assume the same facts as in *Example 1*, except that the entire FC25,000 contribution made under the plan may be taken into account under paragraph (d)(2) of this section. The amount of the excess contribution carried forward was zero, even though the cumulative United States amount may have exceeded the cumulative foreign amount for the taxable year, because the amount of the excess contribution is determined without regard to section 404A(d) and § 1.404A–4.

Example 3. *P*, a domestic corporation, owns all of the one class of stock of foreign corporation *S*. The taxable year for P is the calendar year. The taxable year for *S* is the fiscal year beginning on June 1. *S* made a contribution to its qualified funded plan on February 15, 1983, and notified the plan's trustee in writing that *S* designated the contribution as a payment on account of *S*'s preceding taxable year (ending May 31, 1982). The contribution is taken into account in computing *S*'s earnings and profits for *S*'s taxable year ending May 31, 1982.

§ 1.404A–3 Rules for qualified reserve plans.

(a) *Amounts taken into account with respect to qualified reserve plans*—(1) *General rule.* Except as provided in §§ 1.404A–4 and 1.404A–5, the amount taken into account for a taxable year with respect to a qualified reserve plan equals the sum of—

(i) The reasonable addition during the permitted plan year to a reserve for liabilities under the plan as described in paragraph (b) of this section; and

(ii) The amortization of certain increases or decreases in the plan reserve over ten years, as described in paragraph (c) of this section.

(2) *Amounts less than zero.* If the amount to be taken into account under this section is less than zero, that amount must be treated as an increase in income and earnings and profits for the taxable year.

(3) *Exclusive rules for qualified reserve plans.* No amounts may be taken into account with respect to a qualified reserve plan except as provided for in this section. Thus, for example, no deduction is allowed for benefit payments from the reserve. Similarly, no amount may be taken into account for any payments made by the employer that are used either to reinsure the liabilities or benefits under a qualified reserve plan or to fund separately all or a portion of the benefits under a qualified reserve plan. These amounts may, however, be taken into account as contributions to a qualified funded plan to the extent the requirements of § 1.404A–2 are satisfied.

(b) *Reasonable addition to a reserve for liabilities*—(1) *General rule.* Except as provided in § 1.404A–7(f)(2), the reasonable addition to a reserve for a plan year equals the increase in the reserve, determined under the unit credit method as described in paragraph (b)(2) of this section, that arises from the passage of time and from additional service and expected changes in compensation in the current plan year for employees who were included in the reserve as of the end of the prior plan year. Thus, the reasonable addition to the reserve includes an element of interest on the reserve as of the beginning of the plan year (less the interest on the benefit payments during the plan year) and the actuarial present value of the expected increase in vested benefits accrued during the current plan year for employees who were included in the reserve as of the end of the prior plan year, determined without reference to any plan amendment during the plan year.

(2) *Unit credit method required.* The reserve for the employer's liability must be determined under the unit credit method. Thus, the reserve must be the actuarial present value of the employer's liability, taking into account service and compensation only through the valuation date. In determining the reserve under this section, benefits that are subject to a substantial risk of forfeiture may not be taken into account. The term "substantial risk of forfeiture" has the meaning stated in section 83, except that the term "property" in all events includes benefits accrued under a qualified reserve plan.

(3) *Timing of valuation.* The determination of the reserve and the reasonable addition to the reserve must be made as of the last day of the plan year.

(4) *Permissible actuarial assumptions*—(i) *Interest rates*—(A) *In general.* Notwithstanding any other provision of §§ 1.404A–1 through 1.404A–7, no amount may be taken into account under section 404A with respect to a qualified reserve plan unless the rate (or rates) of interest for the plan that are selected by the employer are within the permissible range. The interest rate selected by the employer for the plan under this paragraph must remain in effect for that plan until the first plan year for which that rate is no longer within the permissible range. At that time, a new rate of interest must be selected by the employer from within the permissible range applicable at that time.

(B) *Permissible range.* For purposes of this paragraph (b)(4), the term "permissible range" means a rate of interest that is not more than 1.2 and not less than the product of 0.8 multiplied by the average rate of interest for the highest quality long-term corporate bonds denominated in the functional currency of the qualified business unit of the employer whose books reflect the plan's liabilities for the 15-year period ending on the last day before the beginning of the employer's taxable year. If there is no market in long-term corporate bonds denominated in the relevant functional currency, or if the qualified business unit computes its income or earnings and profits in dollars under § 1.985–3, the employer must use a rate that can be demonstrated clearly to reflect income, based on all relevant facts and circumstances, including appropriate rates of inflation and commercial practices.

(ii) *Plan benefits.* Except as otherwise provided by the Commissioner, changes in plan benefits or applicable foreign law that become effective (whether or not retroactively) in a future plan year may not be taken into account until the

VOL
58
ISS
87
MY
7
19 93
UMI

plan year the change is effective. Notwithstanding the above, the reserve calculation may take into account cost-of-living adjustments that are part of the employee's vested accrued benefit, using assumptions regarding cost-of-living adjustments that are consistent with the interest rate assumptions described in paragraph (b)(4)(i) of this section and the terms of the plan. Thus, for example, a cost-of-living adjustment that does not require any future service on the part of the employee and is not subject to employer discretion may be taken into account.

(c) *Ten-year amortization for certain changes in reserves*—(1) *Actuarial valuation.* Each plan year an actuarial valuation must be made as of the end of the plan year, comparing the actual reserve with the expected value of the reserve. Any difference between the actual reserve determined as of the end of the plan year and the expected value of the reserve as of that date must be amortized in level amounts of principal over ten years, beginning in the plan year of the actuarial valuation. This amortization applies regardless of whether the difference is attributable to changes in employee population, changes in plan provisions, or changes in actuarial assumptions.

(2) *Expected value of reserve.* The expected value of the reserve as of the end of the plan year is equal to the sum of the reserve as of the end of the prior plan year plus the reasonable addition to the reserve for the plan year described in paragraph (b) of this section less the benefit payments during the plan year. Thus, the expected value of the reserve is generally determined on the basis of the plan in effect and the actuarial assumptions used as of the end of the prior plan year, but, because it includes the reasonable addition to the reserve, includes the effect of expected changes in compensation, service and vesting during the current plan year.

(3) *Special rule for certain cost of living adjustments.* Notwithstanding the general rule that the increase in liability from a plan amendment is amortized over ten years, if under foreign law a shorter period for amortization is required, that shorter period shall be substituted for ten years in this paragraph (c) if the amendment is a cost of living adjustment that either—

(i) Relates primarily to retirees; or

(ii) Is for employees of a foreign corporation in a taxable year beginning before August 5, 1993.

(4) *Anti-abuse rule.* The Commissioner may reclassify any item included by a taxpayor as a reasonable addition to a reserve as instead subject to amortization over ten years if the Commissioner determines that the taxpayer's classification of that item circumvents the intent of section 404A(c)(4). Thus, for example, if the Commissioner determines that the vesting provisions of the plan cause the increase in vested benefits to be unreasonably large in a single plan year, the reasonable addition under paragraph (b) of this section must be calculated without recognizing any changes in vesting for the plan year.

(d) *Examples.* The principles of this section are illustrated by the following examples:

Example 1. S, a foreign subsidiary of *P*, a domestic corporation, contributes funds to an irrevocable trust which is used to pay benefits provided under *S*'s reserve plan. The trust does not satisfy the requirements of section 401(a), 404(a)(4), or 404(a)(5). The funds are not used to provide benefits in addition to those provided by the reserve plan. In 1984, the year the plan was adopted, *S* elected to treat the plan as a qualified reserve plan. In 1984, *S* also contributed an amount to the irrevocable trust. The fact that *S* contributed an amount to the trust has no effect on the computation of the amount that *S* is entitled to take into account under this section in 1984 (or in any other year). Furthermore, no additional amount may be taken into account for the amount of the contribution to the trust beyond the amount permitted to be taken into account under this section.

Example 2. (a) Employer *Y* hired 10,000 employees in 1980, each of whom was age 40 at the beginning of the year and earned FC10,000. The employees immediately commenced participation in the plan. The plan provided that the accrued benefit at the end of X years equaled: (X multiplied by one percent) multiplied by the highest one year's compensation. The plan vesting was 20 percent per year starting after two years of service with the employer. Under the plan, once an employee was vested in a benefit, the benefit could not be forfeited for any reason other than the death of the employee. Employees who terminate employment for reasons other than death or retirement receive an immediate single sum distribution in an amount equal to the actuarial present value (calculated at eight percent interest) of the vested accrued benefit (where the actuarial present value and the vested accrued benefit are determined as of the end of the prior plan year). Reserves and expected increases in the reserve were determined using eight percent interest, five percent assumed compensation increases, the UP–84 mortality table and assuming no pre-retirement terminations other than death. However as set forth in the relevant data below, the actual experience differed from these assumptions (e.g., the actual compensation did not increase five percent each year and the mortality and termination experience were different than assumed).

Year	End of year age	No. of deaths	No. of terminations	No. of employees remaining
1980	41	16	5	9,979
1981	42	18	5	9,956
1982	43	20	5	9,931
1983	44	25	5	9,901
1984	45	30	25	9,846

Year	Compensation for each employee	End of year accrued benefit for each employee	End of year vested accrued benefit for each employee
1980	10,000	100	0
1981	10,000	200	0
1982	10,000	300	60
1983	12,000	480	192
1984	12,000	600	360

Year	Benefit payments	End of year actuarial factor	End of year reserve for vested benefits
1980	0	1.049706	0
1981	0	1.136328	0
1982	0	1.230380	733,134
1983	369	1.332564	2,533,194
1984	6,396	1.443638	5,117,062

(b) *Computation of amounts taken into account for 1980.* The amount taken into account for 1980 was zero because there was no reasonable addition to the reserve (i.e., no increase in the reserve on account of the passage of time, additional service or expected changes in compensation for employees who were included in the reserve at the end of the prior year) and there were no amounts that are subject to ten-year amortization under paragraph (c) of this section.

(c) *Computation of amounts taken into account for 1981.* There was no amount taken into account for 1981 for the same reason as in 1980.

(d) *Computation of amount taken into account for 1982.* The amount taken into account in 1982 was the sum of the reasonable addition to the reserve determined under paragraph (b) of this section and the amortization of certain increases in the plan reserve over ten years determined under paragraph (c) of this section. There was no reasonable addition to the reserve (i.e., no increase in the reserve on account of the passage of time, additional service or expected changes in compensation for employees who were included in the reserve at the end of the prior year) for the 1982 year because no employee was included in the reserve as of the end of 1981. There were no benefits paid during 1981. Thus, the expected value of the reserve at the end of 1982 was zero. However, the actual value of the reserve at the end of 1982 was FC733,134 (9,931 employees × 60 × 1.230380). The difference between the expected and actual values of the reserve was taken into account over ten years beginning in 1982. Thus, the total amount taken into account for 1982 was FC73,313.

(e) *Computation of amount taken into account for 1983.* Using the employee data as of the end of 1982 and the expected rate of compensation increase for 1983, each employee's accrued benefit was expected to be 420 (10,500 × 4 years × .01) as of the end of 1983. 40 percent of this accrued benefit, or 168, was expected to be vested. Thus, the expected increase in each employee's vested accrued benefit was 108 (the difference between 168 and the vested accrued benefit as of the end of the prior year (60) for those employees who were included in the reserve as of the end of the prior year). There were 9,931 employees included in the reserve as of the end of the prior year and 9,931 × p_{43} were expected to be in the reserve as of the end of 1983. The actuarial present value factor for a deferred annuity of FC1 commencing at age 65 payable monthly is 1.332564. Thus, the actuarial present value of the expected increase in vested accrued benefits as of the end of the year was FC1,425,212 (9,931 employees × p_{43} × 108 × 1.332564). The reasonable addition to the reserve also included an element of interest on the reserve as of the end of the prior year equal to FC58,651 (8 percent × 733,134) that is offset by the interest attributable to the actual benefits paid during the year (FC15, which is interest on the benefits paid during the year (FC369) from the date of payment through the end of the year). Thus, the reasonable addition to the reserve for 1983 was FC1,483,848 (1,425,212 + 58,651 − 15) and the expected reserve at the end of the year was FC2,216,613 (733,134 + 1,483,848 − 369). The actual reserve at the end of 1983 is FC2,533,194, so there was an actuarial loss of FC316,581 (2,533,194 − 2,216,613) which was amortized over 10 years beginning in 1983. Thus, the total amount taken into account in 1983 was FC1,588,819 (1,483,848+73,313+10 percent of 316,581).

(f) *Computation of amount taken into account for 1984.* Using the employee data as of the end of 1983 and the expected rate of compensation increase for 1984, each employee's accrued benefit was expected to be 630 (12,600×5 years×.01) as of the end of 1984. 60 percent of this accrued benefit, or 378, was expected to be vested. Thus, the expected increase in each employee's vested accrued benefit was 186 (the difference between 378 and the vested accrued benefit as of the end of the prior year (192) for those employees who were included in the reserve as of the end of the prior year). There were 9,901 employees included in the reserve as of the end of the prior year and 9,901×p_{44} were expected to be in the reserve as of the end of 1984. The actuarial present value factor for a deferred annuity of FC1 commencing at age 65 payable monthly is 1.443638. Thus, the actuarial present value of the expected increase in vested accrued benefits as of the end of the year was FC2,650,355 (9,901 employees×p_{44}×186×1.443638). The reasonable addition to the reserve also included an element of interest on the reserve as of the end of the prior year equal to FC202,656 (8 percent×2,533,194), offset by interest attributable to the actual benefits paid during the year (FC256, which is interest on the benefits paid during the year (FC6,396) from the date of payment through the end of the year). Thus, the reasonable addition to the reserve for 1984 was FC2,852,755 (2,650,355+202,656 − 256) and the expected reserve at the end of the year is FC5,379,553 (2,533,194+2,852,755 − 6,396). The actual reserve at the end of 1984 was FC5,117,062, so there was an actuarial gain of FC262,491 (5,379,553 − 5,117,062) which was amortized over 10 years beginning in 1984. Thus, the total amount taken into account in 1984 was FC2,931,477 (2,852,755+73,313+31,658 − 10 percent of 262,491).

(g) *Alternative computation method.* The amounts taken into account for 1982, 1983 and 1984 may also be illustrated as follows—

Worksheet for Calculating Amount Taken Into Account for Qualified Reserve Plans Under § 404A

1982:	
(1) Reserve at end of Prior Year	0
(2) Interest on (1) to end of Current Year	0
(3) Present Value of the Expected Increase in Vested Accrued Benefits for employees who were included in the reserve as of the end of the prior year.	0
(4) Benefit Payments during current year	0
(5) Interest on (4) from date of payment through end of Current year	0
(6) Reasonable addition to the reserve (2)+(3)−(5)	0
(7) Expected value of reserve (1)+(6)−(4)	0
(8) Actual value of reserve	733,134
(9) Amount to be amortized (8)−(7)	733,134

(12) (9)+(10)−(11)	1,487,378
(13) 10 percent of (12)	148,738
(14) Amount Taken Into Account for Current Year [(6)+(13)]	3,753,775

§ 1.404A–4 United States and foreign law limitations on amounts taken into account for qualified foreign plans.

(a) *In general.* Section 404A(d) and this section place two limits on the amount taken into account for a taxable year with respect to a qualified foreign plan under section 404A (b) and (c) and §§ 1.404A–2 and 1.404A–3. First, as set forth in paragraph (b) of this section, the cumulative amounts that are or have been taken into account under section 404A through the end of the current year may not exceed the cumulative amounts deductible under foreign law in that period. Because the foreign law deduction is cumulative, however, amounts previously disallowed under this rule are taken into account in later years as the amount deductible under foreign law increases. Second, for taxable years beginning before January 1, 1987, or such later year determined under section 902(c)(3)(A), the rule in paragraph (c) of this section further limits the amount taken into account during those taxable years. Because section 404A(d) and this section apply solely to amounts that would otherwise be taken into account under § 1.404A–2 or 1.404A–3, these limitations are applied without regard to amounts taken into account under section 481 (i.e., without regard to the portion of a section 481(a) adjustment that is taken into account during any taxable year within the section 481(a) adjustment period, as defined in § 1.404A–6(e)(2)). See § 1.404A–6, however, for rules applying the section 404A(d) limitations to the calculation of the section 481(a) adjustment.

(b) *Cumulative limitation.* The amount taken into account with respect to a qualified foreign plan for any taxable year equals—

(1) The lesser of—(i) The cumulative United States amount; or

(ii) The cumulative foreign amount;

(2) Reduced by the aggregate amount.

(c) *Special rule for foreign corporations in pre-pooling years.* For a taxable year of a foreign corporation beginning before January 1, 1987, or such later year determined under section 902(c)(3)(A), the reduction in earnings and profits determined under paragraph (b) of this section with respect to a qualified foreign plan may not exceed the amount allowed as a deduction under the appropriate foreign tax laws for such taxable year. See *Example 3* of paragraph (h) of this section for an illustration of this rule.

(d) *Rules relating to foreign currency*—(1) *Taxable years beginning after December 31, 1986.* For taxable years beginning after December 31, 1986, the cumulative United States amount, the cumulative foreign amount, and the aggregate amount must be computed in the employer's functional currency. See generally section 964 and sections 985 through 989 for rules applicable to determining and translating into dollars the amount of income or loss of foreign branches and earnings and profits (or deficits in earnings and profits) of foreign corporations.

(2) *Taxable years beginning before January 1, 1987.* For taxable years beginning before January 1, 1987, the cumulative United States amount, the cumulative foreign amount, and the aggregate amount must be computed in the currency in which the foreign branch or foreign subsidiary kept its books and records. See Rev. Rul. 75–106, 1975–1 C.B. 31 (see § 601.601(d)(2)(ii)(*b*) of this chapter), for rules for determining the amount of income or loss of foreign branches using a net worth method of accounting. See Rev. Rul. 75–107, 1975–1 C.B. 32 (see § 601.601(d)(2)(ii)(*b*) of this chapter), for rules for determining the amount of income or loss of foreign branches using a profit and loss method of accounting. See sections 312, 902, and 1248 and the regulations thereunder for rules for determining the earnings and profits of noncontrolled foreign corporations. See section 964 and the regulations thereunder for rules for determining the earnings and profits of foreign corporations for purposes of subpart F.

(3) *Special rules for the net worth method of accounting.* For purposes of § 1.964–1(e)(4), an amount of deduction that is accrued but not paid at the end of the employer's taxable year with respect to a qualified funded plan must be treated as a short-term liability. In the case of a qualified reserve plan, for purposes of § 1.964–1(e), the amount of the reserve taken into account as a liability on the balance sheet as of the beginning of the taxable year must be limited to the aggregate amount, and the amount of the reserve taken into account as a liability on the balance sheet as of the close of the taxable year must be limited to the sum of the aggregate amount and the amount taken into account for the taxable year. For purposes of § 1.964–1(e)(4), each annual increase in the aggregate amount must be treated as a long-term liability incurred on the last day of the employer's taxable year to which the increase relates. As of the close of each taxable year, a portion of the aggregate amount equal to the amount of benefits expected to be paid during the succeeding taxable year must be reclassified as a short-term liability. The reclassified amount must be allocated to the annual increases in the aggregate amount on a first-in-first-out basis. Similar rules apply for purposes of determining the amount of reserve taken into account by a foreign branch using the net worth method of accounting for taxable years beginning before January 1, 1987, and by a qualified business unit that uses the United States dollar approximate separate transactions method of accounting under § 1.985–3 in a taxable year beginning after December 31, 1986.

(e) *Maintenance of more than one type of qualified foreign plan by an employer.* In determining the deduction or reduction in earnings and profits when an employer maintains one plan for purposes of foreign law that is treated as two separate plans for purposes of § 1.404A–6(a)(2), the cumulative United States amount for each plan must be combined for purposes of paragraphs (a) and (b) of this section. See *Example 5* of paragraph (h) of this section for an illustration of this rule.

(f) *United States and foreign law limitations not applicable.* The limitations set forth in this section do not apply to the adjustments required by section 481, section 446(e) and section 2(e)(3)(A) of Public Law 96–603.

(g) *Definitions*—(1) *Cumulative United States amount.* The term "cumulative United States amount" means (with respect to a qualified foreign plan) the amount determined under section 404A (without regard to section 404A(d)) for the taxable year of the employer and for all consecutive prior taxable years for which an election under section 404A was in effect for the plan plus the "initial section 404A amount" within the meaning of § 1.404A–6(g)(2)(i).

(2) *Cumulative foreign amount.* The term "cumulative foreign amount" means (with respect to a qualified foreign plan) the cumulative amount allowed as a deduction under the appropriate foreign tax law for the taxable year of the employer and for all consecutive prior taxable years for which an election under section 404A was in effect for the plan plus the initial section 404A amount within the meaning of § 1.404A–6(g)(2)(ii).

(3) *Appropriate foreign tax law.* The appropriate foreign tax law is the income tax law of the country (other than the United States) that is the principal place of business of the qualified business unit of the employer whose books reflect the plan liabilities.

(4) *Aggregate amount.* The term "aggregate amount" means (with respect to a qualified foreign plan) amounts permitted to be taken into account under section 404A(d)(1) for all consecutive prior taxable years for which an election under section 404A was in effect for the plan plus the initial section 404A amount required by § 1.404A–6(g)(2)(iii).

(h) *Examples.* The principles of this section are illustrated by the following examples:

Example 1. X, a foreign subsidiary of a domestic corporation, maintains its main office in foreign country *A*, and a branch, *Y*, in foreign country *B*. The functional currency of *X* is the FC. *Y*'s functional currency is the local currency, LC. *X* maintains a qualified foreign plan for the benefit of *X*'s employees in *B*. In the year the plan was adopted, a section 404A election was made for the plan. The appropriate foreign tax law is the tax law of *B* because all the employees covered by the plan are in *B* and plan liabilities are accounted for on *Y*'s books. The tax law of *B* permits *X* to deduct contributions to the plan. The cumulative amount allowed as a deduction under the tax law of *B* is LC80. The cumulative United States amount with respect to the plan is LC100. Therefore, the cumulative limitation is LC80. The earnings and profits of *X* include the profit and loss for *Y* (reflecting a reduction for contributions to the plan, computed in LC and translated into FC under the principles of section 987).

Example 2. A qualified reserve plan is maintained by a foreign branch of a domestic corporation. The foreign branch computes its income under the profit and loss method of Rev. Rul. 75–107, 1975–1 C.B. 32 (see § 601.601(d)(2)(ii)(*b*) of this chapter), in units of the local currency, the FC. The foreign branch established the qualified reserve plan in 1985 and the taxpayer made the elections described in § 1.404A–6. The taxpayer's taxable year and the plan year is the calendar year. The assumed amounts taken into account under section 404A and appropriate foreign tax law for selected years and the computations under this section which follow from the amounts, in units of FC, are shown in the following table—

	1985	1986	1987	1988
(1) Amount determined with respect to the plan under section 404A for the taxable year without regard to section 404A (d)	800,000	900,000	300,000	1,000,000
(2) Cumulative United States amount	800,000	1,700,000	2,000,000	3,000,000
(3) Cumulative foreign amount	1,000,000	1,600,000	2,000,000	2,200,000
(4) Lesser of cumulative United States or cumulative foreign amount	800,000	1,600,000	2,000,000	2,200,000

VOL 58 ISS 87 MY 7 1993 UMI

	1985	1986	1987	1988
(5) Reduced by aggregate amount (cumulative sum of (6) for prior years)	(0)	(800,000)	(1,600,000)	(2,000,000)
(6) Amount taken into account for the taxable year	800,000 800,000	800,000 800,000	400,000 400,000	200,000 200,000

Example 3. Assume the same facts as in *Example 2* for all taxable years, except that the qualified reserve plan is maintained by a foreign subsidiary of a domestic corporation. The foreign subsidiary computes its earnings and profits in units of the local currency, the FC. The foreign subsidiary's taxable year and the plan year are calendar years. The assumed amounts taken into account under section 404A and appropriate foreign law for selected years, and the computations under this section which follow from the amounts, in units of FC, are shown in the following table—

	1985	1986	1987	1988
(1) Amount determined with respect to the plan under section 404A for the taxable year without regard to section 404A (d)	800,000	900,000	300,000	1,000,000
(2) Amount allowed as a deduction under the appropriate foreign tax laws for the taxable year	1,000,000	600,000	400,000	200,000
(3) Cumulative United States amount	800,000	1,700,000	2,000,000	3,000,000
(4) Cumulative foreign amount	1,000,000	1,600,000	2,000,000	2,200,000
(5) Lesser of cumulative United States or cumulative foreign amount	800,000	1,600,000	2,000,000	2,200,000
(6) Reduced by aggregate amount (cumulative sum of (7) or (8), whichever is applicable, for prior years)	(0)	(800,000)	(1,400,000)	(2,000,000)
	800,000	800,000	600,000	200,000
(7) Amount taken into account for taxable years before 1987 (lesse r of (2) and (6))	800,000	600,000	n/a	n/a
(8) Amount taken into account for taxable years after 1986 (same as (6))	n/a	n/a	600,000	200,000

Example 4. *Z*, a domestic corporation, maintains a retirement plan for employees employed in its foreign branch office. The foreign branch computes its income under the profit and loss method Rev. Rul. 75–107, 1975–1 C.B. 32 (see § 601.601(d)(2)(ii)(*b*) of this chapter), in units of local currency, the FC. The plan is a combination book reserve and funded plan, but is considered a single plan under foreign law. The total retirement benefits that a participant is eligible to receive is the sum of the benefits provided by the qualified reserve plan and the qualified funded plan. Pursuant to § 1.404A–6, in the year the plan was adopted, *Z* made a separate qualified reserve plan and funded plan election with respect to each portion of the foreign plan. The assumed deductions under section 404A and appropriate foreign law for selected years, and the computations under this section which follow from the deductions, are shown in the following table—

	Qualified funded plan		Qualified reserve plan		Combined amount—qualified foreign plans	
	1984	1985	1984	1985	1984	1985
(1) Amount determined with respect to the qualified foreign plans under section 404A for the taxable year without regard to section 404A (d)	40,000	90,000	30,000	80,000		
(2) Amount allowed as a deduction under the appropriate foreign tax laws for the taxable year					60,000	185,000
(3) Cumulative United States amount	40,000	130,000	30,000	110,000		
(4) Combined cumulative United States amount (cumulative sum of (3))					70,000	240,000
(5) Cumulative foreign amount (cumulative sum of (2))					60,000	245,000
(6) Aggregate amount					0	60,000
(7) Lesser of combined cumulative United States amount or cumulative foreign amount ((4) or (5))					60,000	240,000
(9) Reduced by the aggregate amount for the qualified funded and reserve plan (cumulative sum of (10) for prior years)					(0)	(60,000)
(10) Amount taken into account for taxable year					60,000	180,000

Example 5. A qualified reserve plan is maintained by *M*, the foreign subsidiary of *N*, a domestic corporation. *M* computes its earnings and profits in units of the local currency, the FC. The taxable years of *M* and *N* and the plan year are the calendar year. *M* established the qualified reserve plan in 1984 and *N* made the elections described in § 1.404A–6. In that year, the reasonable addition to the plan reserve under § 1.404A–3 was FC750,000. However, the amount allowed as a deduction under the appropriate foreign tax laws for the taxable year was FC650,000. The difference between the amount taken into account under § 1.404A–3 and the deduction under the appropriate foreign tax laws, FC100,000, could not be taken into account for any succeeding taxable year under § 1.404A–3, but it may later reduce *M*'s earnings and profits pursuant to paragraph (a) of this section.

§ 1.404A–5 Additional limitations on amounts taken into account for qualified foreign plans.

(a) *Restrictions for nonqualified individuals*—(1) *General rule.* Notwithstanding any other provisions of §§ 1.404A–1 through 1.404A–7, no amount may be taken into account under section 404A for any contribution or amount accrued that is attributable to services performed either in the current or in a prior taxable year—

(i) By a citizen or resident of the United States who is a highly compensated employee (within the meaning of section 414 (q)) (or, for taxable years beginning before January 1, 1989, by a citizen or resident of the United States who is an officer, shareholder, or highly compensated (within the meaning of § 1.410(b)–1 (d)); or

(ii) In the United States, the compensation for which is subject to tax under chapter 1 of subtitle A of the Internal Revenue Code.

(2) *Determination of service attribution*—(i) *Not limited to actual service.* Service performed by individuals described in paragraph (a)(1)(i) of this section includes service credited to those individuals. Service performed in the United States includes service credited in relation (directly or indirectly) to any United States service.

(ii) *Amounts attributable to service performed in the United States.* The accrued benefit attributable to services described in this paragraph (a) is the excess, if any, of the total accrued benefit over the accrued benefit determined without credit for time spent performing services described in this paragraph (a) and without regard to the compensation levels for that time.

(b) *Records to be provided by taxpayer*—(1) *In general.* Notwithstanding any other provisions of §§ 1.404A–1 through 1.404A–7, no amount may be taken into account under section 404A for any contribution or amount accrued unless the taxpayer attaches a statement to its United States income tax return for any taxable year for which a qualified foreign plan maintained by an employer has United States tax significance. This statement must specify the name and type of qualified foreign plan; the cumulative United States amount, the cumulative foreign amount, and the aggregate amount with respect to the plan; the name and country of organization of the employer; and any other information the Commissioner may prescribe by forms and accompanying instructions or by revenue procedure.

(2) *Primary evidence.* The statement described in paragraph (b)(1) of this section and any required forms must be completed in good faith with all of the information called for and with the calculations referenced in paragraph (b)(1) of this section. Except as provided in paragraph (b)(4) of this section, one of the following documents must be attached to the United States income tax return—

(i) A statement from the foreign tax authorities specifying the amount of the deduction allowed in computing taxable income under the appropriate foreign tax law for the relevant year or years with respect to the qualified foreign plan; or

(ii) If the return under the appropriate foreign tax law shows the deduction for plan contributions or plan reserves as a separate identifiable item, a copy of the foreign tax return for the relevant year or years with respect to the qualified foreign plan.

(3) *Additional requirements.* The statement or return attached pursuant to paragraph (b)(2) of this section may be either the original, a duplicate original, a duly certified or authenticated copy, or a sworn copy. If only a sworn copy of a receipt or return is attached, there must be kept readily available for comparison on request the original, a duplicate original, or a duly certified or authenticated copy.

(4) *Secondary evidence.* Where the statement or return described in paragraph (b)(2)(i) or (b)(2)(ii) of this section is not available, all of the following information must be attached to the United States income tax return—

(i) A certified statement setting forth the cumulative foreign amount for each taxable year to which section 404A applies;

(ii) The excerpts from the employer's books and records showing either the change in the reserve or contributions made with respect to the plan for the taxable year to which section 404A applies; and

(iii) The computations of the foreign deduction relating to the plan to be established by data such as excerpts from the foreign law, assessment notices, or other documentary evidence.

(5) *Foreign language.* If the relevant returns, books, records or computations are not maintained in the English language, the taxpayer must furnish, upon request, a certified translation that is satisfactory to the District Director.

(6) *Additional information required by District Director.* If the taxpayer upon request of the District Director fails, without justification, to furnish any additional information that is significant, the provisions of section 982 will apply.

(7) *Authorized officer to complete documents.* The documents required by this section and by §§ 1.404A–6 and 1.404A–7 must be signed by an authorized officer of the taxpayer (as defined in section 6062 or 6063) who must verify under penalty of perjury that the statement and all other documents submitted are true and correct to his knowledge and belief.

(8) *Transitional rule—good faith effort.* For taxable years ending before August 5, 1993, a taxpayer will be treated as satisfying this paragraph (b) if it makes a good faith effort to provide reasonable documentation.

(c) *Actuarial requirements*—(1) *Reasonable actuarial assumptions.* Except as otherwise specifically provided in §§ 1.404A–2 and 1.404A–3 and this paragraph (c), in the case of a qualified reserve plan or a qualified funded plan under which benefits are fixed or determinable, no amount may be taken into account under section 404A unless costs, liabilities, rates of interest, and other factors under the plan are determined on the basis of actuarial assumptions and methods each of which is reasonable (taking into account the experience of the plan and reasonable expectations), or which, in the aggregate, result in an amount being taken into account that is equivalent to that which would be determined if each such assumption and method were reasonable, and that, in combination, offer the actuary's best estimate of anticipated experience under the plan. For plan years beginning before January 1, 1988, the preceding sentence is satisfied if costs, liabilities, rates of interest, and other factors under the plan are determined on the basis of actuarial assumptions and methods that are reasonable in the aggregate (taking into account the experience of the plan and reasonable expectations) and that, in combination, offer the actuary's best estimate of anticipated experience under the plan. Except to the extent required under that paragraph, the interest rate determined under § 1.404A–3(b)(4) may not be considered in determining whether other actuarial assumptions are reasonable in the aggregate for this purpose.

(2) *Full funding limitation.* Notwithstanding any other provisions of §§ 1.404A–1 through 1.404A–7, no amount may be taken into account under section 404A if the amount causes the assets in the trust (in the case of a qualified funded plan) or if taking into account the amount causes the amount of the reserve (in the case of a

VOL 58 ISS 87 MY 7 1993 UMI

qualified reserve plan) to exceed the amount described in section 412(c)(7)(A)(i).

§ 1.404A–6 Elections under section 404A and changes in methods of accounting.

(a) *Elections, changes in accounting methods, and changes in plan years*—(1) *In general*—(i) *Methods of accounting.* An election under section 404A with respect to a qualified foreign plan constitutes the adoption of a method of accounting if the election is made in the taxable year in which the plan is adopted. Any election under section 404A with respect to a preexisting plan, however, constitutes a change in method of accounting requiring the Commissioner's consent under section 446(e) and an adjustment under section 481(a). Additionally, any other change in the method used to determine the amount taken into account under section 404A (a), as well as the revocation of any election under section 404A, constitutes a change in accounting method subject to the consent and adjustment requirements of sections 446(e) and 481(a). This section provides procedures for obtaining the Commissioner's consent to make certain changes in methods of accounting under section 404A. Additionally, § 1.404A–7 provides special procedural rules applicable (along with the rules under this section) for retroactive and transition-period elections under section 404A.

(ii) *Changes not involving accounting methods.* Any change in treatment, adjustment, or correction described in § 1.446–1(e)(2)(ii)(b) (e.g., correction of computational errors) is not a change in accounting method. While a retroactive qualified funded plan election under § 1.404A–7(c) constitutes a change in method of accounting, a mere election to apply the effective date of section 404A under § 1.404A–7(b) retroactively does not necessarily result in a change in accounting method. Additionally, a retroactive election for funded foreign branch plans under § 1.404A–7(d) will not be treated as a change in method of accounting, except to the extent that the taxpayer took erroneous deductions under its method of accounting prior to the beginning of its open period. Finally, a change of actuarial assumptions will not be treated as a change in method of accounting for purposes of this section.

(2) *Single plan*—(i) *General rule.* Except as otherwise provided, the rules of this section regarding elections, revocations, and re-elections, and the adoption or change of a plan year, apply separately (i.e., on a plan-by-plan basis) to each plan that qualifies as a single plan (as defined in § 1.414(l)–1(b)). For purposes of this definition, a separate reserve maintained by an employer exclusively for its liability under a plan is considered a plan asset that is available exclusively to pay benefits to employees who are covered by the plan and to their beneficiaries. Although a plan may be treated as a reserve plan under foreign law, this treatment is not binding for purposes of section 404A and this section.

(ii) *Example.* The principles of this paragraph (a)(2) are illustrated by the following example:

Example. S is a wholly-owned foreign subsidiary of *P*, a domestic corporation. *S* maintains a deferred compensation plan under local law to provide benefits to its employees upon retirement based upon years of service and the highest five-year average salary. *S* decided to account for 70 percent of its deferred compensation liabilities through an unfunded book reserve (Plan One), and to account for the remaining 30 percent through a trust equivalent (Plan Two). All of the assets of Plan One and Plan Two were available for payment of liabilities under their respective plans, and were only available for payment of liabilities under their respective plans. Thus, when deferred compensation was paid to *S*'s employees, within the meaning of this paragraph (a)(2), 70 percent of the amount was paid by check drawn against the general assets of *S* and 30 percent of the amount paid was paid by check drawn on the assets of the trust equivalent. Pursuant to this section, *P* made a qualified reserve plan election for Plan One, which it defined as a plan of deferred compensation with liability for 70 percent of the amount of deferred compensation owing to each employee under *S*'s deferred compensation plan. In addition, it made a qualified funded plan election for Plan Two, which it defined as a plan of deferred compensation with liability for the remaining 30 percent. Because *S*'s reserve for its liability was treated as a plan asset with respect to 70 percent of the liability and the assets of the trust, Plan One met the requirements of a "single plan" under § 1.414(l)–1(b), and Plan Two was a separate "single plan". Thus, *S* could take into account only 70 percent of its liability to each employee under its deferred compensation plan when calculating the reasonable additions to the reserve under section 404A(c) for Plan One. Similarly, the full funding limitation and other calculations with respect to Plan Two may only be made with respect to 30 percent of *S*'s liability to each employee under the foreign deferred compensation plan.

(b) *Initial elections under section 404A*—(1) *In general.* The Commissioner's consent to elect initially under section 404A to treat a single plan as a qualified funded plan or as a qualified reserve plan is granted automatically if the taxpayer complies with the requirements of this paragraph (b). Except as provided in § 1.404A–7, an initial election under this section with respect to any qualified foreign plan may be made only for a taxable year beginning after December 31, 1979.

(2) *Time for making election*—(i) *Foreign branch plans.* Except as provided in § 1.404A–7, the initial election for a qualified foreign plan maintained by a foreign branch must be made no later than the time prescribed by law for filing the United States return (including extensions) for the first taxable year for which the election is to be effective.

(ii) *Foreign corporation plans.* Except as provided in § 1.404A–7, the initial election for a qualified foreign plan maintained by a foreign corporation must be made no later than the time allowed for making elections under §§ 1.964–1 and 1.964–1T. Thus, the election under section 404A may be deferred until the earnings and profits of the foreign corporation have United States tax significance, as defined in §§ 1.964–1 and 1.964–1T. United States tax significance may occur in a number of ways, including, for example, a dividend distribution, an income inclusion under section 951(a), a section 1248 transaction, a step-up of basis by earnings and profits for purposes of valuing assets for interest allocation purposes under section 864(e), or an inclusion in income of the earnings of a qualified electing fund under section 1293(a)(1).

(3) *Manner in which election is to be made*—(i) *Foreign branch plans.* In the case of a qualified foreign plan maintained by a domestic corporation, the initial election must be made by the taxpayer by attaching a list of plans for which section 404A treatment is desired to a return filed within the time prescribed in paragraph (b)(2)(i) of this section.

(ii) *Controlled foreign corporation plans.* If a qualified foreign plan is maintained by a controlled foreign corporation, the initial election under this section must be made in the manner prescribed by §§ 1.964–1 and 1.964–1T and must include a list of all plans for which the election is made.

(iii) *Noncontrolled foreign corporation plans.* If a qualified foreign plan is maintained by a noncontrolled foreign corporation, the initial election under this section must be made in the manner prescribed by §§ 1.964–1 and 1.964–1T and must include a list of all plans for which the election is made, as if the noncontrolled foreign corporation were a controlled foreign corporation. In applying the rules of §§ 1.964–1 and 1.964–1T, the term "majority domestic corporate shareholders" is substituted for the term "controlling United States shareholders" wherever it appears in §§ 1.964–1 and 1.964–1T. The term "majority domestic corporate shareholders" has the meaning set forth in § 1.985–2(c)(3)(i).

(4) *Other requirements for election.* For each plan listed, pursuant to paragraph (b)(3) of this section, the taxpayer must designate whether it elects to treat the plan as a qualified funded plan or qualified reserve plan, and must designate a plan year. Additionally, for each plan listed, the taxpayer must disclose the amount of any section 481(a) adjustment, as well as the initial cumulative United States amount, the initial cumulative foreign amount, and the initial aggregate amount defined in paragraph (g) of this section. See § 1.404A–5(b) for rules on additional information required, signing and verifying required statements, and notices and forms necessary to elect under section 404A. Additionally, see § 1.404A–7(d)(1) for required agreement to assessment of tax for retroactive elections for funded foreign branch plans.

(c) *Termination of election when a plan ceases to be a qualified foreign plan*—(1) *In general.* An election under section 404A with respect to a foreign deferred compensation plan is terminated if at any time on or after the first day of the first taxable year for which the election is effective the plan ceases to be a qualified foreign plan by reason of a failure to satisfy the conditions of section 404A(e) (1) or (2). Thus, for example, the election is terminated (subject to the consent of the Commissioner) if more than 10 percent of the amounts taken into account under the plan are attributable to services performed by employees subject to United States federal income tax. As used in this section, the term "termination" refers only to situations under which a plan ceases to be a qualified foreign plan by reason of a failure to satisfy the conditions of section 404(e) (1) or (2). Thus, the term is distinguished from a voluntary revocation of an election (i.e., under paragraph (d)(1) of this section), which also causes a plan to cease to be a qualified foreign plan. Upon termination of an election under section 404A, a change in method of accounting is required. The conditional advance consent of the Commissioner is granted for this change in method of accounting. This conditional consent may be withdrawn, however, if the District Director determines that tax avoidance was a purpose of the termination or if the procedures in paragraph (c)(2) of this section are not satisfied.

(2) *Rules for changing method of accounting upon termination of election*—(i) *Time for making change*—(A) *Foreign branch plans.* Except as provided in § 1.404A–7, in the case of a plan of a foreign branch the change in method of accounting required upon termination of a section 404A election must be made no later than the time prescribed by law for filing the United States return (including extensions) for the taxable year in which the plan ceases to satisfy the requirements of section 404A(e) (1) or (2).

(B) *Foreign corporation plans.* Except as provided in § 1.404A–7, in the case of a plan of a foreign corporation the change in method of accounting required upon termination of a section 404A election shall be made no later than the first year after the termination in which the earnings and profits of the foreign corporation have United States tax significance, as defined in §§ 1.964–1 and 1.964–1T. See paragraph (b)(2)(ii) of this section for United States tax significance examples.

(ii) *Procedures for changing method of accounting upon termination of election*—(A) *Foreign branch plans.* The change in method of accounting required upon termination of a section 404A election with respect to a foreign branch plan must be made by attaching a statement to the return described in paragraph (c)(2)(i)(A) of this section disclosing the amount of any section 481(a) adjustment (required under paragraph (e) of this section and computed in accordance with paragraph (f) of this section) arising upon the change.

(B) *Controlled foreign corporation plans.* The change in method of accounting required upon termination of a section 404A election with respect to a controlled foreign corporation plan must be made in the manner prescribed by §§ 1.964–1 and 1.964–1T and must include disclosure of the amount of any section 481(a) adjustment (required under paragraph (e) of this section and computed in accordance with paragraph (f) of this section) arising upon the change.

(C) *Noncontrolled foreign corporation plans.* The change in method of accounting required upon termination of a section 404A election with respect to a noncontrolled foreign corporation plan must be made in the manner prescribed by §§ 1.964–1 and 1.964–1T and must include disclosure of the amount of any section 481(a) adjustment (required under paragraph (e) of this section and computed in accordance with paragraph (f) of this section) arising upon the change. In applying the rules of §§ 1.964–1 and 1.964–1T, the term "majority domestic corporate shareholders" is substituted for the term "controlling United States shareholders" wherever it appears in §§ 1.964–1 and 1.964–1T. The term "majority domestic corporate shareholders" has the meaning set forth in § 1.985–2 (c)(3)(i).

(d) *Other changes in methods of accounting and changes in plan year*—(1) *Application for consent.* Except as provided in paragraph (c) of this section or in § 1.404A–7, once an initial election under section 404A is effective with respect to a plan, the taxpayer must separately apply to obtain the express consent of the Commissioner prior to changing any method of accounting with respect to a foreign deferred compensation plan. Application for the consent of the Commissioner is required whether or not the method being changed is proper or permitted under the Internal Revenue Code and regulations thereunder. Any change in method of accounting not described in this paragraph (d)(1) must be made in accordance with the requirements of section 446(e) and the regulations thereunder. The procedures prescribed in this paragraph (d), however, are the exclusive procedures for making the following changes in method of accounting—

(i) Revocation of a section 404A election;

(ii) Re-election under section 404A following termination or revocation of a section 404A election;

(iii) Changing the treatment of a plan from a qualified funded plan to a qualified reserve plan (or the converse); or

(iv) Changing the actuarial funding method used to determine costs under a qualified funded plan.

(2) *Procedures for other changes in method of accounting*—(i) *Foreign branch plans.* To request consent to a change in method of accounting described in paragraph (d)(1) of this section, the taxpayer must file an application on Form 3115 with the Commissioner generally within 180 days after the beginning of the taxable year in which the change is requested to be effective. In the case of a revocation of an election under section 404A, however, the 180-day period in the preceding sentence is extended to the time prescribed by law for filing the United States return for the taxable year of the change.

(ii) *Foreign corporation plans.* For a controlled foreign corporation or a noncontrolled foreign corporation, a request for consent to revocation or to another change in method of accounting

VOL 58 ISS 87 MY 7 1993 UMI

must be made in accordance with the rules of §§ 1.964–1 and 1.964–1T.

(3) *Plan year.* A taxpayer must secure the consent of the Commissioner to change the plan year of a qualified foreign plan. Termination or revocation of a section 404A election will not effect a change in the plan year of the plan.

(e) *Application of section 481*—(1) *In general.* A change in method described in this section constitutes a change in method of accounting to which section 481 applies. Except as otherwise provided in this paragraph and in paragraph (f) of this section, this adjustment must be made in accordance with section 481 and the regulations thereunder in those circumstances. For purposes of section 481(a)(2), any change in method described in this section is considered a change in method of accounting initiated by the taxpayer.

(2) *Period of adjustment*—(i) *In general.* The section 481 (a) adjustment period is determined under the rules of this paragraph (e)(2).

(ii) *Election or re-election.* In the case of an election or a re-election following termination or revocation, the section 481(a) adjustment required by paragraph (e)(1) of this section must be taken into account ratably over a 15-year period, beginning with the first taxable year for which the election or re-election is effective. This section 481(a) adjustment period also applies to a change from a qualified funded plan to a qualified reserve plan.

(iii) *Termination or revocation of election and all other changes in method.* The adjustment required by paragraph (e)(1) of this section for all changes in method (other than those described in paragraph (e)(2)(ii) of this section), including changes in election from a qualified reserve plan to a qualified funded plan, must be taken into account ratably over a six-year period, beginning with the first taxable year for which the change is effective. If an unamortized section 481(a) adjustment amount (e.g., from a previous change) remains at the end of a change in method of accounting to which this paragraph (e)(2)(iii) applies, the net amount of all of the section 481(a) adjustments must be taken into account ratably over this six-year section 481(a) adjustment period.

(iv) *Acceleration of section 481(a) adjustment.* If the employer ceases to engage in the relevant trade or business at any time prior to the expiration of the applicable section 481(a) adjustment period provided in paragraph (e)(2)(ii) or (e)(2)(iii) of this section, the employer must take into account, in the taxable year of cessation, the balance of any section 481(a) adjustment not previously taken into account in computing taxable income (in the case of a branch) or earnings and profits (in the case of a foreign corporation). For purposes of this paragraph (e)(2)(iv), whether or not an employer ceases to engage in the trade or business is to be determined under administrative procedures issued under § 1.446–1(e). In applying those procedures, "employer" is to be defined in the same manner as "taxpayer" is defined under those procedures.

(3) *Allocation and source.* The amount of any net negative section 481(a) adjustment determined under this section and taken into account for a taxable year must be allocated and apportioned under § 1.861–8 in the same manner as a deduction or reduction in earnings and profits under section 404A. Any net positive section 481(a) adjustment that is taken into account for a taxable year first must be reduced by directly allocating to such adjustment the employer's section 404A expense that is subject to apportionment (including any amount that otherwise would be capitalized); to the extent a net positive section 481(a) adjustment exceeds the amount of the employer's section 404A expense for the taxable year, such excess must be sourced or otherwise classified in the same manner as section 404A deductions or reductions in earnings and profits are allocated and apportioned.

(4) *Example.* The principles of this paragraph (e) are illustrated by the following example:

Example. X, a domestic corporation, made an initial election under section 404A to treat an existing deferred compensation plan maintained by its foreign branch as a qualified reserve plan, effective beginning in X's 1985 taxable year. X's foreign branch maintains its books and records in FC, the functional currency. Previously, X had consistently used a permissible method of accounting with respect to the plan. The section 481(a) adjustment arising from X's change in accounting method upon its section 404A election was a negative FC150,000. Beginning with its 1985 taxable year, X took into account a negative FC10,000 each year (FC150,000/15). Effective beginning in X's 1988 taxable year, X received the Commissioner's express consent to change from a qualified reserve plan to a qualified funded plan. The section 481(a) adjustment attributable solely to the 1988 change was a positive FC132,000. Beginning with its 1988 taxable year, and for each of the five succeeding taxable years, X took into account a positive FC2,000, as computed below.

Negative 1985 section 481(a) adjustment	(FC150,000)
Less: 1985, 1986 & 1987 amounts taken into account	30,000
Subtotal	(120,000)
Positive 1988 section 481(a) adjustment	132,000
Net positive section 481(a) adjustment	12,000
Section 481(a) adjustment period	÷ 6
Net amount taken into account annually during section 481(a) adjustment period	FC2,000

(f) *Computation of section 481(a) adjustment*—(1) *In general.* For purposes of section 404A, except as provided in § 1.404A–7(f)(1)(ii)(C), the amount of the section 481(a) adjustment required under paragraph (e)(1) of this section equals—

(i) The Old Method Closing Amount; less

(ii) The New Method Opening Amount.

(2) *Old Method Closing Amount*—(i) *In general.* Except as otherwise provided in paragraph (f)(2) (ii), (iii), or (iv) of this section (or as otherwise prescribed by the Commissioner), the Old Method Closing Amount equals—

(A) The total of all past deductions taken with respect to liabilities under the plan; plus

(B) The net income earned directly or indirectly by any separate funding entity (e.g., account or trust) with respect to the plan, but only to the extent that such net income has not previously been taken into account in determining taxable income (in the case of a foreign branch) or earnings and profits (in the case of a foreign corporation); minus

(C) The total of all past payments under the plan made to plan participants and beneficiaries by the employer, the trust, or the separate funding entity.

(ii) *Taxpayer formerly using a reserve method*—(A) *In general.* If a taxpayer has consistently taken amounts with respect to the plan into account under a reserve method, the Old Method Closing Amount equals the closing reserve balance at the end of the closing year calculated under the taxpayer's reserve method. For purposes of the preceding sentence, a reserve method means a method of accrual based on the actuarial present value of expected future plan benefits.

(B) *Former quolified reserve plan.* To request the Commissioner's consent in the case of a former qualified reserve plan, the closing reserve balance must be adjusted for any unamortized increases or decreases to the reserve described in § 1.404A–3(c) that have not yet been taken into account. For example, if the closing reserve balance is FC100,000, but FC10,000 of the closing reserve balance consists of an unamortized increase in the reserve that has not previously been taken into account due to the ten-year amortization requirements of § 1.404A–3(c), the Old Method Closing Amount is FC90,000.

(iii) *Taxpayer formerly using pay-as-you-go method.* If the taxpayer has consistently taken amounts into account with respect to the plan based only on actual payments of plan benefits to participants and beneficiaries, the Old Method Closing Amount equals zero.

(iv) *Taxpayer formerly using a funded method*—(A) *Payment to separate funding entity.* If the taxpayer has consistently taken amounts into account with respect to the plan based only on actual payments to a separate funding entity and on payments by the employer (but not by the funding entity) to plan participants or beneficiaries, the Old Method Closing Amount equals the balance in the separate funding entity at the end of the closing year, including amounts attributable, directly or indirectly, to net investment income that has not previously been taken into account in determining taxable income (in the case of a foreign branch) or earnings and profits (in the case of a foreign corporation).

(B) *Former qualified funded plan.* In the case of a former qualified funded plan, the Old Method Closing Amount generally equals the amount described in paragraph (f)(2)(iv)(A) of this section, adjusted, however, by—

(*1*) Reducing the amount properly to reflect any net limitations under section 404A (b) and (g) (e.g., the full funding limitation for a qualified funded plan) that were applied in determining amounts taken into account under the former section 404A method of accounting; and

(*2*) Increasing the amount properly to reflect any amounts that are not paid during the closing year but that are permitted to be taken into account in the closing year under section 404A(b)(2) (relating to payments made after the close of the taxable year).

(v) *Section 404A(d) limitation.* In computing the Old Method Closing Amount upon the termination or revocation of an election under section 404A, the limitations of section 404A(d) and § 1.404A–4 must be taken into account. Thus, if the Old Method Closing Amount is determined under paragraph (f)(2)(ii)(B) or (f)(2)(iv)(B) of this section, the amount otherwise determined under those paragraphs shall be reduced by applying the section 404A(d) and § 1.404A–4 limitations to the extent the cumulative United States amount under § 1.404A–4 exceeds the cumulative foreign amount under § 1.404A–4.

(3) *New Method Opening Amount*—(i) *Qualified reserve plan.* In the case of an election to treat a plan as a qualified reserve plan, the New Method Opening Amount equals the balance of the reserve as of the end of the last day of the closing year, calculated under the rules of section 404A(c) and § 1.404A–3 based on plan information and data as of that date. The New Method Opening Amount must be reduced (or increased) for any unamortized increases (or decreases) to the reserve described in section 404A(c)(4) and § 1.404A–3(c).

(ii) *Qualified funded plan.* In the case of an election to be treated as a qualified funded plan, the New Method Opening Amount equals the amount of funds in the trust as of the beginning of the first day of the opening year, adjusted as necessary to take into account the rules of section 404A (b) and (g). If the separate funding entity does not qualify as a trust under § 1.404A–1(e), the New Method Opening Amount in the case of a qualified funded plan is zero because there is no balance in a trust as defined in § 1.404A–1(e).

(iii) *Nonqualified plan.* In the case of any plan that ceases to be a qualified foreign plan (either by reason of the termination or revocation of a section 404A election), the New Method Opening Amount is zero.

(iv) *Section 404A(d) limitation.* In computing the New Method Opening Amount upon an election under section 404A, the limitation on deductions of section 404A(d) and § 1.404A–4 must be taken into account. Thus, if the New Method Opening Amount is determined under paragraph (f)(2)(i) or (f)(2)(ii) of this section, the amount otherwise determined must be reduced to the extent the cumulative United States amount computed under § 1.404A–4 exceeds the cumulative foreign amount computed under § 1.404A–4. See paragraph (g) of this section for initialization of amounts taken into account under section 404A(d).

(4) *Definitions and special rules*—(i) *Opening year.* For purposes of this section, the opening year is the first taxable year for which the new method of accounting is effective with respect to a plan. For example, in the case of an election to treat a foreign corporation plan as a qualified reserve plan beginning in 1989, the opening year is 1989, even though the election may not be made until 1994 pursuant to paragraph (b)(2)(ii) of this section.

(ii) *Closing year.* For purposes of this section, the closing year is the taxable year immediately preceding the opening year.

(iii) *Separate funding entity.* A separate funding entity described in paragraphs (f)(2)(i)(B) and (f)(2)(iv) of this section is any entity that satisfies the first requirement in the definition of the equivalent of a trust in § 1.404A–1(e) (segregation in a separate legal entity) and, in practice, also satisfies the third requirement in that definition (dedication to payment of plan benefits) with respect to benefits under the relevant plan.

(iv) *Special rules for certain foreign corporation plans.* In the case of a foreign corporation's plan for which no method has been used for some or all prior taxable years because no calculation of earnings and profits has been necessary for those years (see, e.g., paragraph (b)(2)(ii) of this section), the employer may assume that the old method has been consistent with any method actually used consistently in immediately prior years. If no calculation of earnings and profits has been made for prior years, in determining the Old Method Closing Amount, the taxpayer may assume the method used was a method described in paragraph (f)(2)(iii) of this section. This assumed method used in the calculation of the Old Method Closing Amount must actually be used by the taxpayer for all the prior taxable years to the extent reductions of earnings and profits for those years are ever determined with respect to the plan.

(v) *Reference to rules applicable in the case of failure to consider net investment income in computing section 481(a) adjustment.* The treatment of net investment income earned by a funding vehicle that has not previously taken into account by the taxpayer in determining taxable income (in the case of a foreign branch) or earnings and profits (in the case of a foreign corporation), and that is not properly considered (as required under paragraphs (f)(2)(i)(B) and (f)(2)(iv)(A) of this section) in determining the amount of the section 481(a) adjustment for purposes of section 404A, is determined under other applicable provisions, which may include sections 61, 671 through 679, and 1001.

(vi) *Certain section 481(a) adjustments treated as carryover contributions.* In the case of an election for a plan to be treated as a qualified funded plan, any net positive section 481(a) adjustment is treated as a carryover contribution (within the meaning of § 1.404A–2(d)(4)) to the extent that the adjustment is attributable to limits (that would be taken into account under § 1.404A–2(d)(4)) on the

VOL 58 ISS 87 MY 7 1993 UMI

amounts previously contributed to the trust under the plan that could be taken into account under section 404A.

(5) *Examples.* The principles of paragraph (f) of this section are illustrated by the following examples:

Example 1. Nonqualified reserve plan to qualified reserve plan. A foreign subsidiary of a domestic corporation established an irrevocable balance sheet reserve for pension expenses in 1981. The subsidiary maintains its books and records in FC, the functional currency. From 1981 through 1987, the taxpayer reduced earnings and profits of the foreign subsidiary by FC150,000, the amount of the pension liability which had accrued under the plan. This method of accounting was never challenged or changed by the District Director prior to the expiration of the statute of limitations for the 1981 through 1987 taxable years. Through December 31, 1987, the last day of the closing year, actual pension payments totalled FC15,000. For the 1988 taxable year, the taxpayer made an election for the plan to be treated as a qualified reserve plan. The reserve calculated under section 404A as of the first day of the 1988 taxable year, the opening year, and based upon employee census data as of that date, was FC175,000. The Old Method Closing Amount was FC135,000 (FC150,000 less FC15,000). The New Method Opening Amount was FC175,000. The section 481(a) adjustment was a negative FC40,000 (FC135,000 less FC175,000). This adjustment is to be taken into account over the 15-year section 481(a) adjustment period prescribed in paragraph (e)(2)(ii) of this section.

Example 2. Nonqualified reserve plan to qualified reserve plan. Assume the same facts as in *Example 1*, except that the reserve calculated under section 404A as of the first day of the 1988 taxable year and based upon employee census data as of that date was FC75,000. The Old Method Closing Amount was FC135,000 (FC150,000 less FC15,000). The New Method Opening Amount was FC75,000. The section 481(a) adjustment was a positive FC60,000 (FC135,000 less FC75,000). This adjustment is to be taken into account over the 15-year section 481(a) adjustment period prescribed in paragraph (e)(2)(ii) of this section.

Example 3. Nonqualified funded plan to qualified reserve plan. *M*, a domestic corporation, wholly owns *N*, a foreign corporation. *N* maintains its books and records in FC, the local currency. From 1981 through 1988, *N* maintained a nonqualified funded plan. During this period, *N* contributed FC55,000 to the separate funding entity administering the plan and reduced earnings and profits by FC55,000. The separate funding entity realized net income of FC17,000 from investment of plan assets and paid nothing to participants. None of the FC17,000 net investment income earned in the separate funding entity was taken into account in computing *N*'s earnings and profits. As of the last day of *N*'s 1988 taxable year, the closing year, the plan's fund balance was FC72,000, comprised of FC55,000 (excess contributions) and FC17,000 (investment income). The reserve calculated under section 404A as of the first day of the 1989 taxable year, the opening year, was FC100,000. Effective for *M*'s 1989 taxable year, *M* elected under section 404A to treat *N*'s funded plan as a qualified reserve plan. The Old Method Closing Amount was FC72,000. The New Method Opening Amount was FC100,000; thus, if, in the future, *N* pays FC100,000 to plan participants or beneficiaries, that FC100,000 will not again reduce *N*'s earnings and profits. The section 481(a) adjustment was a negative FC28,000 (FC72,000 less FC100,000). However, if the District Director later challenges and requires *N* to change its method of accounting for foreign deferred compensation used in determining its 1981 through 1988 earnings and profits in a taxable year prior to the 1989 taxable year, the section 481(a) adjustment could be changed from a negative FC28,000 to a negative FC100,000. Pursuant to the administrative procedures under section 446(e), the District Director, upon challenging the treatment of foreign deferred compensation in years prior to 1989, could require any necessary positive section 481(a) adjustment to be taken into account in one taxable year.

Example 4. Nonqualified funded plan to qualified funded plan. *Y*, a domestic corporation, wholly owns *X*, a foreign corporation. *X* maintains its books and records in FC, the local currency. From 1981 through 1988, *X* maintained a nonqualified funded plan. During this period, *X* reduced earnings and profits by contributions of FC55,000 to the plan. The plan paid participants FC30,000. As of the last day of *Y*'s 1988 taxable year, the plan's fund balance was FC29,000, comprised of FC25,000 (net contributions) and FC4,000 (interest income that was never previously taken into account in determining earnings and profits). Effective for *Y*'s 1989 taxable year, *Y* elected under section 404A to treat *X*'s funded plan as a qualified funded plan. The Old Method Closing Amount was FC29,000. The New Method Opening Amount was FC29,000. The section 481(a) adjustment was zero (FC29,000 less FC29,000). See *Example 3*, however, for the effects on the section 481(a) adjustment of a successful challenge to *X*'s method of accounting for foreign deferred compensation in years prior to 1989 by the District Director.

Example 5. Z, the wholly owned foreign subsidiary of *Y*, a domestic corporation, has maintained a reserve plan for its employees, beginning in 1981. *Z* maintains its books and records in FC, the local currency. Effective for 1984, *Y* elected under section 404A to treat the plan as a qualified reserve plan. The only section 481(a) adjustment required was to take into account the limitation under section 404A(d). In 1981 through 1983, prior to the section 404A election, *Z*'s earnings and profits were reduced by additions to the reserve. This method of accounting was never challenged or changed by the District Director prior to the expiration of the statute of limitations for the 1981 through 1983 taxable years. Thus, the Old Method Closing Amount equaled the balance in the reserve, which was FC300. To compute the New Method Opening Amount, the opening reserve took into account the lesser of the cumulative United States amount (FC300) or the cumulative foreign amount (FC90) as of the first day of 1984, the opening year. Thus, the New Method Opening Amount was FC90. The section 481(a) adjustment was therefore a positive FC210 (FC300—FC90); 1/15 of this amount, FC14 (FC210/15), is being taken into account as an increase in earnings and profits each year over the 15-year section 481(a) adjustment period that began in 1984.

Example 6. Nonqualified reserve plan to qualified reserve plan. Assume the same facts as in *Example 5* for all taxable years and the annual United States reduction, foreign reduction, cumulative United States amount, cumulative foreign amount and the section 481(a) adjustment shown below. The total annual reduction (or increase) in *Z*'s earnings and profits was as follows—

	1984	1985	1986	1987	1988	1989	1990
Amount determined under U.S. law with respect to the plan under section 404A for the taxable year without regard to section 404A(d)	FC(40)	FC(50)	FC(60)	FC(70)	FC(80)	FC(90)	FC(100)
Amount allowed as a deduction for the taxable year under the appropriate foreign tax laws	(70)	(260)	(50)	(40)	(30)	(20)	(10)
Cumulative U.S. amount	(340)	(390)	(450)	(520)	(600)	(690)	(790)
Cumulative foreign amount	(160)	(420)	(470)	(510)	(540)	(560)	(570)
Lesser of cumulative U.S. or foreign amount	(160)	(390)	(450)	(510)	(540)	(560)	(570)
Reduced by the aggregate amount	90	160	390	440	510	540	560
	(70)	(230)	(60)	(70)	(30)	(20)	(10)

	1984	1985	1986	1987	1988	1989	1990
Amount taken into account for the taxable year[1]	(70)	(230)	(50)	(70)	(30)	(20)	(10)
Positive section 481 adjustment	14	14	14	14	14	14	14
Total increase (reduction) in earnings and profits taken into account for the taxable year	FC(56)	FC(216)	FC(36)	FC(56)	FC(16)	FC(6)	FC(4)

[1] The limitation in § 1.404A–4(c) applies to taxable years 1984, 1985 and 1986. In 1986, the amount deductible under the appropriate foreign tax law was less than the lower of (1) the cumulative U.S. amount, or, (2) the cumulative foreign amount (then reduced by the aggregate amount).

(g) Initial section 404A(d) amounts—(1) *In general.* By making an election under section 404A, a taxpayer adopts section 404A(d) as part of its method of accounting. Section 1.404A–4 provides rules to apply the limitations of section 404A(d) in taxable years when an election under section 404A is in effect. This paragraph (g) provides rules to compute initial amounts under section 404A(d) in the opening year. These rules are based on the rules to compute the New Method Opening Amount in paragraph (f)(3) of this section.

(2) *Computation of amounts.* As of the first day of the opening year, the initial section 404A(d) amounts are as follows:

(i) The initial cumulative United States amount equals the New Method Opening Amount without regard to any reduction under paragraph (f)(3)(iv) of this section.

(ii) The initial cumulative foreign amount equals the New Method Opening Amount computed as though the appropriate foreign tax law were the new method of accounting and without regard to paragraph (f)(3)(iv) of this section.

(iii) The initial aggregate amount equals the lesser of—

(A) The initial cumulative United States amount; and

(B) The initial cumulative foreign amount.

(3) *Example.* The principles of paragraph (g) of this section are illustrated by the following example:

Example. A foreign subsidiary of a domestic corporation maintains its books and records in FC, the local currency. The subsidiary established a funded deferred compensation plan in 1983 but reduced earnings and profits on a pay-as-you-go basis. The plan year and the taxable year of the domestic corporation and the subsidiary are the calendar year. For the 1990 taxable year, the domestic corporation elected to treat the plan as a qualified reserve plan. The balance in the separate funding entity as of January 1, 1990, the first day of the opening year, was FC90,000. The initial United States cumulative amount (the opening reserve) was FC150,000. The initial foreign cumulative amount (the balance in the separate funding entity) was FC90,000. The initial aggregate amount was FC90,000 (the lesser of FC90,000 or FC150,000). Since the subsidiary reduced earnings and profits on the pay-as-you-go method, the Old Method Closing Amount was zero. The section 481(a) adjustment was a negative FC90,000 (zero less FC90,000 (the lesser of FC150,000 or FC90,000)).

§ 1.404A–7 Effective date, retroactive elections, and transition rules.

(a) *In general*—(1) *Effective date.* Except as otherwise provided in this section, section 404A applies to taxable years beginning after December 31, 1979.

(2) *Overview of retroactive elections for taxable years beginning before January 1, 1980*—(i) *Plans of foreign subsidiaries.* Section 2(e)(2) of Public Law 96–603 permitted a taxpayer to make section 404A apply retroactively for all of its foreign subsidiaries. Paragraph (b) of this section describes and provides the time and manner to make, perfect, or revoke this retroactive effective date election. If a retroactive effective date election was made, the taxpayer was also eligible to make a qualified funded plan election or a qualified reserve plan election effective retroactively for any of its subsidiaries' plans that met the requirements of § 1.404A–1(a) (other than paragraph (4) thereof) for the relevant period. Paragraph (c) of this section describes and provides the time and manner to make, perfect, or revoke these retroactive plan-by-plan elections for foreign subsidiaries.

(ii) *Plans of foreign branches.* Section 2(e)(3) of Public Law 96–603 permitted a taxpayer to make a qualified funded plan election retroactively for any plans maintained by a foreign branch that met the requirements of § 1.404A–1(a) (other than paragraph (4) thereof) for the relevant period. Paragraph (d) of this section describes and provides the time and manner to make this retroactive plan-by-plan qualified funded plan election for plans maintained by foreign branches.

(3) *Overview of special transition rules for election, revocation, and re-election.* Paragraph (e) of this section provides the time and manner to make and revoke qualified funded plan and qualified reserve plan elections for a taxpayer's transition period.

(b) *Retroactive effective date elections for foreign subsidiaries*—(1) *In general.* Section 2(e)(2) of Public Law 96–603 permitted a taxpayer to make section 404A effective during the taxpayer's open period. If the election was made, the taxpayer accepted section 404A (including, for example, § 1.404A–1(d)) as the operative law for all foreign subsidiaries (whether or not controlled foreign corporations) during the taxpayer's entire open period. If the election was made, section 404A applies to all distributions from accumulated profits (or earnings and profits) earned after December 31, 1970 (unless the election is revoked pursuant to paragraph (b)(3) of this section, if applicable). If accumulated profits were earned prior to January 1, 1971, a change in method of accounting is required for the foreign subsidiary's taxable year that ends with or within the first taxable year in the taxpayer's open period. A section 481(a) adjustment is required for amounts taken into account prior to the beginning of the foreign subsidiary's year of change and must be computed applying the rules of § 1.404A–6(f).

(2) *Time and manner to make, perfect, or revoke election.* The retroactive effective date election described in paragraph (b)(1) of this section is not effective unless the election was actually made no later than the time prescribed by law for filing the United States return for the first taxable year ending on or after December 31, 1980, including extensions (whether or not the time was actually extended for filing the taxpayer's return), and unless the taxpayer perfects the election by filing a statement indicating the taxpayer's agreement to perfect the election with an amended return for the first taxable year ending on or after December 31, 1980, on or before May 9, 1994. In order to be effective, the perfection must be made in the manner provided in § 1.404A–6(b)(3) (ii) or (iii) An election that is not perfected is considered retroactively revoked.

VOL
58
ISS
87
MY
7
19 93
UMI

(3) *Requirement to amend returns*—(i) *In general.* In addition to the amended return required by paragraph (b)(2) of this section, the taxpayer must file any other amended United States returns that are necessary to conform the treatment of all items affected by the election or revocation to the treatment consistent with the election or revocation within the time period described in paragraph (b)(2) of this section. If no adjustments are necessary, the amended return required by paragraph (b)(2) of this section must contain a statement to that effect.

(ii) *Required statements.* All amended returns required by this paragraph (b)(3) must be accompanied by a statement containing—

(A) The open years, open period and retroactive period of the taxpayer;

(B) The taxable year for which the election is perfected or revoked;

(C) A statement that the election (or elections) are perfected or revoked pursuant to the authority contained in § 1.404A–7; and

(D) A signature and verification as provided in § 1.404A–5(b)(7).

(c) *Retroactive plan-by-plan elections for foreign subsidiaries*—(1) *In general.* Any taxpayer that makes a retroactive effective date election described in paragraph (a)(2)(i) of this section under the rules of paragraph (b) of this section may, at its option, also elect to treat any foreign plan of a subsidiary that met the requirements of § 1.404A–1(a) (other than paragraph (4) thereof) for the relevant period as a qualified funded plan or as a qualified reserve plan under section 404A, beginning in any taxable year of the foreign subsidiary that ends with or within the taxpayer's open period (or for any earlier taxable year beginning after December 31, 1971, for which earnings and profits of the subsidiary had no United States tax significance). Alternatively, the taxpayer may decide to make no such plan-by-plan election with respect to any particular plan or plans of any of its foreign subsidiaries. Rules similar to those contained in § 1.404A–6 (including, where applicable, the requirement to obtain the consent of the Commissioner) are used to effect such plan-by-plan elections. If the plan existed in a taxable year beginning prior to the first year for which the election was effective, a change in method of accounting is required for the year of the election. The year of change for purposes of computing the section 481 (a) adjustment is the first year that the election is effective.

(2) *Time and manner to make, perfect, or revoke election.* A taxpayer that is eligible to make a plan-by-plan election described in paragraph (c)(1) of this section may make or perfect such an election by attaching a statement to that effect on an amended return for the year that the election is to be effective on or before May 9, 1994. In order to be effective, the perfection of a plan-by-plan election must be made in the manner provided in § 1.404A–6(b)(3) (ii) or (iii). An election that is not perfected is considered retroactively revoked. Any election made or perfected under this paragraph (c) will continue in effect for taxable years beginning after the taxpayer's open period, unless revoked under paragraph (c)(4) or (e) of this section or § 1.404A–6.

(3) *Requirement to amend returns.* In addition to the amended return required by paragraph (c)(2) of this section, the taxpayer must file any other amended United States returns that are necessary to conform the treatment of all items affected by the election or revocation to the treatment consistent with the election or revocation. All amended returns must be accompanied by the statement described in paragraph (b)(3)(ii) of this section (substituting "made, perfected, or revoked" for "perfected or revoked" where applicable) and all of the information required by § 1.404A–6(b)(4) (and § 1.404A–6(c)(2)(ii), if applicable, in the case of a termination). If no adjustments are necessary, the amended return required by paragraph (c)(2) of this section must contain a statement to that effect.

(4) *Revocation after initial election and re-election permitted.* Any taxpayer that makes an initial election for any plan under paragraph (c)(2) of this section may, under the rules of that paragraph, revoke the election for any taxable year after the sixth consecutive taxable year for which the election is effective, and may re-elect for any taxable year after the sixth consecutive taxable year for which the election is not in effect (regardless of whether the election is not in effect due to revocation or termination of the election as defined in § 1.404A–6(c)(1)). The consecutive changes in method of accounting described in the first sentence of this paragraph (c)(3) must be made under the rules in § 1.404A–6 regarding the section 481(a) adjustment period. The Commissioner may approve a letter ruling request (see § 601.201 of this chapter) to shorten the six-year waiting period upon a showing of extraordinary circumstances.

(5) *Examples.* The principles of paragraphs (b) and (c) of this section are illustrated by the following examples:

Example 1. P, a domestic corporation, wholly owns two foreign subsidiaries, *S* and *T*. *S* and *T* maintain their books and records in FC, the local currency. Since 1978, *S* and *T* have maintained unfunded pension plans for their respective employees. *S* maintained two plans, Plan 1 and Plan 2, and *T* maintained one plan. The plan years and the taxable years of all three corporations are the calendar year.

(i) For 1978 and 1979, *P* reduced the earnings and profits of *S* and *T* by the amount of the pension liability that had accrued under the plans as follows—

Taxable year	S's plan 1	S's plan 2	T's plan
1978	FC30,000	FC5,000	FC70,000
1979	50,000	15,000	80,000
Total reduction in earnings and profits	FC80,000	FC20,000	FC150,000
Total reduction in earnings and profits:			
S	FC100,000		
T	FC150,000		

(ii) In 1981, *P* made a retroactive effective date election pursuant to section 2(e)(2) of Public Law 96–603 and paragraph (b) of this section for taxable years beginning after December 31, 1977, and ending before January 1, 1980, *P*'s open period. Thus, with respect to its open period, *P* has made section 404A the operative law for all distributions of earnings and profits (or accumulated profits) earned after December 31, 1970 for *S* and *T*. The consequences of making or not making the retroactive plan-by-plan election under section 404A for each foreign plan will be determined as though section 404A had been in effect for those years. Accordingly, earnings and profits of *S* and *T* may not be reduced with respect to amounts accrued under their respective plans unless the plans met the requirements of § 1.404A–1(a) for those years in the open period.

(iii) *P* made a retroactive plan-by-plan election to treat *S*'s Plan 1 as a qualified reserve plan for *P*'s retroactive period. The amount taken into account under § 1.404A–3 for *S*'s Plan 1 calculated under section 404A was FC25,000 for 1978 and FC35,000 for 1979. No election under section 404A was made for *S*'s Plan 2 or for *T*'s plan. Thus, no amount of the accrued but unpaid pension liability attributable to *S*'s Plan 2 or to *T*'s plan may reduce *S*'s or *T*'s respective 1978 and 1979 earnings and profits. *P* amended its tax returns for 1978 and 1979 to reflect the correct reduction of earnings and profits of FC25,000 and FC35,000 with respect to *S*'s Plan 1 and no reduction for those years with respect to *S*'s Plan 2 or *T*'s plan. Since *S*'s and *T*'s plans were established during the open period, no section 481(a) adjustment is required.

Example 2. Q, a domestic corporation, has wholly owned *R*, a foreign subsidiary, since *R*'s formation in 1968. *R* maintains its books and records in FC, the local currency. Since 1968, *R* maintained an unfunded pension plan for its employees. The plan year and the taxable year of both corporations is the calendar year. *R*, since 1968, used a method of accounting under which it reduced earnings and profits by its accrued pension liability.

(i) *R*'s earnings and profits were earned and distributed to *Q* as follows—

Taxable year	Earnings and profits	Distribution of earnings and profits
1968	FC10,000	
1969	20,000	
1970	20,000	
Subtotal	50,000	
1971	30,000	
1972	30,000	
1973	30,000	
1974	30,000	
1975	30,000	FC200,000
Subtotal	150,000	
1976	40,000	
1977	40,000	
1978	40,000	
1979	40,000	
1980	40,000	
1981	50,000	
Subtotal	250,000	
Total	FC450,000	

(ii) In 1981, *Q* made a retroactive effective date election pursuant to section 2(e)(2) of Public Law 96–603 and paragraph (b)(1) of this section for its open period. As of December 31, 1980, *Q*'s open period included the taxable years 1975 through 1979. Thus, with respect to those taxable years, *Q* has made section 404A the operative law for *R*. The consequences of making or not making the retroactive plan-by-plan election under section 404A for *R*'s foreign plan will be determined as though section 404A had been in effect for those taxable years. Thus, the earnings and profits of *R* may not be reduced with respect to amounts accrued under *R*'s plan, unless the plan met the requirements of § 1.404A–1(a) for those taxable years.

(iii) *Q* made a retroactive plan-by-plan election to treat *R*'s plan as a qualified reserve plan effective beginning in 1971. Of the distribution of FC200,000 to *Q* in 1975, section 404A applies to FC150,000, because these accumulated profits (or earnings and profits) were earned in taxable years beginning after December 31, 1970 and were also distributed in 1975, within *Q*'s open period. However, section 404A does not apply to the FC50,000 distribution made from accumulated profits earned before December 31, 1970. Since *R*'s plan was established before *Q*'s open period, a section 481 (a) adjustment is required. This section 481(a) adjustment must be taken into account in determining earnings and profits beginning with the 1971 year of change.

(d) *Retroactive plan-by-plan qualified funded plan elections for certain plans of foreign branches*—(1) *In general.* Section 2(e)(3) of Public Law 96–603 permitted a taxpayer to make a qualified funded plan election retroactively for any plans maintained by a foreign branch that met the requirements of § 1.404A–1(a) (other than paragraph (4) thereof) for the relevant period. As a condition of making this election, a taxpayer is required to agree to the assessment of all deficiencies (including interest thereon) arising during those taxable years within the open period (even those taxable years that are not open years as defined in paragraph (g)(4) of this section) to the extent that the deficiencies arise from erroneous deductions claimed by the taxpayer with respect to all of the taxpayer's foreign branches that maintained a deferred compensation plan. For a taxpayer that agrees to the assessment of tax in an election under this paragraph (d), a change in method of accounting is necessary (and a section 481(a) adjustment is required in accordance with the provisions of § 1.404A–6) with respect to any erroneous deductions claimed by the taxpayer under its method of accounting in taxable years ending prior to the beginning of the open period. For such a change in method of accounting, the year of change is the first taxable year in the open period, and the method of accounting to which the taxpayer is required to change is the method permitted during the open period under this paragraph (d).

(2) *Amounts allowed as a deduction.* If an election under section 2(e)(3) of Public Law 96–603 was made under the rules of this paragraph (d), the aggregate of the taxpayer's prior deductions is allowed as a deduction ratably over a 15-year period, beginning with the taxpayer's first taxable year beginning after December 31, 1979. A fractional part of a year which is a taxable year (as defined in sections 441(b) and 7701(a)(23)) is a taxable year for purposes of the 15-year period.

(3) *Definitions*—(i) *Prior deduction*—(A) *In general.* The term "prior deduction" means a deduction with respect to a qualified funded plan (i.e., a plan that met the requirements of § 1.404A–1(a) for the relevant period, and with respect to which a qualified funded plan election was made under the rules of this paragraph (d)) maintained by a foreign branch of a taxpayer for a taxable year beginning before January 1, 1980—

(*1*) That the taxpayer claimed;

(*2*) That was not allowable under the law in effect prior to the enactment of section 404A;

(*3*) With respect to which, on December 1, 1980, the assessment of a deficiency was not barred by any law or rule of law; and

(*4*) That would have been allowable if section 404A applied to taxable years beginning before January 1, 1980.

(B) *Application of section 404A(d).* Because the prior deductions are limited by the amounts that may be taken into account under section 404A, the computation of those prior deductions for the relevant taxable years is subject to the limitations described in section 404A(d) and § 1.404A–4. However, once the aggregate of prior deductions is calculated, the aggregate, or any portion thereof permitted to be taken into account over the 15-year period of paragraph (d)(2) of this section, is not

VOL 58 ISS 87 MY 7 1993 UMI

subject to the limitations prescribed by section 404A(d) and § 1.404A–4.

(ii) *Erroneous deduction.* The term "erroneous deduction" means an amount that is not deductible under section 404(a) (including section 404(a)(5)), that was deducted on a taxpayer's income tax return with respect to a foreign deferred compensation plan.

(4) *Time and manner to make, perfect, or revoke election*—(i) *In general.* A plan-by-plan election described in paragraph (d)(1) of this section is not effective unless the election was actually made no later than the time prescribed by law for filing the United States return for the first taxable year ending on or after December 31, 1980, including extensions (whether or not the time was actually extended for filing the taxpayer's return), and unless the taxpayer perfects the election by filing a statement indicating the taxpayer's agreement to perfect the election with an amended return for the first taxable year ending on or after December 31, 1980, on or before May 9, 1994. In order to be effective, the perfection must be made in the manner provided in § 1.404A–6(b)(3) (ii) or (iii). An election that is not perfected is considered retroactively revoked. Any election under this paragraph (d) will continue in effect for taxable years beginning after the taxpayer's open period, unless revoked under paragraph (e) of this section or § 1.404A–6.

(ii) *Requirement to amend returns.* In addition to the amended return required by paragraph (d)(4)(i) of this section, the taxpayer must file any other amended United States returns that are necessary to conform the treatment of all items affected by the election or revocation to the treatment consistent with the election or revocation under this paragraph (d) within the time period described in paragraph (d)(4)(i) of this section. All amended returns must be accompanied by the statement described in paragraph (b)(3)(ii) of this section and all of the information required by § 1.404A–6(b)(4) (and § 1.404A–6(c)(2)(ii), if applicable, in the case of a termination). If no adjustments are necessary, the amended return required by paragraph (d)(4)(i) of this section must contain a statement to that effect.

(5) *Examples.* The principles of this paragraph (d) are illustrated by the following examples:

Example 1. (i) During its open taxable years 1977 through 1979, *X*, a domestic corporation, maintained a nonqualified funded plan for the employees of its foreign branch. In 1981, *X* made a retroactive effective date election and a retroactive plan-by-plan election to treat this plan as a qualified funded plan. The amounts deducted on *X*'s tax returns, the amount deductible under sections 404(a) and 404A (expressed in FC, the local currency) are as follows—

	1977	1978	1979	Total
Amount deducted on tax return	FC100	FC100	FC100	FC300
Amount deductible under section 404(a)	20	20	20	FC60
Amount deductible under section 404A	90	90	90	FC270

(ii) The assessment (including interest) for the open years 1977 through 1979 is based on adjustments to the erroneous deductions of FC240 (FC300 less FC60).

(iii) The amount of the prior deductions taken into account ratably over 15 years as provided in paragraph (d)(2) of this section, beginning in 1981, is a negative FC210 (FC60 less FC270).

(iv) No section 481(a) adjustment is required because *X* took no deductions with respect to the plan prior to the beginning of its open period.

Example 2. (i) *Z*, a domestic corporation, maintained a nonqualified funded foreign branch plan for its foreign employees, beginning in its 1965 (calendar) taxable year. In 1981, *Z* made a retroactive effective date election and a retroactive plan-by-plan election to treat this plan as a qualified funded plan. As of December 31, 1980, *Z*'s 1965 taxable year was closed, but its 1978 taxable year was open. The amounts deducted on *Z*'s tax returns, the amount deductible under sections 404(a) and 404A (expressed in FC, the local currency) are as follows—

	1965	1978	Total
Amount deducted on tax return.	FC20	FC80	FC100
Amount deductible under section 404(a).	5	6	FC11
Amount deductible under section 404A.	10	40	FC60

(ii) Under paragraph (d)(1) of this section, *Z* agreed to an assessment of deficiencies for its 1978 taxable year based on its FC74 (FC80–FC6) of erroneous deductions as defined in paragraph (d)(3)(ii) of this section.

(iii) The FC34 (FC40–FC6) of prior deductions is permitted to be taken into account as a deduction over the 15-year period beginning with its 1980 taxable year as provided in paragraph (d)(2) of this section.

(iv) Additionally, because *Z* took erroneous deductions under its method of accounting prior to the beginning of its open period, it is required to change to the method of accounting permitted during the open period, and must take a section 481(a) adjustment (determined under the snapshot method of § 1.404A–6(f)) into account over the 15-year section 481(a) adjustment period of § 1.404A–6(e)(2)(ii) beginning in its 1978 year of change. See paragraph (d)(1) of this section.

Example 3. A foreign branch which computes its income under the profit and loss method of Rev. Rul. 75–107, 1975–1 C.B. 32 (see § 601.601(d)(2)(ii)(b) of this chapter), in units of local currency, the FC, maintains a qualified funded plan. In 1980, the taxpayer was eligible to make the elections described in this section, and did so during the 1980 taxable year. The amount determined under paragraph (d)(3)(i) of this section after taking into account the limitations prescribed § 1.404A–4 (a) for the open period was FC1,500,000. For the 1980 taxable year, and as provided paragraph (d) of this section, FC100,000 of the prior deductions were deductible. The prior deductions allowed to be taken into account in the 1980 through 1994 taxable years are determined without regard to, and thus are not subject to, the limitations prescribed by § 1.404A–4 (a).

(e) *Special transition rules for election, revocation and re-election*—(1) *In general.* This paragraph (e) provides the time and manner for making and revoking qualified funded plan and qualified reserve plan elections for a taxpayer's transition period. A taxpayer may make an election, revoke an election, and re-elect to treat any plan that met the requirements of § 1.404A–1(a) (other than paragraph (4) thereof) for the relevant period as a qualified funded plan or a qualified reserve plan under this paragraph (e) for the transition period without regard to whether a retroactive election is made under paragraph (b), (c), or (d) of this section. However, an election made under paragraph (c) or (d) of this section is deemed to continue in effect for taxable years beginning after December 31, 1979, unless revoked under paragraph (c) (4) of this section or this paragraph (e) or terminated or revoked under § 1.404A–6(f). See paragraphs (c)(2) and (d)(4)(i) of this section.

(2) *Time and manner initially to elect and revoke*—(i) *In general.* Taxpayers that wish to make an election under this paragraph (e) may have, but were not required to have, made a Method (1) or Method (2) election for the taxable year for which an election is made under this paragraph. Those taxpayers that wish to make (or perfect) an election under this paragraph (e) must attach a statement to that effect on an amended return for the year the election is to be effective on or before May 9, 1994. An election previously made that is not perfected is considered retroactively revoked.

(ii) *Requirement to amend returns.* In addition to the amended return required by paragraph (e)(2)(i) of this section, the taxpayer must file any other amended United States returns that are necessary to conform the treatment of all items affected by the election or revocation to the treatment consistent with the election or revocation under this paragraph (e) within the time period described in paragraph (e)(2)(i) of this section. All amended returns must be accompanied by the statement described in paragraph (b)(3)(ii) of this section (substituting "made, perfected, or revoked" for "perfected or revoked" where applicable) and all of the information required by § 1.404A–6(b)(4) (and § 1.404A–6(c)(2)(ii), if applicable, in the case of a termination). If no adjustments are necessary, the amended return required by paragraph (e)(2)(i) of this section must contain a statement to that effect.

(3) *Revocation after initial election and re-election permitted.* Any taxpayer that makes an initial election for any plan under paragraph (e)(2) of this section may, under the rules of that paragraph, revoke the election for any taxable year after the sixth consecutive taxable year for which the election is effective, and may re-elect for any taxable year after the sixth consecutive taxable year for which the election is not in effect (whether the election is not in effect due to either revocation or termination of the election as defined in § 1.404A–6(c)(1)). The consecutive changes in method of accounting described in the first sentence of this paragraph (e)(3) must be made under the rules in § 1.404A–6 regarding the section 481(a) adjustment period. The Commissioner may approve a letter ruling request to shorten the six-year waiting period upon a showing of extraordinary circumstances.

(4) Example. The principles of paragraph (e)(3) of this section are illustrated by the following example:

Example. (i) *L*, a domestic corporation, has wholly owned foreign subsidiary *M*, since *M*'s formation in 1971. M maintained a funded plan for its employees from 1971 through 1991. The taxable year of *L* and *M* is the calendar year. In 1981, *L* made a Method (2) election. Within 365 days after the publication of the final regulations in the **Federal Register**, *L* perfected its retroactive effective date election for all its foreign subsidiaries. *L*'s election terminated in 1975 due to its plan's violation of the requirements of section 404A(e)(2). Additionally, *L* perfected, revoked and re-elected on a plan-by-plan basis its election for *M*'s plan, as follows—

Plan-by-plan election effective	Plan-by-plan election terminated or revoked
1971–1974	1975–1981
1982–1987	1988–1993

(ii) A section 481(a) adjustment is required for the years of change 1975, 1982 and 1988.

(f) *Special data rules for retroactive elections*—(1) *Retroactive calculation of section 481 (a) adjustments*—(i) *General rule.* Retroactive elections may be made only if the taxpayer calculates the section 481 (a) adjustment required by § 1.404A–6 based on substantiation quality data. Substantiation quality data generally must be current as of the date of the change in method of accounting. Nevertheless, if contemporaneous substantiation quality data is not readily available, the taxpayer may calculate the section 481 (a) adjustment based on backward projections to earlier years from the first taxable year beginning before January 1, 1980, for which sufficient contemporaneous substantiation quality data is readily available. However, such projections must satisfy the substantiation requirements in paragraph (f) (1) (ii) of this section, however. Furthermore, the taxpayer may not use any of the approaches provided for under this paragraph (f) if circumstances indicate that the overall result is a material distortion of the amounts allowable.

(ii) *Substantiation requirement for retroactive reserves*—(A) *In general.* Although reasonable actuarial estimates and projections may be used, the calculation of the opening balance of the reserve for the first year for which a qualified reserve plan election under paragraph (c) (1) of this section is effective must nonetheless be based on some actual contemporaneous evidence. Thus, the opening balance may be based on actual aggregate covered payroll, the actual number of covered employees, or a contemporaneous actuarial valuation that used reasonable actuarial methods. For example, if the taxpayer has contemporaneous records of the number of covered employees and the aggregate covered payroll, it may estimate other actuarial information, such as average age and marital status, based on reasonable actuarial methods (e.g., using substantiation quality data as of another date and adjusting for actual or expected changes for the interim years). The resulting combination of actual contemporaneous evidence and reasonably estimated data may be used to calculate the opening reserve. If a contemporaneous actuarial valuation is used as the basis of an opening reserve, the results of the valuation must be adjusted to reflect any difference between the actuarial method used in that actuarial valuation and the unit credit method, as required by section 404A (c) and § 1.404A–3 (b).

(B) *Interpolation.* In cases where an taxpayer can meet the substantiation requirement of paragraph (f)(1)(ii)(A) of this section for some years, but cannot meet that requirement in intervening years (including the year of the change in method of accounting), the taxpayer may interpolate a reserve balance for the intervening years based on reasonable actuarial methods. In the absence of evidence to the contrary, it is assumed that a pro rata allocation of amounts to those intervening years is a reasonable actuarial method. This paragraph (f)(1)(ii)(B) does not authorize any interpolation for years in which other evidence indicates that it would cause a material distortion (such as a year during which the work force was on strike and no deferred compensation benefits were accrued). In addition, this paragraph (f)(1)(ii)(B) does not authorize extrapolation of reserve balances to years that are not intervening years between years that meet the substantiation requirements of paragraph (f)(1)(ii)(A) of this section.

(C) *Extrapolation.* If the first year for which the taxpayer is able to meet the substantiation requirements of paragraph (f)(1)(ii)(A) of this section ("the substantiation year") is later than the year of the change in method of accounting, a taxpayer may use the approach described in this paragraph (f)(1)(ii)(C) to determine the section 481(a) adjustments described in § 1.404A–6(f) in years prior to the substantiation year. Under this approach, the taxpayer's closing balance under its prior method as of the date of the change in the method of accounting is compared with the opening balance

VOL 58 ISS 87 MY 7 1993 UMI

in the substantiation year. If the closing balance exceeds the opening balance, the excess is the amount to be used in calculating the adjustment under section 481, as required by § 1.404A–6. However, if the closing balance of the taxpayer's reserve under its method used for years prior to the election under section 404A is less than the opening balance for the substantiation year, the opening balance as of the date of the change in method in accounting is assumed to be equal to the closing balance. Thus, if the closing balance is less than the opening balance for the substantiation year, there is no adjustment under section 481. In such a case, the difference between the opening balance as of the date of the change in method of accounting and the opening balance for the substantiation year is allocated to the years prior to the substantiation year based on reasonable actuarial methods using all available information.

(2) *Determination of reasonable addition to a reserve in interim years.* In the case of a qualified reserve plan that is using the interpolation option of paragraph (f)(1)(ii)(B) of this section or that is described in the last sentence in paragraph (f)(1)(ii)(C) of this section, none of the increase in the reserve in the intervening year is considered a reasonable addition to the reserve under § 1.404A–3(b). Thus, the entire amount of the increase must be considered an amount to be amortized over ten years under § 1.404A–3(c).

(3) *Protective elections.* For those taxpayers that relied on the prior position of the Internal Revenue Service by making a Method (1) election under which the section 481(a) adjustment was computed in a manner inconsistent with this section or by making a Method (2) election under which no section 481(a) adjustment was reflected in the original return, appropriate adjustments required by section 404A and its underlying regulations must be made on an amended return filed no later than May 9, 1994, for the first year the election is effective and for all subsequent affected years for which a return has been filed. If no adjustments are necessary, an amended return should be filed for the first year stating that no adjustments are necessary.

(g) *Definitions and special rules*—(1) *Method (1) election.* The term "Method (1) election" means an election that was made under Method (1) (as defined in Ann. 81–114, 1981–28 I.R.B. 21) (see § 601.601(d)(2)(ii)(*b*) of this chapter) by claiming the deduction or credit allowable under section 404A on the taxpayer's income tax return for the first taxable year ending on or after December 31, 1980, including extensions (or an amended return filed no later than the end of the extended time period prescribed in section 6081, whether or not such time was actually extended for filing the taxpayer's return).

(2) *Protective or Method (2) election.* The term "protective election" or "Method (2) election" means an election that was made under Method (2) (as defined in Ann. 81–114, 1981–28 I.R.B. 21) (see § 601.601(d)(2)(ii)(*b*) of this chapter) without claiming deductions attributable to a qualified foreign plan on the taxpayer's income tax return (or, in the case of foreign subsidiaries, without taking into account reductions of earnings and profits).

(3) *Open years of the taxpayer.* The term "open years of the taxpayer" means open taxable years beginning after December 31, 1971, and for which, on December 31, 1980, the making of a refund, or the assessment of a deficiency, was not barred by any law or rule of law.

(4) *Retroactive period.* The term "retroactive period" means a taxpayer's taxable years (whether or not the making of a refund, or the assessment of a deficiency, was barred by any law or rule of law for any taxable year) in the following range—

(i) Any taxable year selected by the taxpayer between taxable years beginning after December 31, 1970 and before January 1, 1980 (the beginning taxable year); and

(ii) The last taxable year beginning before January 1, 1980 (the ending taxable year).

(5) *Transition period.* The term "transition period" means taxable years beginning after December 31, 1979, and before May 7, 1993.

(6) *Open period.* For purposes of this section, the term "open period" means, with respect to any taxpayer, all taxable years beginning after December 31, 1971, and beginning before January 1, 1980, and for which, on December 31, 1980, the making of a refund, or the assessment of a deficiency, was not barred by any law or rule of law.

Michael P. Dolan,

Acting Commissioner of Internal Revenue.

BILLING CODE 4830–01–U

26 CFR Part 1

[EE–14–81]

RIN 1545–AD81

Deductions and Reductions in Earnings and Profits (or Accumulated Profits) With Respect to Certain Foreign Deferred Compensation Plans Maintained by Certain Foreign Deferred Compensation Plans Maintained by Certain Foreign Corporations or by Foreign Branches of Domestic Corporation; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document contains notice of a public hearing on proposed regulations relating to the limitations on deductions and adjustments to earnings and profits (or accumulated profits) with respect to certain foreign deferred compensation plans.

DATES: The public hearing will be held on Tuesday, October 5, 1993, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Tuesday, September 14, 1993.

ADDRESSES: The public hearing will be held in room 2615, Second Floor, 2600 Corridor, Internal Revenue Service Building, 1111 Constitution Avenue NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R, (EE–14–81), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Carol Savage of the Regulations Unit, Assistant Chief Counsel (Corporate), (202) 622–8452 (202) 622–7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 404A of the Internal Revenue Code. The proposed regulations appear elsewhere in this issue of the **Federal Register**.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Tuesday, September 14, 1993, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be permitted beyond the lobby of the Internal Revenue Service Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

BILLING CODE 4830–01–P

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 201

[Docket No. RM 93–2]

Digital Recording Devices and Media; Auditing of, and Confidential Access to, Statements of Account

AGENCY: Copyright Office, Library of Congress.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document is issued to advise the public that the U.S. Copyright Office in the Library of Congress is proposing regulations to implement portions of the Audio Home Recording Act of 1992. Section 1003 of title 17 of the United States Code imposes an obligation to make royalty payments on persons who import and distribute in the United States, or manufacture and distribute in the United States, any digital audio recording device or digital audio recording medium. In addition to remitting the royalties to the Copyright Office, the importer or manufacturer must file Statements of Account with the Copyright Office. Section 1003 also provides that the Register of Copyrights shall issue regulations to provide for the verification and audit of such statements and to protect the confidentiality of information contained in such statements. The effect of this proposed regulation is to provide for the access to and confidentiality of such statements. The Copyright Office also solicits comments about the form and content of regulations governing verification and audit of Statements of Account.

DATES: Public comments on the proposed regulation should be received on or before July 6, 1993. Reply comments should be received on or before August 5, 1993.

ADDRESSES: Ten copies of written comments should be addressed, if sent by mail to: Library of Congress, Department 100, Washington, DC 20540. If delivered by hand, copies should be brought to: Office of the Copyright General Counsel, James Madison Memorial Building, room 407, First and Independence Avenue, SE., Washington, DC 20559.

FOR FURTHER INFORMATION CONTACT: Dorothy Schrader, General Counsel, Copyright Office Library of Congress, Washington, DC 20540. Telephone (202) 707–8380.

SUPPLEMENTARY INFORMATION:

1. Background

Effective October 28, 1992, the Audio Home Recording Act (AHRA), Public Law 102–563, 106 Stat. 4237, created new statutory obligations in a new Chapter 10 of title 17 U.S.C. The AHRA provides solutions to the policy problems presented by consumer products that make nearly perfect copies of digital sound recordings. It (1) provides consumers an exemption for private noncommercial home recording of analog or digital sound recordings, (2) mandates that digital audio recorders restrict serial copying by technological means, and (3) requires that manufacturers and importers of digital audio recorders and media must file an initial notice of distribution, file statements of account, and pay royalties upon distribution in the United States of digital audio recording devices and media. The AHRA also directs the Register to issue regulations to provide for the verification and audit of such Statements of Account and to protect the confidentiality of the information contained in such statements and to provide for the disclosure, in confidence, of such statements to interested copyright parties.

In separate proceedings, the Copyright Office issued interim regulations governing the filing of notices of initial distribution (RM 92–6) 57 FR 55464 (November 25, 1992) and to establish requirements governing the filing dates, frequency of filing, and content of the Statements of Account that must be filed by persons exerciaing the statutory license (RM 92–8) 58 FR 9544 (February 22, 1993). In this proceeding the Office is taking a third step to implement the AHRA, by proposing rules for the disclosure and confidentiality of information contained in Statements of Account, and by soliciting public comment regarding the form and content of regulations governing verification and audit of Statements of Account.

Section 1003(c)(2) of the Audio Home Recording Act of 1992 provides in part, that the Register shall issue regulations to provide for the verification and audit of statements of account and to protect the confidentiality of the information contained in such statements. Such regulations shall provide for the disclosure, in confidence, of such statements to interested copyright parties.

Section 1001(7) defines an "interested copyright party" and creates four categories of persons or entities who may be given access to AHRA Statements of Account. The first category is the owner of the exclusive right under section 106(1) of title 17 to reproduce a sound recording of a musical work that has been embodied in a digital musical recording or analog musical recording lawfully made under title 17 that has been distributed.

The second category is the legal or beneficial owner of, or the person that controls, the right to reproduce in a digital musical recording or analog musical recording a musical work that has been embodied in a digital musical recording or analog musical recording lawfully made under title 17 that has been distributed.

The third category is a featured recording artist who performs on a sound recording that has been distributed.

The fourth category is any association or other organization which either represents persons specified in the first three categories, or is engaged in licensing rights in musical works to music users on behalf of writers and publishers.

2. Proposed Access Regulations

The general public is denied access to Copyright Office files of Statements of Account for Digital Audio Recording Products. Access will be granted to interested copyright parties and their duly authorized legal representatives in accordance with these regulations. Only those interested copyright parties named in section 1001(7) of title 17 U.S.C. shall have access to such information. They shall be required to sign a certification to limit the use of the information to verification functions under section 1003(c)(2) and any enforcement actions that may result from such verification procedures.

VOL
58
ISS
87
MY
7
19 93
UMI

Importers and manufacturers will have access to their own Statements of Accounts.

Employers of the Copyright Office and the Copyright Royalty Tribunal who require statement of account information in the performance of their duties will also have access to such information.

The Office will provide a DART Statement of Account Access Form, which must be used by interested copyright parties, importers, or manufacturers for access to the statements. The completed form will contain certification of the identity of the requestor and the prospective use of the information. The Office provides the forms free of charge.

The Office will charge a fee of $10 to make a coy of a statement plus the statutory fee of $8 if the copy is to be certified, and $0.50 for each page of any other material in the statement file.

3. Verification and Audit

Pursuant to section 1003(c)(2) of title 17 United States Code, the Register of Copyrights shall issue regulations to provide for the verification and audit of AHRA Statements of Account. Although the AHRA does not explicitly state who shall verify and audit, the Copyright Office assumes the interested copyright parties as defined in section 1001(7) are entitled to verify and audit the Statements of Account. Presumably, one or more interested copyrights parties will select an independent certified public accountant to conduct the audit and verify the accuracy of the information disclosed in the quarterly and annual Statements of Account filed by manufacturers and importers with the Copyright Office.

The Senate version of the bill (S. 1623, 102d Congress, First Session) later enacted as the Audio Home Recording Act of 1992 contained detailed provisions regarding verification and audit which were dropped from the bill as passed. The Copyright Office generally understands that the Congress eliminated these detailed provisions in the interest of shortening the bill and in order to provide regulatory flexibility. The Office assumes that Congress did not intend to disapprove of S. 1623's detailed verification and audit provisions. Accordingly, the Copyright Office is inclined to adopt the relevant provisions of S. 1623 and the accompanying explanation in Senate Report 102–294, 102d Congress, 2d Session 55–57 (1992) as the framework for the regulations governing verification and audit of AHRA Statements of Account.

The Copyright Office is not proposing the details of a verification and audit regulation at this time. By this Notice, however, we solicit public comments and detailed proposals for the form and content of a verification and audit regulation.

In addition to general comment and detailed proposals, the Office solicits public comment on the following specific questions.

1. Does the Copyright Office have authority to prescribe regulations authorizing the audit of business records held by manufacturers and importers? If yes, how should that authority be exercised? Should the Office simply require that the business records be maintained for a certain period of years and be made available as specified in regulations to interested copyright parties?

2. Should the Copyright Office specify that "generally accepted audit standards" shall mean the auditing standards applied by the American Institute of Certified Public Accountants?

3. What is the extent of the Register's duty to determine the independence of an auditor? How can the Register's responsibilities be carried out?

4. How long should the Copyright Office retain the results of a verification audit?

5. What is a reasonable period to notify manufacturers and importers of an impending audit? To whom should the notice be given? What is a reasonable period of time for conducting the audit?

6. What is the Copyright Office's role in case of disputes among the parties regarding the conduct of an audit? For example, if an audit discloses that additional royalties are owed, should the Office take affirmative action to collect the royalties due, or will the interested copyright party or parties alone bear that responsibility?

7. Should the Copyright Office require the filing of "working papers" along with the results of a verification audit?

8. Should the scope of the audit be limited? If so, what limitations would be appropriate.

9. Who should bear the cost of a verification audit? Should the regulations allocate the costs on the same basis as originally proposed in S. 1623? If not, why not; what alternate solution should be adopted?

10. Should the audit be conducted no more than once a calendar or fiscal year, in accordance with the manufacturing party's basis of filing? Should the audit be conducted less frequently than on an annual basis? If so, how frequently should audits be conducted?

With respect to the Regulatory Flexibility Act, the Copyright Office takes the position that this Act does not apply to Copyright Office rulemaking. The Copyright Office is a department of the Library of Congress and is part of the legislative branch. Neither the Library of Congress nor the Copyright Office is an "agency" within the meaning of the Administrative Procedure Act of June 11, 1946, as amended (title 5, chapter 5 of the U.S. Code, subchapter II and chapter 7). The Regulatory Flexibility Act consequently does not apply to the Copyright Office since the Act affects only those entities of the Federal Government that are agencies as defined in the Administrative Procedure Act.[1]

Alternatively, if it is later determined by a court of competent jurisdiction that the Copyright Office is an "agency" subject to the Regulatory Flexibility Act, the Register of Copyrights has determined and hereby certifies that this regulation will have no significant impact on small businesses.

List of Subjects in 37 CFR Part 201

Copyright; Digital audio recording products.

Proposed Regulation

In consideration of the foregoing, the Copyright Office proposes to amend part 201 of 37 CFR chapter II in the manner set forth below.

PART 201—[AMENDED]

1. The authority citation of part 201 would be revised to read as follows:
